Eval Notes:	FISHER PRINTING INC 2257 N PACIFIC ST ORANGE 92865 On site for an above ground petroleum storage tank (APST) inspection. Bob Glines, maintenance manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). The facility reported via CERS that there is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. The hazardous material inventory forms reported 1,490 gallons in qualified on site storage. Inventory disclosed Blanket wash, vactra oil and oily water stored on site in 55 gallon or larger containers. The facility had a Spill Control and Countermeasure (SPCC) plan. The plan was on site and available for review.

Eval Notes:	On site for a routine hazardous waste inspection. Bob Glines, director of operations, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. We reviewed the required identifying information to be marked on containers storing hazardous waste. The signed off manifests and receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the

Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The facility is also recycling waste ink. Various colors of ink are consolidated in 55 gallon drums, which are then picked up by Caneda America and shipped to a manufacturing facility in Canada. The ink is filtered and reused as an ingredient to make virgin black ink, which is then sold back to Fisher Printing. Containers were observed stored closed and properly labeled as Excluded Recyclable Material. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for [Truncated]

Eval Notes: On site to conduct a routine Hazardous Waste Recycler inspection. Met with Robert Glines, Maintenance Manager. Recycling activities were discussed and observed. Recyclable ink material of various colors is recovered from printing machines and collected in 55 gallon drums. Drums were observed properly labeled as Excluded Recyclable Material (ERM). ERM is picked up by Caneda America and shipped to an ink manufacturing in Canada, from which the facility purchases product ink. The ERM is recycled and used as an ingredient to make virgin black ink, which is then sold back to Fisher Printing. Bills of lading were available for review. Emergency contingency plan was available for review. The facility has not submitted an Excluded Recyclable Materials report to California Environmental Reporting System (CERS). Within 30 days please complete the ERM report and submit it to CERS. This inspection report was sent to bobg@fisherprinting.com.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-01-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Spoke to Jason Voss of OC Sandbagger on the phone. He was away from the office. Consent was provided over the phone to enter and conduct inspection activities. Hazardous waste observed onsite included a 500 gallon aboveground waste oil tank. The tank was labeled however the container was stored open (See violation I617 above). Waste manifests were unavailable for review (see violation I474 above). EPA ID # CAL000218391 is inactive (see violation I352 above). Your EPA ID # can be reactivated at http://www.dtsc.ca.gov/HazardousWaste/upload/GISS_FORM_1358.pdf. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping in the trash dumpster.

Eval Notes:	On site to conduct an Aboveground Petroleum Storage Tank reinspection. The facility was cited violation I031 on 11/1/18 for not having a Spill Prevention Control & Countermeasures (SPCC) Plan prepared or being implemented. This Agency had received a copy of the facility's SPCC Plan on 12/18/18, but corrections were required. Corrections have since been made and the facility's SPCC Plan is complete. Monthly inspections are being conducted and records were available for review. Violations I031 is corrected, no outstanding violations remain. This inspection report was sent to Jason Vos at jason@ocsandbagger.com.

WEST COAST EQUIPMENT INC (Continued) **S113120026**

Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous waste inspection. Rick Tankersley, welder, was present for the inspection and provided consent to inspect. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. We discussed maintaining containers storing waste oil closed, except when adding or removing waste, and marking the containers with the required identifying information. The receipts for the removal of the facility's hazardous waste were maintained on site and reviewed with Jason Vos via a phone follow up. A hazardous waste emergency response card was posted in the office. report PDF to jason@swentinc.com

Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine above ground petroleum storage tank (APST) inspection. Jason Vos, Sandwood Enterprises, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There was equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included tanks and an occasional drum. We reviewed the SPCC plan templates available on our website occupainfo.com for use. SPILL CONTROL: Secondary containment and spill response equipment was reviewed. INSPECTIONS: We discussed the required SPCC inspections and record keeping. EMPLOYEE TRAINING: Annual oil handling employee SPCC training was reportedly conducted. We recommend maintaining training records and having the records available for inspection. report PDF to Jason Vos
Eval Division:	Orange County Environmental Health
Eval Program:	APSA
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-01-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine Aboveground Petroleum Storage Tank (APST) inspection. The facility has the following aboveground petroleum storage capacity: - 1,000 gallon clear diesel tank - 500 gallon red dye diesel tank - 500 gallon used oil tank - 55 gallon drum hydraulic oil The APSTs on site have appropriate secondary containment measures. An SPCC (Spill Prevention Control & Countermeasures) Plan has not been prepared and implemented. The facility was cited violation I085 on 8/10/16 for not having an SPCC Plan in place. This violation is being closed and recited. Discussed and provided the Tier I Qualified Facility SPCC Plan template with Jason Vos. Please note, because your facility is maintaining aboveground petroleum storage in quantities greater than 1,320 gallons, it is subject to the requirements of the Aboveground Petroleum Storage Act, and is required to implement an SPCC Plan. Please complete the SPCC Plan within 30 days and immediately begin [Truncated]

WEST COAST EQUIPMENT INC (Continued) **S113120026**

Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Walked throughout the facility and observed hazardous waste storage. Containers were observed properly labeled and stored closed. A 500 gallon used oil tank was observed with used oil in containment underneath it. Jason Vos stated he had moved the tank the tank recently and a valve had broke, which has been fixed, and that he would pump the used oil in containment back into the tank. Municipal trash were observed free of hazardous waste. Manifests and emergency response plan were available for review. The following violations were cited 12/1/16 and are now corrected: I474 - Failure to have hazardous waste manifests available for review; manifests were available for review during this inspection I617 - Failure to keep hazardous waste containers kept closed when not actively being poured into; hazardous waste containers were observed closed I352 - Failure to have an active EPA ID number; the facility an [Truncated]

Eval Notes:	On site for a routine above ground petroleum storage tank (APST) inspection. Garrett Pack, general manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included double walled tanks, single walled tanks, and 55 gallon drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 4-15-13. The plan was on site and available for review. SPILL CONTROL: Secondary containment was provided as described in the plan, except for the transmission fluid and hydraulic oil ASTs. INSPECTIONS: SPCC monthly inspections were reported conducted as described in the plan. We discussed the requirement to maintain [Truncated]

Eval Notes:	On site for a routine hazardous waste inspection. Gary Pack, general manager, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The signed off manifests and receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility had both a business emergency plan and a SPCC plan on site which contained spill response directions and emergency contact numbers. report PDF to gpack@the markco.com

Violation Date:	04-23-2014
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 06/25/2014. Three 55 gallon drums of hazardous waste caustic cleaner were observed stored adjacent to the cleaning tank line. The drums were not marked with their accumulation start dates. The cubic yard sack storing the hazardous waste used filters was also observed not marked with its accumulation start date. All drums storing hazardous waste must be marked with the required accumulation start dates. Labels were provided for use.

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 05/05/2014. Three 55 gallon drums of hazardous waste caustic cleaner were stored adjacent to the cleaning tank line. These drums were not marked with the required identifying information. Also, a cubic yard sack storing the hazardous waste used filters along with a drum storing hazardous waste polishing dust were observed not marked with their respective physical state and hazardous property. All drums storing hazardous waste must be marked with the required identifying information. Labels were provided for use.

