The City of Orange City Council welcomes you to this meeting and encourages your participation. Regular City Council meetings are held on the second and fourth Tuesday of each month at 6:00 p.m.

Agenda Information

The agenda contains a brief general description of each item to be considered. The City Council may take legislative action deemed appropriate with respect to the item and is not limited to the recommended action indicated in staff reports or the agenda. The agenda and supporting documentation is available after 4:00 p.m. on the Thursday prior to the Council meeting on the City's website at www.cityoforange.org, at the City Clerk's Office located at 300 E. Chapman Avenue, and at the Main Public Library located at 407 E. Chapman Avenue. Written materials relating to an item on the agenda that are provided to the City Council after agenda packet distribution and within 72 hours before Council is to consider the item will be made available for public inspection in the City Clerk's Office during normal business hours; at the City Council meeting; and made available on the City's website.

Public Participation

Regular meetings are televised live on Spectrum Cable Channel 3 and AT&T U-verse Channel 99, and streamed live and on-demand on the City's website at www.cityoforange.org.

Pursuant to Government Code Section 54954.3, members of the public may address the City Council on any agenda item before or during Council's consideration of the item, and on any other matters within the City Council's jurisdiction by using any of the following methods:

1) In-Person

To speak on an item on the agenda, complete a speaker card indicating your name, address, and identify the agenda item number or subject matter you wish to address. The card should be given to the City Clerk prior to the start of the meeting. General comments are received during the "Public Comments" section at the beginning of the Regular Session. No action may be taken on off-agenda items unless authorized by law. Public Comments are limited to three (3) minutes per speaker unless a different time limit is announced. It is requested that you state your name for the record, then proceed to address the City Council. All speakers shall observe civility, decorum, and good behavior.

(Continued on page 2)

2) Written Public Comments via eComment

Members of the public can submit their written comments electronically for City Council consideration by using the eComment feature on the Agenda page of the City's website at www.cityoforange.org. To ensure distribution to the City Council prior to consideration of the agenda, we encourage the public to submit written comments by 3:00 p.m. the day of the meeting. All written comments will be provided to the Council for consideration and posted on the City's website after the meeting.

3) Public Comments via recorded voicemail message

Finally, the public can record their comments by calling (714) 744-2234 no later than 3:00 p.m. the day of the meeting. Recorded messages will not be played at the meeting, but will be provided to the Council.

In accordance with Ordinance No. 10-01, any person making personal, impertinent, slanderous or profane remarks or who becomes boisterous while addressing the Council shall be called to order by the Mayor. If such conduct continues, the Mayor may order the person barred from addressing the City Council further during that meeting, unless permission to continue is granted by a majority vote of the Council.

Please contact the City Clerk's Office at (714) 744-5500 with any questions.

ADA Requirements: In compliance with the Americans with Disabilities Act, if you need accommodations to participate in this meeting, please contact the City Clerk's office at (714) 744-5500. Notification at least 48 hours in advance of meeting will enable the City to make arrangements to assure accessibility to this meeting.

REMINDER: Please silence all electronic devices while City Council is in session.

5:00 PM CLOSED SESSION

- Draft Proclamation

Proclamation

Honoring

Strikers FC Orange – Boys U10 Division

and

Coach Jesse Ortiz

2026 Cal South State Cup Champions

WHEREAS, Strikers FC Orange, a competitive club program of the Orange Junior Soccer Club, has a long history of empowering young athletes to become confident in themselves to perform at their best while representing their team, Soccer Club, and City in a positive manner; and

WHEREAS, under the expert tutelage of Coach Jesse Ortiz, the Boys U10 division of the Strikers FC Orange was the first of this club program to win the Cal South State Cup Championship and bring home the 2026 title; and

WHEREAS, for the past two years, the team motto has been "On Your Toes." It represents readiness, focus, discipline, and a commitment to continuous improvement in everything the team does. In Coach Ortiz's own words, "Success on the field means very little if they are not growing as students and as young men off the field;" and

