Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

GREAT WESTERN CARPET CUSHION CO INC (Continued) **1000158746**

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U223
Waste Description: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-04-2013
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: Warm and sunny. Single SWPPP presented for review. Overall housekeeping is significantly improved; Contact reports that the broken sweeper has been replaced. Sweeping is done each working day during second shift when foam buns are moved around. Leaf-blower is used for hard-to-reach places but frequency is not known to Contact. Form cone impressions still in secondary containment at E tank area. Curtains on unloading pumps have been replaced. Found steam water leaking from pipe next to metering house. North rail line and trash compactor are littered. Unknown demo job left debris next to north loading platform. Outlet #4 has heavy litter and debris inside basin. Abandoned plastic sheeting found at SE corner. Improper leak response found at conveyor and in bun storage area. Improper storage of decomissioned baler found. Evidence of steam water discharge from pipe behind Tank 108 found.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: partly cloudy and warm. SWPPP is undated and in process of being updated; several versions presented, most lack site plan; agreed to use site plan last revised 3/1/2000. Site is mostly orderly but littered with bits of fresh and weathered foam, including neglected, moldy-looking patches of foam dust. Contact cites lack of personnel and broken sweeping equipment for the condition of the site. Plastic sheeting is piled at the SE corner and not secured against wind. Leaks, or evidence of leaks, found from various process equipment. Heavy litter and weathered plastic sheeting found in NW portion of

GREAT WESTERN CARPET CUSHION CO INC (Continued) **1000158746**

site near compactor. Storm drain inlet basins are littered; pipes are fitted with sliding gate valves left either open or partly-open; default position is not known to Contact.

Eval Notes: On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On-site for a routine inspection. Met with Douglas Darling this date. This is a Program Level 1 CalARP facility as well as a Federally Regulated site. The facility has approximately 680,000 pounds of TDI. The federal threshold is 10,000 pounds. The site has filed electronically with EPA, and has made several changes (dates and amount of TDI on-site). The last electronic change was made on 04/14/14. The EPA RMP anniversary date for this facility is 05/09/18. The latest version of the RMP hs been submitted and approved by OCHCA. The California Program Level 1 certification is signed 04/26/13. The emergency eye wash and showers are being inspected and were tested this date. An email from Rosie Flores of the City of Orange Fire Department dated 04/22/14 verified that there have been no releases with off-site consequences within the last 5-years. 1) Five Year Accident History: According to Mr.Darling there have been no releases of TDI within the last 5-years [Truncated]

Eval Notes:	On site for a routine non-RCRA (CA regulated) hazardous waste large quantity generator (LQG) inspection. Doug Darling, Regional EHS manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The facility's outside lot was walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A non-RCRA LQG is a generator of equal to or greater than 1000 kg (roughly 2200 pounds) of non RCRA hazardous waste during a single month during a one year period. In the last year, the facility's records documented that this facility was a non-RCRA hazardous waste LQG. The storage of the facility's hazardous waste was inspected. The containers were stored closed and with [Truncated]

Eval Notes: INSPECTOR COMMENTS: This inspection report is being written in order to correct the inspections reports dated 05/16/13, 05/17/13, 04/25/14 and 06/085/15. After reviewing the RMP, Federal (EPA) Certification and the Hazardous Assessment completed by RMP Professionals in April 2013 it appears that this facility is not a Program Level 1 but is in fact a Program Level 2 facility with an off-site consequence. The following was taken into account in making this determination: 1) The EPA RMP Submission dated 05/09/13 lists an off-site consequence of 0.01 miles (no off-site consequence) 2) The April 2014 Hazard Assessment by RMP Professionals on page 7 lists the off-site consequence as <0.0128 miles (no off-site consequence) 3) The April 2014 Hazard Assessment by RMP Professionals on page 11 lists the off-site consequence as 0.128 miles (off-site consequence) 4) The April 2014 Hazard Assessment by RMP Professionals on page 12, figure 7 (MARPLOT) shows no [Truncated]

Eval Notes:	On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to adequately discuss in the SPCC Plan all applicable bulk storage containers, or no discussion regarding all applicable bulk storage containers included.
Violation Notes: Returned to compliance on 12/22/2016. Inspection found the facility's qualifying APSA petroleum storage to differ from what was described in the plan. Additional totes and drums of petroleum products (oils, WD40, diesel) were observed on site that had not been identified in the plan. Also, the actual contents of the baler building's ASTs differed from what was in the plan. Please update the plan's qualifying APSA storage table to be current. Submit a copy of the table to this Agency within 30 days.

Eval Notes: On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Eval Notes: On-site for a routine inspection. Met with Douglas Darling this date. This is a Program Level 1 CalARP facility as well as a Federally Regulated site. The facility has approximately 680,000 pounds of TDI. The federal threshold is 10,000 pounds. The site has filed electronically with EPA, and has made several changes (dates and amount of TDI on-site). The last electronic change was made on 04/14/14. The EPA RMP anniversary date for this facility is 05/09/18. The latest version of the RMP hs been submitted and approved by OCHCA.

GREAT WESTERN CARPET CUSHION CO INC (Continued) **1000158746**

	The California Program Level 1 certification is signed 04/26/13. The emergency eye wash and showers are being inspected and were tested this date. An email from Rosie Flores of the City of Orange Fire Department dated 04/22/14 verified that there have been no releases with off-site consequences within the last 5-years. 1) Five Year Accident History: According to Mr.Darling there have been no releases of TDI within the last 5-years [Truncated]

Eval Notes: INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Eval Notes:	On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and

GREAT WESTERN CARPET CUSHION CO INC (Continued) **1000158746**

Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Eval Date:	07-07-2015
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.
Eval Division:	Orange County Environmental Health
Eval Program:	CalARP
Eval Source:	CERS
Eval General Type:	Other/Unknown
Eval Date:	07-14-2016
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Reviewed Doug's email with the updated SPCC plan and inspection checklist, which is provided to address violations. Checklist corrects violation I258. Bulk oil table IDs mineral oil, castor oil, and SCE-owned oil filled equipment in facility's APSA qualifying storage. Castor oil - exempt SCE-owned equipment - exempt

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-04-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: A routine compliance inspection was conducted for this facility on 1-04-01 at 1208. Mr. Jeffrey Stanfill, quality assurance manager, was onsite to accompany staff memebers through the site. Mr. David Juarez

DUNHAM METAL PLATING INC. (Continued) **1000352574**

was not on site. The facility boundaries have changed; the adjacent property, which was once not a part of the property, is a part now. A new NOI needs to be submitted to reflect these changes. Minor staining was seen on the northern portion of the property, adjacent to empty, washed, containers ready for disposal. An oily out of use compressor was also seen here. Staff indicated that all spills must be cleaned up immediately and out of use equipment that is in contact with storm water should be covered. On the southern portion of the property, a few out of use containers were not stored properly. Also, old rusting equipment was observed. Iron oxide staining was seen in this area also. Per Mr. Stanfill, there is only one dishcharge/sampling point on the property. Staff saw two storm swales leading off the property. Both need to be sampled. A copy of the SWPPP was requested, however could not be found because Mr. Juarez was not in. A phone call will be made to follow up with the details of this inspection and to obtain a copy of the SWPPP.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Complaint Inspection
Eval Date: 05-19-2004
Violations Found: No
Eval Type: Industrial Storm Water Complaint Inspection
Eval Notes: On May 19, 2004. Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Enrique Hernandez the acting manager. The SWPPP was not able to be reviewed due to the fact that it was locked up in the managers office and he was not present. Upon inspection of the facility the following observations were made. A filter cake bin was stored directly next to the storm water swale as well as, several used empty drums. Staff instructed site personnel to move the bin and drums to a area that is not so close to the storm drain swale. Furthermore, staff informed site personnel that they must have access to the SWPPP at all times during the hours of business.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-30-2019
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a compliance inspection of the above facility on July 30, 2019. Staff met with Mr. Rafael Salcedo, Plant Supervisor. The SWPPP and training records were reviewed. The SWPPP was dated May 2019 and training records were last documented in June 2016. Mr. Salcedo stated they had a recent training but would have to look for the documentation. The facility is currently in Level 1 for Nitrite + Nitrate. A site walk was conducted and the facility collects samples from one outfall. Mr. Salcedo explained they use sand bags to help collect their sample since the water runs off as sheet flow. Housekeeping is conducted monthly using a push broom. Mr. Salcedo stated they get run-on from their neighbor and this could be the reason for the high parameter results. He went on to explain that the City of Orange came for their yearly inspection and noted the staining on the ground and went to speak to their neighbor about cleaning up

DUNHAM METAL PLATING INC. (Continued) **1000352574**

the run-on. Filter cakes are stored in lidded scrap metal bins under cover. Mr. Salcedo noted the bins are picked-up once a month. Raw chemicals are stored on secondary containment in locked chemical storage shed. Totes of diesel exhaust fluid are stored under a covered canopy. Some air compressor condensate was observed on the ground. Mr. Salcedo noted the condensate does not travel further than observed.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Other/Unknown
Eval Date: 12-30-2002
Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: ON December 30, 2002 under clear conditions the above referenced facility was viewed from the street by Regional Board staff. Staff attempted to enter the business, but discovered it was closed for the Holidays until January 6, 2003. Staff spoke with office personnel from an adjoining property, who told them that the plant was closed until that date. From the facility's entrance, staff could see through the business' windows, a grouping of 15-20 poly carboys that had hazardous materials labeling. These containers appeared to have adequate containment. All other manufacturing operations appeared to be contained indoors. The facility was secured and staff could not enter.

Click Here:

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

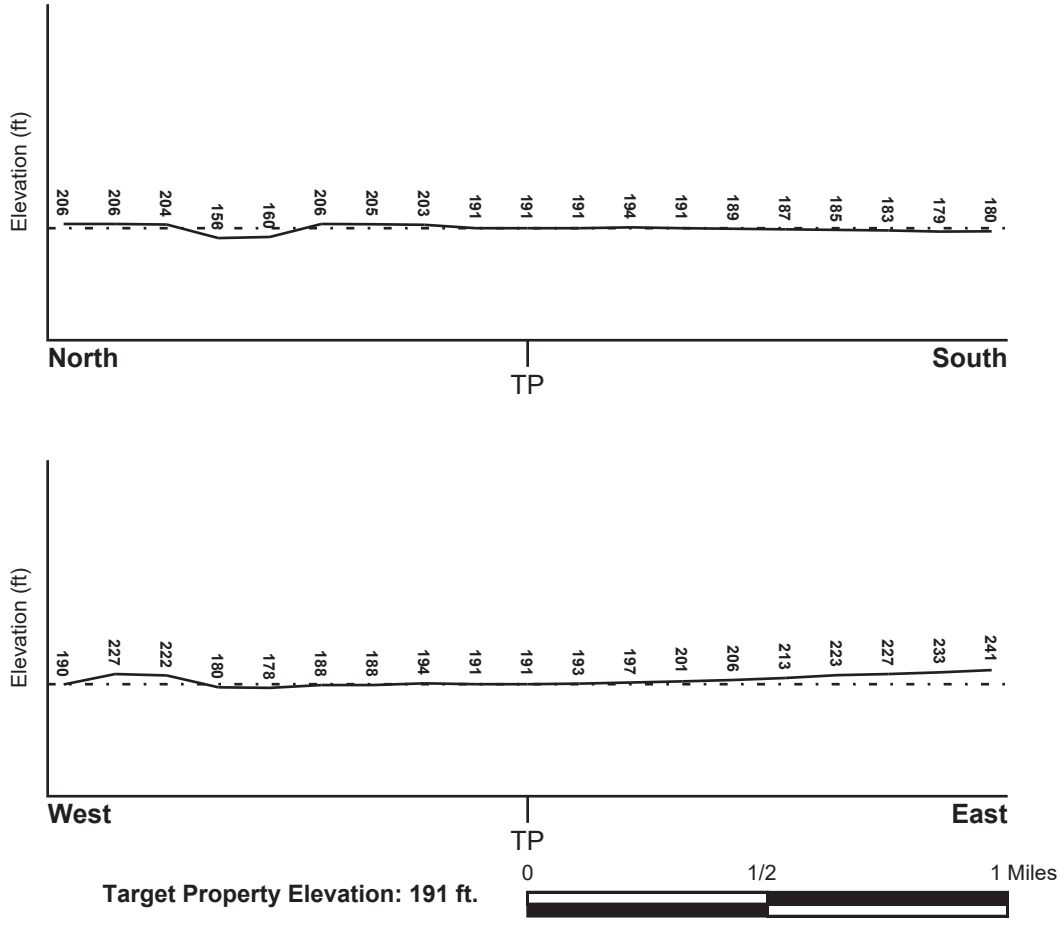
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06059C0153J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06059C0014E	FEMA Q3 Flood data
06059C0154J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ORANGE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	GREAT WESTERN CARPET CUSHION CO INC
Site EPA ID Number:	CAD008352361
Groundwater Flow Direction:	Southeast
Measured Depth to Water:	less than 140 feet.
Hydraulic Connection:	Information is not available regarding the hydraulic connection between aquifer(s) underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

7G	1/2 - 1 Mile South	Not Reported
8G	1/2 - 1 Mile SSW	SE
9G	1/2 - 1 Mile SSW	SE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	16 inches	40 inches	stratified sand to sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
3	40 inches	46 inches	silt loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
4	46 inches	59 inches	stratified sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6

Soil Map ID: 4

Soil Component Name: PITS

Soil Surface Texture: extremely gravelly coarse sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	extremely gravelly coarse sand	Not reported	Not reported	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	extremely gravelly sand	Not reported	Not reported	Max: 141 Min: 42	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX E

ASTM USER QUESTIONNAIRE

AEI Consultants
Environmental & Engineering Services

ASTM E 1527-13 User Questionnaire

In order to qualify for the protection offered under the EPA All Appropriate Inquiry (AAI) Standard, the **User** (entities seeking to use the ASTM E1527-13 Practice to complete an environmental site assessment of the property; i.e. Lenders and/or Borrowers) must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that AAI is not complete. This information should be the collective knowledge of the entities relying on the Phase I. **Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the property.**

Site Name/Address: 2390-2444 North American Way, Orange, CA 92865

Person Interviewed/Title: Richard Huntington, Conservation Date: 1/25/2021

If known, when was the property initially developed? Purchased 5/1976

If different, when were the current building(s) on the property constructed? Event Center 1985

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law? (**Note:** If unknown, a review of title records or an environmental lien search is recommended)

Yes ☐ No ☒ If you answer yes, please include an explanation in the space provided below:

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). *Institutional Controls* are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Yes ☐ No ☒ If you answer yes, please include an explanation in the space provided below:

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the *User* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes ☐ No ☒ If you answer yes, please include an explanation in the space provided below:

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

a) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?

Yes ☒ No ☐ If you answer no, please include an explanation in the space provided below, including whether the lower purchase price is because contamination is known or believed to be present at the *property*?

5. Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *User*:

a. Do you know the past uses of the *property*?

Yes ☒ No ☐

b. Do you know of specific chemicals that are present or once were present at the *property*?

Yes ☐ No ☒

c. Do you know of spills or other chemical releases that have taken place at the *property*?

Yes ☐ No ☒

d. Do you know of any environmental cleanups that have taken place at the *property*?

Yes ☐ No ☒

If you answered yes to any of the questions above, please include an explanation in the space provided below:

A. Property used as Event Center, storage tenants, and residential House

6. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the *User* of this *ESA*, based on your knowledge and experience related to the *property,* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

Yes ☐ No ☒ If you answer yes, please include an explanation in the space provided below:

Please provide the following property contact information:

Property Owner: MARTY S ADAIR Phone Number: (714) 609-3738

Key Site Personnel: RICHARD HUNTINGTON Phone Number: (949) 748-0911

Past Owner: DONALD MAINS - 1976 Phone Number: N/A

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Residential First Capital to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 2390-2444 North American Way, Orange, Orange County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	2390-2444 North American Way, Orange, Orange County, California 92865
Property ID (APN or Block/Lot)	374-632-08
Location	Bound by West Fletcher Avenue to the north, North American Way to the east, and West Freedom Avenue to the south
Property Type	Mixed-Use
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	3.99/Assessor
Number of Buildings	4; One commercial building at 2390 North American Way and two residences at 2442 and 2444 North American Way, and a garage along the northern portion
Building Construction Date(s)/Source	Residences: Circa 1952 Commercial Building: Circa 1985
Building Square Footage (SF)/Source	Estimated at approximately 68,000 (commercial building) and 4,300 (residences)/Google Earth
Number of Floors/Stories	1 (2442 and 2444 North American Way), 4 (2390 North American Way)
Basement or Subgrade Area(s)	None identified
Number of Units	12
Additional Improvements	Small parking garage, storage containers, asphalt-paved parking areas, courtyard associated with the Cultural Center, and associated landscaping. Several large containers were present on the property, which were inaccessible. The containers are used by the tenants for storage; no hazardous materials or chemicals were reported within these containers.
On-site Occupant(s)	See below
Current On-site Operations/Use	See below
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	CA HWTS (3), CA HAZNET

Tenant Information

Subject Property Address/Unit	Tenant	Use	Accessed
2390 North American Way	American Way Cultural Center	Ball room, entertainment	Yes
2390 North American Way	A-1 Septic Pumping	Vehicle storage	Yes

Subject Property Address/Unit	Tenant	Use	Accessed
2390 North American Way	Adan Tree Specialist	Storage yard	Yes
2390 North American Way	D&N Sealing	Storage Yard	No
2390 North American Way	Duarte Ramos Cycling	Storage yard	No
2390 North American Way/Space 1 and 2	Frank & Sons Enterprises	Storage yard	Yes
2390 North American Way	Gregorios Pallets	Pallet manufacturer and storage	Yes
2390 North American Way	Hipolito V. Alvarez	Storage yard	No
2390 North American Way	Ledesma Pallets	Pallet manufacturer and storage	Yes
2390 North American Way	Orange Pool Plastering	Equipment storage	Yes
2442 North American Way	Residential	Residential	No
2444 North American Way	Residential	Residential	No

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1896 - 1932	Unimproved land	Topographic maps
1938 - 1946	Agricultural land (orchard or row crops)	Aerial photographs
Circa 952 - Present	Addition of current residences on northeastern portion (610 and 612 W. Fletcher St., later 2442 and 2444 N. American Way)	Aerial photographs, city directories, site observation, interview
Circa 1963	Addition of outdoor storage yard for contractor storage use	Aerial photographs
1970 - Present	Outdoor storage area for Adair Roofing and other contractors (540 and 560 W. Fletcher St, later 2390 N. American Way)	Aerial photographs, city directories, site observation, interview
Circa 1985 - Present	Addition of current commercial building along southern portion/Entertainment venue (2390 N. American Way)	Aerial photographs, city directories, site observation, interview

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Fletcher Avenue, followed by Fletcher Avenue Condominiums (639 W Fletcher Ave), Calafia Townhomes (621 W Fletcher Ave), and Fletcher Elementary School (515 W Fletcher Ave)	None identified
East	American Way, followed by Fletcher Coating (426 W Fletcher Ave, 2467 N American Way)	HIST UST, EMI, NPDES, CIWQS, CERS, RCRA NONGEN/NLR, FINDS, ECHO, CERS, CERS HAZ WASTE
South	West Freedom Avenue, followed by commercial/ industrial buildings (590 - 630 W Freedom Ave) and JJ Foll Company (650 W Freedom Ave)	RCRA NONGEN/NLR (590 W Freedom Ave) RCRA-LQG, FINDS, ECHO (600 W Freedom Ave) RCRA-SQG, FINDS, ECHO, CIWQS (630 W Freedom Ave)

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
		RCRA NONGEN/NLR (650 W Freedom Ave)
West	Fletcher Retarding Basin	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- Due to the approximate age of the subject property buildings, there is a potential that ACMs are present. The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building

renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

- Due to the approximate age of the subject property buildings, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/ renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 2390-2444 North American Way, Orange, Orange County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 2390-2444 North American Way, Orange, Orange County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- Due to the large volume of materials within portions of the building and vehicles, equipment, pallets, and natural materials within exterior areas, direct visual observation of many of the floor and wall areas of the building and exterior ground surfaces was not possible. Access inside several large storage containers was not provided. Features may be present that were not observed during AEI's field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.

- AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.

- Due to the current conditions associated with the outbreak of COVID-19, access was not provided to the residences at 2442 and 2444 North American Way. Based on the lack of hazardous substances reported within the buildings and information provided by the Mr. Richard Huntington, the limited access is not expected to significantly alter the findings of this assessment.

- On June 1, 2020, the City of Orange Fire and Building Departments were contacted for information on the subject property in order to identify historical tenants, property use and/or hazardous materials handling. Due to the time frame of this assessment and the current conditions associated with the Coronavirus disease 2019 (COVID-19) outbreak, records at the Orange Fire and Building Departments were not available for review. However, based on the quality of information obtained from other sources including historical sources, this limitation is not expected to significantly alter the findings of this assessment.

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

AEI did not identify evidence of data failure during the course of this assessment.