Violation Date:	02-22-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Floor sweepings that included sandpaper and what appeared to be sanding/ polishing/grinding dust were observed in the dumpster. Per Mr. Estrada, grinding and polishing is done on brass objects. The generator must have knowledge that brass is made up of different metals including copper and zinc, both of which are regulated Title 22 metals. If you believe this is not the case, a hazardous waste determination must be made on the sweepings. If this is not completed, the sweepings are deemed to be hazardous waste and must be disposed as such.
Violation Division:	Orange County Environmental Health
Violation Program:	HW

Violation Date:	04-23-2014
Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes:	Returned to compliance on 06/25/2014. One 275 gallon tote of corrosive liquid waste, full and marked with an accumulation start date of 2/13, was observed on site during the facility's hazardous waste 6-26-13 inspection. This waste was subsequently removed under manifest on 2-13-14 and disposed of at TSDF in Santa Fe Springs California. The facility had accumulated and stored the hazardous waste on site greater than the approved accumulation time. A cubic yard sack storing an accumulation of used plating filters was observed on site this date. Its accumulation start date was not marked. A 55 gallon drum storing an accumulation of polishing dust waste was also observed on site this date. The drum was marked with an accumulation start date of 5/13. An additional estimated 10 pounds of polishing dust waste was scattered on the polishing room floor, which was in use during the

MAGMA FINISHING CORP (Continued) **S113178162**

inspection. Note: the owner advised me that the facility's hazardous powder coating waste is mixed in with the hazardous polishing [Truncated]

Eval Type: Other, not routine, done by local agency
Eval Notes: On site to review the 4-23-14 inspection report with Francisco Estrada, president. Inspection disclosed the correction of violations (W013, W016). Containers storing hazardous waste were closed and marked with the required information. Note: the cubic yard sack remained unmarked with its start accumulation storage date since that date was unknown. The president informed me that he is arranging to have all accumulated hazardous waste removed by a registered hauler

MAGMA FINISHING CORP (Continued) **S113178162**

within the next several weeks. I requested that copies of the removal documents be provided to this Agency to address the open violation. Also, he informed me that he had collected the scattered hazardous waste polishing dust from the polishing room for storage within a closed and labeled drum. The polishing room was in use at the time of inspection. The room was observed having been cleaned. The storage drum was observed. He reported that he had collected debris and dust from the floor of the outside dumpster [Truncated]

Eval Notes:	I called Sophia and messaged that accumulation storage times for HW is firm. The violation stays open until corrected. I offered my phone number to call if she wants to discuss. I will be conducting the reinspection. From: Dong, Alvin Sent: Monday, July 29, 2013 9:37 AM To: Krall, Joyce Cc: Carrier, Terry Subject: magma Hi Joyce, Sophia from Magma called and is asking to extend her time to dispose her hazardous waste until maybe September. Please call her 714 685 0179 Thanks, Alvin Dong Hazardous Waste Specialist Environmental Health Division 714 640 9358 voice 714 754 1768 fax

Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Walked throughout facility and observed processes and hazardous waste storage. The facility conducts plating, polishing and sandblasting, and powder coating. Plating lines consist of caustic, copper, and nickel sulfate, which each have additional dragout and rinse tanks. Francisco stated as solutions lose grade they are transitioned into the sequential dragout/rinse tanks. Solutions are topped off as needed. Containment underneath the plating line was observed dry. A 55 gallon drum of acid is used for stripping solution and is changed out approximately once per year. The facility has a room for polishing and grinding of steel and brass parts. A 55 gallon drum was observed for storage of dust floor sweepings and is hauled with plating filters. Sand blasting media was tested 10/2008 and is non hazardous, processes have not changed. Francisco stated the facility does not powdercoat regularly and has not yet had [Truncated]

Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Met with President Francisco Estrada of Magma Finishing Corp. Consent was provided to enter and conduct inspection activities and to collect photos as needed. Hazardous waste observed onsite included: - (1) 275 gallon tote containing acidic waste liquid. The container was labeled properly and stored closed. - (1) poly drum containing in-line rinse filters and sanding/grinding dust. The container was open and was not labeled (See violations I617 and I400, respectively). - (1) large plastic bag used to store in-line filters and sanding/grinding dust. This container was not labeled (see violation I400 below). Hazardous waste manifests were available for review. The facilities dumpster bin was inspected. Floor sweepings including used sand paper and sanding/grinding dust was observed in the dumpster. Mr. Estrada stated that sanding and grinding is done on brass metal. Brass is composed of copper and Zinc [Truncated]

Eval Notes:	On site for a routine hazardous waste inspection. Francisco Estrada, president, was present for the inspection and provided consent to inspect and take regulatory photos if needed. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its shared dumpster area. We discussed the handling of the facilityG s hazardous waste polishing room dust. The room was in use. Dust was observed both scattered and piled on the floor. Dust was adhered to the walls. A

MAGMA FINISHING CORP (Continued) **S113178162**

common trash can was located within the room. It was dusted. I reminded the owner that the release of hazardous waste into the environment must be prevented. He advised me that the room was maintained daily to properly manage the hazardous waste. We discussed the observation on the 6-14-12 inspection report of an on site G drum of sulfuric acid labeled as hazardous waste dated 1/14/12G . There was no storage container of waste sulfuric on [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site ID: 411666
Site Name: LEONARD CHAIDEZ TREE SERVICE
Violation Date: 06-21-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 07/03/2017. The containers storing the drained used oil filters, waste antifreeze, and used oil all do not have the start accumulation date written on the hazardous waste label. The waste antifreeze and used oil labels are faded and not legible. All hazardous waste containers must be labeled with the following information: generatorG s name and address, accumulation start date, content, physical state, and hazardous properties. Please correct the violation and submit the certification of compliance to this Agency within 30 days of receiving this report.

Eval Date: 06-21-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENT: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Debi Foushee, Office Manager, and Marina Orellana, Admin. Walked throughout the facility. Observed hazardous waste storage areas. The containers storing the drained used oil filters, waste antifreeze, and used oil all do not have the start accumulation date written on the hazardous waste label. The waste antifreeze and used oil labels are faded and not legible. Discussed hazardous labeling requirements with Ms. Orellana and Ms. Foushee. New hazardous waste stickers were provided

LEONARD CHAIDEZ TREE SERVICE (Continued) **S113121513**

to the facility. The used oil secondary containment contains approximately 5 gallons of used oil. Discussed proper hazardous waste containment with Ms. Orellana and Ms. Foushee. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted in the office. No hazardous waste was observed in the trash bins [Truncated]

Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-24-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Juan Lopez, Mechanic and Debi Foushee, Office Manager. The facility is a Small Quantity Generator of automotive repair wastes generated from maintenance of landscaping machinery. Walked throughout the facility and observed the facilityG s Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked. Municipal trash cans were observed and there are no signs of illegal disposal. The facility's municipal trash dumpster was not observed this date. Hazardous waste manifests were available for review. The facilityG s EPA ID number is active. Emergency plan is maintained in the office, spill response notification was discussed. No hazardous waste violations were observed this date. This inspection report was sent to Lchaidez@earthlink.net.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 08-23-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: steph called regarding the APST bill. She said that they had removed the APST years ago. History check showed no record of any inspection. I informed her that I would inspect next week to confirm.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002
Waste Description:	CORROSIVE WASTE
Waste Code:	D004
Waste Description:	ARSENIC
Waste Code:	D005
Waste Description:	BARIUM
Waste Code:	D006
Waste Description:	CADMIUM
Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D008
Waste Description:	LEAD
Waste Code:	D011
Waste Description:	SILVER
Waste Code:	D033
Waste Description:	HEXACHLOROBUTADIENE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

SUMMIT INTERCONNECT INC., ORANGE DIVISION (Continued) **1000168729**

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F008
Waste Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Address:	230 W BRISTOL LN
City,State,Zip:	ORANGE, CA 92865
Site ID:	132752
CERS ID:	10657684
CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	132752
Site Name:	SUMMIT INTERCONNECT INC. ORANGE
Violation Date:	01-22-2019
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 03/01/2019. One cubic yard box of solid hazardous waste plating debris in the 90 day storage area was observed not covered. Please note containers containing solid hazardous waste must be covered when waste is not being added into the container. Obtain a cover for this container within 30 days.
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS

MARCEL ELECTRONICS (Continued) **S106835091**

Site ID:	132752
Site Name:	SUMMIT INTERCONNECT INC. ORANGE
Violation Date:	01-26-2017
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 01/26/2017. All containers storing hazardous waste must be kept closed at all times unless actively placing waste in the container. The 55-gallon drum storing hazardous waste was observed open. The drum was closed and this violation was abated on this date.
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS

Site ID:	132752
Site Name:	SUMMIT INTERCONNECT INC. ORANGE
Violation Date:	02-25-2014
Citation:	HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description:	Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 01/27/2015. The facility’s hazardous waste storage tanks were not current in the required PE certification. PE assessment of hazardous waste storage tank systems that references the standards listed in CCR title 22, 66265.192 is required. Obtain the required report and submit a copy to this Agency for our review.