WHEREAS, over the past couple of years, this strong team has played together and won many tournament championships, endured long practice sessions and grueling travel miles, injuries, and fatigue to become the 2026 Cal South State Cup Champions. Through their hard work, determination, blood, sweat, and tears, these young players who were greatly influenced by their coaches' teachings have shown tremendous team spirit and sportsmanship both on and off the field; and

WHEREAS, Orange is proud to be home to Strikers FC Orange and is proud of Coach Ortiz's Boys U10 team's outstanding competition season.

NOW, THEREFORE, I, Dan Slater, Mayor of the City of Orange, on behalf of the entire City Council, do hereby congratulate our Strikers FC Orange Boys U10 team and Coach Ortiz on their outstanding competition season leading to a Championship win at the Cal South State Cup for the first time in this division's organization's history.

DATED this 10th day of March 2026.

WEEKLY WARRANT WRITING CHECK REGISTER

Warrant Writing	Warrant Writing Confirmation Date: 02/12/26 2 of 4 reports for 03/10/26 Council Meeting
Notes:	
Requester Signature: eSigned via GovOS.com Jocelin Mendez Key: c75eb71bc2d138050ea61da6a02e3123	Date: 02-12-2026

AGENDA ITEM NO. 3.2

I certify that the attached register of demands has been prepared and audited under my direction and supervision. I also certify that each demand is accurately set forth and correctly stated, that each is a legal obligation of the City, and that there are sufficient funds available for the payment of each demand.

Please review and approve before:

WEEKLY WARRANT WRITING CHECK REGISTER

Warrant Writing	Warrant Writing Confirmation Date: 02/19/26 3 of 4 reports for 03/10/26 Council Meeting
Notes:	
Requester Signature: eSigned via GovOS.com Holli Kittleson Key: c75eb71bc2d138050ea61da6a02e3123	Date: 02-19-2026

AGENDA ITEM NO. 3.2

I certify that the attached register of demands has been prepared and audited under my direction and supervision. I also certify that each demand is accurately set forth and correctly stated, that each is a legal obligation of the City, and that there are sufficient funds available for the payment of each demand.

Please review and approve before:

WEEKLY WARRANT WRITING CHECK REGISTER

Warrant Writing	Warrant Writing Confirmation Date: 02/26/26 4 of 4 reports for 03/10/26 Council Meeting
Notes:	
Requester Signature:	eSigned via GovOS.com Jocelin Mendez Key: c75eb71bc2d138050ea61da6a02e3123
Date:	02-26-2026

AGENDA ITEM NO. 3.2

I certify that the attached register of demands has been prepared and audited under my direction and supervision. I also certify that each demand is accurately set forth and correctly stated, that each is a legal obligation of the City, and that there are sufficient funds available for the payment of each demand.

Please review and approve before:

4. CLOSED SESSION REPORT

None

5. ADJOURNMENT

Closed Session was adjourned at 5:50 p.m.

Draft

6:00 PM REGULAR SESSION

1. OPENING/CALL TO ORDER

Mayor Slater called the meeting to order at 6:02 p.m.

1.1 INVOCATION

Given by Reverend Nancy E. Brink, Executive Director of the Fish Interfaith Center at Chapman University.

1.2 PLEDGE OF ALLEGIANCE

Led by Councilmember John Gyllenhammer.

1.3 ROLL CALL

Present: Barrios, Dumitru, Gutierrez, Tavoularis, Gyllenhammer, and Slater
Absent: Bilodeau

1.4 PRESENTATIONS/ANNOUNCEMENTS

Proclamation honoring K-9 Nash for six years of service to the City of Orange

Orange High School Student Liaison Jacob Gonzalez provided Council with a brief update on school happenings.