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of Residential First Capital. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by Residential First Capital on May 27, 2020. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	2390-2444 North American Way, Orange, Orange County, California 92865
Property ID (APN or Block/Lot)	374-632-08
Location	Bound by West Fletcher Avenue to the north, North American Way to the east, and West Freedom Avenue to the south
Property Type	Mixed-Use
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	3.99/Assessor
Number of Buildings	4; One commercial building at 2390 North American Way and two residences at 2442 and 2444 North American Way, and a garage along the northern portion
Building Construction Date(s)/Source	Residences: Circa 1952 Commercial Building: Circa 1985
Building Square Footage (SF)/Source	Estimated at approximately 68,000 (commercial building) and 4,300 (residences)/Google Earth
Number of Floors/Stories	1 (2442 and 2444 North American Way), 4 (2390 North American Way)
Basement or Subgrade Area(s)	None identified
Number of Units	12
Additional Improvements	Small parking garage, storage containers, asphalt-paved parking areas, courtyard associated with the Cultural Center, and associated landscaping. Several large containers were present on the property, which were inaccessible. The containers are used by the tenants for storage; no hazardous materials or chemicals were reported within these containers.
On-site Occupant(s)	See below
Current On-site Operations/Use	See below
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	CA HWTS (3), CA HAZNET

Tenant Information

Subject Property Address/Unit	Tenant	Use	Accessed
2390 North American Way	American Way Cultural Center	Ball room, entertainment	Yes
2390 North American Way	A-1 Septic Pumping	Vehicle storage	Yes
2390 North American Way	Adan Tree Specialist	Storage yard	Yes
2390 North American Way	D&N Sealing	Storage Yard	No
2390 North American Way	Duarte Ramos Cycling	Storage yard	No
2390 North American Way/Space 1 and 2	Frank & Sons Enterprises	Storage yard	Yes

Subject Property Address/Unit	Tenant	Use	Accessed
2390 North American Way	Gregorios Pallets	Pallet manufacturer and storage	Yes
2390 North American Way	Hipolito V. Alvarez	Storage yard	No
2390 North American Way	Ledesma Pallets	Pallet manufacturer and storage	Yes
2390 North American Way	Orange Pool Plastering	Equipment storage	Yes
2442 North American Way	Residential	Residential	No
2444 North American Way	Residential	Residential	No

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	City of Orange
Sewage Disposal/Treatment	City of Orange

Utility source/system information listed in the table above is provided by Mr. Richard Huntington, unless otherwise noted above.

2.3 Site and Vicinity Characteristics

The subject property is located in a commercial and residential area of Orange, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Fletcher Avenue, followed by Fletcher Avenue Condominiums (639 W Fletcher Ave), Calafia Townhomes (621 W Fletcher Ave), and Fletcher Elementary School (515 W Fletcher Ave)	None identified
East	American Way, followed by Fletcher Coating (426 W Fletcher Ave, 2467 N American Way)	HIST UST, EMI, NPDES, CIWQS, CERS, RCRA NONGEN/NLR, FINDS, ECHO, CERS, CERS HAZ WASTE
South	West Freedom Avenue, followed by commercial/ industrial buildings (590 - 630 W Freedom Ave) and JJ Foll Company (650 W Freedom Ave)	RCRA NONGEN/NLR (590 W Freedom Ave) RCRA-LQG, FINDS, ECHO (600 W Freedom Ave) RCRA-SQG, FINDS, ECHO, CIWQS (630 W Freedom Ave) RCRA NONGEN/NLR (650 W Freedom Ave)
West	Fletcher Retarding Basin	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Qoa: Dissected older alluvial gravel and sand, undeformed, age late Pleistocene/California Department of Conservation
Soil Series: Description/Source	Metz: Somewhat excessively drained, loamy sands on alluvial fans. A typical profile of Metz soils consists of loamy sand from 0 to 17 inches below ground surface (bgs); stratified sand to sandy clay loam from 17 to 40 inches bgs; silt loam and silty clay loam from 40 to 46 inches bgs; and stratified sandy clay loam from 46 to 60 inches bgs./USDA Soil Survey
Groundwater Flow Direction/Source	Southwest/Topographic map interpretation
Estimated Depth to Groundwater/ Source	132 feet bgs/GeoTracker information for nearby site at 2525 Orange Olive
Surface waters on the subject property or adjoining sites	Yes, Fletcher Retarding Basin located adjoining to the west
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1896 - 1932	Unimproved land	Topographic maps
1938 - 1946	Agricultural land (orchard or row crops)	Aerial photographs
Circa 952 - Present	Addition of current residences on northeastern portion (610 and 612 W. Fletcher St., later 2442 and 2444 N. American Way)	Aerial photographs, city directories, site observation, interview
Circa 1963	Addition of outdoor storage yard for contractor storage use	Aerial photographs
1970 - Present	Outdoor storage area for Adair Roofing and other contractors (540 and 560 W. Fletcher St, later 2390 N. American Way)	Aerial photographs, city directories, site observation, interview
Circa 1985 - Present	Addition of current commercial building along southern portion/Entertainment venue (2390 N. American Way)	Aerial photographs, city directories, site observation, interview

The following historical addresses were associated with the subject property: 540, 560, 610, and 612 West Fletcher Street. These addresses were also researched as part of this assessment.

The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site. With the exception of some landscaped areas, the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, development of the subject property likely involved grading activities which would have removed near surface soils or would have potentially involved the addition of imported soils for the landscaped areas. The landscaped areas observed were relatively small in square footage, and covered with ground cover and/or trees which also can reduce direct contact with any potential remaining concentrations in the soil. Based on the presence of the site improvements, no further action related to the former agricultural use of the subject property appears warranted at this time. If redevelopment of the subject property is planned for residential use and the site improvements are removed, exposing unimproved areas, the user of the report should contact the local planning or other applicable oversight agency department to determine whether sampling relating to the former agricultural use of the subject property is required prior to redevelopment activities.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1938	Agricultural land (orchard)	NORTH: Road, followed by agricultural land (orchard) and small residence EAST: Agricultural land (orchard) SOUTH: Vacant or agricultural land WEST: Agricultural land (orchard
1946	No significant changes, except site is in row corp production	NORTH: No significant changes EAST: No significant changes SOUTH: Row crops WEST: Excavation pit
1952	Developed with a residence in northeastern portion with associated outbuildings	NORTH: Road, followed by several small structures resembling residences EAST: Agricultural land and small residence SOUTH: No significant changes WEST: No significant changes, although pit appears to be filled or graded
1963	Addition of outdoor storage yard in central and northern portions, one additional residential building shown adjacent to the previous structure	NORTH: No significant changes EAST: Outdoor storage yard SOUTH: No significant changes WEST: Current basin
1966	No significant changes	NORTH: Road, followed by residences, vacant land, and early configuration of current school EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
1972, 1977	No significant changes	NORTH: Residences or small commercial buildings, outdoor storage yard, and school EAST: No significant changes SOUTH: Outdoor storage yard WEST: No significant changes, pond is filled with water
1985	Residence in the northern portion, vacant land in the central portion, and current commercial improvements in the southern portion	NORTH: Current residences and school EAST: Road, followed by current industrial building SOUTH: Vacant graded land and outdoor storage yard WEST: No significant changes
1989, 1990, 1995, 2005, 2009, 2012, 2016	Current residential and commercial improvements and storage yards; two small buildings are present along the north portion by 2002	NORTH: No significant changes EAST: No significant changes SOUTH: Road, followed by current commercial/industrial buildings WEST: No significant changes

Based on a review of aerial photographs, the subject property appears to have been developed for agricultural use from at least 1938 to 1946, please refer to Section 3.0 for additional information.

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 City Directories

A search of historical city directories was conducted for the subject property utilizing EDR. Directories were reviewed in approximate five-year increments from 1920 to 2015. The first listing for the subject property appeared in 1970. The following table summarizes the results of the city directory search:

Year(s)	Address - Occupant Listed
1970	540 W. Fletcher St. - Adair Roofing Inc.
1975	560 W. Fletcher St. - Adair Roofing Inc. 610 W. Fletcher St. - Residential tenant 612 W. Fletcher St. - Residential tenant
1980	560 W. Fletcher St. - Capital Lumber Co. 610 W. Fletcher St. - Residential tenant 612 W. Fletcher St. - Residential tenant 2390 American Way - Residential tenant
1986	610 W. Fletcher St - Residential tenant 2390 American Way - American Way Cultural Center, Adair Enterprises, Adair Roofing Inc, TLA Enterprise
1991	2390 American Way - American Way Cultural Center, Adair Enterprises, Adair Glenda L, Adair J, Adair Roofing Inc, TLA Enterprise
1994	2390 American Way - Adair Enterprises, Adair Roofing Inc., American Way Cultural Center, TLA Enterprise
1995	2390 American Way - Adair Roofing Inc, American Way Cultural Center, Adair Enterprises
1999	2390 American Way - Adair Enterprises, Adair Roofing Inc, American Way Cultural Center 2442 American Way - Richard Adair
2004	2390 American Way - Richard Adair, American Way Cultural Center
2009	2390 American Way - Adair Roofing Inc, American Way Cultural Center 2442 American Way - Richard Adair 2444 American Way - Occupant unknown
2015	2390 American Way - Adair Enterprises, Adair Roofing Inc, American Way Cultural Center 2442 American Way - Richard Adair 2444 American Way - Occupant unknown

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review.

3.4 HISTORICAL TOPOGRAPHIC MAPS

A search of historical topographic maps was conducted for the subject property utilizing NETR Online (www.historicaerials.com). Topographic maps were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1896, 1901, 1906, 1912, 1922	Unimproved land	NORTH: Road, followed by unimproved land EAST: Unimproved land SOUTH: Unimproved land WEST: Small structure and unimproved land
1932, 1935, 1946	No significant changes	NORTH: Road, followed by unimproved land and small structure EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
1950, 1956	No significant changes	NORTH: Fletcher Avenue, followed by unimproved land, agricultural land, and small structure EAST: Agricultural land SOUTH: Agricultural land WEST: Sand pit
1966, 1974, 1982	Mostly unimproved land and small structure	NORTH: Fletcher Avenue, followed by several small structures EAST: Mostly unimproved land and small structure SOUTH: Unimproved land WEST: Fletcher Retarding Basin

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the historic topographic map review.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Orange County Health Care Agency (OCHCA)	June 1, 2020	Website	N/A	Response pending, refer to Section 1.5

No records were on file with the OCHCA for the subject property addresses at 2390 - 2444 North American Way.

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Orange Fire Department (OFD)	June 1, 2020	Email	Barbara Reid	Records discussed below

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
2020	American Way Cultural Center (2390 N. American Way)	Violation notice	Violation for failure to maintain fire lane free of obstruction, lack of knox box access, failure to renew/ apply for permits, failure to maintain fire detection equipment, sprinkler systems, extinguishing systems, and failure to abate electrical hazards

Review of information on file for the subject property at the OFD did not reveal any significant environmental concerns.

As of this writing, no response has been received regarding the historical addresses on West Fletcher Street. Refer to Section 1.5.

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Orange Building Department (OBD)	June 1, 2020	Website	N/A	Response pending, refer to Section 1.5

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Orange Planning Department (OPD)	June 1, 2020	Website	N/A	No evidence indicating the existence of AULs on file for the subject property

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Orange County Assessor's Office	June 1, 2020	Website	N/A	Information obtained is discussed below

Records Summary

APN	374-632-08
Acreage	3.99 acres
Construction Date	Not provided
Building Square Footage	Not provided
Current Owner	Not provided

4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	June 1, 2020	Website	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	June 1, 2020	Website	N/A	Records discussed below
CA DTSC EnviroStor	June 1, 2020	Website	N/A	No records on file
South Coast Air Quality Management District (AQMD)	June 1, 2020	Website	N/A	Records discussed below

California DTSC HWTS Database Summary

Occupant	Year(s)	Hazardous Waste Generated	Amount (Tons)
Bob Wetzel Concrete, Inc. (2390 N American Way)	2014	Off-spec, aged, or surplus organics	0.1485
L&K Rental, Inc. (2390 American Way)	N/A	No waste manifests	N/A
Mr. Landscape (2390 American Way)	N/A	No waste manifests	N/A

Based on the small quantity and single occurrence of organics in 2014, this listing is not expected to represent a significant environmental concern.

South Coast AQMD Database Summary

A & M Tree Specialist, located at 2390 North American Way, was identified in the AQMD database. No permits to operate, notices of violation, or notices to comply were listed. Based on the lack of information indicating significant hazardous substance or petroleum product use, this listing is not expected to represent a significant environmental concern.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management (CalGEM)	June 1, 2020	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	June 1, 2020	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Facility Name	L & K Rental, Inc, Bob Wetzel Concrete, Inc., Mr. Landscape
Address	2390 American Way
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	CA HWTS (3), CA HAZNET
Comments	The subject property was identified in the state Hazardous Waste Tracking System (HWTS) database. According to the listings, Bob Wetzel Concrete, Inc. generated 0.1485 ton of off-specification, aged or surplus organics in 2014. No additional pertinent information was provided. Based on the small quantity and single occurrence, this listing is not expected to represent a significant environmental concern. The two remaining HWTS listings do not include waste manifests and are not expected to represent a significant environmental concern.

Facility Name	Fletcher Coating Co.
Address	426 Fletcher Avenue, 2467 N. American Way
Distance & Direction	Adjoining to the east (across N. American Way)
Hydrologic Position	Up- to cross-gradient
Databases Listed	HIST UST, EMI, NPDES, CIWQS, CERS, RCRA NONGEN/NLR (2), FINDS, ECHO, CERS, CERS HAZ WASTE
Comments	This adjoining site was identified as a former hazardous waste generator. Wastes included hydraulic oil. No violations were noted. According to the historical UST listing, this site was equipped with one 2,000-gallon gasoline and one 5,000-gallon gasoline USTs, installed circa 1979/1980. No specific removal information was provided. This site was also identified as a storm water permit site. According to the listing, this appears to be associated with an industrial storm water protection plan typically associated with industrial exterior storage areas. Violations were noted regarding maintenance of of scrap metal bins, 55-gallon drums, and blow down water from an air compressor. Other minor administrative violations were noted. This property is listed as a FINDS and ECHO site in association with the above RCRA listing. No violations or

	enforcement actions were identified on the EPA websites Envirofacts and ECHO. Based on the nature of the listings and lack of reported violations, it is not expected to represent a significant environmental concern. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	SSR Performance
Address	590 W. Freedom Ave.
Distance & Direction	Adjoining to the south (across W. Freedom Ave.)
Hydrologic Position	Down- to cross-gradient
Databases Listed	RCRA NON-GEN/NLR
Comments	This adjoining site was identified as a previous hazardous waste generator as of 2018. Specific wastes were not identified and no violations were noted. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	General Coatings Corporation
Address	600 W. Freedom Ave.
Distance & Direction	Adjoining to the south (across W. Freedom Ave.)
Hydrologic Position	Down- to cross-gradient
Databases Listed	RCRA-LQG, FINDS, ECHO
Comments	This adjoining site was identified as a large quantity generator of hazardous wastes starting in 2008, with an operations start date listed as 1983. Wastes generated including ignitable waste, barium, cadmium, chromium, lead, MEK, spent halogenated solvents, and spent non-halogenated solvents. Violations were identified; however, no additional pertinent information was provided. This property is listed as a FINDS and ECHO site in association with the above RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. Based on the nature of this listing and lack of violations, it is not expected to represent a significant environmental concern. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Duratech Industries Inc.
Address	630 W. Freedom Ave.
Distance & Direction	Adjoining to the south (across W. Freedom Ave.)
Hydrologic Position	Down- to cross-gradient
Databases Listed	RCRA-SQG, FINDS, ECHO, CIWQS

Comments	This adjoining site was identified as a small quantity generator of hazardous wastes starting in 2000, including ignitable waste and corrosive waste. No violations were identified. This site was also identified as a storm water permit site. This property is listed as a FINDS and ECHO site in association with the above RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. Based on the nature of this listing and lack of violations, it is not expected to represent a significant environmental concern. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	C& TJ Incorporated DBA JJ Foll Company
Address	650 W. Freedom Ave.
Distance & Direction	Adjoining to the south (across W. Freedom Ave.)
Hydrologic Position	Down- to cross-gradient
Databases Listed	RCRA NON-GEN/NLR
Comments	This adjoining site was identified as a former hazardous waste generator, which no longer generated wastes as of 2006. Specific wastes were not identified and no violations were noted. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Bill's Sweeping Service, Inc.
Address	715 Fletcher St.
Distance & Direction	250 feet northwest (across Fletcher Avenue)
Hydrologic Position	Cross-gradient
Databases Listed	LUST, AST, SWEEPS UST, CA FID UST, HIST CORTESE, CERS
Comments	This nearby site was identified as a historical UST and closed LUST site. According to the LUST listing, a release of gasoline to soil only was cleaned up under oversight of the City of Orange and Santa Ana Regional Water Quality Control Board (RWQCB). The case was closed on April 7, 1988. AEI visited the SWRCB GeoTracker website; however, no additional information was available online. Based on the media affected (soil only), regulatory status, and relative distance, this nearby release site is not expected to represent a significant environmental concern to the subject property. Additional listings: This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Not interviewed	N/A	N/A	N/A	Not interviewed; refer to Section 1.5
Key Site Manager	Mr. Richard Huntington	June 3, 2020	In Person	2019	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	No
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	No
Are you aware of any known plans for site redevelopment or change in site use?	N/A	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	No

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	Unknown	No
Additional information provided:	N/A	Mr. Richard Huntington stated that there are no hazardous materials stored on the subject property. In addition, no auto repair activities are conducted on the subject property.

6.1.2 Past Owners, Operators, and Occupants

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)).	Information not provided

Question	Response/ Comment
Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

6.4 Environmental Lien Search

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	June 3, 2020
AEI Site Assessor(s)	Eric Young
Property Escort(s)/ Relationship(s) to Property	Mr. Richard Huntington/Owner's Representative
Units/Areas Observed	See Tenant Information table in Section 2.1.
Area(s) not accessed and reason(s)	See Tenant Information table in Section 2.1. Refer to Section 1.5 for discussion of limiting condition(s).
Other Physical Constraints	None

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers		
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other	✔	

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/ No)
Pad-Mounted	1	Southern California Edison	Unknown	No	Yes

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

7.1.2 Other

Cleaning supplies, paints, and detergents are stored in 2390 North American Way. All chemicals were packaged in consumer quantities. SDSs for these chemicals were observed in the facility management office.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI did not observe any of the items listed in the above Reconnaissance Findings Summary table.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the approximate age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the approximate age of the subject property buildings, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

AEI did not observe interior areas of the residential structures. Refer to Section 1.5.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or

unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property buildings to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/30/2020 has revealed that there

are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 13 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 12 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 31 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CA DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the CA DRYCLEANERS list, as provided by EDR, has revealed that there are 2 CA DRYCLEANERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-11-2002
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Address for site should be corrected to read: 426 Fletcher Avenue, Orange, CA 92865. Arrived on site at approximately 10:00 a.m., clear skies, approximately 70 degrees F. Met with Kurtis Breeding and new CEO (Don?). Reviewed the site monitoring reports and SWPPP. SWPPP was

FLETCHER COATING CO (Continued) **U001577488**

in place in October 2001. Mr. Breeding stated that the business operated from 7:00 a.m. to 3:30 p.m., and that he is the primary contact for storm water and has received some training via his consultant (Jorgensen). SWPPP appeared to be adequate. Conducted site inspection. In general, the site appeared to be in compliance; however, we did identify a few areas that required better housekeeping. Stated that pipes/supplies are kept covered with tarp in the event of rain. Areas needing improvement included the following: (1) scrap metal bins needs to be kept covered with tarp, in the event of rain; (2) several 55-gallong drums need to be collected and stored appropriately; (3) rust from pipes on ashalt-covered area needs to be swept on a routine basis; (4) blow-by water from compressor needs secondary containment; and (5) tracking from trucks along American Way needs to be swept on a routine basis.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Complaint Inspection
Eval Date: 05-19-2004
Violations Found: No
Eval Type: Industrial Storm Water Complaint Inspection
Eval Notes: On May 19, 2004. Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with John Bejarano the Plant Manager. The SWPPP and inspection logs could not be reviewed at this time due to the fact that they were locked up in another office and there was no access to them. Upon inspection of the facility the following observations were made. The facility was about 50 percent asphalt and 50 percent loose sediment and rock. The majority of operations occurred indoors or under some type of coverage. Although, a large amount of materials are stored outside. Based on previous analytical sampling it is staff's best professional judgment that the sampling points are not reflective of the actual discharges that can occur on this site. Therefore the site should re-evaluate this portion of the program. Large amounts of rust was noted in the ground located in the northwest portion of the facility.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	412678
Site Name:	WATER HEATER MAN INC
Violation Date:	02-20-2018
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 02/20/2018. OBSERVATION: All hazardous waste containers shall be closed at all times except when adding or removing waste. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste. Violation was corrected during this inspection.
Violation Division:	Orange County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	412678
Site Name:	WATER HEATER MAN INC
Violation Date:	03-31-2015
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 09/08/2015. The drums storing used oil were unmarked. All containers storing hazardous waste must be marked with the required identifying information. Labels were provided. Violation corrected.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-31-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Robert Villasenor, facilitator, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were stored closed. The receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. We discussed acceptable on site hazardous waste storage times for the volume of used oil that they generate. This facility is a conditionally exempt small quantity generator (CESQG). The facility had spill response directions and emergency contact numbers posted for the employees. report PDF to cswhminc@earthlink.net [Truncated]

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-08-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Aboveground Petroleum Storage Tank (APST) inspection. Met with Mike Carter, President. The facility is a Tier I Qualified Facility. The following petroleum storage capacity was observed: - 2,000 gallons diesel, double-walled tank - 220 gallon waste oil, double-walled tank - 200 gallon new motor oil, single-walled tank with containment The 2,000 gallon diesel APST has tertiary containment and the 200 gallon new motor oil APST is stored within fiberglass containment. Containment was observed free of liquid and debris at this time. A Spill Prevention Control & Countermeasures (SPCC) Plan dated 2019 was available for review and is complete. Employee training records were available for review. Inspection records of APSTs were available for review. This inspection report was sent to info@billssweeping.net.