MARCEL ELECTRONICS (Continued) **S106835091**

	15, Section(s) 66265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 05/26/2017. In various areas within secondary containment, hazardous waste accumulation was observed. Although Mr. Hernandez has indicated that secondary containment is cleaned on a daily basis, this is not happening due to the observation of copper crystallization within secondary containment. As part of your daily inspection checklist, this "housekeeping" must be conducted. A reinspection will be conducted to ensure that secondary containment is kept clean and without hazardous waste build-up.

MARCEL ELECTRONICS (Continued) **S106835091**

Chapter 15, Section(s) 66265.192(h)

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Notes: Returned to compliance on 01/27/2015. The facility's PBR tank systems, except for possibly Regen #1, #2, #3 as discussed below, were not current in the required PE certification. PE assessment of the hazardous waste treatment tank systems that references the standards listed in CCR title 22, 66265.192 is required. Obtain the required report and submit a copy to this Agency for our review.

Eval Notes:	Please be advised that this Agency has reviewed the Tiered Permitting Financial Assurance Self Certification submitted to CERS on 3/29/17. Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to initial closure cost, $5,816.91, submitted in 2016. The 2017 CCE should be, at a minimum, your 2016 CCE multiplied by an inflation factor of 1.013. Your 2016 CCE was submitted and approved at $5,869.26. Therefore, your minimum 2017 amount must be $5,869.26 x 1.013 = $5,945.56. Corrected Certification Of Financial Assurance Form and breakdown of costs must be submitted within 30 days of this inspection report.

Eval Notes:	On site for a hazardous waste re-cycler inspection. Ray Hernandez, environmental manager, was present for the inspection and provided consent to inspect and take regulatory related photos. The facility's router and drilling dust containing copper fines are handled as excluded recyclable material (ERM) and removed on bill of lading for off site recycling. The storage containers of the facilityG s ERM were inspected. The containers were marked with the required identifying information. The receipts for the removal of ERM for off site recycling were on site and available for inspection. The records for 2014 was reviewed. The facility had an emergency response plan and a disaster recovery plan. Written spill response directions and emergency contact numbers were provided for the employees. Eval Notes: Reviewed 2017 Financial Assurance documents submitted to CERS on 2/26/17. Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to initial closure cost, $5,816.91, submitted in 2016. The 2017 CCE should be, at a minimum, your 2016 CCE multiplied by an inflation factor of 1.013. Your 2016 CCE was submitted and approved at $5,869.26. Therefore, your minimum 2017 amount must be $5,869.26 x 1.013 = $5,945.56. Corrected Certification Of Financial Assurance Form and breakdown of costs must be submitted within 30 days of this inspection report.

CERS Description: Toxic Release Inventory

Violations:

Site ID: 132752
Site Name: SUMMIT INTERCONNECT INC. ORANGE
Violation Date: 01-22-2019
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 03/01/2019. One cubic yard box of solid hazardous waste plating debris in the 90 day storage area was observed not covered. Please note containers containing solid hazardous waste must be covered when waste is not being added into the container. Obtain a cover for this container within 30 days.

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 05/26/2017. In various areas within secondary containment, hazardous waste accumulation was observed. Although Mr. Hernandez has indicated that secondary containment is cleaned on a daily basis, this is not happening due to the observation of copper crystallization within secondary containment. As part of your daily inspection checklist, this "housekeeping" must be conducted. A reinspection will be conducted to ensure that secondary containment is kept clean and without hazardous waste build-up.

Eval Notes: Please be advised that this Agency has reviewed the Tiered Permitting Financial Assurance Self Certification submitted to CERS on 3/29/17. Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to initial closure cost, $5,816.91, submitted in 2016. The 2017 CCE should be, at a minimum, your 2016 CCE multiplied by an inflation factor of 1.013. Your 2016 CCE was submitted and approved at $5,869.26. Therefore, your minimum 2017 amount must be $5,869.26 x 1.013 = $5,945.56. Corrected Certification Of Financial Assurance Form and breakdown of costs must be submitted within 30 days of this inspection report.

Eval Notes: On site to conduct a Hazardous Waste Recycler inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility manufactures printed circuit boards. Throughout the facility there are 2 buildings where boards are drilled into, which generates fine hazardous copper routing dust. For both buildings the dust is captured through baghouse vacuum units and the dust is managed as Excluded Recyclable Material (ERM). Containers of the routing dust were observed stored closed, but not properly labeled. The ERM labels were missing the hazardous property of the dust (toxicity). The labeling was corrected during the inspection, violation corrected on site. Bills of lading for the removal of the ERM off site for recycling were available for review. The facilityG s contingency plan was available for review. Employee training records were available for review. This inspection report was sent to Ray Hernandez at ray.hernandez@summit-pcb.com.

Eval Notes:	On site for a hazardous waste re-cycler inspection. Ray Hernandez, environmental manager, was present for the inspection and provided consent to inspect and take regulatory related photos. The facility's router and drilling dust containing copper fines are handled as excluded recyclable material (ERM) and removed on bill of lading for off site recycling. The storage containers of the facilityG s ERM were inspected. The containers were marked with the required identifying information. The receipts for the removal of ERM for off site recycling were on site and available for inspection. The records for 2014 was reviewed. The facility had an emergency response plan and a disaster recovery plan. Written spill response directions and emergency contact numbers were provided for the employees. Eval Notes:	Reviewed 2017 Financial Assurance documents submitted to CERS on 2/26/17. Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to initial closure cost, $5,816.91, submitted in 2016. The 2017 CCE should be, at a minimum, your 2016 CCE multiplied by an inflation factor of 1.013. Your 2016 CCE was submitted and approved at $5,869.26. Therefore, your minimum 2017 amount must be $5,869.26 x 1.013 = $5,945.56. Corrected Certification Of Financial Assurance Form and breakdown of costs must be submitted within 30 days of this inspection report.

Violation Date:	09-22-2015
Citation:	HSC 6.5 25189.5(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a)
Violation Description:	Failure to properly dispose of hazardous waste at an authorized location.
Violation Notes:	Returned to compliance on 07/03/2017. A 5 gallon container of hazardous liquid waste (stain), was observed discarded within the shop's trash dumpster. Hazardous waste must be handled properly. The new owner removed the waste for proper recycling/disposal. Violation corrected.

Violation Date:	08-06-2019
Citation:	HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2
Violation Description:	Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.
Violation Notes:	Returned to compliance on 08/06/2019. OBSERVATION: Two hazardous waste consolidated manifests dated 10/25/17 and 4/19/19 were observed with an incorrect generator EPA ID number, CAL000105581. CORRECTIVE ACTION: Please ensure future manifests are properly completed and have the current ownership's EPA ID number, CAL000414538.

Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Met with Janet Zimmermann, Manager. The facility is a Small Quantity Generator of automotive repair wastes. Walked throughout the facility and observed the facilityG s Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. Two hazardous waste consolidated manifests dated 10/25/17 and 4/19/19 were observed with an incorrect generator EPA ID number, CAL000105581. Spoke with Janet about making sure the manifests are properly completed. Please ensure manifests have your current EPA ID number, CAL000414538. This violation is corrected on site. The facilityG s EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed [Truncated]

Eval Notes:	GORDONS AUTO WORKS 2221 N BATAVIA ST ORANGE 92865 On site for a change in business ownership hazardous waste inspection. Al Delalto, owner, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the outside lot. I did not observe hazardous waste in the facility’s trash or as run off on the ground. Oil soaked absorbents were observed on the ground. We discussed handling the oil soaked absorbents as hazardous waste. The storage of the shop’s hazardous waste was inspected. We discussed the required information to be marked on containers storing hazardous waste. Labels were provided for the drums. We discussed maintaining the drums storing hazardous waste closed when waste is not actively being added or removed. The records for the removal of the facility’s hazardous waste were on site and available for inspection. The records were reviewed. A [Truncated]

Violations:

Site ID:	415188
Site Name:	EPTECH
Violation Date:	10-13-2016
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to provide and maintain secondary containment for bulk storage tank installations (except for mobile refuelers and other non-transportation-related tank trucks) sufficient to hold the capacity of the largest container and sufficient freeboard for precipitation.
Violation Notes:	Returned to compliance on 12/03/2018. Based on your facility, appropriate secondary containment must be available. Please provide documentation showing that secondary containment/appropriate diversionary structures are in place.
Violation Division:	Orange County Environmental Health

Violation Date:	03-12-2015
Citation:	HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description:	Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 04/22/2015.
Violation Division:	Orange City Fire Department
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	415188
Site Name:	EPTECH
Violation Date:	12-09-2015
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years.
Violation Notes:	Returned to compliance on 07/03/2017. Facility was not conducting SPCC plan inspections. Conduct the required inspections (monthly minimum) and maintain inspection records available for review. Submit a copy of your first inspection record to this Agency for our review within 30 days.

Eval Notes: Joe called. He said he was the consultant and they were in compliance with....other agencies, regs... no single tank over 1320 gallons.....He did not make sense to me. He said that he works with the health care agency all the time and was in compliance.>>>He was referencing storage issue compliance that are not APSA issues. I informed him that I'm working on facility's APSA compliance. To make sure that we are on the same page - I informed him I will send him links from our website regarding APSA compliance. I asked him if he had an SPCC plan. He replied yes.

Eval Notes: From: Krall, Joyce Sent: Monday, February 01, 2016 8:30 AM To: 'joe@aps-dev.com' Subject: EPTECH 2199 N BATAVIA STE D ORANGE / APSA COMPLIANCE Hello Joe, Thank you for your phone call. Please reference EptechG s above ground storage tank inspection report dated 12-9-15. There are 3 violations to correct. The applicable 40 CFR and CA HSC sections in violation are identified in the violation text. You had informed me that the facility does have a spill prevention countermeasure and control (SPCC) plan. >>Please submit a copy to this Agency for my review. That will begin to address the violation (I085). HereG s the link to our website which offers aboveground petroleum storage act (APSA) information. http://occupainfo.com/programs/apst IG ve also attached a page of APSA definitions. Please contact me if you should have any questions. Regards, Joyce Krall, REHS

Eval Notes:	On site for an aboveground petroleum storage tank (APST) inspection. Met with owner Haim Herzog of EP Tech. Consent was provided to enter and conduct inspection activities. Facility is regulated under the Aboveground Storage Tank Act (APSA). Based on average inventory of petroleum oils, the facility stores approximately 5,000 gallons (MAX) in 55-gallon steel drums. The facility DOES NOT have a single container larger than 5,000 gallons. This facility meets the Tier 1 Qualified Facility conditions. A Tier 1 SPC plan was created and certified on this date. The following need to be conducted/completed: All employees need to be trained of the SPCC plan and waste disposal procedures (See violation I009 above). Implement appropriate secondary containment or diversionary structures (See violation I192 above). Orange County Environmental Health has created a website that contains information regarding the APST program and its requirements. The SPCC Plan requirements [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Haim Herzog, owner, was present and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products and waste in 55 gallon drums or tanks on site. The APST inspection program and Spill Control and Countermeasure Plan (SPCC) requirements were discussed. We discussed its qualifying petroleum storage and secondary containment methods. Facilities that are a qualified Tier I (less than 10,000 gallons and no single container greater than 5,000 gallons) can create and self certify a SPCC Plan using the federal template. Orange County Environmental Health has created a website that contains information regarding the APST program and its requirements. The SPCC Plan requirements have also been provided. We reviewed the APST forms on website [Truncated]

Address: 2200 N BATAVIA
City,State,Zip: ORANGE, CA 92865
Site ID: 545694
CERS ID: 653607
CERS Description: Industrial Facility Storm Water

Violations:
Site ID: 545694
Site Name: USF Reddaway Inc 575 ORG
Violation Date: 08-31-2011
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Inadequate spill response to oil spills inside of top-off shed; has leaked to outside foundation. Threatened unauthorized non-storm water discharge from washing windshields with the hose.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Site ID: 545694
Site Name: USF Reddaway Inc 575 ORG
Violation Date: 08-31-2011
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SWPPP
Violation Notes: SWPPP is out-of-date; doesn't reflect closed repair shop. Doesn't reflect sump box in the gutter.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-31-2011
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: warm and sunny. Maintenance shop closed over 2-years ago; SWPPP needs to be updated. Has a fuel island with a nearby shed containing automotive fluids for topping off trucks' fluids. Shed is slab-on-grade construction with no integrated secondary containment; oil stain on floor has migrated between wall and slab and extends outside on the foundation. Found a hose on the old maintenance building with large patch of wet asphalt; Contact reports that hose is used for washing off windshields; SWPPP says to use a squeegie/bucket. Found a sump box in gutter leading to edge of facility; sump is filled with debris and not noted in SWPPP.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes:	Returned to compliance on 02/27/2015. Copies of the signed off manifests, showing receipt of the shipments by the receiving facility, were not available for inspection. Also, the manifest used for the waste generated from the recent ink cleanup activities was not available for inspection. Maintain copies of the facility's hazardous waste removal records for inspection. Submit a copy set of the signed off manifests and the spill cleanup manifest for 2014 to present to this Agency. Submit along with the attached certificate of return to compliance to this Agency within 30 days.

Eval Notes:	On site for a routine hazardous waste inspection. Bob Bohi, terminal manager, and Frank Lococo, area safety manager, were present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were labeled. We discussed the marking of containers storing hazardous waste with the required identifying information. A container storing a hazardous waste must be marked with the hazardous property of the waste. We discussed maintaining hazardous waste storage containers closed except for when adding or removing waste. USF briefed me on their policies and procedures for handling chemical spills and damaged chemical goods. We discussed USFG s OES spill [Truncated]

Eval Notes: Received phone call from Jaimy Haines, YRC Worldwide Corp. Safety Manager, following up on my messages left morning of Saturday, 11/7/2015, requesting more information to spill that occurred at the Orange Terminal. Mr. Haines reviewed incident report verifying 20 gallons of Diesel Exhaust Fluid was spilled onto concrete when driver was transferring the fluid from a 275-gallon storage container to the holding reservoir of the truck. A mechanical error occurred that caused the reservoir to overflow. No fuel was involved. The fluid was

REDDAWAY (Continued) **S113128035**

contained on the concrete with absorbent material, no release off the property occurred. The company's environmental response contractor, Patriot Environmental Services, was dispatched and began cleaning spill about 5 am. All the absorbent material, including the pads, were placed in a 55-gallon drum and retained on site to be managed off site as a California regulated hazardous waste. Informed Mr. Haines the waste needs to be within [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description:	Caller states during warehouse operations, a fork-lift punctured a 300 gallon non-regulated ink tote. Of the 300 gallons, 110 gallons of the ink was released to a trailer, concrete floor and an asphalt parking lot. A contractor has been hired to conduct the clean-up. No waterways were impacted and the spill has been stopped.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 10-28-2014
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes: Returned to compliance on 12/09/2015.
Violation Division: Orange City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-10-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Brad Banks, superintendent, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's lot. I did not observe hazardous waste in the facility's trash or as run off on the ground. Annie Mejia, office manager, was consulted regarding waste disposal records and the possible generation of other hazardous waste such as waste paints, solvents, and resins. She clarified that the gallon containers piled next to the waste storage drums, that I had thought could possibly be hazardous waste, were mastic product. The storage of the shop's hazardous waste was inspected. The facility had two drums for the storage of used oil. Approximately 17 gallons of used oil was in storage. Records show that the facilityG s last removal of hazardous waste was in 2011. This facility is a CESQG. A CESQG may accumulate up to 27 [Truncated]

Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Met with Brad Banks, Project Manager. The facility is a Very Small Quantity Generator of used oil generated from equipment maintenance. Walked throughout the facility and observed the facilityG s Hazardous Waste storage area. One 55 gallon drum of waste oil was observed properly labeled and stored closed. The perimeter of the facility was walked and municipal trash was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facilityG s EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to brad@sanmarinoroof.com and skipbanks@sanmarinoroof.com.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-19-2010
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Facility manufactures/packages drywall mud, sheetrock tape, patch compounds, and similar products. Rainfall occurred throughout inspection. Contact asserts that 3 staff are assigned to sweep the site daily. Storm drain inlet for the production area discharges to sewer; when a certain volume is exceeded, remainder is discharged to street. Main yard (shipping) is neat and orderly. Runoff from main yard is black apparently from tire wear. Storage yard (NW portion) is in need of better housekeeping; area is littered with paper bits and fibers from tape manufacturing. Production area is mostly covered against stormwater but tracking and splashing subject spilled powder to runoff. Found no effective effort to protect against spills at dust collectors: collection barrels were found overflowing, soft downtubes were missing, and areas were heavily coated in dust. Trash and sludge found on ground around trash compactor. Packing peanuts and foam bits found floating in runoff from an outdoor enclosed room; a roof drain from the adjacent main building discharges onto the floor of this room and picks up trash and carries it outside. Found three air compressor blow-down lines plumbed to drain to ground outside; one drain line was actively discharging. A compressor was found outside without a cover and a heavy coating of oil around the motor. On roof, found several

HAMILTON MATERIALS INC. (Continued) **1000254743**

dust collection components with small to large piles of dust beneath them; some of the dust had been carried to roof edges by rainwater, leaving a thick mucky deposit. Various parts found stored uncovered outside on racks along a building; some parts were rusting in the rain and others consisted of motors and electrical parts.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Case Development Inspection
Eval Date: 12-07-2010
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Weather was sunny and warm. Rain had occurred over the last weekend. Observed that all real and threatened non-storm water discharges from air compressors had been eliminated. The single outdoor and uncovered air compressor had had the oil cleaned off its exterior. The outside storage racks had been covered with tarp; operations staff expressed dissatisfaction with this solution and will pursue an alternative that may consist of constructing a fixed overhand and relocated racks under that. Housekeeping on roof is substantially improved; no significant deposits of powder observed. Contact reported that he was now inspecting roof routinely; recent inspections had shown equipment leaking powder onto the roof. Contact reported that these leaks have since been fixed. Dust collection drums have been replaced with a larger hopper and a flexible fabric chute installed to convey dust into the hopper. Flexible chute was on ground nearby and Contact re-installed it immediately. Still observed powder coating most everything in the vicinity. Although hopper area is covered by a high roof, the recent rain has left a distinct line showing where powder had deposited on ground beyond edge of roofline and rainfall had washed it away. Contact will consider other ways to minimize airborne powder but housekeeping will be a continuous issue in this area. Trash compactor area and northwest storage yard have also been cleaned and so has the outbuilding where styrofoam pellets are handled. SWPPP has not yet been updated.

Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 11/02/2020.
Violation Division: Orange City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 171464
Site Name: Westpac Materials
Violation Date: 10-19-2010
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Major improvements in housekeeping and dust management BMPs needed in production areas surrounding the dust collection system. Dust spills caused by negligence and missing system components observed. Improvements in housekeeping are needed in area surrounding the trash compactor and the storage yard. Maintenance, cleaning, or other BMP needed to keep oil on an exposed compressor from being exposed to storm water.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-19-2010
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Facility manufactures/packages drywall mud, sheetrock tape, patch compounds, and similar products. Rainfall occurred throughout inspection. Contact asserts that 3 staff are assigned to sweep the site daily. Storm drain inlet for the production area discharges to sewer; when a certain volume is exceeded, remainder is discharged to street. Main yard (shipping) is neat and orderly. Runoff from main yard is black apparently from tire wear. Storage yard (NW portion) is in need of better housekeeping; area is littered with paper bits and fibers from tape manufacturing. Production area is mostly covered against stormwater but tracking and splashing subject spilled powder to runoff. Found no effective effort to protect against spills at dust collectors: collection barrels were found overflowing, soft downtubes were missing, and areas were heavily coated in dust. Trash and sludge found on ground around trash compactor. Packing peanuts and foam bits found floating in runoff from an outdoor enclosed room; a roof drain from the adjacent main building discharges onto the floor of this room

HAMILTON MATERIALS INC. (Continued) **1000254743**

and picks up trash and carries it outside. Found three air compressor blow-down lines plumbed to drain to ground outside; one drain line was actively discharging. A compressor was found outside without a cover and a heavy coating of oil around the motor. On roof, found several dust collection components with small to large piles of dust beneath them; some of the dust had been carried to roof edges by rainwater, leaving a thick mucky deposit. Various parts found stored uncovered outside on racks along a building; some parts were rusting in the rain and others consisted of motors and electrical parts.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Case Development Inspection
Eval Date: 12-07-2010
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Weather was sunny and warm. Rain had occurred over the last weekend. Observed that all real and threatened non-storm water discharges from air compressors had been eliminated. The single outdoor and uncovered air compressor had had the oil cleaned off its exterior. The outside storage racks had been covered with tarp; operations staff expressed dissatisfaction with this solution and will pursue an alternative that may consist of constructing a fixed overhand and relocated racks under that. Housekeeping on roof is substantially improved; no significant deposits of powder observed. Contact reported that he was now inspecting roof routinely; recent inspections had shown equipment leaking powder onto the roof. Contact reported that these leaks have since been fixed. Dust collection drums have been replaced with a larger hopper and a flexible fabric chute installed to convey dust into the hopper. Flexible chute was on ground nearby and Contact re-installed it immediately. Still observed powder coating most everything in the vicinity. Although hopper area is covered by a high roof, the recent rain has left a distinct line showing where powder had deposited on ground beyond edge of roofline and rainfall had washed it away. Contact will consider other ways to minimize airborne powder but housekeeping will be a continuous issue in this area. Trash compactor area and northwest storage yard have also been cleaned and so has the outbuilding where styrofoam pellets are handled. SWPPP has not yet been updated.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Date:	05-17-2016
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous waste inspection. Garret Walker, area fleet supervisor, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the lotG s perimeter. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled with the required information. We discussed the handling of e-waste. I provided an OCCUPA fact sheet regarding the handling of universal waste. The records for the removal of the facility's hazardous waste were on site

REYES COCA COLA BOTTLING LLC (Continued) **S101589306**

and available for inspection. The records for the last year were reviewed. The facility must provide written spill response directions and emergency contact numbers for their employees. We discussed providing employee access to the required information. report PDF to garret walker [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-22-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Fleet Manager Dave Andersen of Coca Cola Bottling Co. Mr. Andersen provided consent to enter and conduct this inspection. Hazardous waste observed on-site included used oil, used oil filters, waste antifreeze, and universal waste in the form of aerosols. Hazardous waste was properly labeled and stored closed. Hazardous waste manifests were available for review. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Waste Description: 4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-

Waste Code: U162
Waste Description: 2-PROPENOIC ACID, 2-METHYL-, METHYL ESTER (I,T) (OR) METHYL METHACRYLATE (I,T)

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U182
Waste Description: 1,3,5-TRIOXANE, 2,4,6-TRIMETHYL- (OR) PARALDEHYDE

Waste Code: U201
Waste Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U213
Waste Description: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

Waste Code: U219
Waste Description: THIOUREA

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U223
Waste Description: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Waste Code: U228
Waste Description: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