1.5 REPORT ON CLOSED SESSION ACTIONS

None

2. PUBLIC COMMENTS

Public Speakers:
Greg Arrowsmith spoke regarding statistics related to California correctional facilities.
Reggie Mundekis encouraged Council to support the International Brotherhood of Electrical Workers (IBEW) and all employee bargaining groups.
Marci Carey spoke regarding federal immigration issues.
Michael Ristig spoke regarding federal immigration issues.
Ryan Johnson spoke about the use of non-sworn Community Service Officers to supplement Police Department staffing.
Lynnette Gertz spoke regarding federal immigration issues.
Mel Vernon announced a "No Kings" event at Yorba Park on March 28.
Mary Oberschlake commented on federal immigration offices in Orange County.
Chip O'Neal encouraged Council to adopt a resolution stating the City would not assist federal immigration officers.
Carole Walters inquired about parking meter funds.
David Casselman expressed support for Ukraine and commented on his First Amendment rights.
Lisa Baldwin spoke about the notice mailed to residents regarding a proposed development at the former Best Buy site.
Shawn Donnelly, City of Orange Water Division employee, talked about labor negotiations and the retention of Water Division employees.

Draft

Josh Borden, City of Orange Water Division employee, stated the City of Orange is the lowest paid City in the area and discussed retention concerns, noting employees are trained by the City and subsequently leave for other jurisdictions.
Steven Borden spoke regarding the automation of street sweeping parking citations.
Paul (no last name given) suggested adding 15-minute parking spaces in Old Towne.

Written Public Comments
Janice Brownfield emailed about the dangers of air pollution.
Matin Sharifinejad submitted an eComment concerning the impact that the ban on tobacco sales from 2 a.m. to 6 a.m. has had on his business.

3. CONSENT CALENDAR

All items on the Consent Calendar are considered routine and are enacted by one motion approving the recommended action listed on the Agenda. Any member of the City Council, staff, or the public may request an item be removed from the Consent Calendar for discussion or separate action. Unless otherwise specified in the request to remove an item from the Consent Calendar, all items removed shall be considered immediately following action on the remaining items on the Consent Calendar.

3.1. Waive reading in full of all ordinances on the Agenda.

ACTION: Approved.

3.2. Approval of minutes of the City of Orange City Council Special Meeting held on February 5, 2026, and Regular Meeting held on February 10, 2026.

ACTION: Approved minutes as presented.

3.3. Agreement with Lance, Soll & Lunghard, LLP for annual financial audit services for the City and the Successor Agency of the former Orange Redevelopment Agency for Fiscal Year 2025-2026 and 2026-2027 and an Agreed-Upon Procedures for Payroll.

ACTION: Approved the agreement with Lance, Soll & Lunghard, LLP in the amount of $185,240 for audit services and Agreed-Upon Procedures for Payroll; and authorized the Mayor and City Clerk to execute on behalf of the City.

3.4. Agreement with Officer Logan Shryock for the transfer of ownership of police service dog, Nash, assigned to the Police Department's canine team.

A speaker card was submitted for Item 3.4; therefore, the item was removed from the Consent Calendar for separate consideration.

Public Speaker:
David Casselman spoke in support.

ACTION: A motion was made by Councilmember Dumitru, seconded by Councilmember Barrios, to approve the agreement with Logan Shryock to transfer ownership of canine Nash; and authorize the Mayor and City Clerk to execute on behalf of the City. The motion carried by the following vote:

Ayes: Barrios, Dumitru, Gutierrez, Tavoularis, Gyllenhammer, and Slater
Noes: None
Absent: Bilodeau

Draft

3.5. First Amendment to Agreement with Tetra Tech, Inc. for additional design services for Well 29 Equipping.

ACTION: Approved the First Amendment with Tetra Tech, Inc. in the amount of $191,200; and authorized the Mayor and City Clerk to execute on behalf of the City.

3.6. Appropriation of $10,689 in designated grant funding received from California Library Association and California State Library.