Eval Date:	03-29-2016
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous waste inspection. Mike Carter, vice president, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled with the required information. The receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility had a SPCC plan, which contained spill response directions and emergency contact numbers. report PDF to mike@streetsweeper.com

Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine above ground petroleum storage tank (APST) inspection. Mike Carter, vice president, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included oils, used oil, and diesel fuel. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. The plan was on site and available for review. SPILL CONTROL: Secondary containment and spill response equipment was provided as described in the plan. INSPECTIONS: Weekly inspections were conducted as described in the plan. Inspection records were on site and available for inspection. EMPLOYEE TRAINING: Annual employee SPCC training was discussed. report PDF to [Truncated]

Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date: 08-21-2017
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SWPPP
Violation Notes: SWPPP needs to be updated to include the new media used on site for sand blasting and a calibrated pH meter.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-03-2003
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a routine compliance inspection of the above facility on April 3, 2003. The SWPPP was lacking the following items: a certification page, training records, and monitoring program. Review of previous Annual Reports showed extremely high levels of Al, Fe, Zn, and N+N. The elevated levels of N+N are most likely due to the neighboring mulch manufacturer. Staff could not locate any pollution sources of nitrates originating from the permitted facility. The industrial processes are all under cover with a berm surrounding the area. There are three (3) discharge locations that discharge directly to the adjacent flood channel.
Eval Division: Water Boards
Eval Program: INDSTW

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-03-2018
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a compliance inspection of the above facility on July 3, 2018. Staff met with Mr. William McGuire. The SWPPP and training records were not reviewed. The facility is currently in Level 1 for Iron and Aluminum and Level 2 for Zinc. The

CUNDIFF STEEL FABRICATING & ER (Continued) **U001577483**

Level 2 ERA Action Plan BMP implementation schedule notes that a collection and percolation system will be installed near sampling locations #1 and #3. The facility is in the process of constructing the two collection systems. A memo uploaded in SMARTS, dated 02/07/2018, explains that Cundiff Steel is in the process of achieving zero discharge from their facility by constructing on-site infiltration systems. Another memo uploaded in SMARTS, dated 06/15/2018, notes the infiltration systems will be completed by the 3rd or 4th quarter of 2018, which is outlined in the Level 2 ERA Action Plan BMP implementation schedule.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-21-2017
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a compliance inspection of the above facility on August 21, 2017. The SWPPP was reviewed and needs to be updated to include the new media used for sand blasting. It was also determined the facility has been using litmus paper to sample pH since moving into Level 1 and Level 2 status. The facility needs to purchase a calibrated meter with 3 pH buffers for sampling. Subsequent employee training needs to be conducted to ensure proper meter calibration and use. A site walk was then conducted. A scrap metal stockpile was observed uncovered in an unpaved dirt lot. Mr. Piscopo explained the stockpile is covered with a tarp during rain events as the cost of the tarp is too expensive to maintain. A garden hose was observed on site and is used to hose down the trucks on the property. Mr. Piscopo explained the water does not flow off property (instead ponds) and he is aware this would constitute a Non-Storm Water Discharge and a violation of the permit if it flowed off the site.

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Charlie Piscopo, Operations Manager. The facility is a Very Small Quantity Generator of waste oil and oily absorbent generated from structural steel fabrication, including cutting and welding. Walked throughout the facility and observed the facilityG s Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facilityG s EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to charlie@cundiff-steel.com.

Eval Notes:	On site for a routine hazardous waste inspection. Charlie Piscopo, operations manager, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. The records for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. We reviewed on site hazardous waste accumulation / storage times. The facility had written spill response directions and emergency contact numbers for the employees. report PDF to charlie piscopo

Eval Notes:	From: Krall, Joyce Sent: Wednesday, March 02, 2016 9:12 AM To: 'Charlie Piscopo' Subject: RE: HAZARDOUS WASTE INSPECTION Hi Charlie, Thank you for your reminder email. I apologize for overlooking your first email! In order to make a hazardous waste determination, have a representative sample of the waste bag house dust analyzed by a state certified lab for California regulated heavy metals (Title 22, CCR). Perform a Total Threshold Limit Concentration (TTLC) analysis and if necessary, a Soluble Threshold Limit Concentration (STLC) analysis. Submit a copy of the lab analysis report to this Agency for evaluation and comment. If waste is not analyzed or if the lab analysis results are above Title 22, CCR hazardous waste criteria, then the waste must continue to be handled as hazardous waste. Please contact me if you should have any questions. Regards, Joyce Krall, REHS Hazardous Waste Specialist III Environmental Health, Health Care Agency [Truncated]

Eval Notes: HARVEST LANDSCAPE ENTERPRISES INC 2351 BATAVIA ST ORANGE 92665 On site to conduct a new business hazardous waste generator inspection. The

HARVEST LANDSCAPE ENTERPRISE INC. (Continued) **S123518759**

business owner was identified as Harvest Landscape Enterprises Inc. Ignacio Santiago, mechanic, was present for the inspection and provided consent to inspect. The facilityG hazardous waste generator EPA ID # was CAL000313540. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside work and parking areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. The containers were marked with the required identifying information. We discussed maintaining the facilityG s records for the removal of its hazardous waste for 3 years from the date of removal and have available for inspection.. Written spill response directions and emergency contact numbers must be provided [Truncated]

Eval Date: 12-12-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site to conduct a Hazardous Waste reinspection. The facility was cited violation I053 during the last routine inspection on 8/22/18 for storing waste on site past its allowable accumulation time of 180 days. No waste was observed on site past accumulation time limits. A manifest dated 9/14/18 was available for review showing hazardous waste being hauled offsite. Violation I053 is corrected, no outstanding violations remain. Please ensure hazardous waste is disposed of within 180 days of its starting accumulation date. This report was sent to Maria Lopez at maria@hlei.us.

V&E TREE SERVICE (Continued) **U001577508**

Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous waste inspection. Vic Eggers, vice president, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. We discussed the identifying information to be marked on containers storing hazardous waste. The receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A hazardous waste emergency response card was posted in the office area. The facility also had a SPCC plan, that contained emergency contact information and spill response directions. report PDF to vic@vetreeservice.com

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for an above ground petroleum storage tank (APST) inspection. Vic Eggers, vice president, was present for the inspection. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. The facility had a Spill Control and Countermeasure (SPCC) plan. Its most recent review date was 12-3-08. The plan was on site and available for review. SPILL CONTROL: Inspection found bulk petroleum storage secondary containment and available spill response sorbent materials were provided. We discussed the completion of the SPCC plan to include this information. INSPECTIONS: Owner reported that monthly inspections were being conducted as described in the plan. However, inspection records were not maintained. You must keep a record of the inspections and tests performed, signed by the appropriate supervisor or [Truncated]

CERS HAZ WASTE:

Name:	K & H MARINE
Address:	2387 N BATAVIA ST
City,State,Zip:	ORANGE, CA 92865
Site ID:	181882
CERS ID:	10544863
CERS Description:	Hazardous Waste Generator

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-30-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS K & H MARINE 2387 NORTH BATAVIA ST ORANGE, CA 92865 CO0069028 EPA ID: CAL00009641 = ACTIVE On site to conduct a Hazardous Waste Generator inspection of the facility. Met this date with Bob Grant, Owner, who granted consent to enter and inspect and take photos if necessary. Facility is a boat maintenance site which conducts occasional boat oil changes as well. Hazardous waste generated on site is Waste Oil and Waste Oil Filters. Guidance documents provided this date. EPA ID is active. Manifests from Action Oil were available for review. Emergency information is posted in the office. Walked the entire lot and did not observed any signs of hazardous waste dumping. Looked in the facility dumpster also. No signs of leakage or any other signs of chemicals from any of the boats on site or other equipment (Engine blocks/engines). Labels were placed on the waste oil and waste filters this date. Report emailed to Bob Grant at info@knhmarine.com. [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-10-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Debbie Hamby, corporate secretary, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The receipts for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. Spill response directions and emergency contact numbers must be provided for the employees. A hazardous waste emergency response card was provided for use if needed. report PDF to lasfloreslancscape@sbcglobal.net

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval General Type: Other/Unknown
Eval Date: 07-02-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Facility’s 2-18-15 submission on CERS claims APST at both the 2341 and 2257 N Pacific St. addresses. Inspection to be conducted. APSA submission states documents are stored at facility. APSA submissions accepted. >> Haz mat inventory forms reviewed. Chemical compositions did not identify petroleum products.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-11-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Aboveground Petroleum Storage Tank (APST) inspection. Met with Robert Glines, Maintenance Manager, The facility has the following aboveground petroleum storage capacity: - (x15) 300 gallon totes of various inks - (x4) 55 gallon drums of ink excluded recyclable material - (x2) 55 gallon drums of waste oil - 275 gallon tote of blanket wash - (x2) 55 gallon drums of ink The APSTs on site have secondary containment, which are free of liquid and debris. Absorbent material and spill socks are stored in areas where petroleum is kept. The facilityG s Spill Prevention Control and Countermeasures (SPCC) Plan, dated 10/8/15, was available for review. Employee training records for employees that conduct oil-handling activities were available for review. Weekly inspection logs of APSTs were available for review. No APST violations were observed this date. This inspection report was sent to bobg@fisherprinting.com.

Eval General Type:	Other/Unknown
Eval Date:	11-10-2015
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	This Agency received and reviewed the facility's documents submitted to address violation (R029), which was cited on the 9-9-15 hazardous waste recycler inspection report. The documents addressed the requirements for ERM that is transported out of country for recycling, except for 25162.1 (b)(4). For each individual shipment, the value of the shipment material must be identified. Violation (R029) was corrected, with the caveat that the value of the material be identified as required. report PDF to Bob Glines

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Robert Glines, Maintenance Manager. The facility is a Small Quantity Generator of used oil and oily debris generated from maintenance of machinery. Walked throughout the facility and observed the facilityG s Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The facility is also recycling waste ink. Various colors of ink are consolidated in 55 gallon drums, which are then picked up by Caneda America and shipped to a manufacturing facility in Canada. The ink is filtered and reused as an ingredient to make virgin black ink, which is then sold back to Fisher Printing. Containers were observed stored closed and properly labeled as Excluded Recyclable Material. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for [Truncated]

Registry ID: 110008276043
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110008276043

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine above ground petroleum storage tank (APST) inspection. Jason Vos, Sandwood Enterprises, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There was equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included tanks and an occasional drum. We reviewed the SPCC plan templates available on our website occupainfo.com for use. SPILL CONTROL: Secondary containment and spill response equipment was reviewed. INSPECTIONS: We discussed the required SPCC inspections and record keeping. EMPLOYEE TRAINING: Annual oil handling employee SPCC training was reportedly conducted. We recommend maintaining training records and having the records available for inspection. report PDF to Jason Vos

Eval Notes:	On site for a routine hazardous waste inspection. Rick Tankersley, welder, was present for the inspection and provided consent to inspect. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. We discussed maintaining containers storing waste oil closed, except when adding or removing waste, and marking the containers with the required identifying information. The receipts for the removal of the facility's hazardous waste were maintained on site and reviewed with Jason Vos via a phone follow up. A hazardous waste emergency response card was posted in the office. report PDF to jason@swentinc.com

Eval Notes:	On site to conduct an Aboveground Petroleum Storage Tank reinspection. The facility was cited violation I031 on 11/1/18 for not having a Spill Prevention Control & Countermeasures (SPCC) Plan prepared or being implemented. This Agency had received a copy of the facility's SPCC Plan on 12/18/18, but corrections were required. Corrections have since been made and the facility's SPCC Plan is complete. Monthly inspections are being conducted and records were available for review. Violations I031 is corrected, no outstanding violations remain. This inspection report was sent to Jason Vos at jason@ocsandbagger.com.

Eval Notes:	On site to conduct a routine Aboveground Petroleum Storage Tank (APST) inspection. The facility has the following aboveground petroleum storage capacity: - 1,000 gallon clear diesel tank - 500 gallon red dye diesel tank - 500 gallon used oil tank - 55 gallon drum hydraulic oil The APSTs on site have appropriate secondary containment measures. An SPCC (Spill Prevention Control & Countermeasures) Plan has not been prepared and implemented. The facility was cited violation I085 on 8/10/16 for not having an SPCC Plan in place. This violation is being closed and recited. Discussed and provided the Tier I Qualified Facility SPCC Plan template with Jason Vos. Please note, because your facility is maintaining aboveground petroleum storage in quantities greater than 1,320 gallons, it is subject to the requirements of the Aboveground Petroleum Storage Act, and is required to implement an SPCC Plan. Please complete the SPCC Plan within 30 days and immediately begin [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Walked throughout the facility and observed hazardous waste storage. Containers were observed properly labeled and stored closed. A 500 gallon used oil tank was observed with used oil in containment underneath it. Jason Vos stated he had moved the tank the tank recently and a valve had broke, which has been fixed, and that he would pump the used oil in containment back into the tank. Municipal trash were observed free of hazardous waste. Manifests and emergency response plan were available for review. The following violations were cited 12/1/16 and are now corrected: I474 - Failure to have hazardous waste manifests available for review; manifests were available for review during this inspection I617 - Failure to keep hazardous waste containers kept closed when not actively being poured into; hazardous waste containers were observed closed I352 - Failure to have an active EPA ID number; the facility an [Truncated]

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-02-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Garrett Pack, general manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included double walled tanks, single walled tanks, and 55 gallon drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 4-15-13. The plan was on site and available for review. SPILL CONTROL: Secondary containment was provided as described in the plan, except for the transmission fluid and hydraulic oil ASTs. INSPECTIONS: SPCC monthly inspections were reported conducted as described in the plan. We discussed the requirement to maintain [Truncated]

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous waste inspection. Gary Pack, general manager, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The signed off manifests and receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility had both a business emergency plan and a SPCC plan on site which contained spill response directions and emergency contact numbers. report PDF to gpack@the markco.com

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

MAGMA FINISHING, CORP. (Continued) **1010313511**

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D010
. Waste name: SELENIUM

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 4645.5

Waste code: D008
Waste name: LEAD
Amount (Lbs): 2752.3

Waste code: D010
Waste name: SELENIUM
Amount (Lbs): 2752.3

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
Amount (Lbs): 60

Site Name:	MAGMA FINISHING CORP
Violation Date:	04-23-2014
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 05/05/2014. Three 55 gallon drums of hazardous waste caustic cleaner were stored adjacent to the cleaning tank line. These drums were not marked with the required identifying information. Also, a cubic yard sack storing the hazardous waste used filters along with a drum storing hazardous waste polishing dust were observed not marked with their respective physical state and hazardous property. All drums storing hazardous waste must be marked with the required identifying information. Labels were provided for use.

Violation Description:	Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes:	Returned to compliance on 06/25/2014. One 275 gallon tote of corrosive liquid waste, full and marked with an accumulation start date of 2/13, was observed on site during the facility's hazardous waste 6-26-13 inspection. This waste was subsequently removed under manifest on

MAGMA FINISHING CORP (Continued) **S113178162**

2-13-14 and disposed of at TSDF in Santa Fe Springs California. The facility had accumulated and stored the hazardous waste on site greater than the approved accumulation time. A cubic yard sack storing an accumulation of used plating filters was observed on site this date. Its accumulation start date was not marked. A 55 gallon drum storing an accumulation of polishing dust waste was also observed on site this date. The drum was marked with an accumulation start date of 5/13. An additional estimated 10 pounds of polishing dust waste was scattered on the polishing room floor, which was in use during the inspection. Note: the owner advised me that the facility's hazardous powder coating waste is mixed in with the hazardous polishing [Truncated]

Violation Date:	02-22-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Floor sweepings that included sandpaper and what appeared to be sanding/ polishing/grinding dust were observed in the dumpster. Per Mr. Estrada, grinding and polishing is done on brass objects. The generator must have knowledge that brass is made up of different metals including copper and zinc, both of which are regulated Title 22 metals. If you believe this is not the case, a hazardous waste determination must be made on the sweepings. If this is not completed, the sweepings are deemed to be hazardous waste and must be disposed as such.

Eval Date:	02-22-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Met with President Francisco Estrada of Magma Finishing Corp. Consent was provided to enter and conduct inspection activities and to collect photos as needed. Hazardous waste observed onsite included: - (1) 275 gallon tote containing acidic waste liquid. The container was labeled properly and stored closed. - (1) poly drum containing in-line rinse filters and sanding/grinding dust. The container was open and was not labeled (See violations I617 and I400, respectively). - (1) large plastic bag used to store in-line filters and sanding/grinding dust. This container was not labeled (see violation I400 below). Hazardous waste manifests were available for review. The facilities dumpster bin was inspected. Floor sweepings including used sand paper and sanding/grinding dust was observed in the dumpster. Mr. Estrada stated that sanding and grinding is done on brass metal. Brass is composed of copper and Zinc [Truncated]

Eval Notes:	On site to review the 4-23-14 inspection report with Francisco Estrada, president. Inspection disclosed the correction of violations (W013, W016). Containers storing hazardous waste were closed and marked with the required information. Note: the cubic yard sack remained unmarked with its start accumulation storage date since that date was unknown. The president informed me that he is arranging to have all accumulated hazardous waste removed by a registered hauler within the next several weeks. I requested that copies of the removal documents be provided to this Agency to address the open violation. Also, he informed me that he had collected the scattered hazardous waste polishing dust from the polishing room for storage within a closed and labeled drum. The polishing room was in use at the time of inspection. The room was observed having been cleaned. The storage drum was observed. He reported that he had collected debris and dust from the floor of the outside dumpster [Truncated]

Eval Notes:	On site for a routine hazardous waste inspection. Francisco Estrada, president, was present for the inspection and provided consent to inspect and take regulatory photos if needed. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its shared dumpster area. We discussed the handling of the facilityG s hazardous waste polishing room dust. The room was in use. Dust was observed both scattered and piled on the floor. Dust was adhered to the walls. A common trash can was located within the room. It was dusted. I reminded the owner that the release of hazardous waste into the environment must be prevented. He advised me that the room was maintained daily to properly manage the hazardous waste. We discussed the observation on the 6-14-12 inspection report of an on site G drum of sulfuric acid labeled as hazardous waste dated 1/14/12G . There was no storage container of waste sulfuric on [Truncated]

Eval Date:	05-28-2014
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	emailed snapshots of manifests showed removal of one sack of copper and nickel filters and two 55 G drums of polishing dust by Miles Chemical to Beatty NV TSDF. On site inspection will confirm removal and record keeping. HW storage can be inspected for compliance. The 6-14-12 violation regarding HW with sulfuric acid was closed (records showed 660 gallons of NaOH solutions were removed 8-15-12).

Eval Date: 11-06-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Walked throughout facility and observed processes and hazardous waste storage. The facility conducts plating, polishing and sandblasting, and powder coating. Plating lines consist of caustic, copper, and nickel sulfate, which each have additional dragout and rinse tanks. Francisco stated as solutions lose grade they are transitioned into the sequential dragout/rinse tanks. Solutions are topped off as needed. Containment underneath the plating line was observed dry. A 55 gallon drum of acid is used for stripping solution and is changed out approximately once per year. The facility has a room for polishing and grinding of steel and brass parts. A 55 gallon drum was observed for storage of dust floor sweepings and is hauled with plating filters. Sand blasting media was tested 10/2008 and is non hazardous, processes have not changed. Francisco stated the facility does not powdercoat regularly and has not yet had [Truncated]

Eval Notes:	INSPECTOR COMMENT: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Debi Foushee, Office Manager, and Marina Orellana, Admin. Walked throughout the facility. Observed hazardous waste storage areas. The containers storing the drained used oil filters, waste antifreeze, and used oil all do not have the start accumulation date written on the hazardous waste label. The waste antifreeze and used oil labels are faded and not legible. Discussed hazardous labeling requirements with Ms. Orellana and Ms. Foushee. New hazardous waste stickers were provided to the facility. The used oil secondary containment contains approximately 5 gallons of used oil. Discussed proper hazardous waste containment with Ms. Orellana and Ms. Foushee. Manifests were available and reviewed. Employees are reported to be trained.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 222
. Waste name: Oil/water separation sludge

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 792

SUMMIT INTERCONNECT INC., ORANGE DIVISION (Continued) **1000168729**

. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D011
. Waste name: SILVER

. Waste code: D033
. Waste name: HEXACHLOROBUTADIENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS)

SUMMIT INTERCONNECT INC., ORANGE DIVISION (Continued) **1000168729**

ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-22-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a change in business ownership hazardous waste inspection. Change in business ownership is scheduled for 10-1-15. Al Delalto, new owner, and Gordon Williams, former owner, were present for the inspection and provided consent to inspect. The inspection included a walk of the facility's outside lot and trash storage areas. I did not observe hazardous waste as run off on the ground. I did observe hazardous waste in the shopG s trash dumpster, as cited above. The business was in process of obtaining its owner specific / site specific EPA ID number. The storage of the shop's hazardous waste was inspected. We reviewed the required identifying information to be marked on containers storing hazardous waste. Labels were provided for use. The receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year was reviewed. Written spill response directions and emergency contact information must [Truncated]

Description:	Caller states during warehouse operations, a fork-lift punctured a 300 gallon non-regulated ink tote. Of the 300 gallons, 110 gallons of the ink was released to a trailer, concrete floor and an asphalt parking lot. A contractor has been hired to conduct the clean-up. No waterways were impacted and the spill has been stopped.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 01/11/2019. Overfill failed to test by Oct 2018. Corrected 1/11/19.