Waste Code: U239
Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Waste Code: U240
Waste Description: 2,4-D, SALTS & ESTERS (OR) ACETIC ACID, (2,4-DICHLOROPHENOXY)-, SALTS & ESTERS (OR) DICHLOROPHENOXYACETIC ACID 2,4-D

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or

FEDEX FREIGHT ONG (Continued) **1000819101**

dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS Description:	Industrial Facility Storm Water

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-18-2004
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Watkins Motor Lines is a freight transportation facility. Various types of freight are transported to the facility and transferred from one trailer to another (Photo 2). The facility maintains a covered concrete dock located near the center of the facility and an administrative office located along the east side of the concrete dock. The remainder of the facility is paved. Maintenance for the tractor trucks and trailers was observed to be conducted in a designated area by a subcontracted service company. Hazardous materials, including waste motor oil are transported off site by a subcontractor. The trucks and trailers are routinely washed by a subcontracted truck washing company and the wash water is contained and removed off site by the subcontractor. Spill kits were present in the concrete dock area in the event of a minor spill. Storm water at

FEDEX FREIGHT ONG (Continued) **1000819101**

the facility is conveyed to a series of drop inlets located throughout the driveway surrounding the concrete loading dock (Photo 3). Storm water runoff associated with the washing area and maintenance area is conveyed to a drain located near the southwest corner of the facility (Photos 4 and 5). Storm water discharge is sampled at this location prior to discharging into the city storm water culvert located along the southern perimeter of the site.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003

FXI, INC. - ORANGE (Continued) **1000158746**

Waste Description: REACTIVE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U223
Waste Description: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

FXI, INC. - ORANGE (Continued) **1000158746**

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FXI, INC. - ORANGE (Continued) **1000158746**

Site Name: FXI INC
Violation Date: 06-08-2016
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes: Returned to compliance on 12/22/2016. Monthly SPCC inspections as described in the plan were not being conducted. The monthly inspection log that was provided for review did not contain the required SPCC elements. Implement SPCC inspections for the qualifying above ground petroleum storage. Submit a copy of the first month inspection record to this Agency within 30 days.
Violation Division: Orange County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 30779
Site Name: FXI INC
Violation Date: 06-08-2016
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to adequately discuss in the SPCC Plan all applicable bulk storage containers, or no discussion regarding all applicable bulk storage containers included.
Violation Notes: Returned to compliance on 12/22/2016. Inspection found the facility's qualifying APSA petroleum storage to differ from what was described in the plan. Additional totes and drums of petroleum products (oils, WD40, diesel) were observed on site that had not been identified in the plan. Also, the actual contents of the baler building's ASTs differed from what was in the plan. Please update the plan's qualifying APSA storage table to be current. Submit a copy of the table to this Agency within 30 days.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 04-18-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site for a CalARP audit. Met with Lydia Gallardo and Luis Carbajal of FXI. Consent to enter and take photos was granted. Facility is regulated under the CalARP Program level 1 requirements. The regulated substance on site is an 80/20 mix of 2-4- and 2-6 Toluene Diisocyanate. Max storage of 680,000 pounds has not changed. Facility is regulated by the EPA and the CUPA. Photos were collected of the storage and process machinery. RMP is in the process of recertification.

Eval Notes:	On-site for a routine inspection. Met with Douglas Darling this date. This is a Program Level 1 CalARP facility as well as a Federally Regulated site. The facility has approximately 680,000 pounds of TDI. The federal threshold is 10,000 pounds. The site has filed electronically with EPA, and has made several changes (dates and amount of TDI on-site). The last electronic change was made on 04/14/14. The EPA RMP anniversary date for this facility is 05/09/18. The latest version of the RMP hs been submitted and approved by OCHCA. The California Program Level 1 certification is signed 04/26/13. The emergency eye wash and showers are being inspected and were tested this date. An email from Rosie Flores of the City of Orange Fire Department dated 04/22/14 verified that there have been no releases with off-site consequences within the last 5-years. 1) Five Year Accident History: According to Mr.Darling there have been no releases of TDI within the last 5-years [Truncated]

Eval Notes: On site for a routine non-RCRA (CA regulated) hazardous waste large quantity generator (LQG) inspection. Doug Darling, Regional EHS manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The facility's outside lot was walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A non-RCRA LQG is a generator of equal to or greater than 1000 kg (roughly 2200 pounds) of non RCRA hazardous waste during a single month during a one year period. In the last year, the facility's records documented that this facility was a non-RCRA hazardous waste LQG. The storage of the facility's hazardous waste was inspected. The containers were stored closed and with [Truncated]

Eval Notes:	On site for a routine above ground petroleum storage tank (APST) inspection. Douglas Darling, Regional EHS Manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There was more than 10,000 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included machine reservoirs, tanks, and drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 10-22-12. The plan was on site and available for review. Changes in the described qualifying petroleum storage were noted and discussed. Updates will be completed. SPILL CONTROL: Secondary containment and spill response equipment were provided as described in the plan. INSPECTIONS: We discussed the required SPCC inspections [Truncated]

Eval Notes:	INSPECTOR COMMENTS: This inspection report is being written in order to correct the inspections reports dated 05/16/13, 05/17/13, 04/25/14 and 06/085/15. After reviewing the RMP, Federal (EPA) Certification and the Hazardous Assessment completed by RMP Professionals in April 2013 it appears that this facility is not a Program Level 1 but is in fact a Program Level 2 facility with an off-site consequence. The following was taken into account in making this determination: 1) The EPA RMP Submission dated 05/09/13 lists an off-site consequence of 0.01 miles (no off-site consequence) 2) The April 2014 Hazard Assessment by RMP Professionals on page 7 lists the off-site consequence as <0.0128 miles (no off-site consequence) 3) The April 2014 Hazard Assessment by RMP Professionals on page 11 lists the off-site consequence as 0.128 miles (off-site consequence) 4) The April 2014 Hazard Assessment by RMP Professionals on page 12, figure 7

Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Met with Doug Darling, Regional EHS Manager, and Luis Carbajal, Plant Manager. The facility is a Large Quantity Generator of Non-RCRA Hazardous Waste. The facilityG s operations and waste generated were discussed. Walked throughout the facility and observed the facilityG s Hazardous Waste. The facility has a designated hazardous waste storage area in the mechanics building, and also several satellite accumulation areas. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and municipal trash dumpsters were observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facilityG s EPA ID number is active. Emergency plan is maintained onsite, spill response notification was discussed. Weekly hazardous waste container inspection logs were available for review. Eval Notes:	INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Eval Notes:	On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes:	Returned to compliance on 12/22/2016. Monthly SPCC inspections as described in the plan were not being conducted. The monthly inspection log that was provided for review did not contain the required SPCC elements. Implement SPCC inspections for the qualifying above ground petroleum storage. Submit a copy of the first month inspection record to this Agency within 30 days.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to adequately discuss in the SPCC Plan all applicable bulk storage containers, or no discussion regarding all applicable bulk storage containers included.
Violation Notes:	Returned to compliance on 12/22/2016. Inspection found the facility's qualifying APSA petroleum storage to differ from what was described in the plan. Additional totes and drums of petroleum products (oils, WD40, diesel) were observed on site that had not been identified in the plan. Also, the actual contents of the baler building's ASTs

FXI, INC. - ORANGE (Continued) **1000158746**

differed from what was in the plan. Please update the plan's qualifying APSA storage table to be current. Submit a copy of the table to this Agency within 30 days.

Eval Type: Other, not routine, done by local agency
Eval Notes: On site for a CalARP audit. Met with Lydia Gallardo and Luis Carbajal of FXI. Consent to enter and take photos was granted. Facility is regulated under the CalARP Program level 1 requirements. The regulated substance on site is an 80/20 mix of 2-4- and 2-6 Toluene Diisocyanate. Max storage of 680,000 pounds has not changed. Facility is regulated by the EPA and the CUPA. Photos were collected of the storage and process machinery. RMP is in the process of recertification.