ACTION: 1) Accepted into the City's General Fund (100) revenue budget $10,689 in grant funds from California Library Association and California State Library to:
100-2101-43201-262110-48 Lunch at the Library Grant FY26
2) Authorized the appropriation of $10,689 to General Fund (100):
100-2316-53101-262110-20 Operating Materials & Supplies

3.7. Appropriation of $55,000 from the County of Orange for the 2025 Proposition 69 funding award and approval of purchase of a forensic imaging and evidence detection device from Foster & Freeman USA Inc.

ACTION: 1) Accepted into the City's Reimbursable Capital Projects (550) revenue budget $55,000 in 2025 Proposition 69 funding from the County of Orange to:
550-4134-43299-264067 State - Other
2) Authorized the appropriation of $55,000 into Reimbursable Capital Projects (550):
550-4134-80101-264067 Equipment - Prop 69 2025
3) Approved the sole source purchase of the Crime-Lite AUTO device from Foster & Freeman USA Inc. for $54,831.94.

3.8. Authorize an increase to two purchase orders for medical supplies and essential equipment repairs for the Emergency Medical Transport Program.

ACTION: 1) Approved an increase to a blanket purchase order for a total not-to-exceed amount of $375,000 with Life Assist, Inc. for medical supplies; and 2) Approved an increase to a blanket purchase order for a total not-to-exceed amount of $85,000 with Stryker Medical Supplies for medical supplies and other professional services.

3.9. Authorize purchase of replacement public use desktop computers and laptops from CPAC, Inc.

ACTION: Approved the purchase order for replacement public use desktop computers and laptops from CPAC, Inc. for $80,000.

3.10. Annual Comprehensive Financial Report and related financial reports for the Fiscal year ended June 30, 2025.

ACTION: Receive and file the following documents for the fiscal year ended June 30, 2025:
1) Annual Comprehensive Financial Report
2) Audit Communication Letter
3) Independent Accountants' Report on Agreed-Upon Procedures Applied to the Appropriations Limit Worksheets
4) Independent Accountants' Report on Agreed-Upon Procedures Applied to the Investment Portfolio
5) Air Pollution Reduction Fund Financial Statements and Independent Auditors' Report

Draft

6) Independent Auditors' Report on Internal Control Over Financial Reporting
7) Housing Successor Fund Financial Statements

Approval of the Consent Calendar

Item 3.4 was removed from the Consent Calendar and heard separately. All other items were approved as recommended.
A motion was made by Councilmember Tavoularis, seconded by Councilmember Dumitru, to approve the Consent Calendar as recommended. The motion carried by the following vote:

Ayes: Barrios, Dumitru, Gutierrez, Tavoularis, Gyllenhammer, and Slater
Noes: None
Absent: Bilodeau

END OF CONSENT CALENDAR

4. REPORTS FROM MAYOR SLATER

4.1. Discuss reinstating sidewalk steam cleaning services for the Plaza in Old Towne.

Mayor Slater proposed reinstating sidewalk steam cleaning services in Old Towne. Council discussed the cost associated with restoring weekly and monthly cleanings, the possibility of adding the Lemon Street parking structure to the cleaning schedule, and the addition of security cameras in the parking structure stairwells.

Public Speakers:
The following spoke in support of reinstating the cleaning services: AJ Ricci, Brandy Romero, Lisa Baldwin, Steve Molina, and Tim Mabshi.

With Council concurrence, staff was directed to restore cleaning efforts within the City Manager's signing authority.

RECESS: The City Council recessed at 7:32 p.m. and reconvened at 7:47 p.m. with all Members present, except Mayor pro tem Bilodeau who was absent.

4.2. Discuss updating the standards for paving, driveway widths, and parking in setback areas.

Mayor Slater noted an increase in the amount of vehicles parked in single driveways and requested consensus to direct staff to revise standards related to paving, driveway widths, and parking within setback areas.

