# **ECONOMIC UPDATE**

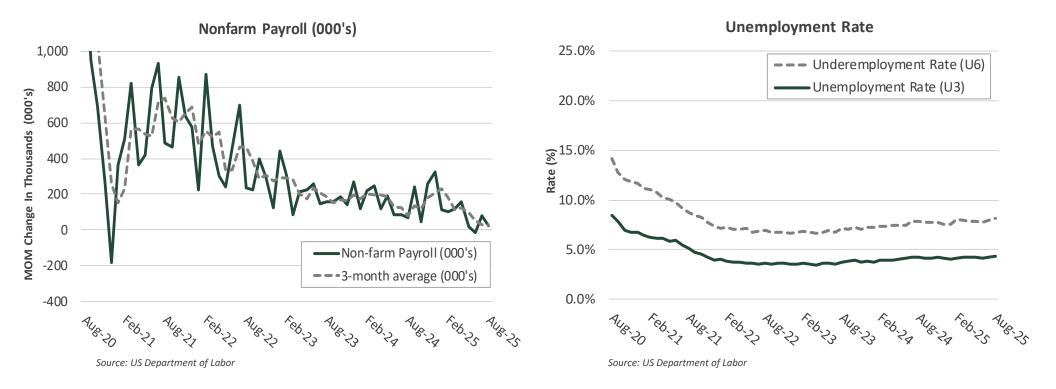

Recent economic data suggest slower growth in 2025 and greater market uncertainty as the effects of fiscal policy unfold. Inflation pressures have eased, though core levels remain above the Federal Reserve's target, while tariffs continue to cloud forecasts. Signs of a softer labor market are emerging, prompting expectations that the Fed will move cautiously toward policy normalization. Given the economic outlook, we expect gradual normalization of monetary policy and a steeper yield curve.

■ The Federal Reserve lowered the Federal Funds Rate a quarter percentage point to the range of 4.00 – 4.25% upon conclusion of the September Federal Open Market Committee meeting. The move was telegraphed by the Fed and in line with market expectations. Stephen Miran was the only opposing vote in the 11-1 decision as Governor Miran called for a larger 50 basis point rate cut. Chair Powell said concerns over signs of a softening labor market prompted the policy shift. Policymakers also updated their economic forecasts penciling in two additional quarter-point cuts through year-end.

The US Treasury yield curve flattened in September, as the 2-year Treasury yield declined 13 basis points to 3.57%, the 5-year Treasury also down 13 basis points to 3.66%, and the 10-year Treasury yield declined 14 basis points to 4.12%. The spread between the 2-year and 10-year Treasury yield points on the curve decreased to +54 basis points at September month-end versus +61 basis points at August month-end. The spread between the 2-year Treasury and 10-year Treasury yield one year ago was 14 basis points. The spread between the 3-month and 10-year Treasury yield points on the curve was +21 basis points in September versus +8 basis points in August.

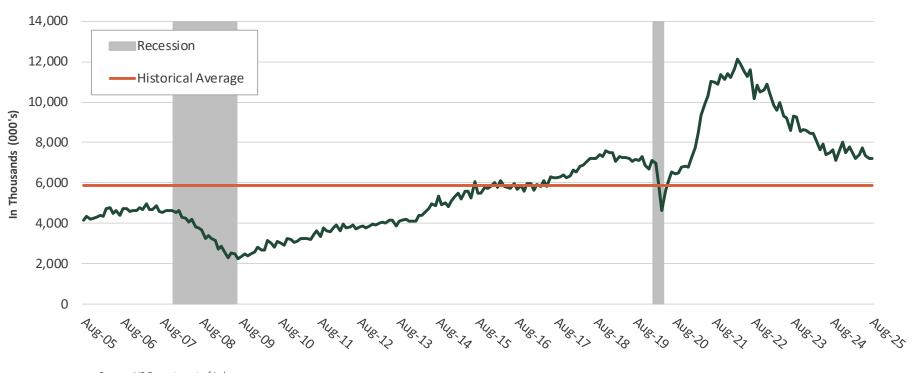

The U.S. economy added just 22,000 jobs in August, falling short of consensus expectations and punctuating the softening trend in the labor market. The three-month moving average and six-month moving average payrolls totaled 29,000 and 64,000 respectively. The unemployment rate rose to 4.3% in August from 4.2% in July. The labor participation rate inched up to 62.3%, remaining below the prepandemic level of 63.3%. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons jumped to 8.1% in August from 7.9% in July. Average hourly earnings fell to 3.7% year-over-year from 3.9% last month.