Eval Notes:	Received phone call from Jaimy Haines, YRC Worldwide Corp. Safety Manager, following up on my messages left morning of Saturday, 11/7/2015, requesting more information to spill that occurred at the Orange Terminal. Mr. Haines reviewed incident report verifying 20 gallons of Diesel Exhaust Fluid was spilled onto concrete when driver was transferring the fluid from a 275-gallon storage container to the holding reservoir of the truck. A mechanical error occurred that caused the reservoir to overflow. No fuel was involved. The fluid was contained on the concrete with absorbent material, no release off the property occurred. The company’s environmental response contractor,

REDDAWAY (Continued) **S113128035**

	Patriot Environmental Services, was dispatched and began cleaning spill about 5 am. All the absorbent material, including the pads, were placed in a 55-gallon drum and retained on site to be managed off site as a California regulated hazardous waste. Informed Mr. Haines the waste needs to be within [Truncated]

Eval Notes:	On site for a routine hazardous waste inspection. Bob Bohi, terminal manager, and Frank Lococo, area safety manager, were present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were labeled. We discussed the marking of containers storing hazardous waste with the required identifying information. A container storing a hazardous waste must be marked with the hazardous property of the waste. We discussed maintaining hazardous waste storage containers closed except for when adding or removing waste. USF briefed me on their policies and procedures for handling chemical spills and damaged chemical goods. We discussed USFG s OES spill [Truncated]

Eval Date: 08-31-2011
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: warm and sunny. Maintenance shop closed over 2-years ago; SWPPP needs to be updated. Has a fuel island with a nearby shed containing automotive fluids for topping off trucks' fluids. Shed is slab-on-grade construction with no integrated secondary containment; oil stain on floor has migrated between wall and slab and extends outside on the foundation. Found a hose on the old maintenance building with large patch of wet asphalt; Contact reports that hose is used for washing off windshields; SWPPP says to use a squeegie/bucket. Found a sump box in gutter leading to edge of facility; sump is filled with debris and not noted in SWPPP.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Enforcement Action:
Site ID: 545694
Site Name: USF Reddaway Inc 575 ORG
Site Address: 2200 N BATAVIA
Site City: ORANGE
Site Zip: 92865
Enf Action Date: 08-31-2011
Enf Action Type: Industrial Storm Water Enforcement
Enf Action Description: Industrial Storm Water Enforcement
Enf Action Notes: Contact was advised to update SWPPP to reflect closed maintenance shop and sump box. Instructed to discontinue using hose and to use squeegie/bucket as described in SWPPP and to investigate cause of leak from fluid storage shed and clean the spill through wall/foundation.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-10-2014
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine hazardous waste inspection. Brad Banks, superintendent, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the facility's lot. I did not observe hazardous waste in the facility's trash or as run off on the ground. Annie Mejia, office manager, was consulted regarding waste disposal records and the possible generation of other hazardous waste such as waste paints, solvents, and resins. She clarified that the gallon containers piled next to the waste storage drums, that I had thought could possibly be hazardous waste, were mastic product. The storage of the shop's hazardous waste was inspected. The facility had two drums for the storage of used oil. Approximately 17 gallons of used oil was in storage. Records show that the facilityG s last removal of hazardous waste was in 2011. This facility is a CESQG. A CESQG may accumulate up to 27 [Truncated]
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-05-2016
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine hazardous waste inspection. Met with Leo of San Marino Roofing Co. Consent was provided to enter and conduct inspection activities. Hazardous waste observed onsite included a 55 gallon drum containing waste oil. The container was properly labeled and stored closed. Waste manifests were available for review. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping in the trash dumpster.

City,State,Zip: ORANGE, CA 92865
Site ID: 132752
CERS ID: 92665MRCLL230BR
CERS Description: Toxic Release Inventory

Violations:
Site ID: 132752
Site Name: SUMMIT INTERCONNECT INC. ORANGE
Violation Date: 01-26-2017
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 05/26/2017. In various areas within secondary containment, hazardous waste accumulation was observed. Although Mr. Hernandez has indicated that secondary containment is cleaned on a daily basis, this is not happening due to the observation of copper crystallization within secondary containment. As part of your daily inspection checklist, this "housekeeping" must be conducted. A reinspection will be conducted to ensure that secondary containment is kept clean and without hazardous waste build-up.
Violation Division: Orange County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Violation Date: 02-25-2014
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f
Violation Notes: Returned to compliance on 01/27/2015. The facility's PBR tank systems, except for possibly Regen #1, #2, #3 as discussed below, were not current in the required PE certification. PE assessment of the hazardous waste treatment tank systems that references the standards listed in CCR title 22, 66265.192 is required. Obtain the required report and submit a copy to this Agency for our review.

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 03/01/2019. One cubic yard box of solid hazardous waste plating debris in the 90 day storage area was observed not covered. Please note containers containing solid hazardous waste must be covered when waste is not being added into the container. Obtain a cover for this container within 30 days.

Eval Notes:	Please be advised that this Agency has reviewed the Tiered Permitting Financial Assurance Self Certification submitted to CERS on 3/29/17. Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to initial closure cost, $5,816.91, submitted in 2016. The 2017 CCE should be, at a minimum, your 2016 CCE multiplied by an inflation factor of 1.013. Your 2016 CCE was submitted and approved at $5,869.26. Therefore, your minimum 2017 amount must be $5,869.26 x 1.013 = $5,945.56. Corrected Certification Of Financial Assurance Form and breakdown of costs must be submitted within 30 days of this inspection report.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	Reviewed 2017 Financial Assurance documents submitted to CERS on 2/26/17. Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to initial closure cost, $5,816.91, submitted in 2016. The 2017 CCE should be, at a minimum, your 2016 CCE multiplied by an inflation factor of 1.013. Your 2016 CCE was submitted and approved at $5,869.26. Therefore, your minimum 2017 amount must be $5,869.26 x 1.013 = $5,945.56. Corrected Certification Of Financial Assurance Form and breakdown of costs must be submitted within 30 days of this inspection report.

Eval Notes: On site to conduct a routine Hazardous Waste inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility is a Large Quantity Generator of RCRA Hazardous Waste. The facility is comprised of four buildings, Building 1 is administration and 2-4 are for production of printed circuit boards where Hazardous Waste is generated. The perimeter of the facility and each building was inspected. Building 2 G Developer, etch, photoresist strip and oxide processing lines were observed. Process bath solutions are plumbed to below grade holding tanks, which are plumbed via below grade piping to the treatment system outside of building 3. Waste cupric chloride from the etch bath is plumbed to an enclosed hazardous waste tank behind the building, and gets hauled off as hazardous waste. Waste copper routing dust from board drilling is captured in a baghouse unit outside the building. The dust is managed as Excluded Recyclable Material (ERM). [Truncated]

Eval Notes:	On site for a hazardous waste re-cycler inspection. Ray Hernandez, environmental manager, was present for the inspection and provided consent to inspect and take regulatory related photos. The facility's router and drilling dust containing copper fines are handled as excluded recyclable material (ERM) and removed on bill of lading for off site recycling. The storage containers of the facilityG s ERM were inspected. The containers were marked with the required identifying information. The receipts for the removal of ERM for off site recycling were on site and available for inspection. The records for 2014 was reviewed. The facility had an emergency response plan and a disaster recovery plan. Written spill response directions and emergency contact numbers were provided for the employees. Name: SUMMIT INTERCONNECT INC. ORANGE
Address: 230 W BRISTOL LN
City,State,Zip: ORANGE, CA 92865
Site ID: 132752
CERS ID: 10657684
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 132752
Site Name: SUMMIT INTERCONNECT INC. ORANGE
Violation Date: 01-26-2017
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 05/26/2017. In various areas within secondary containment, hazardous waste accumulation was observed. Although Mr. Hernandez has indicated that secondary containment is cleaned on a daily basis, this is not happening due to the observation of copper crystallization within secondary containment. As part of your daily inspection checklist, this "housekeeping" must be conducted. A reinspection will be conducted to ensure that secondary containment is kept clean and without hazardous waste build-up.

MARCEL ELECTRONICS (Continued) **S106835091**

Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f
Violation Notes:	Returned to compliance on 01/27/2015. The facility's PBR tank systems, except for possibly Regen #1, #2, #3 as discussed below, were not current in the required PE certification. PE assessment of the hazardous waste treatment tank systems that references the standards listed in CCR title 22, 66265.192 is required. Obtain the required report and submit a copy to this Agency for our review.

Eval Notes: On site for a hazardous waste re-cycler inspection. Ray Hernandez, environmental manager, was present for the inspection and provided consent to inspect and take regulatory related photos. The facility's waste rinse waters are handled as excluded recyclable material (ERM) and recycled on site for reuse. The facility's router and drilling dust containing copper fines are also handled as ERM and transported off site on a bill of lading for recycling. The storage containers of the facilityG s ERM were inspected. The manager informed us that the router dust collection outside of bldg 4, handled as ERM, had no hazardous property. We discussed the use of generator's knowledge or laboratory analysis in the hazardous waste determination of the router dust collection outside of bldg 4. Please contact this Agency for assistance when conducting hazardous waste determinations. The facility's records included receipts for the removal of ERM for off site recycling. The [Truncated]

Eval Notes:	Please be advised that this Agency has reviewed the Tiered Permitting Financial Assurance Self Certification submitted to CERS on 3/29/17. Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to initial closure cost, $5,816.91, submitted in 2016. The 2017 CCE should be, at a minimum, your 2016 CCE multiplied by an inflation factor of 1.013. Your 2016 CCE was submitted and approved at $5,869.26. Therefore, your minimum 2017 amount must be $5,869.26 x 1.013 = $5,945.56. Corrected Certification Of Financial Assurance Form and breakdown of costs must be submitted within 30 days of this inspection report.

Eval Notes: On site to conduct a Hazardous Waste Recycler inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility manufactures printed circuit boards. Throughout the facility there are 2 buildings where boards are drilled into, which generates fine hazardous copper routing dust. For both buildings the dust is captured through baghouse vacuum units and the dust is managed as Excluded Recyclable Material (ERM). Containers of the routing dust were observed stored closed, but not properly labeled. The ERM labels were missing the hazardous property of the dust (toxicity). The labeling was corrected during the inspection, violation corrected on site. Bills of lading for the removal of the ERM off site for recycling were available for review. The facilityG s contingency plan was available for review. Employee training records were available for review. This inspection report was sent to Ray Hernandez at ray.hernandez@summit-pcb.com.

router and drilling dust containing copper fines are handled as excluded recyclable material (ERM) and removed on bill of lading for off site recycling. The storage containers of the facilityG s ERM were inspected. The containers were marked with the required identifying information. The receipts for the removal of ERM for off site recycling were on site and available for inspection. The records for 2014 was reviewed. The facility had an emergency response plan and a disaster recovery plan. Written spill response directions and emergency contact numbers were provided for the employees. Report PDF to rhernandez@mei4pcbs.com

Eval Division: Orange County Environmental Health
Eval Program: HWRecycler
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-26-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste treatment tiered permitting Conditionally Exempt - Limited (CEL) inspection for unit FTU #5 (Oil/Water Separator). Ray Hernandez, environmental manager, was present for the inspection. The secondary containment beneath the unit was dry. Documentation maintained on site and available for review included: Written operating instructions for the unit, Manifests documenting the treatmentG s recovered used oil removal, Wastewater discharge permit 2-1-446, expiration date 2-28-15, Emergency Response Plan, which provided spill response directions, Disaster recovery plan, which provided emergency contact information. report PDF to rhernandez@mei4pcbs.com

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-19-2010
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Facility manufactures/packages drywall mud, sheetrock tape, patch compounds, and similar products. Rainfall occurred throughout inspection. Contact asserts that 3 staff are assigned to sweep the site daily. Storm drain inlet for the production area discharges to sewer; when a certain volume is exceeded, remainder is discharged to street. Main yard (shipping) is neat and orderly. Runoff from main yard is black apparently from tire wear. Storage yard (NW portion) is in need of better housekeeping; area is littered with paper bits and fibers from tape manufacturing. Production area is mostly covered against stormwater but tracking and splashing subject spilled powder to runoff. Found no effective effort to protect against spills at dust collectors: collection barrels were found overflowing, soft downtubes were missing, and areas were heavily coated in dust. Trash and sludge found on ground around trash compactor. Packing peanuts and foam bits found floating in runoff from an outdoor enclosed room; a roof drain from the adjacent main building discharges onto the floor of this room and picks up trash and carries it outside. Found three air compressor blow-down lines plumbed to drain to ground outside; one drain line was actively discharging. A compressor was found outside without a cover and a heavy coating of oil around the motor. On roof, found several dust collection components with small to large piles of dust beneath them; some of the dust had been carried to roof edges by rainwater, leaving a thick mucky deposit. Various parts found stored uncovered outside on racks along a building; some parts were rusting in the rain and others consisted of motors and electrical parts.

WESTPAC MATERIALS (Continued) **1000254743**

Eval Source: CERS

Eval General Type: Case Development Inspection
Eval Date: 12-07-2010
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Weather was sunny and warm. Rain had occurred over the last weekend. Observed that all real and threatened non-storm water discharges from air compressors had been eliminated. The single outdoor and uncovered air compressor had had the oil cleaned off its exterior. The outside storage racks had been covered with tarp; operations staff expressed dissatisfaction with this solution and will pursue an alternative that may consist of constructing a fixed overhand and relocated racks under that. Housekeeping on roof is substantially improved; no significant deposits of powder observed. Contact reported that he was now inspecting roof routinely; recent inspections had shown equipment leaking powder onto the roof. Contact reported that these leaks have since been fixed. Dust collection drums have been replaced with a larger hopper and a flexible fabric chute installed to convey dust into the hopper. Flexible chute was on ground nearby and Contact re-installed it immediately. Still observed powder coating most everything in the vicinity. Although hopper area is covered by a high roof, the recent rain has left a distinct line showing where powder had deposited on ground beyond edge of roofline and rainfall had washed it away. Contact will consider other ways to minimize airborne powder but housekeeping will be a continuous issue in this area. Trash compactor area and northwest storage yard have also been cleaned and so has the outbuilding where styrofoam pellets are handled. SWPPP has not yet been updated.

Trash and sludge found on ground around trash compactor. Packing peanuts and foam bits found floating in runoff from an outdoor enclosed room; a roof drain from the adjacent main building discharges onto the floor of this room and picks up trash and carries it outside. Found three air compressor blow-down lines plumbed to drain to ground outside; one drain line was actively discharging. A compressor was found outside without a cover and a heavy coating of oil around the motor. On roof, found several dust collection components with small to large piles of dust beneath them; some of the dust had been carried to roof edges by rainwater, leaving a thick mucky deposit. Various parts found stored uncovered outside on racks along a building; some parts were rusting in the rain and others consisted of motors and electrical parts.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-07-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: field verification
Eval Division: Orange City Fire Department
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Case Development Inspection
Eval Date: 12-07-2010
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Weather was sunny and warm. Rain had occurred over the last weekend. Observed that all real and threatened non-storm water discharges from air compressors had been eliminated. The single outdoor and uncovered

WESTPAC MATERIALS (Continued) **1000254743**

air compressor had had the oil cleaned off its exterior. The outside storage racks had been covered with tarp; operations staff expressed dissatisfaction with this solution and will pursue an alternative that may consist of constructing a fixed overhand and relocated racks under that. Housekeeping on roof is substantially improved; no significant deposits of powder observed. Contact reported that he was now inspecting roof routinely; recent inspections had shown equipment leaking powder onto the roof. Contact reported that these leaks have since been fixed. Dust collection drums have been replaced with a larger hopper and a flexible fabric chute installed to convey dust into the hopper. Flexible chute was on ground nearby and Contact re-installed it immediately. Still observed powder coating most everything in the vicinity. Although hopper area is covered by a high roof, the recent rain has left a distinct line showing where powder had deposited on ground beyond edge of roofline and rainfall had washed it away. Contact will consider other ways to minimize airborne powder but housekeeping will be a continuous issue in this area. Trash compactor area and northwest storage yard have also been cleaned and so has the outbuilding where styrofoam pellets are handled. SWPPP has not yet been updated.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be

WESTPAC MATERIALS (Continued) **1000853847**

considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Notes:	On site for a routine hazardous waste inspection. Garret Walker, area fleet supervisor, was present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The inspection included a walk of the lotG s perimeter. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled with the

	required information. We discussed the handling of e-waste. I provided an OCCUPA fact sheet regarding the handling of universal waste. The records for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility must provide written spill response directions and emergency contact numbers for their employees. We discussed providing employee access to the required information. report PDF to garret walker [Truncated]

Eval Date:	05-22-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine hazardous waste inspection. Met with Fleet Manager Dave Andersen of Coca Cola Bottling Co. Mr. Andersen provided consent to enter and conduct this inspection. Hazardous waste observed on-site included used oil, used oil filters, waste antifreeze, and universal waste in the form of aerosols. Hazardous waste was properly labeled and stored closed. Hazardous waste manifests were available for review. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 212

FEDEX FREIGHT ONG (Continued) **1000819101**

. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 232
. Waste name: Pesticides and other waste associated with pesticide production

. Waste code: 272
. Waste name: Polymeric resin waste

. Waste code: 281
. Waste name: Adhesives

. Waste code: 291
. Waste name: Latex waste

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 512
. Waste name: Other empty containers 30 gallons or more

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 561
. Waste name: Detergent and soap

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-18-2004
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Watkins Motor Lines is a freight transportation facility. Various types of freight are transported to the facility and transferred from one trailer to another (Photo 2). The facility maintains a covered concrete dock located near the center of the facility and an administrative office located along the east side of the concrete dock. The remainder of the facility is paved. Maintenance for the tractor trucks and trailers was observed to be conducted in a designated area by a subcontracted service company. Hazardous materials, including waste motor oil are transported off site by a subcontractor. The trucks and trailers are routinely washed by a subcontracted truck washing company and the wash water is contained and removed off site by the subcontractor. Spill kits were present in the concrete dock area in the event of a minor spill. Storm water at the facility is conveyed to a series of drop inlets located throughout the driveway surrounding the concrete loading dock (Photo 3). Storm water runoff associated with the washing area and maintenance area is conveyed to a drain located near the southwest corner of the facility (Photos 4 and 5). Storm water discharge is sampled at this location prior to discharging into the city storm water culvert located along the southern perimeter of the site.

Hazardous Waste Summary:

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 171
. Waste name: Metal sludge (see 121)

CIRTECH INC (Continued) **1000398155**

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D008
. Waste name: LEAD

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 200

Waste code: D002

CIRTECH INC (Continued) **1000398155**

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 41600

Waste code: D008
Waste name: LEAD
Amount (Lbs): 1820

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
Amount (Lbs): 5280

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002

FXI, INC (Continued) **1000158746**

. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D005
. Waste name: BARIUM

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

FXI, INC (Continued) **1000158746**

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D005
. Waste name: BARIUM

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: partly cloudy and warm. SWPPP is undated and in process of being updated; several versions presented, most lack site plan; agreed to use site plan last revised 3/1/2000. Site is mostly orderly but littered with bits of fresh and weathered foam, including neglected, moldy-looking patches of foam dust. Contact cites lack of personnel and broken sweeping equipment for the condition of the site. Plastic sheeting is piled at the SE corner and not secured against wind. Leaks, or evidence of leaks, found from various process equipment. Heavy litter and weathered plastic sheeting found in NW portion of site near compactor. Storm drain inlet basins are littered; pipes are fitted with sliding gate valves left either open or partly-open; default position is not known to Contact.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-04-2013
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: Warm and sunny. Single SWPPP presented for review. Overall housekeeping is significantly improved; Contact reports that the broken sweeper has been replaced. Sweeping is done each working day during second shift when foam buns are moved around. Leaf-blower is used for hard-to-reach places but frequency is not known to Contact. Form cone impressions still in secondary containment at E tank area. Curtains on unloading pumps have been replaced. Found steam water leaking from pipe next to metering house. North rail line and trash compactor are littered. Unknown demo job left debris next to north loading platform. Outlet #4 has heavy litter and debris inside basin. Abandoned plastic sheeting found at SE corner. Improper leak response

FXI, INC (Continued) **1000158746**

found at conveyor and in bun storage area. Improper storage of decomissioned baler found. Evidence of steam water discharge from pipe behind Tank 108 found.

Violation Description:	Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes:	Returned to compliance on 12/22/2016. Monthly SPCC inspections as described in the plan were not being conducted. The monthly inspection log that was provided for review did not contain the required SPCC elements. Implement SPCC inspections for the qualifying above ground petroleum storage. Submit a copy of the first month inspection record to this Agency within 30 days.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to adequately discuss in the SPCC Plan all applicable bulk storage containers, or no discussion regarding all applicable bulk storage containers included.
Violation Notes:	Returned to compliance on 12/22/2016. Inspection found the facility's qualifying APSA petroleum storage to differ from what was described in the plan. Additional totes and drums of petroleum products (oils, WD40, diesel) were observed on site that had not been identified in the plan. Also, the actual contents of the baler building's ASTs differed from what was in the plan. Please update the plan's qualifying APSA storage table to be current. Submit a copy of the table to this Agency within 30 days.

