Introduction:

The Segment Planning Sheet (SPS) is used by the Santiago Creek Commission (Commission) and City staff to set out a vision while identifying possible projects for City Council consideration along the Santiago Creek Area. The SPS intends to provide the City Council with critical information and ensure orderly implementation should the City Council wish to move forward with a specific project. Each project identifies how it furthers the Commission's purpose, the property zoning information, lead department, and specific funding sources (i.e., identify specific grants). The Plan is a living document that can be amended by the Commission to better meet the needs of the City should priorities and resources change over time.

Table Definitions:

1. **Recommended Project** – General description/name of the specific project along Santiago Creek.

2. **Recommended Priority** – Scored one through three with (1) representing critical and feasible projects that would immediately improve and promote Santiago Creek; (2) representing projects that would improve and promote Santiago Creek but would require funding not readily available; and (3) representing projects that although would improve and promote Santiago Creek, it would not make a significant contribution, and funding is not readily available.

3. **Project Description** – Details on what the project plans to incorporate and instruct. Additionally, a brief description on how it would improve Santiago Creek.

4. **Lead Department/Stakeholders** – Expected department(s) and/or outside groups to take lead on the project and expected staffing needs.

5. **Needed Collaborations** – Identify government agencies that would need to be involved in the proposed project.

6. **Recommended Funding Strategy** – Specific grants the City could pursue to implement the project along with any matching requirements. If a cost estimate is available, this should be included as well.

7. **Zoning Information and Limitation (if any)** – Detail the project location's zoning designation and any expected limitations or issues that would need to be addressed.

8. **Reference Documents** – Detail the planning documents, if any, that support or were the impetus for the proposed recommendation/project.

9. **Other Matters of Interest** – Check boxes that detail if the proposed project carries ecological, scenic, historical, and/or recreational significance/opportunities.