Eval Notes: On-site for a routine inspection. Met with Douglas Darling this date. This is a Program Level 1 CalARP facility as well as a Federally Regulated site. The facility has approximately 680,000 pounds of TDI. The federal threshold is 10,000 pounds. The site has filed electronically with EPA, and has made several changes (dates and amount of TDI on-site). The last electronic change was made on 04/14/14. The EPA RMP anniversary date for this facility is 05/09/18. The latest version of the RMP hs been submitted and approved by OCHCA. The California Program Level 1 certification is signed 04/26/13. The emergency eye wash and showers are being inspected and were tested this date. An email from Rosie Flores of the City of Orange Fire Department dated 04/22/14 verified that there have been no releases with off-site consequences within the last 5-years. 1) Five Year Accident History: According to Mr.Darling there have been no releases of TDI within the last 5-years [Truncated]

Eval Notes:	On site for a routine non-RCRA (CA regulated) hazardous waste large quantity generator (LQG) inspection. Doug Darling, Regional EHS manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The facility's outside lot was walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A non-RCRA LQG is a generator of equal to or greater than 1000 kg (roughly 2200 pounds) of non RCRA hazardous waste during a single month during a one year period. In the last year, the facility's records documented that this facility was a non-RCRA hazardous waste LQG. The storage of the facility's hazardous waste was inspected. The containers were stored closed and with [Truncated]

Eval Notes:	On site for a routine above ground petroleum storage tank (APST) inspection. Douglas Darling, Regional EHS Manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There was more than 10,000 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included machine reservoirs, tanks, and drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 10-22-12. The plan was on site and available for review. Changes in the described qualifying petroleum storage were noted and discussed. Updates will be completed. SPILL CONTROL: Secondary containment and spill response equipment were provided as described in the plan. INSPECTIONS: We discussed the required SPCC inspections [Truncated]

Eval Notes:	INSPECTOR COMMENTS: This inspection report is being written in order to correct the inspections reports dated 05/16/13, 05/17/13, 04/25/14 and 06/085/15. After reviewing the RMP, Federal (EPA) Certification and the Hazardous Assessment completed by RMP Professionals in April 2013 it appears that this facility is not a Program Level 1 but is in fact a Program Level 2 facility with an off-site consequence. The following was taken into account in making this determination: 1) The EPA RMP Submission dated 05/09/13 lists an off-site consequence of 0.01 miles (no off-site consequence) 2) The April 2014 Hazard Assessment by RMP Professionals on page 7 lists the off-site consequence as <0.0128 miles (no off-site consequence) 3) The April 2014 Hazard Assessment by RMP Professionals on page 11 lists the off-site consequence as 0.128 miles (off-site consequence) 4) The April 2014 Hazard Assessment by RMP Professionals on page 12, figure 7 (MARPLOT) shows no [Truncated]

Eval Notes:	INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-04-2013
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: Warm and sunny. Single SWPPP presented for review. Overall housekeeping is significantly improved; Contact reports that the broken sweeper has been replaced. Sweeping is done each working day during second shift when foam buns are moved around. Leaf-blower is used for hard-to-reach places but frequency is not known to Contact. Form cone impressions still in secondary containment at E tank area. Curtains on unloading pumps have been replaced. Found steam water leaking from pipe next to metering house. North rail line and trash compactor are littered. Unknown demo job left debris next to north loading platform. Outlet #4 has heavy litter and debris inside basin. Abandoned plastic sheeting found at SE corner. Improper leak response found at conveyor and in bun storage area. Improper storage of decomissioned baler found. Evidence of steam water discharge from pipe behind Tank 108 found.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: partly cloudy and warm. SWPPP is undated and in process of being updated; several versions presented, most lack site plan; agreed to use site plan last revised 3/1/2000. Site is mostly orderly but littered with bits of fresh and weathered foam, including neglected, moldy-looking patches of foam dust. Contact cites lack of personnel and broken sweeping equipment for the condition of the site. Plastic sheeting is piled at the SE corner and not secured against wind. Leaks, or evidence of leaks, found from various process equipment.

FXI, INC. - ORANGE (Continued) **1000158746**

Heavy litter and weathered plastic sheeting found in NW portion of site near compactor. Storm drain inlet basins are littered; pipes are fitted with sliding gate valves left either open or partly-open; default position is not known to Contact.

Violation Description: Failure to adequately discuss in the SPCC Plan all applicable bulk storage containers, or no discussion regarding all applicable bulk storage containers included.
Violation Notes: Returned to compliance on 12/22/2016. Inspection found the facility's qualifying APSA petroleum storage to differ from what was described in the plan. Additional totes and drums of petroleum products (oils, WD40, diesel) were observed on site that had not been identified in the plan. Also, the actual contents of the baler building's ASTs differed from what was in the plan. Please update the plan's qualifying APSA storage table to be current. Submit a copy of the table to this Agency within 30 days.

Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Met with Doug Darling, Regional EHS Manager, and Luis Carbajal, Plant Manager. The facility is a Large Quantity Generator of Non-RCRA Hazardous Waste. The facilityG s operations and waste generated were discussed. Walked throughout the facility and observed the facilityG s Hazardous Waste. The facility has a designated hazardous waste storage area in the mechanics building, and also several satellite accumulation areas. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and municipal trash dumpsters were observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facilityG s EPA ID number is active. Emergency plan is maintained onsite, spill response notification was discussed. Weekly hazardous waste container inspection logs were available for review. Annual employee training records [Truncated]

Eval Notes:	INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Eval Notes: On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Eval Notes:	INSPECTOR COMMENTS: This inspection report is being written in order to correct the inspections reports dated 05/16/13, 05/17/13, 04/25/14 and 06/085/15. After reviewing the RMP, Federal (EPA) Certification and the Hazardous Assessment completed by RMP Professionals in April 2013 it appears that this facility is not a Program Level 1 but is in fact a Program Level 2 facility with an off-site consequence. The following was taken into account in making this determination: 1) The EPA RMP Submission dated 05/09/13 lists an off-site consequence of 0.01 miles (no off-site consequence) 2) The April 2014 Hazard Assessment by RMP Professionals on page 7 lists the off-site consequence as <0.0128 miles (no off-site consequence) 3) The April 2014 Hazard Assessment by RMP Professionals on page 11 lists the off-site consequence as 0.128 miles (off-site consequence) 4) The

Eval Notes:	On site for a routine Aboveground Petroleum Storage Tank (APST) inspection. Met with Doug Darling, Regional EHS Manager, and Luis Carbajal, Plant Manager. The facility has aboveground petroleum storage exceeding 1,320 gallons, but less than 10,000 gallons. The following petroleum storage capacity: - 6,000 gallon single-walled AST containing mineral oil (east tank farm) - 300 gallon single-walled diesel AST (fire protection building) - 750 gallon double-walled diesel AST (mechanics building) - 300 gallon single-walled oily water AST (x2) (steam clean area) - 120 gallon hydraulic oil tote (steam clean area) - 120 gallon lube oil tote (steam clean area) - 55 gallon drums of various petroleum throughout facility (x14) All ASTs observed on site have secondary containment. Secondary containment areas were observed free of liquid and debris. An SPCC Plan certified by a Professional Engineer is maintained on site and is dated 7/1/2016. Employee training [Truncated]

Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Met with Doug Darling, Regional EHS Manager, and Luis Carbajal, Plant Manager. The facility is a Large Quantity Generator of Non-RCRA Hazardous Waste. The facilityG s operations and waste generated were discussed. Walked throughout the facility and observed the facilityG s Hazardous Waste. The facility has a designated hazardous waste storage area in the mechanics building, and also several satellite accumulation areas. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and municipal trash dumpsters were observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facilityG s EPA ID number is active. Emergency plan is maintained onsite, spill response notification was discussed. Weekly hazardous waste container inspection logs were available for review. Annual employee training records [Truncated]