Eval Notes: On-site for a routine inspection. Met with Douglas Darling this date. This is a Program Level 1 CalARP facility as well as a Federally Regulated site. The facility has approximately 680,000 pounds of TDI. The federal threshold is 10,000 pounds. The site has filed electronically with EPA, and has made several changes (dates and amount of TDI on-site). The last electronic change was made on 04/14/14. The EPA RMP anniversary date for this facility is 05/09/18. The latest version of the RMP hs been submitted and approved by OCHCA. The California Program Level 1 certification is signed 04/26/13. The emergency eye wash and showers are being inspected and were tested this date. An email from Rosie Flores of the City of Orange Fire Department dated 04/22/14 verified that there have been no releases with off-site consequences within the last 5-years. 1) Five Year Accident History: According to Mr.Darling there have been no releases of TDI within the last 5-years [Truncated]

Eval Notes:	On site for a routine non-RCRA (CA regulated) hazardous waste large quantity generator (LQG) inspection. Doug Darling, Regional EHS manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The facility's outside lot was walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A non-RCRA LQG is a generator of equal to or greater than 1000 kg (roughly 2200 pounds) of non RCRA hazardous waste during a single month during a one year period. In the last year, the facility's records documented that this facility was a non-RCRA hazardous waste LQG. The storage of the facility's hazardous waste was inspected. The containers were stored closed and with [Truncated]

Eval Notes: INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Eval Notes:	On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Eval Notes:	On-site for a routine inspection. Met with Douglas Darling this date. This is a Program Level 1 CalARP facility as well as a Federally Regulated site. The facility has approximately 680,000 pounds of TDI. The federal threshold is 10,000 pounds. The site has filed electronically with EPA, and has made several changes (dates and amount of TDI on-site). The last electronic change was made on 04/14/14. The EPA RMP anniversary date for this facility is 05/09/18. The latest version of the RMP hs been submitted and approved by OCHCA. The California Program Level 1 certification is signed 04/26/13. The emergency eye wash and showers are being inspected and were tested this date. An email from Rosie Flores of the City of Orange Fire Department dated 04/22/14 verified that there have been no releases with off-site consequences within the last 5-years. 1) Five Year Accident History: According to Mr.Darling there have been no releases of TDI within the last 5-years [Truncated]

Eval Notes:	On site for a routine non-RCRA (CA regulated) hazardous waste large quantity generator (LQG) inspection. Doug Darling, Regional EHS manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The facility's outside lot was walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A non-RCRA LQG is a generator of equal to or greater than 1000 kg (roughly 2200 pounds) of non RCRA hazardous waste during a single month during a one year period. In the last year, the facility's records documented that this facility was a non-RCRA hazardous waste LQG. The storage of the facility's hazardous waste was inspected. The containers were stored closed and with [Truncated]

Eval Notes:	INSPECTOR COMMENTS: This inspection report is being written in order to correct the inspections reports dated 05/16/13, 05/17/13, 04/25/14 and 06/085/15. After reviewing the RMP, Federal (EPA) Certification and the Hazardous Assessment completed by RMP Professionals in April 2013 it appears that this facility is not a Program Level 1 but is in fact a Program Level 2 facility with an off-site consequence. The following was taken into account in making this determination: 1) The EPA RMP Submission dated 05/09/13 lists an off-site consequence of 0.01 miles (no off-site consequence) 2) The April 2014 Hazard Assessment by RMP Professionals on page 7 lists the off-site consequence as <0.0128 miles (no off-site consequence) 3) The April 2014 Hazard Assessment by RMP Professionals on page 11 lists the off-site consequence as 0.128 miles (off-site consequence) 4) The April 2014 Hazard Assessment by RMP Professionals on page 12, figure 7 (MARPLOT) shows no [Truncated]

Eval Notes:	INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Eval Notes:	On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes:	Returned to compliance on 12/22/2016. Monthly SPCC inspections as described in the plan were not being conducted. The monthly inspection log that was provided for review did not contain the required SPCC elements. Implement SPCC inspections for the qualifying above ground petroleum storage. Submit a copy of the first month inspection record to this Agency within 30 days.

Eval Notes:	On-site for a routine inspection. Met with Douglas Darling this date. This is a Program Level 1 CalARP facility as well as a Federally Regulated site. The facility has approximately 680,000 pounds of TDI. The federal threshold is 10,000 pounds. The site has filed electronically with EPA, and has made several changes (dates and amount of TDI on-site). The last electronic change was made on 04/14/14. The EPA RMP anniversary date for this facility is 05/09/18. The latest version of the RMP hs been submitted and approved by OCHCA. The California Program Level 1 certification is signed 04/26/13. The emergency eye wash and showers are being inspected and were tested this date. An email from Rosie Flores of the City of Orange Fire Department dated 04/22/14 verified that there have been no releases with off-site consequences within the last 5-years. 1) Five Year Accident History: According to Mr.Darling there have been no releases of TDI within the last 5-years [Truncated]

quantity generator (LQG) inspection. Doug Darling, Regional EHS manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The facility's outside lot was walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A non-RCRA LQG is a generator of equal to or greater than 1000 kg (roughly 2200 pounds) of non RCRA hazardous waste during a single month during a one year period. In the last year, the facility's records documented that this facility was a non-RCRA hazardous waste LQG. The storage of the facility's hazardous waste was inspected. The containers were stored closed and with [Truncated]

Eval Notes: INSPECTOR COMMENTS: This inspection report is being written in order to correct the inspections reports dated 05/16/13, 05/17/13, 04/25/14 and 06/085/15. After reviewing the RMP, Federal (EPA) Certification and the Hazardous Assessment completed by RMP Professionals in April 2013 it appears that this facility is not a Program Level 1 but is in fact a Program Level 2 facility with an off-site consequence. The following was taken into account in making this determination: 1) The EPA RMP Submission dated 05/09/13 lists an off-site consequence of 0.01 miles (no off-site consequence) 2) The April 2014 Hazard Assessment by RMP Professionals on page 7 lists the off-site consequence as <0.0128 miles (no off-site consequence) 3) The April 2014 Hazard Assessment by RMP Professionals on page 11 lists the off-site consequence as 0.128 miles (off-site consequence) 4) The April 2014 Hazard Assessment by RMP Professionals on page 12, figure 7 (MARPLOT) shows no [Truncated]

Eval Notes: INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Eval Notes:	On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Eval Notes:	On-site for a routine inspection. Met with Douglas Darling this date. This is a Program Level 1 CalARP facility as well as a Federally Regulated site. The facility has approximately 680,000 pounds of TDI. The federal threshold is 10,000 pounds. The site has filed electronically with EPA, and has made several changes (dates and amount of TDI on-site). The last electronic change was made on 04/14/14. The EPA RMP anniversary date for this facility is 05/09/18. The latest version of the RMP hs been submitted and approved by OCHCA. The California Program Level 1 certification is signed 04/26/13. The emergency eye wash and showers are being inspected and were tested this date. An email from Rosie Flores of the City of Orange Fire Department dated 04/22/14 verified that there have been no releases with off-site consequences within the last 5-years. 1) Five Year Accident History: According to Mr.Darling there have been no releases of TDI within the last 5-years [Truncated]

Eval Notes:	On site for a routine non-RCRA (CA regulated) hazardous waste large quantity generator (LQG) inspection. Doug Darling, Regional EHS manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. The facilityG s operations and the waste generated were discussed. The facility's outside lot was walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A non-RCRA LQG is a generator of equal to or greater than 1000 kg (roughly 2200 pounds) of non RCRA hazardous waste during a single month during a one year period. In the last year, the facility's records documented that this facility was a non-RCRA hazardous waste LQG. The storage of the facility's hazardous waste was inspected. The containers were stored closed and with [Truncated]

Eval Notes:	INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Eval Notes:	On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 135
. Waste name: Unspecified aqueous solution

DUNHAM METAL PLATING INC. (Continued) **1000352574**

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 350

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
Amount (Lbs): 18000

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	07-30-2019
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Regional Board staff conducted a compliance inspection of the above facility on July 30, 2019. Staff met with Mr. Rafael Salcedo, Plant Supervisor. The SWPPP and training records were reviewed. The SWPPP was dated May 2019 and training records were last documented in June 2016. Mr. Salcedo stated they had a recent training but would have to look for the documentation. The facility is currently in Level 1 for Nitrite + Nitrate. A site walk was conducted and the facility collects samples from one outfall. Mr. Salcedo explained they use sand bags to help collect their sample since the water runs off as sheet flow. Housekeeping is conducted monthly using a push broom. Mr. Salcedo stated they get run-on from their neighbor and this could be the reason for the high parameter results. He went on to explain that the City of Orange came for their yearly inspection and noted the staining on the ground and went to speak to their neighbor about cleaning up the run-on. Filter cakes are stored in lidded scrap metal bins under cover. Mr. Salcedo noted the bins are picked-up once a month. Raw chemicals are stored on secondary containment in locked chemical storage shed. Totes of diesel exhaust fluid are stored under a covered canopy. Some air compressor condensate was observed on the ground. Mr. Salcedo noted the condensate does not travel further than observed.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS

Eval General Type:	Other/Unknown
Eval Date:	12-30-2002
Violations Found:	No
Eval Type:	Construction Storm Water Compliance Evaluation
Eval Notes:	ON December 30, 2002 under clear conditions the above referenced facility was viewed from the street by Regional Board staff. Staff attempted to enter the business, but discovered it was closed for the Holidays until January 6, 2003. Staff spoke with office personnel from an adjoining property, who told them that the plant was closed until that date. From the facility's entrance, staff could see through the business' windows, a grouping of 15-20 poly carboys that had hazardous materials labeling. These containers appeared to have adequate containment. All other manufacturing operations appeared to be contained indoors. The facility was secured and staff could not enter.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-04-2001
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	A routine compliance inspection was conducted for this facility on 1-04-01 at 1208. Mr. Jeffrey Stanfill, quality assurance manager, was onsite to accompany staff memebers through the site. Mr. David Juarez was not on site. The facility boundaries have changed; the adjacent property, which was once not a part of the property, is a part now. A new NOI needs to be submitted to reflect these changes. Minor staining

DUNHAM METAL PLATING INC. (Continued) **1000352574**

was seen on the northern portion of the property, adjacent to empty, washed, containers ready for disposal. An oily out of use compressor was also seen here. Staff indicated that all spills must be cleaned up immediately and out of use equipment that is in contact with storm water should be covered. On the southern portion of the property, a few out of use containers were not stored properly. Also, old rusting equipment was observed. Iron oxide staining was seen in this area also. Per Mr. Stanfill, there is only one dishcharge/sampling point on the property. Staff saw two storm swales leading off the property. Both need to be sampled. A copy of the SWPPP was requested, however could not be found because Mr. Juarez was not in. A phone call will be made to follow up with the details of this inspection and to obtain a copy of the SWPPP.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Complaint Inspection
Eval Date: 05-19-2004
Violations Found: No
Eval Type: Industrial Storm Water Complaint Inspection
Eval Notes: On May 19, 2004. Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Enrique Hernandez the acting manager. The SWPPP was not able to be reviewed due to the fact that it was locked up in the managers office and he was not present. Upon inspection of the facility the following observations were made. A filter cake bin was stored directly next to the storm water swale as well as, several used empty drums. Staff instructed site personnel to move the bin and drums to a area that is not so close to the storm drain swale. Furthermore, staff informed site personnel that they must have access to the SWPPP at all times during the hours of business.

FINDS:
Registry ID: 110008261816
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110008261816

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

		NO SITES FOUND			

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/30/2020
Date Data Arrived at EDR: 02/05/2020
Date Made Active in Reports: 02/14/2020

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020
Date Data Arrived at EDR: 02/05/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 01/30/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Version Date:	2012
West Map:	5641294 ANAHEIM, CA
Version Date:	2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

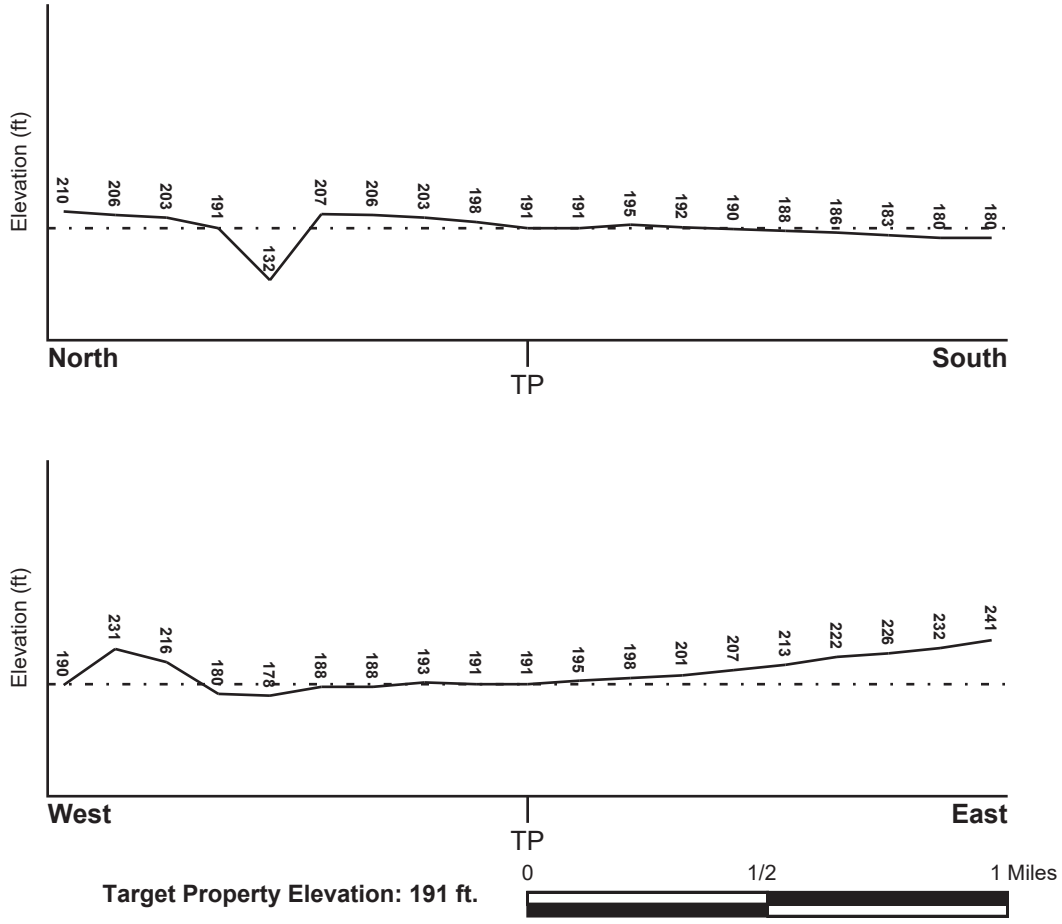
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06059C0153J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06059C0014E	FEMA Q3 Flood data
06059C0154J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ORANGE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	GREAT WESTERN CARPET CUSHION CO INC
Site EPA ID Number:	CAD008352361
Groundwater Flow Direction:	Southeast
Measured Depth to Water:	less than 140 feet.
Hydraulic Connection:	Information is not available regarding the hydraulic connection between aquifer(s) underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

10G	1/2 - 1 Mile SSW	SE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: PITS

Soil Surface Texture: extremely gravelly coarse sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	extremely gravelly coarse sand	Not reported	Not reported	Max: 141 Min: 42	Max: Min:

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	5 inches	59 inches	extremely gravelly sand	Not reported	Not reported	Max: 141 Min: 42	Max: Min:

Soil Map ID: 4

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
2	16 inches	40 inches	stratified sand to sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
3	40 inches	46 inches	silt loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
4	46 inches	59 inches	stratified sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Rocio Quinones <rquinones@aeiconsultants.com>
Tue 6/9/2020 12:59 PM
To: Barbara Reid <breid@cityoforange.org>

Hello again,

I would also like to request fire department records for the following addresses:

540 W Fletcher St, Orange, CA 92865

560 W Fletcher St, Orange, CA 92865

610 W Fletcher St, Orange, CA 92865

612 W Fletcher St, Orange, CA 92865

Please let me know if you have any questions.

Thank you,
Rocio

Subject: Public records request - 2390 N American Way

Hello Barbara

I am conducting an environmental assessment at the following location:

2390-2444 (evens) North America Way
Orange, CA 92865

For the purposes of my report, I am requesting any records that your department may have on:
-historical or present hazardous materials usage;
-historical or present underground/aboveground storage tanks (USTs/ASTs); and,
-any Notice of Violation and/or Notice to Comply issued.

Please let me know if you have any questions.

Thanks,

Rocio Quiñones
Project Manager

ORANGE CITY FIRE DEPARTMENT

176 S.Grand Street • Orange, CA 92866
(714)288-2541 • fireinspection@cityoforange.org

VIOLATION NOTICE

03/16/2020

American Way Cultural Center - MLI#30847
2390 N American WY
Orange, CA 92865

The following violations were noted during an inspection of your facility on Monday March 16, 2020

ORDER TO COMPLY: Violations shall be corrected upon receipt of this notice.
An inspection to determine compliance with this Notice will be conducted on T.

Non-compliance may result in additional inspection fees and the issuance of a civil citation.

Violation Code	Count
CFC 503.4 Maintain fire lane free of obstruction	1

Recheck violation record automatically created from a recheck request.
Original Violation Remarks: Maintain fire lane free of obstruction. CFC 503.2.1Provide access road of at least 20 foot width in back alley.

CFC 506.1 Knox box access required by code official — 1

Recheck violation record automatically created from a recheck request.
Original Violation Remarks: Where access to or within a structure or an area is restricted because of secured openings or where immediate access is necessary for life saving or firefighting. The fire code official is authorized to require a key box to be installed and access maintained.Verify current keys in knox box are functional once all key-operated hardware on exit doors are ready.

CFC 105.6 Renew / Apply for and post FD permit(s) for — 1

Recheck violation record automatically created from a recheck request.
Original Violation Remarks: Renew / Apply for and post FD permit(s) CFC 105.6 for.Potential unpermitted work in nautical room on 3rd floor and entire 2nd floor above Red carpet room/Lion room.

CFC 901.6 Inspection, testing and maintenance. — 1

Recheck violation record automatically created from a recheck request.
Original Violation Remarks: Fire detection, alarm, and extinguishing systems, mechanical smoke exhaust systems, and smoke and heat vents shall be maintained in an operative condition at all times, and shall be replaced or repaired where defective. Non-required fire protection systems and

QUALIFICATIONS

Edna M. Picciolini ☐National Client Manager

B.A. – Environmental Sciences, Northwestern University, 1995

Illinois Department of Public Health Asbestos Inspector
USEPA Accredited Asbestos Building Inspector

Ms. Picciolini has served as a National Client Manager, Senior Project Manager and Group Leader, overseeing all aspects of Environmental Due Diligence, including Phase I Environmental Site Assessments (ESAs), Phase II ESAs, and Regulatory Compliance Audits. Ms. Picciolini has 22 years of environmental consulting experience. Her responsibilities have included coordinating Phase I Environmental Site Assessments (ESA) and Industrial Hygiene operations and managing national client accounts for sites throughout the United States, Canada and Mexico. Ms. Picciolini has produced several national client report formats for Phase I ESAs, as well as NEPA reports. She has prepared a Quality Assurance/Quality Control (QA/QC) database to track the report writing performance of internal staff. Her experience includes writing proposals, overseeing project budgets, invoicing, and reviewing Health and Safety Plans, Phase I ESAs, Asbestos and Lead Survey Reports, reviewing and writing Federal Communications (FCC) NEPA Compliance Checklists and FCC Environmental Assessments (EAs), and performing Phase I ESAs, asbestos surveys, mold inspections, hazardous materials surveys and compliance audits. She has been responsible for overall QA/QC of Phase I ESAs, Phase II ESAs, and Asbestos Surveys for multiple clients and portfolios. Ms. Picciolini has performed and managed Phase I ESAs on varied property types including retail shopping centers, commercial office buildings, high-rise structures, medical clinics, medical office buildings, manufacturing sites, industrial/warehouse structures, gas stations, automotive service stations, marinas, retail strip malls, multi-family residential buildings, railroad yards, airports, bulk oil storage terminals, cemeteries, funeral homes, and vacant parcels.

Ms. Picciolini's experience also includes FESOP and Title V air permitting, air emissions inventories, and a thorough knowledge of Comprehensive Environmental Response, Compensation, and Liability Act issues and reform options; Illinois Responsible Property Transfer Act (IRPTA) applicability; Risk Management Planning (RMP); Resource Conservation and Recovery Act (RCRA); Emergency Prevention and Community Right-To-Know Act (EPCRA) regulations; asbestos surveys; mold surveys; hazardous materials surveys, and project management.

Ms. Picciolini has a thorough knowledge of health and safety issues and regulations. She has provided Occupational Safety and Health Administration (OSHA) Asbestos Awareness Training to clients and in-house personnel, and has provided mentoring and training to junior staff. She has successfully managed and/or completed numerous multi-site portfolios within project budgets and under strict deadlines.

Project experience for Ms. Picciolini includes:

- **GMAC Commercial Mortgage Corporation -** Managed many multi-site portfolios of Phase I ESAs including healthcare, and emissions testing facilities throughout the State of Illinois. These projects were performed for re-financing purposes and identified recognized environmental conditions (RECs) associated with these sites. Provided client consultation regarding next steps for Phase II ESAs.
- **Confidential Client -** Managed major telecommunications account that involved over 1,300 projects, including FCC Checklist reports, FCC EAs, Phase I ESAs, and Phase II investigations, including asbestos surveys.
- **GuernseyBel** - Conducted air emissions inventory and completed the Illinois Environmental Protection Agency annual emissions summary report for a regional food topping manufacturer.
- **Confidential Client - Completed desktop reviews of prior environmental reports, historical record reviews and database reports for 950 properties. Risk analysis of each property was performed, with information summarized in an access database. Calculated worst case environmental liability loss.**
- **Confidential Client** - Maintained monthly reporting requirements for an active site remediation system. Activities include submitting wastewater effluent reports in connection with the industrial waste permit for an on-site remediation system.
- **Confidential Client** - Performed compliance reviews for a national drugstore's distribution warehouse facilities and an equipment rental company in Illinois, Wisconsin, and Indiana. Responsibilities included determination of compliance status and developing company-wide compliance manual.
- **Confidential Client** - Prepared EAs pertaining to flood plain, wetland, archaeological, and historical issues. Acted as liaison between local telecommunications clients and United States Army Corps of Engineers, Natural Resources Conservation Service, State Historic Preservation Agency, and local agencies.
- **LaSalle Investment Management**: Managed multiple Phase I ESAs, Asbestos and Lead Surveys, and Phase II ESAs for various properties throughout the United States and Canada for purchase and sale. Inspections were performed to current ASTM Standards.
- **Military Housing -** Conducted Mold Surveys in the southeast to support the privatization of base housing.
- **Client Management: Various** - Managed multiple portfolios of Phase I ESAs, Asbestos and Lead Surveys, and Phase II ESAs for various properties throughout the United States, Mexico and Canada for purchase, sale and refinances. Inspections were performed to current ASTM Standards. Performed staff training, prepared report formats, project management, staff assignments, report reviews, and client communications throughout the projects. Ensured projects

were performed within budget and timelines. Communicated updates to the client and provided consultation regarding next steps. Oversaw Phase II proposals and completion of Phase II ESAs. Analyzed subsurface data to determine if a reported release had occurred and next steps. Prepared or reviewed Health and Safety Plans for each project determining whether various safety issues were adequately addressed for on-site staff performing assessments.