Public Speaker:
Douglas Newall spoke about the need for updated standards, noting that accessory dwelling units (ADUs) have contributed to an increase in the number of vehicles per household.

With Council concurrence, staff was directed to return with a report on driveway parking standards and the boarding house ordinance.

4.3. Additional Reports from Mayor Slater

Mayor Slater made a brief announcement about the current vacancies on various Boards, Commissions, and Committees.

5. REPORTS FROM COUNCILMEMBERS

Councilmember Barrios requested that the Tobacco Ordinance be brought back to Council for further updates.

Councilmember Gutierrez thanked Orange Police Department for keeping students safe during the recent walkouts while allowing them to exercise their constitutional rights.

Councilmember Tavoularis thanked the community for organizing a cleanup on Canal Street and announced an Open House for the Heim & Meats specific plan on February 26, 2026.

6. AB 1234 REPORTS

None

7. REPORTS FROM CITY MANAGER

None

8. ADMINISTRATIVE REPORTS

8.1. Lottery selection for permits to sell safe and sane fireworks.

Staff provided a brief report noting that the three high schools identified in Resolution No. 11648 (Orange High School, El Modena High School, and Richland High School) have indicated their intent to move forward with the permitting process. Staff then conducted the random lottery. The results were as follows:
1) Greater Orange Community Arts Theater Foundation (GOCAT)
2) Orange Plaza Rotary Club
3) Cedar Tree Music and Performance
4) Young Life
5) Santiago Canyon College Foundation
6) Orange Lutheran High School
7) McPherson Educational Foundation
8) Journey to Hope Ministries
9) Orange Antlers #1475/Orange Elks Lodge #1475

The following alternate organizations were selected:
1) Rest Ezzz Foundation
2) The Church of God of Prophecy Orange
3) Homeless Intervention Services of Orange County
4) Father JJ Juba Council 4922 Knights of Columbus
5) Love Orange

Draft

6) House of Mercy

Draft

8.2. Review of the Santiago Creek Commission Strategic Plan.

Deputy City Manager Jack Morgan presented the Santiago Creek Commission Strategic Plan. Council expressed strong support for the plan and discussed options for implementation.

Public Speakers:
Pamela Galera, Santiago Creek Commission Vice Chair, spoke in support of adoption and expressed interest in collaborating with grant writers to advance the plan.
Adrienne Gladson spoke in support of adoption and implementation of the plan.
Theresa Sears spoke in support of adoption and implementation of the plan.

A motion was made by Councilmember Dumitru, seconded by Councilmember Barrios, to adopt the Santiago Creek Strategic Plan. The motion carried by the following vote:
Ayes: Barrios, Dumitru, Gutierrez, Tavoularis, Gyllenhammer, and Slater
Noes: None
Absent: Bilodeau

A motion was made by Mayor Slater, seconded by Councilmember Gutierrez, to direct the Santiago Creek Commission to collaborate with Townsend Public Affairs to identify potential grant opportunities and engage community groups to implement the recommendations detailed in the plan. The motion carried by the following vote:
Ayes: Barrios, Dumitru, Gutierrez, Tavoularis, Gyllenhammer, and Slater
Noes: None
Absent: Bilodeau

9. ADJOURNMENT

There being no further business, the meeting was adjourned at 8:44 p.m. in Memory of former City employee Viviano Cortez.

The next Regular City Council meeting will be held on Tuesday, March 10, 2026, at 6:00 p.m., in the Council Chamber, with Closed Session beginning at 5:00 p.m., if necessary.