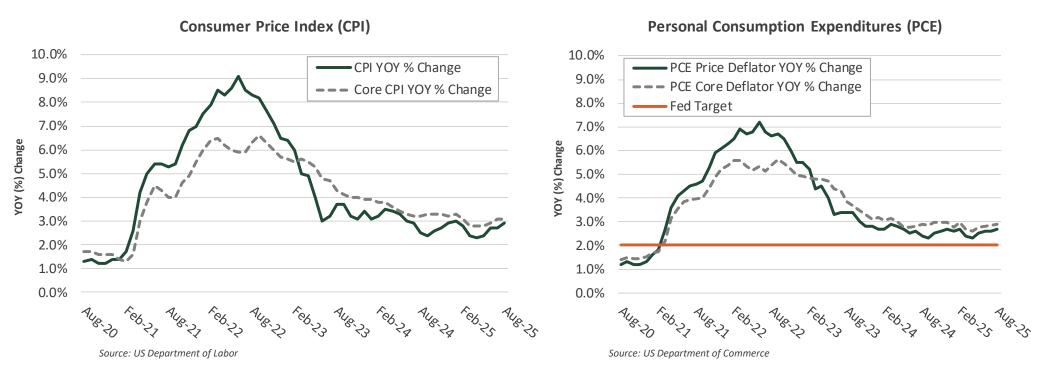

# **Job Openings**

Source: US Department of Labor

The Labor Department's Job Openings and Labor Turnover Survey (JOLTS) showed a modest increase to 7.227 million new job openings in August from 7.2 million in July. The quits rate and layoffs remained relatively stable. Job openings indicate a ratio of approximately 1 job for each unemployed individual, representing a relatively balanced labor market.

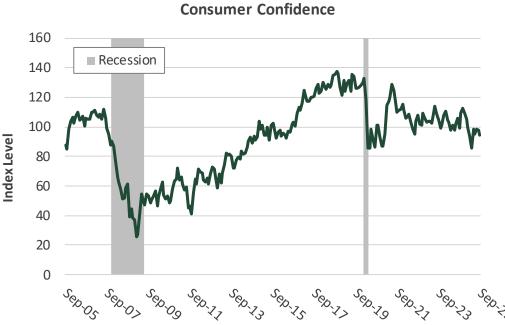

In August, the Consumer Price Index (CPI) increased more than expected at 0.4% month-over-month and 2.9% year-over-year, while the Core CPI rose 0.3% month-over-month and 3.1% year-over-year, in line with expectations. The Personal Consumption Expenditures (PCE) price index rose 0.3% month-over-month and 2.7% year-over-year in August. The Core PCE deflator, which excludes food and energy and is the Fed's preferred gauge, was up 0.2% from July leaving it unchanged at 2.9% on an annual basis in August.

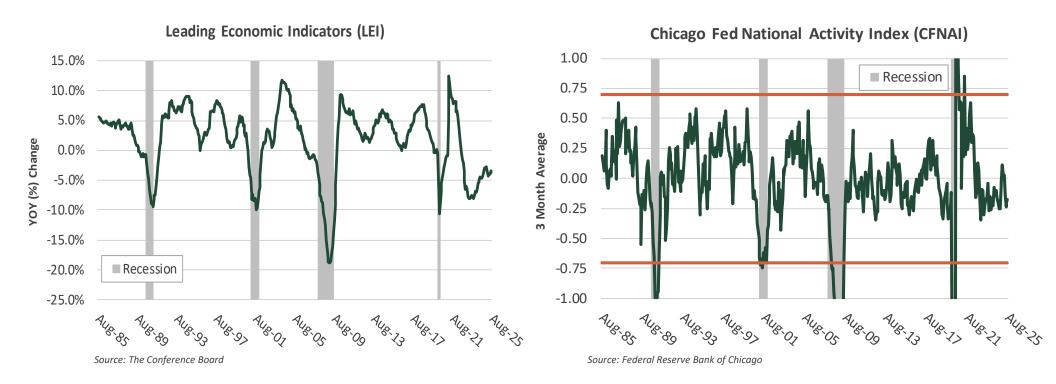

Source: The Conference Board All time high is 144.70 (1/31/00); All time low is 25.30 (2/28/09)