- **Walgreen Co. –** Oversaw Due Diligence Services for a National Retail Drug Chain Account. Duties included training staff, overseeing all reporting, tracking, maintaining, developing, and providing training to the account. Oversaw project proposals, budgets, client contacts and updates, as well as made sure client performance standards were met. Sites were located throughout the United States and Puerto Rico.
- **Confidential Client** - Performed a Visual Survey for suspect microbial growth on drywall, which included cuts to drywall throughout the structure. The Survey was performed for an insurance carrier to determine if the moisture infiltration was occurring in several areas, or was isolated to one portion of the building.
- **Equity** - Prepared an Asbestos and Hazardous Material Survey for a defunct power plant. Oversaw basement dewatering, hazardous material identification removal, and asbestos abatement contractors throughout the project, which spanned over one year and was valued at over $3 million in total cost. Oversaw obtaining de-watering permits from the local municipalities, as well as compliance with local, state and federal regulations throughout the project.
- **Lillibridge Healthcare Services, Inc**.- Provided OSHA Asbestos Awareness Training to maintenance personnel and established a Corporate Asbestos Management Plan for a healthcare property management company.
- **Albertson** - Performed an Asbestos and Hazardous Material Survey for a defunct bakery building slated for demolition. Provided detailed reporting and drawings for asbestos removal cost estimates.

Eric Young – Project Manager

B.S. – Applied Ecology, University of California, Irvine

EPA Asbestos Building Inspector Certification (40 CFR 763 Sub E [AHERA])

Mr. Young has been in the environmental service industry since 2003. His project experience includes: Phase I Environmental Site Assessments, Phase II and Phase III subsurface investigations, site conceptual model updates reports, and quarterly groundwater monitoring events. He has successfully completed commercial, residential, and complex industrial sites.

Project experience for Mr. Young includes:

- Phase I Environmental Site Assessments
- Telecommunication Phase I Environmental Site Assessments
- Regulatory Database Review
- Historical Record Reviews
- The design and implementation of numerous Phase II soil and groundwater investigations for a variety of suspected contaminants for dues
- The design and implementation of numerous soil and groundwater investigations and remediation in conjunction with regulatory agencies.
- Groundwater Monitoring Well Installation and Monitoring Projects

Subsurface investigations have included extensive soil and groundwater testing, identification of petroleum hydrocarbons and volatile organic contamination in near surface soils, and contaminant plume delineation in soil vapor, soil and groundwater.

Rocio Quinones ☐Project Manager, Due Diligence Services

B.A. - Environmental Earth Science, University of California, Berkeley
EPA AHERA 24-Hour Asbestos Building Inspector

Mrs. Quinones has been in the environmental service industry since June 2013. Mrs. Quinones has worked as a project manager to ensure compliance and satisfaction of client requirements for Phase I Environmental Site Assessment and Limited Due Diligence Assessments as well as field data collection for Level 1 and 2 ASHRAE Energy Audits. Mrs. Quinones is accustomed to all aspects of Due Diligence Property Assessments and the needs and requirements of a variety of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), Freddie Mac, Fannie Mae, HUD, and customized client formats. Mrs. Quinones has successfully completed assessments on a variety of properties throughout California, Nevada, Washington, Florida, Texas, and Illinois. Her past experience includes environmental and geological field work in the Black Hills National Forest in South Dakota.

Project experience for Mrs. Quinones includes:

- Phase I Environmental Site Assessments
- Environmental Transaction Screens
- Regulatory Database Reviews
- Historical Records Review
- Project Coordination and Setup
- Level 1 and Level 2 ASHRAE Energy Audits
- Limited Asbestos Surveys

Rocio Quinones worked as an environmental intern while receiving her undergraduate degree from University of California Berkeley. Her education includes course material regarding environmental toxicology and energy resources.

RE: Historical Resource Summary | 2390, 2442, and 2444 North American Way, Orange, CA.

Dear Ms. Thayer:
At the request of EPD Solutions, Inc. (EPD), Urbana Preservation & Planning, LLC has evaluated the buildings at 2390, 2442, and 2444 N American Way in Orange, California, for eligibility under the criteria of the California Register of Historical Resources (CRHR) to identify whether the buildings meet the definition of historic resources pursuant to the California Environmental Quality Act (CEQA). Urbana's conclusion is that the buildings are not eligible for the inclusion on the CRHR and thus, they are assigned a CRHR status code of 6Z. The properties are documented and evaluated on Department of Parks and Recreation (DPR) 523 series forms (attached) with our findings summarized below.

Under CRHR Criterion 1, the buildings at 2390, 2442, and 2444 N American Way represent the transitionary period of Orange during the last half of the 20th century when the region evolved from a rural and agricultural environment to a commercial / industrial center. The buildings are some of the early structures completed along N American Way and Freedom Avenue from 1948 through the 1978. While 2390, 2442, and 2444 N American Way are associated with rural and commercial activity in Orange, the buildings lack sufficient significance to be found eligible under Criterion 1. Each building has been substantially altered through exterior additions which have altered the original layout of the structures and removed original materials. With those changes, the buildings lack sufficient integrity to be found eligible under Criterion 1. The buildings were not identified as maintaining an association with the lives of persons significant in national, state, or local history, and do not appear eligible under CRHR Criterion 2. The buildings were constructed in 1948, 1961-63, and 1978 for housing and commercial offices. Through the 1980s and 1990s, the buildings all underwent many changes, including exterior additions, landscaping changes, interior faux building facades, and additional outbuildings, resulting in the loss of historic materials. In their current configuration and appearance, the buildings each no longer expresses either Minimal Traditional style elements from the mid-20th century or 1970s commercial office building designs. Therefore, 2390, 2442, and 2444 N American Way are all found ineligible under CRHR Criterion 3. Further study of the buildings is not likely to yield information important in prehistory or history of the local area. It is not eligible under CRHR Criterion 4.

The buildings are in their original location and have not been moved since its construction; therefore, the properties retain integrity of **location**. The buildings were constructed in 1948, 1961-1963, and 1978, when the City of Orange was developing into a suburban community and industrial center. By 1980, the farmland and vacant lots located within proximity of the buildings were replaced by industrial buildings and suburban developments. Today, the properties are surrounded by contemporary-period warehouses and commercial office parks that have changed the surrounding context. The buildings do not possess integrity of **feeling**, **setting, or association** and no longer convey their historic association with the commercial / industrial development of Orange. The buildings have been substantially altered and possess low integrity of materials. Changes to the interior and exterior layout of the buildings through modifications and renovations have altered the layout of the structures. Therefore, the buildings possess low **materials, design, and workmanship** aspects of integrity.

Because the buildings are ineligible for inclusion on the CRHR, they do not meet the definition of an historical resource pursuant to Section 15064.5 of the CEQA Guidelines. Please refer to the attached DPR forms for additional property history and contact the office with any questions or comments.

Respectfully Submitted,

Wendy L. Tinsley Becker

e. Other Locational Data: APN: 374-632-08

***P3a. Description:** Constructed in 1978, the building at the 2390 North American Way property sits on approximately 1.28 acres and includes a single-story commercial office building (1978) and a gazebo that was added in the early 1990s. The evaluated property is located on American Way approximately 1,500-meters east of Highway 57 in Orange, California. The single-story office building has a square shaped floor plan, an asymmetrical façade, and is sited on a concrete foundation. The structure measures approximately 142' x 142' and is approximately 20,600 square feet. The building is clad in concrete (painted brown and partially patterned with wood 2" x 4"s) with wood paneled pillars and a concrete tile roof. The building features multi-light aluminum framed fixed pane windows with five wooden doors that feature glass panels at public entryways, seven solid metal doors for service entry, and one retractable metal loading dock door. All windows and wooden doors with glass panels are covered with plywood boards for security. The building has a flat roof with a wood framed shed roof parapet wall around the border clad in concrete tile. **See continuation sheet for additional description information.**

B1. Historic Name: Not Identified
B2. Common Name: 2390 North American Way
B3. Original Use: Not Identified **B4. Present Use:** American Way Cultural Center / Adair Enterprises
***B5. Architectural Style:** Modern Style

***B6. Construction History:** In 1978, the property was initially improved with the construction of an approximately 20,600 square foot U-shaped single-story commercial office building. The initial building is first visible on a 1978 aerial of the area which shows a U-shaped floorplan, a flat roof, and a courtyard to the north of the building (Earth Explorer). The original exterior has likely not changed since the initial construction. The exterior fenestration throughout the original building has also remained likely original. **See continuation sheet for additional construction history.**

***B7. Moved?** ☒ **No** ☐ **Yes** ☐ **Unknown** **Date:** N/A **Original Location:** N/A
***B8. Related Features:** None
B9a. Architect: Not Identified **b.** Builder: Not Identified
***B10. Significance:**
Theme: N/A **Area:** Orange County
Period of Significance: N/A **Property Type:** Commercial **Applicable Criteria:** CRHR / Local Ineligible

CRHR Criterion 1: Association with events that have made a significant contribution to the broad patterns of local or regional history.
Constructed in 1978, the corporate office building at 2390 North American Way is situated in an area that was once part of Rancho Santiago de Santa Ana. In 1868, the rancho was subdivided among heirs and claimants, spurring the development of various settlements in the region. At that time, Alfred Chapman and Andrew Glassell bought up thousands of acres in the region. In 1870, Chapman subdivided his lands and began construction on an irrigation ditch from the Santa Anna River. In 1871, he laid out a townsite between Lemon St. in the west, Grand Street in the east, Maple Avenue in the north, and Almond Avenue in the south. Due to the emerging popularity of the citrus industry in Southern California, the city was renamed Orange from Richland, California, and was incorporated in 1888. By the turn of the century, orange production employed about a third of Orange's labor force. After WWII, population surged in Orange and tract houses began to replace orange groves. The economy gradually shifted from agriculture to light manufacturing and service sector jobs. During the tail end of this period, in the late 1970s, the commercial building was constructed at 2390 North American Way. The structure holds an association with the economic shift of Orange after the height of the citrus industry. However, this specific building does not appear to have played a significant role in the city's development during this time. The development of the property only holds a loose association with the industrial history of the city. Therefore, the building is not eligible under CRHR Criterion 1. **See continuation sheet for significance and eligibility conclusions.**

CRHR Status Code: 6Z
Other Listings: None

*Map Name: Orange, CA Quadrangle *Scale: 1:24,000 *Map Date: 2018

Primary Record Information Continued:

P3a. Description Continued: The primary elevation of the square building faces east towards American Way. The east elevation is characterized by an asymetrical façade featuring a shed roof parapet wall and facia, a front door at the northwest corner of the building, and five aluminum framed multilight windows above stone faced, concrete masonry unit (CMU) planters topped with brick. The front door is pivoted at an angle to face northeast under the soffit of the roof. The wood door with a glass paneling on the upper half is flanked by four multilight windows that are situated above small stone faced, CMU planter bench walls topped with brick. The north elevation is symetrical with two evenly spaced window bays located under the shed roofing clad with concrete tiles. Each of the window bays feature metal shed roofs, aluminum framed multilight windows and a framed door with a glass panel. The west elevation if the building is the rear of the structure along the Fletcher Retarding Basin. This elevation has an asymetrical façade under the shed roof parapert wall that is pierced by a stone lined chimney and a concrete dome along the west elevation. The west façade features no windows, five metal doors, one retractable metal loading dock door, and three electrical panels concealed by metal double doors. The south elevation has a flat roof attic that pierces the main flat roof with muliple four light aluminum framed windows. Beneath the parapet walls there are five mulilight aluminum framed windows, two solid metal doors, and two wood doors with glass panel lights.

A wood gazebo constructed in the ealry 1990s is located north of the building in a conctrete courtyard that is surrounded by stone lined CMU walls. The gazebo itself sits on a raised concrete and brick platform with an octagonal gazebo roof clad with concrete tile. The gazebo is a wood framed structure with steel supports. The steel supports are painted black and decorated with floral and vase relief designs. Decorative ornamental ceiling molding is installed across the interior rim of the roof. The west side of the gazebo features four brick stairs leading up to the platform and the east side of the platform features a brick ramp in the center of two smaller sets of brick steps. The concrete and stone lined courtyard also features a concrete fountain directly east of the gazebo.

Historic Property Appearance

In 1978, the single-story commercial office building was constructed on approximately 1.28 acres of undeveloped farmland east of the Fletcher Retarding Basin. The building is first visible in a 1978 aerial photograph of the area (Earth Explorer). The building had a U-shaped floorplan and a flat roof with an adjacent northern courtyard. The original fenestration of the building has likely remained consistent since its initial construction. In the late 1980s, renovations to the structure added the flat roof addition along the south elevation. Shortly after, in the early 1990s, further renovations remodeled the courtyard and added the northern gazebo. A few years later in the late 1990s, the concrete dome on the west elevation was added, sealing the U-shaped building into a square (UCSB Frame Finder; Earth Explorer). Since the late 1990s, the property has remained relatively unaltered.

History of the Property and Environs

The 2390 North American Way property is located in the City of Orange within the Santa Ana River Valley. The property was once part of the Rancho Santiago de Santa Ana, originally owned by the Yorba and Peralta families. It was sub-divided in 1868 and Los Angeles attorneys and real estate developers, Alfred Chapman and Andrew Glassell, bought up thousands of acres in the area. They also received additional land in return for their legal services during the partition of the former rancho land. Chapman subdivided his land and began construction on an irrigation ditch from the Santa Anna River. In 1871, he laid out a townsite between Lemon St. in the west, Grand Street in the east, Maple Avenue in the north, and Almond Avenue in the south. The town, originally named Richland by its farming community, grew throughout the early 1870s by establishing a school district, general store, church, and post office. While grain and grape production first dominated the crop production in Richland, the citrus industry grew as the 20th century approached. Due to the growth of citrus farming, and the fact that another Richland was already incorporated in California, the town was renamed to Orange (Brigandi, Phil; 2019).

The City of Orange was formerly incorporated in 1888 and after crop failure for many of the local vineyards, orange groves began to take on a larger role in the agricultural economy. By 1920, roughly a third of Orange's labor force worked in the citrus industry. During the Depression, a Works Progress Administration project constructed Orange City Park (now W.O. Hart Park). After WWII,

Primary Record Information Continued:
between 1950 and 1970, the population of Orange ballooned from 10,000 to 77,000 and tract houses began to replace orange groves (Brigandi, Phil; 2019).

As Orange steadily transitioned away from the citrus industry, light manufacturing centers between suburban developments and service sector jobs became more prevalent in the area. The first freeway in the area (SR 55) came into Orange in 1962, providing easy access for post-war families to travel in and out of the area Population growth slowed for much of the 1970s but began to accelerate again after further subdivisions in the area (Brigandi, Phil; 2019). After the post-war development in Orange, the property of 2390 North American Way remained undeveloped until 1978, when the city was still transitioning away from agricultural production. Suburban plots consistently encroached further on farmland surrounding the Santa Ana River. By the mid-1980s there was no remaining farmland surrounding the property.

By 1978 the U-shaped commercial building at 2390 North American Way was completed. However, between 1978 and 1981, it is unclear what businesses occupied the property. In 1980, the building was vacant, and was listed in *The Los Angeles Times* real estate advertisements. In 1982, Adair Roofing, a roofing contracting company run by Richard Adair, moved into the building. Adair Roofing advertised openings the following year, 1983, in the *Santa Ana Orange County Register*. Between 1983 and 1985, it appears that Adair Roofing expanded and rebranded their operation to Adair Enterprises and opened the American Way Cultural Center at their offices located at 2390 North American Way. Over the following decade, Adair Enterprises operated 2390 American Way as an events venue and oversaw multiple renovation projects at the property. The American Way Cultural Center hosted weddings, performances, receptions, and other events. In late 1980s, Adair Enterprises added the flat roof addition along the south elevation. In the early 1990s, between 1990 and 1992, Adair Enterprises installed the gazebo in the northern courtyard. Between 1995 and 2000, the inner courtyard of the U-shaped building was heavily improved and multiple faux building facades were erected, closing the U-shape into a square. In 2021, the American Way Cultural Center closed and Adair Enterprises, at the time run by Marty Adair, sold the property to Rexford Industries, Inc.

B10. Statement of Significance Continued:

CRHR Criterion 2: Association with the lives of persons significant in national, state, or local history.
The building at 2390 North American Way was not identified as being associated with the lives of persons significant in national, state, or local history. Therefore, the building is found ineligible under Criterion 2.

CRHR Criterion 3: Embodies the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values.
The building at 2390 North American Way was constructed in 1978 to serve local commercial businesses. The property underwent significant changed from the late 1980s through the 1990s, including improvements to the northern courtyard and interior changes to the central plaza or courtyard of the building that fully enclosed the west elevation. A flat roof half-story addition was also added in the late 1980s. The exterior has likely been maintained and the fenestration has likely remained largely unaltered. The concrete clad, steel framed, and flat asphalt roofed building retains its original massing and elements of the original 1970s commercial design. However, the design no longer embodies distinctive characteristics of a 1970s commercial building as a whole and it does not reflect a specific building type from the initial period of construction. Therefore, the building is found ineligible under Criterion 3.

CRHR Criterion 4: Potential to yield information important in prehistory or history of the local area.
The building has not been found eligible under Criterion 4 as they are unlikely to yield information important in prehistory or history of the local area.

Integrity Analysis
The property no longer possesses its original integrity from 1978. Each of the seven aspects of integrity are analyzed below.

The original building was constructed by 1978, when the area was shifting from agricultural to commercial and industrial uses. By 1980, much of the surrounding farmland located within proximity of the property was replaced by commercial or industrial developments. Today, the property is surrounded by contemporary-period warehouses and commercial office parks and the vacant areas present at the time of construction have since been filled with office park buildings or suburban developments. The property does not possess integrity of **feeling**, **setting, or association** with the surrounding environment and no longer conveys its historic association with the late 20th century industrial development of the City of Orange.

The building is in its original location and has not been moved since that time; therefore, the property retains integrity of **location**.

The building has been substantially altered and possess poor to fair integrity of materials. Much of the exterior fenestration has likely remained unaltered over time and windows and doors on the exterior have likely had limited changes. The interior spaces have been changed substantially during its conversion into an event venue. Walls were installed and removed, and the layout of the building changed from a U-shaped plan to a square layout. Therefore, the buildings possess low integrity regarding original **materials, design, and workmanship**.

Because the building is ineligible for inclusion on the CRHR, it does not meet the definition of a historical resource pursuant to Section 15064.5 of the CEQA Guidelines.

***P3a. Description:** 2442 North American Way was first constructed in 1948 and 2444 North American Way was constructed between 1961 and 1963 on the same parcel. The buildings sit on approximately 1.42 acres and includes two single-story residential buildings and a detached garage that was added in 1994. The evaluated property is located on American Way approximately 1,600-meters east of Highway 57 in Orange, California. The residential buildings have irregular floor plans and asymmetrical façades on concrete foundations. The 2444 N American Way residence measures approximately 42' x 61' and is approximately 2,500 square feet. The 2442 N American Way building measures 36' x 44' and is approximately 1,400 square feet. The detached garage measures 25' x 50' and approximately 1,200 square feet. Each building is clad in stucco. The residential buildings for 2442 and 2444 N American Way have gable roofs clad in asphalt shingles with interior stucco chimneys. The garage has a flat rolled asphalt roof with a parapet wall. The homes largely feature multi-light wood framed windows and doors with nickel or leaded glass lights. Some doors and windows are obstructed from observation with plywood boards for security. The residences are located within a brick, stucco, and steel fence enclosure within a concrete courtyard. **See continuation sheet for additional description information.**

B1. Historic Name: Not Identified
B2. Common Name: 2442 / 2444 North American Way
B3. Original Use: Not Identified **B4. Present Use:** Adair Roofing / Adair Enterprises
***B5. Architectural Style:** Minimal Traditional Style

***B6. Construction History:** The single-family residence at 2442 N American Way was constructed in 1948, when the region was dominated by orange groves. According to aerial photography of the area, the owners installed an entryway addition on the east elevation of the home between 1958 and 1960. Shortly afterwards, between 1961 and 1963, the house at 2444 N American Way was constructed immediately adjacent and west of the original residence. The 2444 N American Way residence was significantly remodeled between 1990 and 1992. The detached garage located south of the two single-family residences was constructed in 1994 and is a non-historic addition to the property. The original fenestration of 2442 and 2444 N American Way have been significantly altered since initial construction. **See continuation sheet for additional construction history.**

***B7. Moved?** ☒ **No** ☐ **Yes** ☐ **Unknown** **Date:** N/A **Original Location:** N/A
***B8. Related Features:** None
B9a. Architect: Not Identified **b.** Builder: Not Identified
***B10. Significance:** N/A
Theme: N/A **Area:** Orange County
Period of Significance: N/A **Property Type:** Commercial / Residential **Applicable Criteria:** CRHR / Local Ineligible

CRHR Criterion 1: Association with events that have made a significant contribution to the broad patterns of local or regional history.
Constructed in 1948 and between 1961 and 1963, the single-family residences on Parcel Number 374-632-05, are situated in an area that was once part of Rancho Santiago de Santa Ana. In 1868, the rancho was subdivided among heirs and claimants, spurring the development of various settlements in the region. At that time, Alfred Chapman and Andrew Glassell bought up thousands of acres in the region. In 1870, Chapman subdivided his lands and began construction on an irrigation ditch from the Santa Anna River. In 1871, he laid out a townsite between Lemon St. in the west, Grand Street in the east, Maple Avenue in the north, and Almond Avenue in the south. Due to the emerging popularity of the citrus industry in Southern California, the city was renamed Orange from Richland, California, and was incorporated in 1888. By the turn of the century, orange production employed about a third of Orange's labor force. After WWII, population surged in Orange and tract houses began to replace orange groves. The economy gradually shifted from agriculture to light manufacturing and service sector jobs. During the beginning of this transitional period, in the late 1940s, the residence at 2442 N American Way was constructed when the area was still dominated by orange groves. The 2442 and 2444 N American Way single-family residences hold an association with the economic shift of Orange after the height of the citrus industry. However, these specific buildings do not appear to have played a significant role in the city's development during this time. The development of the property only holds a loose association with the industrial history of the city. Therefore, the buildings are not eligible under CRHR Criterion 1. **See continuation sheet for significance and eligibility conclusions.**

Primary Record Information Continued:

***P3a. Description (Continued from Page 1):**

2442 N American Way
The primary elevation of the single-family residence of 2442 N American Way faces south towards Freedom Avenue. The south elevation is characterized by an asymetrical façade featuring a side-gabled central mass with three windows and a side-gabled pop-out on the east end of the building featuring a metal front door that faces south. There is little eave overhang and no decorative elements along the roofline except a white painted wood facia board. The front door on the eastern side of the south elevation is a metal framed French door with white painted metal security bars that sits on a concrete stoop. To the west of the door, in the central mass of the building, there is a window bay with a paired wooden casement window. In the center, to the west of the casement window is a one-over-one double hung wooden sash window painted grey that is covered by a wooden board. On the west end of the south elevation, there is a larger one-over-one double hung wooden sash window painted white. The east elevation sits adjacent to the stucco wall for the property and has no windows or doors.

