hi Larry,

thanks for your letter of 2 December on Plaza traffic concepts.

of those potential strategies suggested, we're most in favor of so-called "splitter islands", as they will add physical safety, don't divert traffic into neighborhoods, and won't add noise pollution to an already loud (must the fire dept roll hook-and-ladders through here for every call?!). for us to do business as a professional services firm.

pursuant to our commitment to Orange, feel free to reach out to us at any point regarding the likely future of motor vehicles. we help most carmakers plan and design their forward models, and have a good window into what will, and won't, happen in the next 20 years with the U.S. vehicle fleet in terms of size, mass, powertrain, etc.

respectfully,

Eric Noble
president