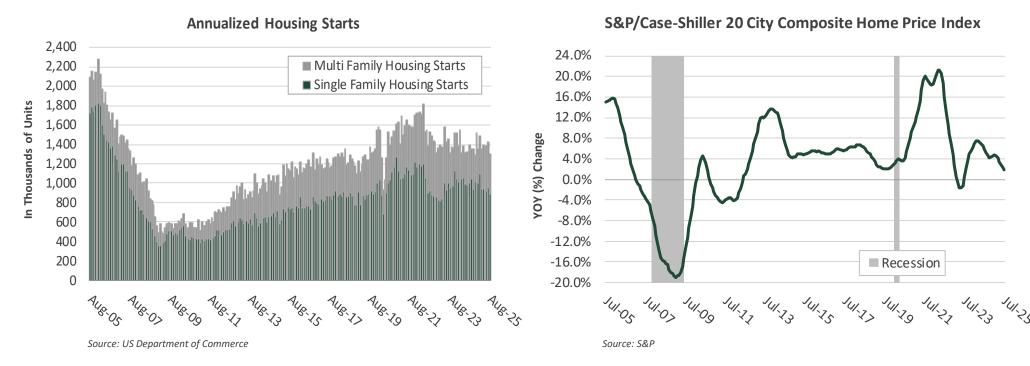

Advance Retail Sales showed continued strength jumping 0.6% in August as July data was also revised up to 0.6% month-over-month. The increase elevated retail sales to 5.0% on an annual basis after jumping 4.1% year-over-year in July. Back-to-school shopping was a likely catalyst as online shopping, clothing, and sporting goods saw some of the largest increases. Control group sales, which feed into GDP, also jumped 0.74% in August from the prior month. The Conference Board's Consumer Confidence Index fell to 94.2 in September from a revised 97.8 in August, marking the lowest level since April 2025. Measures of current conditions and future expectations fell, signaling weaker sentiment toward employment and income. Consumers have remained resilient, but rising debt burdens, higher delinquency rates, lingering inflation worries, and emerging signs of labor market cooling could weigh on future spending.

The Conference Board's Leading Economic Index (LEI) fell by 0.5% in August, following a 0.1% increase in July. The LEI decreased by 3.6% year-over-year. The Conference Board is expecting economic growth to slow in the second half of 2025 due to consumer pessimism, soft manufacturing new orders, and negative impacts from tariffs. The Chicago Fed National Activity Index (CFNAI) came in at -0.12% in August after a downwardly revised -0.28 in July, indicating that economic momentum remained below its historical trend for the fifth consecutive month. The three-month moving average shows a similar trend at -0.18 in August from -0.20 in the prior month signaling ongoing below-trend growth in national economic activity.