The north elevation is asymetrical featuring two rear doors, nickel or leaded fixed pane windows, large muli-light casement windows, and a covered back porch with spindled columns and an enclosed soffit. At the eastern end on the north elevation there is a wooden paneled door with a fan light atop a concrete stoop. In the center of the northern elevation, there are two wooden fixed pane windows with nickel or lead framed deocrative panes. Underneath the porch roof on the western end of the northern elevation, there is a wooden paneled door covered with plywood and a large tripartite window with wooden framed lights featuring interior shutters. The two side windows are casement and the center window is fixed. The back porch is brick and concrete. The western elevation only features one one-over-one wood framed double hung sash window that faces 2444 N American Way.

2444 N American Way
The primary elevation of the single-family residence of 2444 N American Way faces south toward Freedom Avenue. The south elevation is characterized by an asymetrical façade featuring a front-gabled construction style with three windows and a front door. The front door sits on a brick front porch with three steps and a metal handrail. The front door and a tripartite bay window sit below a shed roof porch cover clad in asphalt shingles. The door is wooden with panels and a central oval light with nickel or lead pane decoration. It is flanked by two rectangular side-lights that also feature wooden panles. To the east of the door there is an octagonal fixed pane window with lead framed panels. In the center of the south elevation under the shed roof porch cover the window bay features two muli-light fixed pane windows on either side of two central six-over-six double hung wood sash windows. On the west end of the south elevation there is another bay window with three lights. In the center of the bay there is a twenty-four light fixed pane window flanked on either side by a four light fixed pane windows.

The eastern elevation is characterized by an asymetrical façade with a rear porch. On the south end of the east elevation there is is a wood framed fixed pane window with decorative panes. Within the rear porch, there is a wooden French door with rectangular multipane sidelights; a kitchen bay window with interior shutters and two casement windows; a wooden paneled door with a fan light; an octagonal fixed pane window; and a group of four large casement windows with ten lights each. The north elevation features a window bay with a pair of four-over-four double hung wood sash windows beneath a shed roof cover clad in aphalt shingles. Facing north on the west elevation, there is a rear entrance with a brick landing, a French door, and three sidelights with ten panes each. One sidelight is on the east side of the door and the other two are paired together on the west side of the French door. Around the corner from the rear entrance, there are presumably more sidelights for the rear entrance facing west, however, they are fully mothballed with wooden planks. The west elevation only features tow wood framed fixed pane windows that have been boarded over.

Detached Garage
The detached garage south of 2442 and 2444 N American Way is a modern stucco clad frame structure with two metal garage doors on the eastern elevation. It features no windows and only one doorway on the north elevation covered by and arched entryway. The door is steel with six panels.

***B6. Construction History (Continued from Page 2):**

The property at APN 374-632-05 was first improved in 1948 when 2442 N American Way was built off Fletcher Avenue east of what is now the Fletcher Retarding Basin.[1] According to aerial imagery, the original residence at 2442 N American Way appears to have been a side-gabled Minimal Traditional style house with a porch on the north elevation. Non-extant outbuildings south of the house appear to be agricultural in nature since the property was largely surrounded by fields and citrus groves at that time. Between 1958 and 1960, the owners of the home added a small gable roof addition on the east elevation to act as an entryway or mudroom for the residence.[2] Aerial photographs at that time show that the number of warehouse type buildings located to the south of the house sharply increased. Shortly after the pop-out on 2442 N American Way was installed, the home at 2444 N American Way was constructed between 1961 and 1963.[3] The house, located on the same parcel as 2442 N American Way, was built immediately northwest of the original home. Between 1990 and 1992, the house at 2444 N American Way was significantly remodeled and expanded along the south elevation.[4] The House nearly doubled in size and the house now bordered 2442 N American Way along the west elevation of the older residence. At the same time as the remodel, outbuildings, possibly earlier garage structures, located southwest of both houses were demolished. A new detached garage was installed in a roughly similar location in 1994.[5]

The house at 2442 N American Way appears to have been re-stuccoed, likely in the early 1990s when the garage was installed due to the matching pattern shared by the two structures and 2444 N American Way. It appears to have retained original wood windows on the south elevation. However, the door in the south entryway is a modern replacement. The north elevation doors and windows all appear to be modern replacements and the back porch does not exhibit any signs of historic building material. The north elevation windows have double panes, the window / door hardware is modern, and the porch is not composed of historic brick.

All windows and doors on 2444 N American way appear to be non-historic replacements with the exception on the paired four-over-four double hung sash windows on the north elevation in a window bay. The north elevation also features two areas where previous window openings have been covered with grey stucco. Windows are missing on the west elevation of 2444 N American Way and their age could not be determined. All windows and doors on the south elevation were added in the 1990s when the building was expanded south. The garage is non-historic and does not incorporate any building material from previous structures erected in the area.

History of the Property and Environs

The 2442 / 2444 North American Way property is located in the City of Orange within the Santa Ana River Valley. The property was once part of the Rancho Santiago de Santa Ana, originally owned by the Yorba and Peralta families. It was sub-divided in 1868 and Los Angeles attorneys and real estate developers, Alfred Chapman and Andrew Glassell, bought up thousands of acres in the area. They also received additional land in return for their legal services during the partition of the former rancho land. Chapman subdivided his land and began construction on an irrigation ditch from the Santa Anna River. In 1871, he laid out a townsite between Lemon St. in the west, Grand Street in the east, Maple Avenue in the north, and Almond Avenue in the south. The town, originally named Richland by its farming community, grew throughout the early 1870s by establishing a school district, general store, church, and post office. While grain and grape production first dominated the crop production in Richland, the citrus industry grew as the 20th century approached. Due to the growth of citrus farming, and the fact that another Richland was already incorporated in California, the town was renamed to Orange.[6]

The City of Orange was formerly incorporated in 1888 and after crop failure for many of the local vineyards, orange groves began to take on a larger role in the agricultural economy. By 1920, roughly a third of Orange's labor force worked in the citrus industry. During the Depression, a Works Progress Administration project constructed Orange City Park (now W.O. Hart Park). After WWII, between 1950 and 1970, the population of Orange ballooned from 10,000 to 77,000 and tract houses began to replace orange groves.[7]

Primary Record Information Continued:

As Orange steadily transitioned away from the citrus industry, light manufacturing centers between suburban developments and service sector jobs became more prevalent in the area. The first freeway in the area (SR 55) came into Orange in 1962, providing easy access for post-war families to travel in and out of the area Population growth slowed for much of the 1970s but began to accelerate again after further subdivisions in the area.[8] After the post-war development in Orange, the property of 2442 / 2444 North American Way remained undeveloped until 1948, when the city was beginning to transition away from agricultural production. Suburban plots consistently encroached further on farmland surrounding the Santa Ana River. By the mid-1980s there was no remaining farmland surrounding the property.

By 1963, both residences at 2442 and 2444 N American Way were completed. However, between 1948 and 1981, it is unclear what individuals occupied the residences. American Way and Freedom Avenue were not formally established and paved until the mid-1970s. Before then the homes at 2442 and 2444 N American Way likely had different addresses associated with nearby Fletcher Avenue. Further intensive archival research would be necessary to determine previous addresses and occupants. By 1982, Richard Adair occupied the property and the two parcels south of the homes at APN #374-632-07 and #374-632-08.[9] Richard Adair with Marty Adair operated their roofing and contracting business at the property. Eventually, they expanded their operation and converted the commercial office space at 2390 N American Way into an event venue called the American Way Cultural Center. Over the following decade, Adair Enterprises operated 2390 American Way as an events venue and oversaw multiple renovation projects at the property. The American Way Cultural Center hosted weddings, performances, receptions, and other events. In the 1990s, the Adair family renovated both 2442 and 2444 N American Way. It appears that during this time they added a new garage, expanded 2444 N American Way, re-stuccoed the exterior of both homes, and renovated the rear porches for both houses. In 2021, the American Way Cultural Center closed and Adair Enterprises, at the time run by Marty Adair, sold all three parcels to Rexford Industries, Inc.[10]

B10. Statement of Significance Continued:

CRHR Criterion 2: Association with the lives of persons significant in national, state, or local history.

The buildings at 2442 / 2444 North American Way were not identified as being associated with the lives of persons significant in national, state, or local history. Therefore, the property is found ineligible under Criterion 2.

CRHR Criterion 3: Embodies the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values.

Minimal Traditional Style

As a result of the Great Depression and an interest in adapting a more affordable and simple aesthetic at working class dwellings, the exterior of homes in the 1930s and 1940s was stripped to only the most minimal detailing and form. This design direction was substantially influenced by the federal government's New Deal programming, through the United States Commerce Department led by future President Herbert Hoover, in particular via the 1931 *President's Conference for the Design of Residential Neighborhoods* (President's Conference) and the Federal Housing Administration, established in 1934.

The 1931 President's Conference convened experts in architecture, planning, residential design, home building, and lending to establish recommendations on reforming the nation's housing system. Primary goals of the conference included: creating a home financing program, improving the quality of moderate and low-income housing and residential districts, and stimulating the building industry. The conference culminated in the creation of a new national priority to lower the cost of American homes while improving their design and efficiency. Financing goals and enforcing quality construction practices were implemented by the Federal Housing Administration (FHA) established in 1934, which, through its approval of properties for mortgage insurance and publication of housing and subdivision standards, instituted a national program that would guide home building practices for decades to come.

Published in 1936 and revised in 1940, the FHA's Technical Bulletin No. 4 *Principles of Planning Small Houses* detailed a series of floor plans and features for small houses between one and four bedrooms that offered a "maximum amount of usable space, with as much comfort, convenience, and privacy as possible" all obtained "for a minimum amount of money."[11] This publication affirmed the professional opinions and experience of architects, espousing that the planning of well-designed, livable houses could be achieved through adherence to a few fundamental principles. The simplest FHA design, known as the "FHA minimum house", was designed for a family of three adults or two adults and two children, and measured 534-624 square feet, with a kitchen, living room, two bedrooms, and one bathroom. With an emphasis on enlarging the home to meet user needs, the one-story minimum house could be expanded to accommodate growing families, with aesthetic features and stylistic details similarly tailored to respond to an owner's aesthetic interests via the inclusion of gable or hipped roofs, porches at different facades, exterior wall and roof materials, window types and corresponding adornments including shutters, awnings, etc. The stylistic classification assigned to these 'minimum' houses built in the 1930s-1940s period is Minimal Traditional.

Loosely based on the Tudor Revival and Colonial Revival style and occasionally designed to feature Modernistic details, Minimal Traditional homes were built in large numbers throughout the country immediately preceding and following World War II. The style reached its peak in popularity by the late 1940s. Typically compact in size and single-story, relative to plan and form, the building type represents a transition between the deep-set bungalows and cottages of the 1910s and 1920s and the horizontally oriented Ranch homes built in the 1950s and 1960s. Minimal Traditional homes were typically built as part of comprehensively constructed residential subdivisions. The Linda Vista neighborhood of San Diego represents the most notable local example of a comprehensively constructed residential community developed with Minimal Traditional homes. In the San Diego neighborhood of City Heights, a concentration of individually constructed Minimal Traditional homes are located within the boundaries of the Islenair Historic District, which also includes Spanish

Eclectic bungalows and Ranch homes. Excepting a rare example designed by Richard Requa at 2207 29th Street, no architects or builders of note are generally associated with the style in San Diego.

Minimal Traditional style homes are typically single-story and offer minimal articulations or stylistic enhancement.[12] Character-defining features of the Minimal Traditional style are listed below.

- Roof – low-pitched gabled roof or hipped roof with clipped / boxed eaves and rake, usually there is one front facing gable.
- Exterior Walls – clad in horizontal board siding, stucco, brick veneer, or stone veneer.
- Windows – wood frame with wide one-over-one or multi-lite divide sash pattern, often decorated with fixed wood shutters.
- Porches – small area recessed into the front facade and roofline or formed by addition of a small overhang / roof line extension above a small concrete slab, with or without wood posts and supports.
- Moderne articulations – porthole windows, glass block, and curvilinear corners.
- Colonial articulations – horizontal board siding, scalloped edge details, and brick at porches, doorframes, and base or ground floor walls.
- Tudor articulations – gable roofs, secondary dormers or lower gables, stone at feature facades, doorframes, and base or ground floor walls.
- Garages – detached units set back at the rear of the lot or attached single-car units with tilt-up wood door

In Coronado, Minimal Traditional homes represent ca. 1940s WWII-era single-family and multiple-family infill development, either single-parcel projects or limited instances of a larger infill campaign to construct multiple new units but not as part of a comprehensively constructed subdivision community as was typically to nearby San Diego and surrounding cities. Within the island, the Bay View Housing Corporation and Palmer-Bilt Homes executed construction of multiple Minimal Traditional housing units.

In 1943, BVHC was commissioned by the War Production Board and the National Housing Agency to develop a housing project on Coronado Island. The project included 37 single-family dwellings and 12 apartment buildings for civilian workers at the North Island Naval Air Station during World War II. A year later, in 1944, the Palmer-Bilt Homes Company developed 154 single family homes on Coronado Island, including the 236 D Avenue subject property. These homes all followed a similar layout with three bedrooms and one bath. By the early 1940s, Coronado had been developed with buildings throughout the island leaving little open space. The Palmer-Bilt company filled in the last remaining open blocks on the western side of the island, save a portion that had been optioned to the school district. Palmer-Bilt homes were easy to construct and simple in design. The Minimal Traditional style homes had limited stylistic detailing and were constructed with inexpensive materials.

2442 and 2444 North American Way

The buildings at 2442 / 2444 North American Way were constructed in 1948, 1958-1960, and 1994 to serve as single-family residences with a detached garage. The Minimal Traditional style residences have undergone significant changes since their construction, including exterior additions, re-stucco work, and window / door removal and replacement until the early 1990s. The exterior of the residential buildings is heavily altered. The exterior fenestration has changed over time and the overall massing has also evolved since initial construction. Few elements illustrating the original Minimal Traditional style of the homes remain intact. Limited historic material remains on the exterior. The design no longer embodies distinctive characteristics of mid-century residential construction techniques and does not reflect the initial design intent. Therefore, the buildings are found ineligible under Criterion 3.

CRHR Criterion 4: Potential to yield information important in prehistory or history of the local area.
The buildings have not been found eligible under Criterion 4 as they are unlikely to yield information important in prehistory or history of the local area.

Integrity Analysis
The property no longer possesses its original integrity from the mid-20th century. Each of the seven aspects of integrity are analyzed below.

The original buildings were constructed when the area was shifting from agricultural to commercial and industrial uses. By the 1970s, nearly all the surrounding farmland located within proximity of the property was replaced by commercial or industrial developments. Today, the property is surrounded by contemporary-period warehouses and commercial office parks. The rural farmlands present at the time of construction have since been filled with office park buildings or suburban developments. The property does not possess integrity of **feeling**, **setting, or association** with the surrounding environment and no longer conveys its historic association with the rural nature of the area during the mid-20th century on the periphery of the City of Orange.

The buildings are in their original location and has not been moved since that time; therefore, the property retains integrity of **location**.

The buildings have been substantially altered and possess poor to fair integrity of materials. Much of the exterior fenestration has been replaced or removed over time and windows and doors on the exterior have largely been replaced. The interior spaces have also likely been changed substantially. However, the buildings are currently mothballed with no access. Walls have been installed and removed, and the layout of the buildings have expanded. Therefore, the buildings possess low integrity regarding original **materials, design, and workmanship**.

Because the building is ineligible for inclusion on the CRHR, it does not meet the definition of a historical resource pursuant to Section 15064.5 of the CEQA Guidelines.

Archaeological Records Search Results

BRIAN F. SMITH and ASSOCIATES

CALIFORNIA HISTORICAL RESOURCES INFORMATION SYSTEMS

RECORDS SEARCH

Company: Brian F. Smith and Associates

Processed By: Andrew Garrison

Date Processed: 12-13-2021

Project Identification: 2390 North American Way

Information Center: South Central Coastal Information Center

Search Radius: Half-Mile Buffer

Historical Resources:

Trinomial and Primary site maps have been reviewed. All sites within the project boundaries and the specified radius of the project area have been plotted. Copies of the site record forms have been reviewed for all recorded sites.

There is one resource located within a half-mile radius of the current project area. No resources are located within the current project.

Previous Survey Report Boundaries:

Project boundary maps have been reviewed. National Archaeological Database (NADB) citations for reports within the project boundaries and within the specified radius of the project area have been reviewed.

There are 10 reports within a half-mile radius of the current project area. One report (OR 2708) includes a portion of the subject property.

Elevation: 195 feet ASL.

***P3a. Description**: The site consists of a Orange County Water District maintained retention basin and flood control channel that send storm water into the Santa Ana River. The basin, according to archival topographic maps, was "sand pit" in the 1940's (there were many such pits along the Santa Ana at the time) and the channel to the Santa Ana did not exist. In 1951, in response to tract development upstream and commercial development downhill (south), the Orange County Water District bought the property and began excavating the south end of the pit such that 1952 aerial photos show the pit held some groundwater. In the early 1960's the County dug a v-shaped channel with wire and post erosion controls connecting the pit to the earthen dike lining the Santa Ana. At the time, orchards predominated the area but tract development was spreading. Development of tract homes surrounding Glasell Street to the northeast of the Basin did not begin in Olive until about 1968, so at the time storm drain water from the tracts was brought underground into the basin. Originally, the basin was about 15 feet deep, some 720 long and 180 feet wide with an access road ringing most of the facility. The channel is about 14 feet deep and connects to the southwest corner of the Basin via riprap and concrete without controls of any kind. The Basin was filled with soil in the last 10 years or so, leaving a cut in the northwest quadrant that allows storm drain flows to pass it and enter the Fletcher Channel. The basin and channel is not considered a historic property at the national, state or local level of significance.

Re: Request for Sacred Lands File and Native American Contact List for the 2390 North American Way Project, City of Orange, Orange County, California.

I would like to request a record search of the Sacred Lands File and a list of appropriate Native American contacts for the following project: 2390 North American Way (21-329). The approximately four-acre project is a Phase I assessment associated with the redevelopment of APNs 374-632-05, -07, and -08. The project can be found at 2390 North American Way in the city of Orange, Orange County, California. Further the project can be located within the unsectioned Santiago de Santa Ana land Grant (Township 4 South, Range 9 West [Projected]), as shown on the USGS *Orange, California* Quadrangle. A copy of the project map showing the project area has been included for the processing of this request.

Thank you for your time.

Sincerely,

Andrew Garrison M.A., RPA

Re: 2390 North American Way Project, Orange County

Dear Mr. Garrison:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

I. INTRODUCTION AND LOCATION

A paleontological resource assessment has been completed for the 2390 North American Way Project located at 2390 North American Way between West Fletcher Avenue and West Freedom Avenue in the city of Orange, Orange County, California (Figures 1 and 2). The approximately four-acre project consists of three parcels, with Assessor's Parcel Numbers (APNs) 374-632-05, -07, and -08. On the United States Geological Survey 7.5-minute, 1:24,000-scale *Orange*, *California* topographic quadrangle map, the project is located in an unsectioned area of Township 4 South, Range 9 West, of the San Bernardino Baseline and Meridian (Figure 2). The project proposes to demolish the property's existing structures and construct two one-story industrial buildings with areas of 49,600 square feet and 46,500 square feet, respectively. The proposed concrete tilt-up buildings will be constructed at grade with truck parking and loading areas. The development will include utility infrastructure, pavement, flatwork, and landscaping (Pflueger and Kim 2021).

As the lead agency, the City of Orange has required the preparation of a paleontological assessment to evaluate the project's potential to yield paleontological resources. The paleontological assessment of the project included a review of paleontological literature and fossil locality records in the area; a review of the underlying geology; and recommendations to mitigate impacts to potential paleontological resources, if necessary. A paleontological field survey was not conducted since the surface of the project property is completely developed.