Eval Notes:	INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Eval Notes:	On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-04-2001
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	A routine compliance inspection was conducted for this facility on 1-04-01 at 1208. Mr. Jeffrey Stanfill, quality assurance manager, was onsite to accompany staff memebers through the site. Mr. David Juarez was not on site. The facility boundaries have changed; the adjacent property, which was once not a part of the property, is a part now. A new NOI needs to be submitted to reflect these changes. Minor staining was seen on the northern portion of the property, adjacent to empty, washed, containers ready for disposal. An oily out of use compressor was also seen here. Staff indicated that all spills must be cleaned up immediately and out of use equipment that is in contact with storm water should be covered. On the southern portion of the property, a few out of use containers were not stored properly. Also, old rusting equipment was observed. Iron oxide staining was seen in this area also. Per Mr. Stanfill, there is only one dishcharge/sampling point on the property. Staff saw two storm swales leading off the property. Both need to be sampled. A copy of the SWPPP was requested, however could not be found because Mr. Juarez was not in. A phone call will be made to follow up with the details of this inspection and to obtain a copy of the SWPPP.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS
Eval General Type:	Complaint Inspection
Eval Date:	05-19-2004
Violations Found:	No
Eval Type:	Industrial Storm Water Complaint Inspection
Eval Notes:	On May 19, 2004. Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Enrique Hernandez the acting manager. The SWPPP was not able to be reviewed due to the fact that it was locked up in the managers office and he was not present. Upon inspection of the facility the following observations were made. A filter cake bin was stored directly next to the storm water swale as well as, several used empty drums. Staff instructed site personnel to move the bin and drums to a area that is not so close to the storm drain swale. Furthermore, staff informed site personnel that they must have access to the SWPPP at all times

DUNHAM METAL PLATING INC. (Continued) **1000352574**

during the hours of business.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-30-2019
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a compliance inspection of the above facility on July 30, 2019. Staff met with Mr. Rafael Salcedo, Plant Supervisor. The SWPPP and training records were reviewed. The SWPPP was dated May 2019 and training records were last documented in June 2016. Mr. Salcedo stated they had a recent training but would have to look for the documentation. The facility is currently in Level 1 for Nitrite + Nitrate. A site walk was conducted and the facility collects samples from one outfall. Mr. Salcedo explained they use sand bags to help collect their sample since the water runs off as sheet flow. Housekeeping is conducted monthly using a push broom. Mr. Salcedo stated they get run-on from their neighbor and this could be the reason for the high parameter results. He went on to explain that the City of Orange came for their yearly inspection and noted the staining on the ground and went to speak to their neighbor about cleaning up the run-on. Filter cakes are stored in lidded scrap metal bins under cover. Mr. Salcedo noted the bins are picked-up once a month. Raw chemicals are stored on secondary containment in locked chemical storage shed. Totes of diesel exhaust fluid are stored under a covered canopy. Some air compressor condensate was observed on the ground. Mr. Salcedo noted the condensate does not travel further than observed.

Eval General Type: Other/Unknown
Eval Date: 12-30-2002
Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: ON December 30, 2002 under clear conditions the above referenced facility was viewed from the street by Regional Board staff. Staff attempted to enter the business, but discovered it was closed for the Holidays until January 6, 2003. Staff spoke with office personnel from an adjoining property, who told them that the plant was closed until that date. From the facility's entrance, staff could see through the business' windows, a grouping of 15-20 poly carboys that had hazardous materials labeling. These containers appeared to have adequate containment. All other manufacturing operations appeared to be contained indoors. The facility was secured and staff could not enter.

Summary: COPPER AND ACID SOLUTIONS. FIRE DEPT CLOSED CASE. GROUNDWATER HAS NOT BEEN INVESTIGATED. Called and left messages for Ragelio of McCurdy Circuits at 714 - 507 -4900 on Nov. 7, 2000. Site closed March 7, 2001.

FINDS:
Registry ID: 110008261816

Click Here:

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills
This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

West Map:	5641294 ANAHEIM, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

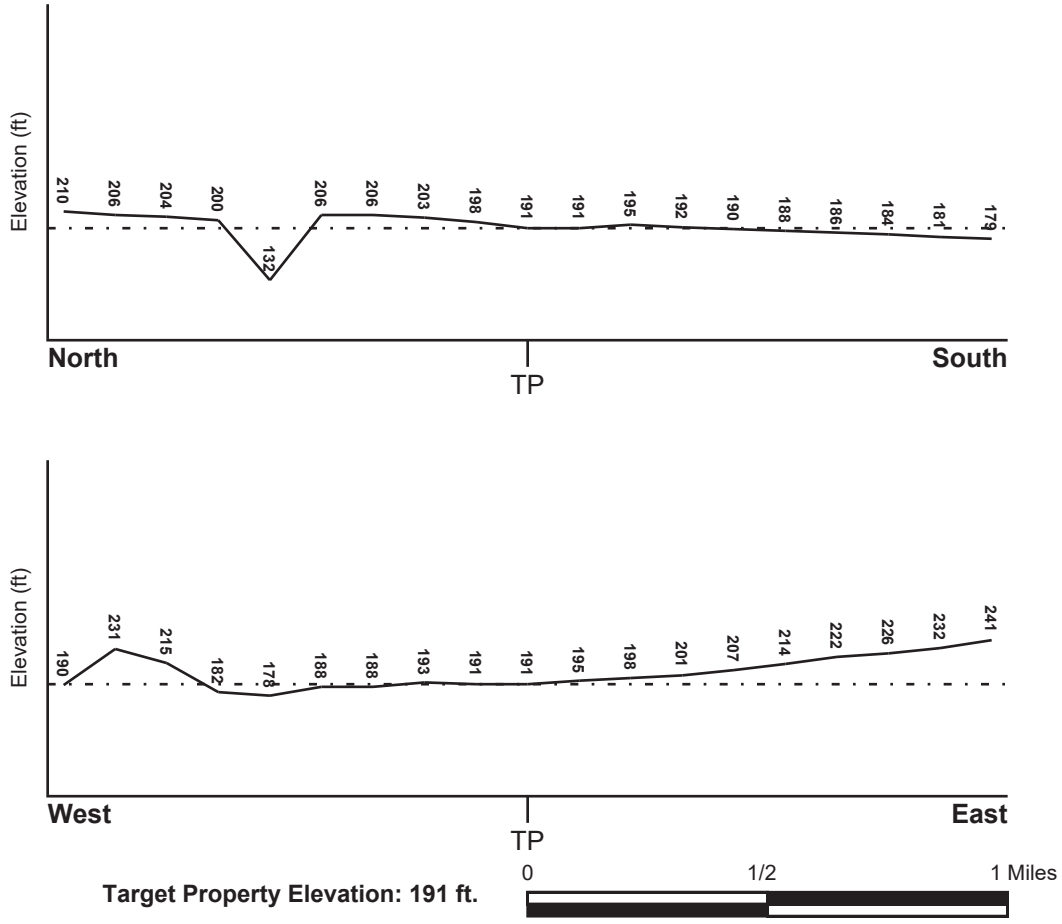
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06059C0153J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06059C0154J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ORANGE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	GREAT WESTERN CARPET CUSHION CO INC
Site EPA ID Number:	CAD008352361
Groundwater Flow Direction:	Southeast
Measured Depth to Water:	less than 140 feet.
Hydraulic Connection:	Information is not available regarding the hydraulic connection between aquifer(s) underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

10G	1/2 - 1 Mile SSW	SE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: PITS

Soil Surface Texture: extremely gravelly coarse sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	extremely gravelly coarse sand	Not reported	Not reported	Max: 141 Min: 42	Max: Min:

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	5 inches	59 inches	extremely gravelly sand	Not reported	Not reported	Max: 141 Min: 42	Max: Min:

Soil Map ID: 4

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

3	40 inches	46 inches	silt loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
4	46 inches	59 inches	stratified sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.