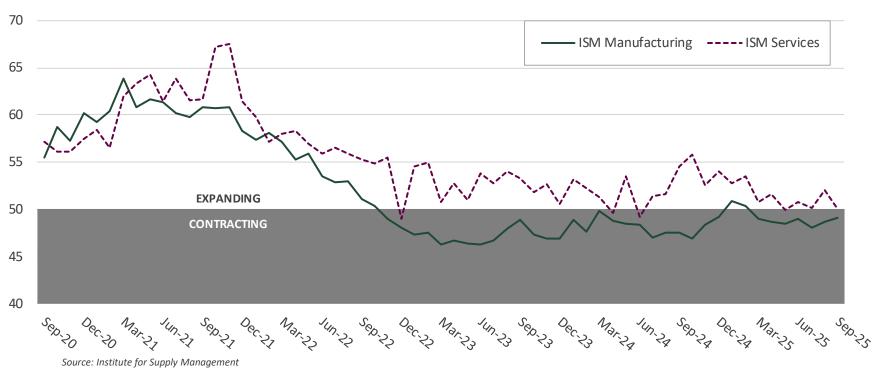

Housing starts dropped 8.5% in August to 1.307 million units, marking a pullback amid elevated inventory levels and a softening labor market. Single-family starts fell 7.0% in August to 890,000 units, hitting their lowest level since July 2024. The S&P Cotality Case Shiller 20-City Home Price Index recorded a 0.07% month-over-month decline in July, marking the fifth consecutive month of losses, while still posting a modest year-over-year gain of 1.8%. Persistently high asking prices and elevated mortgage rates have continued to challenge affordability, contributing to the recent cooling across the housing market. However, the Freddie Mac 30-year fixed mortgage rate continued recent declines to 6.3% as of September.

### **Institute of Supply Management (ISM) Surveys**

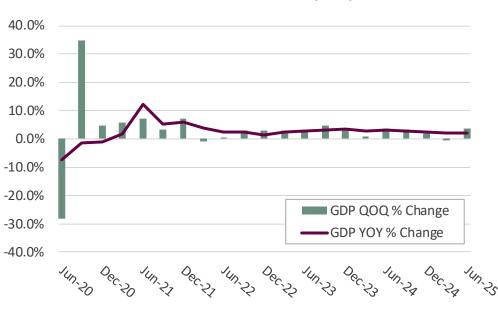

Manufacturing activity contracted at a slightly slower rate as the Institute for Supply Management (ISM) Manufacturing Index edged up to 49.1 in September, from 48.7 in August yet remaining below the expansion threshold, signaling the seventh consecutive month of contraction in the manufacturing sector. Production growth factored into the gain, although drops in new orders and inventories offset the increase. The ISM Services Index fell to 50.0 in September from 52.0 in August, which is the breakeven point between expansion and contraction. The 2.0-point decline generally indicated moderate to weak growth, with only isolated reports of supplier delivery delays. Employment remained in contraction territory, reflecting delayed hiring plans and ongoing challenges in finding qualified workers.

Components of GDP	9/24	12/24	3/25	6/25
Personal Consumption Expenditures	2.7%	2.6%	0.4%	1.7%
Gross Private Domestic Investment	0.2%	-1.3%	3.8%	-2.7%
Net Exports and Imports	-0.4%	-0.1%	-4.7%	4.8%
Federal Government Expenditures	0.5%	0.3%	-0.4%	-0.4%
State and Local (Consumption and Gross Investment)	0.4%	0.3%	0.2%	0.3%
Total	3.4%	1.9%	-0.6%	3.8%

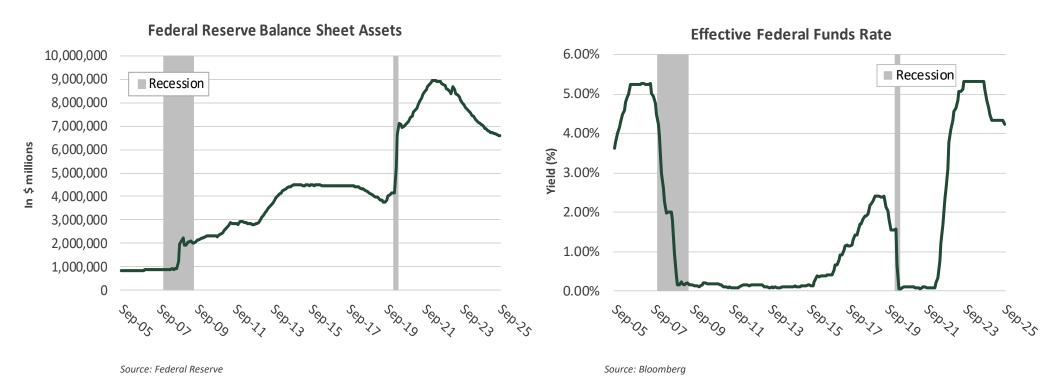

### **Gross Domestic Product (GDP)**

Source: US Department of Commerce Source: US Department of Commerce

In a sharp rebound from the first quarter, real GDP increased at an annualized rate of 3.8% in the second quarter of 2025 according to the final data revision from the Bureau of Economic Analysis. The increase in real GDP in the second quarter was driven by the drop in imports following the significant rise in the first quarter in anticipation of higher tariffs and an increase in consumer spending. The consensus projection calls for 1.7% growth for the third quarter and 1.8% for the full year 2025.