II. REGULATORY SETTING

The California Environmental Quality Act (CEQA), which is patterned after the National Environmental Policy Act, is the overriding environmental regulation that sets the requirement for protecting California's paleontological resources. CEQA mandates that governing permitting agencies (lead agencies) set their own guidelines for the protection of nonrenewable paleontological resources under their jurisdiction.

State of California

Under "Guidelines for Implementation of the California Environmental Quality Act," as amended in December 2018 (California Code of Regulations [CCR] Title 14, Division 6, Chapter 3, Sections 15000 et seq.), procedures define the types of activities, persons, and public agencies required to comply with CEQA. Section 15063 of the CCR provides a process by which a lead agency may review a project's potential impact to the environment, whether the impacts are significant, and provide recommendations, if necessary.

DeLorme (1:250,000)

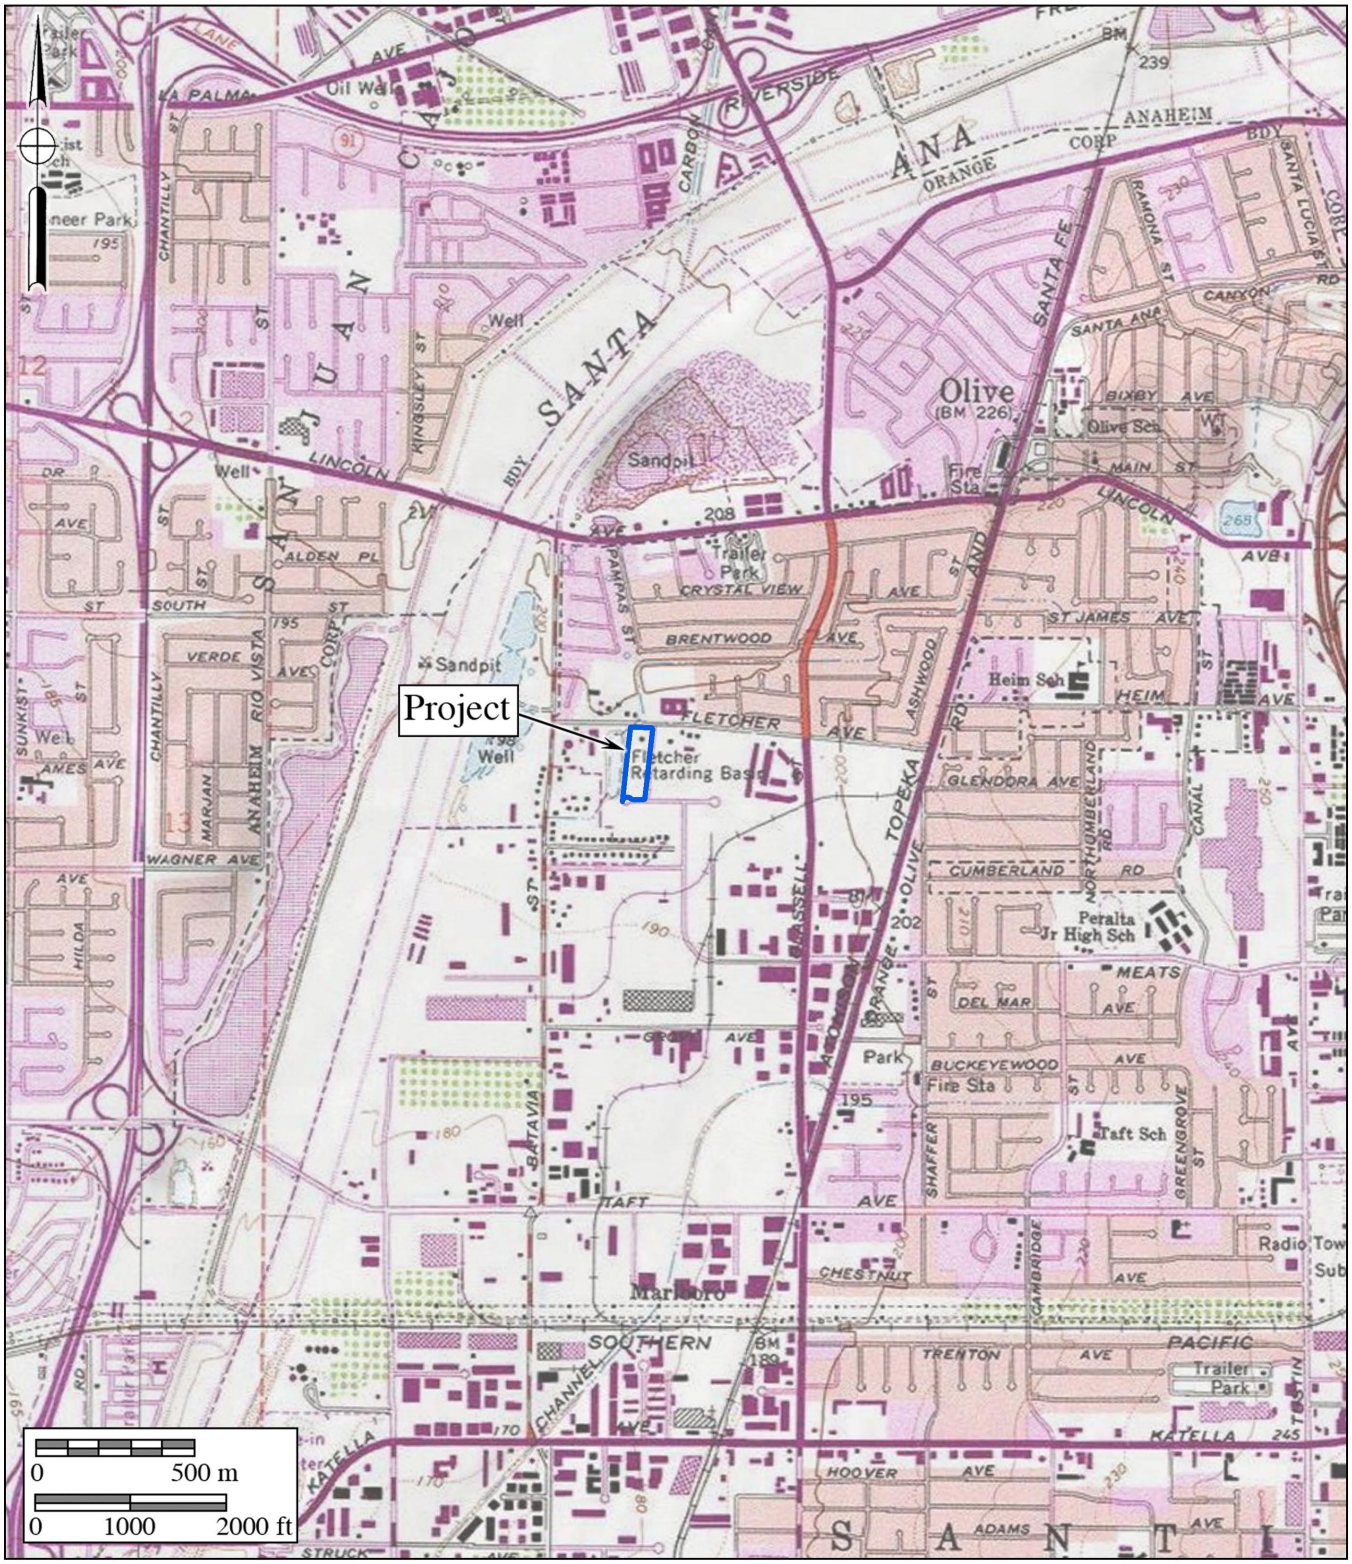

Figure 2

Project Location Map

The 2390 North American Way Project

USGS *Orange* and *Anaheim* Quadrangles (7.5-minute series)

In CEQA's Environmental Checklist Form, one of the questions to answer is, "Would the project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?" (Appendix G, Section VII, Part f). This is to ensure compliance with California Public Resources Code Section 5097.5, the law that protects nonrenewable resources, including fossils, which is paraphrased below:

a) A person shall not knowingly and willfully excavate upon, or remove, destroy, injure or deface any historic or prehistoric ruins, burial grounds, archaeological or vertebrate paleontological site, including fossilized footprints, inscriptions made by human agency, rock art, or any other archaeological, paleontological or historical feature, situated on public lands, except with the express permission of the public agency having jurisdiction over such lands.
b) As used in this section, "public lands" means lands owned by, or under the jurisdiction of, the state, or any city, county, district, authority, or public corporation, or any agency thereof.
c) A violation of this section is a misdemeanor.

County of Orange

Section 2-5-27(c) of Article 2 of the Codified Ordinances of Orange County includes protection measures for "natural, cultural, structural, and archeological resources" in recreational areas and mandates that:

> No person shall possess, destroy, injure, deface, remove, dig, or disturb from its natural state any fossilized or nonfossilized paleontological specimens, cultural or archaeological resources, or the parts thereof in any park, beach or recreational facility. (County of Orange 2005)

Similarly, Section 2-5-227(c) of Article 9 of the Codified Ordinances of Orange County includes protection measures for "natural, cultural, structural, and archeological resources" in privately owned parks and mandates that:

> No person shall possess, destroy, injure, deface, remove, dig, or disturb from its natural state any fossilized or nonfossilized paleontological specimens, cultural or archaeological resources, or the parts thereof in any designated park. (County of Orange 2005)

Eisentraut and Cooper (2002) introduced a curation model and monitoring and mitigation guidelines for the conservation of archaeological and paleontological materials in the County of

Orange. This document and its recommendations were subsequently adopted by the Orange County Board of Supervisors and now provide a standard for the paleontological profession to use in the paleontological mitigation process in Orange County. In 2009, the John D. Cooper Archaeology and Paleontology Center ("the Cooper Center") was formally organized in Santa Ana with the intent to provide a repository to receive future incoming collections. Operation of the Cooper Center was initially a joint partnership between the County of Orange and California State University, Fullerton. In 2019, Orange County Parks (OC Parks) took over administration of the facility.

City of Orange

Paleontological resources are not covered in the City's general plan or environmental impact report (City of Orange 2010).

III. GEOLOGY

The current path of the Santa Ana River lies approximately one-third mile west of the project. Geologically, the surficial sediments across the project are mapped as Holocene and late Pleistocene young alluvial fan deposits (yellow areas labeled "Qyf_a" and "Qyf_{sa}" on Figure 3), mostly consisting of unconsolidated, alluvial silty sands (Morton and Miller 2006). Holocene deposits are estimated to be approximately 100 feet thick in the area of the project (Sprotte et al. 1980: pl. 8). During the Holocene, activity of the Santa Ana River points to widespread sheet flooding and wandering, as indicated by extensive and continuous "younger" sand and silt deposits (Greenwood and Pridmore 1997).

A geotechnical investigation was recently performed for the project by Leighton Consulting, Inc. (Pflueger and Kim 2021). Findings from auger drilling, direct-push probe penetration, and soil sampling activities indicated the project is covered by approximately three feet of undocumented fill soils that overlie poorly graded sand, with a horizon of clay to silty-sandy clay between about 15 and 30 feet deep. Underlying the clayey horizon is a thick sequence of gravelly sands, to the total depth explored of about 50 feet. To accommodate the planned construction, Pflueger and Kim (2021) recommended: the removal of all undocumented fill soils below the building footprint for replacement with engineered fill; a minimum of three feet of engineered fill should be established below the proposed foundation; and deeper over excavation may be warranted in places depending on encountered conditions.

Geologic Map

The 2390 North American Way Project

Geology after Morton and Miller (2006)

IV. PALEONTOLOGICAL RESOURCES

Definition

Paleontological resources are the remains of prehistoric life that have been preserved in geologic strata. These remains are called fossils and include bones, shells, teeth, and plant remains (including their impressions, casts, and molds) in the sedimentary matrix, as well as trace fossils such as footprints and burrows. Fossils are considered older than 5,000 years of age (Society of Vertebrate Paleontology 2010) but may include younger remains (subfossils), for example, when viewed in the context of local extinction of the organism or habitat. Fossils are considered a nonrenewable resource under state and local guidelines (see Section II of this report).

Fossil Locality Search

Fossil locality record searches conducted for prior projects by Brian F. Smith and Associates were consulted to research potential nearby fossil localities. Sources for locality data are from the Natural History Museum of Los Angeles County (LACM) and OC Parks. The records searches indicate that no fossil localities were identified within the project boundaries or close to the project. The nearest known fossil localities are approximately five miles east of the project in much older geologic formations. In sedimentary deposits similar to those at the project, the nearest fossil localities held by OC Parks are located in Tustin, several miles to the southeast.

A review of published and unpublished literature was conducted for potential paleontological resources that are known in the vicinity of the project. Data reported in Miller (1971) indicate there are no nearby fossil localities known. Jefferson (1991) lists a late Pleistocene-aged specimen of horse located at "Glasell [Street] and Fletcher [Avenue]" in Orange (LACM locality 4943), about 1,800 feet east of the project. While this street intersection is mapped with the same deposits as those of the project, it is very close to the Pleistocene-aged old alluvial fan deposits mapped by Morton and Miller (2006; "Qof_{cg}" on Figure 3), the geologic contact of which is placed a few hundred feet east of the intersection. The fossil remains are probably derived from these sediments.

V. PALEONTOLOGICAL SENSITIVITY

Overview

The degree of paleontological sensitivity of any particular area is based on a number of factors, including the documented presence of fossiliferous resources on a site or in nearby areas, the presence of documented fossils within a particular geologic formation or lithostratigraphic unit, and whether or not the original depositional environment of the sediments is one that might have been conducive to the accumulation of organic remains that might have become fossilized

over time. Holocene alluvium is generally considered to be geologically too young to contain significant nonrenewable paleontological resources (*i.e.,* fossils), and is therefore typically assigned a Low paleontological sensitivity. Pleistocene (more than 11,700 years old) alluvial and alluvial fan deposits in the Los Angeles Basin, however, often yield important Ice Age terrestrial vertebrate fossils, such as extinct mammoths, mastodons, giant ground sloths, extinct species of horse, bison, and camel, saber-toothed cats, and others (Jefferson 1991). These Pleistocene sediments are accorded a High paleontological resource sensitivity.

Professional Standards

The Society of Vertebrate Paleontology has drafted guidelines that include four categories of paleontological sensitivity for geologic units (formations) that might be impacted by a proposed project, as listed below:

- *High Potential:* Rock units from which vertebrate or significant invertebrate, plant, or trace fossils have been recovered.
- *Undetermined Potential:* Rock units for which little information is available concerning their paleontological content, geologic age, and depositional environment; further study is needed to determine the potential of the rock unit.
- *Low Potential:* Rock units that are poorly represented by fossil specimens in institutional collections or based on a general scientific consensus that only preserve fossils in rare circumstances.
- *No Potential:* Rock units that have no potential to contain significant paleontological resources, such as high-grade metamorphic rocks and plutonic igneous rocks.

Using these criteria, based on a Holocene age for the surficial sedimentary deposits at the project, and the regional geology, a low paleontological potential may be assigned to the project.

VI. CONCLUSIONS AND RECOMMENDATIONS

Research has revealed the presence of "Holocene and late Pleistocene" young alluvial fan deposits mapped at the 2390 North American Way Project. Within Orange County, young alluvial fan sediments rarely produce fossils. The sediments at the project are likely too young and very thick as a result of high sedimentation rates by the Santa Ana River since the end of the Pleistocene. These data strongly suggest a low paleontological potential for the project. All of these factors support the recommendation that paleontological monitoring should not be required during mass grading, trenching, and excavation activities in undisturbed young alluvial fan sediments at the project. However, if paleontological resources are inadvertently discovered, a Paleontological Resources Impact Mitigation Program (PRIMP) should be implemented at the project. A proposed PRIMP is detailed below. When implemented with the provisions of

CEQA and the guidelines of the Society of Vertebrate Paleontology (2010), this PRIMP would mitigate any adverse impacts (loss or destruction) to potential nonrenewable paleontological resources (fossils), if present, to a level below significant.

Paleontological Resources Impact Mitigation Program

The following PRIMP guidelines, outlined below, are based on the findings stated above. Paleontological monitoring may be reduced upon the observations and recommendations of the professional-level project paleontologist. The following PRIMP, when implemented, would reduce potential impacts of paleontological resources to a level below significant:

1. If paleontological resources are discovered during earth disturbance activities, the discovery shall be cordoned off with a 100-foot radius buffer so as to protect the discovery from further potential damage, and a city-qualified paleontologist shall be consulted to assess the discovery.

If the discovery is determined to be significant by the paleontologist, a PRIMP shall be initiated, which will include notification of appropriate personnel involved and monitoring of earth disturbance activities:

1. Monitoring of mass grading and excavation activities in areas identified as likely to contain paleontological resources shall be performed by a qualified paleontologist or paleontological monitor. Monitoring will be conducted full-time in areas of grading or excavation in undisturbed sediments of alluvial fan and formational deposits.
2. Paleontological monitors will be equipped to salvage fossils as they are unearthed to avoid construction delays. The monitor must be empowered to temporarily halt or divert equipment to allow removal of abundant or large specimens in a timely manner. Monitoring may be reduced if the potentially fossiliferous units are not present in the subsurface, or, if present, are determined upon exposure and examination by qualified paleontological personnel to have low potential to contain fossil resources. The monitor shall notify the project paleontologist, who will then notify the concerned parties of the discovery.
3. Paleontological salvage during trenching and boring activities is typically from the generated spoils and does not delay the trenching or drilling activities. Fossils will be collected and placed in cardboard flats or plastic buckets and identified by field number, collector, and date collected. Notes will be taken on the map location and stratigraphy of the site, which is photographed before it is vacated and the fossils are removed to a safe place. On mass grading projects, discovered fossil sites will be protected by flagging to prevent them from being overrun by earthmovers (scrapers) before salvage begins. Fossils are collected in a similar manner, with notes and

photographs being taken before removing the fossils. Precise location of the site is determined with the use of handheld GPS units. If the site involves remains from a large terrestrial vertebrate, such as large bone(s) or a mammoth tusk, that is/are too large to be easily removed by a single monitor, a fossil recovery crew shall excavate around the find, encase the find within a plaster and burlap jacket, and remove it after the plaster is set. For large fossils, use of the contractor's construction equipment may be solicited to help remove the jacket to a safe location.

4. Isolated fossils will be collected by hand, wrapped in paper, and placed in temporary collecting flats or five-gallon buckets. Notes will be taken on the map location and stratigraphy of the site, which is photographed before it is vacated and the fossils are removed to a safe place.
5. Particularly small invertebrate fossils typically represent multiple specimens of a limited number of organisms, and a scientifically suitable sample can be obtained from one to several five-gallon buckets of fossiliferous sediment. If it is possible to dry screen the sediment in the field, a concentrated sample may consist of one or two buckets of material. For vertebrate fossils, the test is usually the observed presence of small pieces of bones within the sediments. If present, multiple five-gallon buckets of sediment can be collected and returned to a separate facility to wet-screen the sediment.
6. In accordance with the "Microfossil Salvage" section of the Society of Vertebrate Paleontology guidelines (2010:7), bulk sampling and screening of fine-grained sedimentary deposits (including carbonate-rich paleosols) must be performed if the deposits are identified to possess indications of producing fossil "microvertebrates" to test the feasibility of the deposit to yield fossil bones and teeth.
7. In the laboratory, individual fossils are cleaned of extraneous matrix, any breaks are repaired, and the specimen, if needed, is stabilized by soaking in an archivally approved acrylic hardener (*e.g.,* a solution of acetone and Paraloid B-72).
8. Recovered specimens will be prepared to a point of identification and permanent preservation (not display), including screen-washing sediments to recover small invertebrates and vertebrates. Preparation of individual vertebrate fossils is often more time-consuming than for accumulations of invertebrate fossils.
9. Recovered specimens shall be identified and curated of specimens into a professional, accredited public museum repository with a commitment to archival conservation and permanent retrievable storage (*e.g.,* OC Parks). The paleontological program should include a written repository agreement prior to the initiation of mitigation activities. Prior to curation, the lead agency (*e.g.,* the City of Orange) will be consulted on the repository/museum to receive the fossil material.
10. A final report of findings and significance will be prepared, including lists of all fossils recovered and necessary maps and graphics to accurately record their original

location(s). The report, when submitted to, and accepted by, the appropriate lead agency, will signify satisfactory completion of the project program to mitigate impacts to any potential nonrenewable paleontological resources (*i.e.,* fossils) that might have been lost or otherwise adversely affected without such a program in place.

VII. CERTIFICATION

I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this paleontological report, and that the facts, statements, and information presented are true and correct to the best of my knowledge and belief, and have been compiled in accordance with CEQA criteria.

Phone: (858) 679-8218 • Fax: (858) 679-9896 • E-Mail: twirths@bfsa-ca.com

Education

Master of Science, Geological Sciences, San Diego State University, California **1995**

Bachelor of Arts, Earth Sciences, University of California, Santa Cruz **1992**

Professional Certifications

California Professional Geologist #7588, 2003
Riverside County Approved Paleontologist
San Diego County Qualified Paleontologist
Orange County Certified Paleontologist
OSHA HAZWOPER 40-hour trained; current 8-hour annual refresher

Professional Memberships

Board member, San Diego Geological Society
San Diego Association of Geologists; past President (2012) and Vice President (2011)
South Coast Geological Society
Southern California Paleontological Society

Experience

Mr. Wirths has more than a dozen years of professional experience as a senior-level paleontologist throughout southern California. He is also a certified California Professional Geologist. At BFSA, Mr. Wirths conducts on-site paleontological monitoring, trains and supervises junior staff, and performs all research and reporting duties for locations throughout Los Angeles, Ventura, San Bernardino, Riverside, Orange, San Diego, and Imperial Counties. Mr. Wirths was formerly a senior project manager conducting environmental investigations and remediation projects for petroleum hydrocarbon-impacted sites across southern California.