The Federal Reserve lowered its benchmark interest rate by a quarter point to a range of 4.00% to 4.25% at its September meeting, as officials responded to mounting signs of labor market weakness. Chair Jerome Powell said the move was aimed at cushioning the slowdown while keeping policy restrictive enough to fight lingering inflation. The Fed kept its balance-sheet runoff unchanged, maintaining a \$5 billion monthly cap on Treasuries and \$35 billion on agency and mortgage-backed securities. Since launching its Quantitative Tightening campaign in June 2022, the Fed has reduced its securities holdings by about \$2.35 trillion, bringing the total down to roughly \$6.6 trillion.

At the end of September, the 2-year Treasury yield was 5 basis points lower, and the 10-Year Treasury yield was 40 basis points higher, year-over-year. The spread between the 2-year and 10-year Treasury yield points on the curve decreased to +54 basis points at September month-end versus +61 basis points at August month-end. The prior 2-year/10-year yield curve inversion, which spanned from July 2022 to August 2024, was historically long. The average historical spread (since 2005) is about +99 basis points. The spread between the 3-month and 10-year Treasury yield points on the curve was +21 basis points in September versus +8 basis points in August.

# **ACCOUNT PROFILE**

## **Investment Objectives**

The investment objectives of the City of Orange are first, to provide safety of principal to ensure the preservation of capital in the overall portfolio; second, to provide adequate liquidity to meet all requirements which might be reasonably anticipated; and third, to earn a commensurate rate of return.

## Chandler Asset Management Performance Objective

The performance objective for the portfolio is to achieve a rate of return over a market cycle that equals or exceeds the return on a market index of similar duration and sector allocation.

## Strategy

In order to achieve these objectives, the portfolio invests in high quality fixed income securities consistent with the investment policy and California Government Code.

#### **IMPORTANT DISCLOSURES**

2025 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc ("IDS"), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Source ICE Data Indices, LLC ("ICE"), used with permission. ICE permits use of the ICE indices and related data on an "as is" basis; ICE, its affiliates and their respective third party suppliers disclaim any and all warranties and representations, express and/or implied, including any warranties of merchantability or fitness for a particular purpose or use, including the indices, index data and any data included in, related to, or derived therefrom. Neither ICE data, its affiliates or their respective third party providers guarantee the quality, adequacy, accuracy, timeliness or completeness of the indices or the index data or any component thereof, and the indices and index data and all components thereof are provided on an "as is" basis and licensee's use it at licensee's own risk. ICE data, its affiliates and their respective third party do not sponsor, endorse, or recommend chandler asset management, or any of its products or services.

This report is provided for informational purposes only and should not be construed as a specific investment or legal advice. The information contained herein was obtained from sources believed to be reliable as of the date of publication, but may become outdated or superseded at any time without notice. Any opinions or views expressed are based on current market conditions and are subject to change. This report may contain forecasts and forward-looking statements which are inherently limited and should not be relied upon as indicator of future results. Past performance is not indicative of future results. This report is not intended to constitute an offer, solicitation, recommendation or advice regarding any securities or investment strategy and should not be regarded by recipients as a substitute for the exercise of their own judgment.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest.

Benchmark	Disclosure
ICE BofA 1-5 Yr US Treasury & Agency Index	The ICE BofA 1-5 Year US Treasury & Agency Index tracks the performance of US dollar denominated US Treasury and nonsubordinated US agency debt issued in the US domestic market. Qualifying securities must have an investment grade rating (based on an average of Moody's, S&P and Fitch). Qualifying securities must have at least one year remaining term to final maturity and less than five years remaining term to final maturity, at least 18 months to maturity at time of issuance, a fixed coupon schedule, and a minimum amount outstanding of \$1 billion for sovereigns and \$250 million for agencies.