Agenda Item

Orange City Council

Item #: 3.4. 3/10/2026 **File #:** 26-0074

TO: **Honorable Mayor and Members of the City Council**

THRU: **Jarad Hildenbrand, City Manager**

FROM: **Christopher Cash, Public Works Director**

1. SUBJECT

Cooperative Agreement by and between the cities of Anaheim, Brea, Fullerton and Orange for the State College Boulevard/The City Drive Regional Traffic Signal Synchronization Project

2. SUMMARY

The OCTA Board approved competitive Measure M2 grant funding for an inter-jurisdictional traffic signal enhancement project along the State College Boulevard/City Drive corridor. This Cooperative Agreement establishes the respective responsibilities of each of the four participating agencies. Orange is responsible for 20 percent of project costs within the city limits.

3. RECOMMENDED ACTION

1. Approve the Cooperative Agreement with the cities of Anaheim, Brea, and Fullerton for the implementation of State College Boulevard/The City Drive Regional Traffic Signal Synchronization Project; and authorize the City Manager and City Clerk to execute on behalf of the City.

2. Authorize the appropriation of $200,000 from the Measure M - Traffic Improvement (263) unreserved fund balance to:

   263-5704-87101-265105 State College Blvd Traffic Signal Synchronization

4. FISCAL IMPACT

The expense for this cooperative agreement is $200,000 and will be funded through Measure M - Traffic Improvement (263):

263-5704-87101-265105 State College Blvd Traffic Signal Synchronization

Upon approval of this appropriation, the estimated Measure M - Traffic Improvement (263) fund balance on June 30, 2026, will be $6,468,215.07.

5. STRATEGIC PLAN GOALS

Goal 5: Improve infrastructure, mobility, and technology.

6. DISCUSSION AND BACKGROUND

In August 2024, Orange County Transportation Authority (OCTA) issued a call for projects for coordinating traffic signals across multiple jurisdictional boundaries as part of the Renewed Measure

M (M2) Regional Traffic Signal Synchronization Program (referred to as Project P) to enhance countywide traffic flow and reduce congestion.

In response to the call, the City of Anaheim, with the participation of the cities of Orange, Fullerton and Brea, initiated an application and was awarded Measure M2 funds for the synchronization of the traffic signals along the State College Boulevard/The City Drive Corridor. As a requirement of the grant application process, the Orange City Council adopted Resolution No. 11590 in January 2025, which enabled OCTA to allocate funds from the Comprehensive Transportation Funding Programs to this project.

The 11-mile State College Boulevard/The City Drive corridor, between Cliffwood Avenue in the City of Brea and Garden Grove Boulevard in Orange, includes 58 traffic signals across five jurisdictions: Santa Ana, Orange, Brea, Placentia, Caltrans, and Anaheim. Within the City of Orange, the corridor spans approximately one mile along The City Drive and includes seven intersections from Orangewood Avenue to Garden Grove Boulevard. In addition to signal timing changes, the project will include traffic signal equipment and modifications identified in the application. For the City of Orange, equipment upgrades include installation of fiber optic cable, controller and cabinet upgrades, and new video detection systems.

The total project cost is $4,702,863.50. The participating agencies agreed to a combined cash and in-kind (staffing commitments and equipment purchases) match of $940,572.70, representing approximately twenty percent (20%) of the total project cost. The City of Orange has a local match (fair share) of $185,621.20. The proposed $200,000 appropriation is expected to cover our local match and provide for a small contingency.

The attached Cooperative Agreement describes the duties and responsibilities, including funding obligations of all the participating agencies. The City of Anaheim has agreed to act as the implementing agency to carry out project implementation. Participating agencies will be responsible for coordinating the installation of their elements during the course of the project and on-going maintenance and operation after the three-year grant period. When completed, vehicular traffic in a synchronized corridor will often pass through a longer series of green lights before stopping.

COOPERATIVE AGREEMENT BY AND BETWEEN THE CITIES OF ANAHEIM, BREA, FULLERTON, AND ORANGE FOR THE STATE COLLEGE BOULEVARD / THE CITY DRIVE REGIONAL TRAFFIC SIGNAL SYNCHRONIZATION PROJECT

This Cooperative Agreement ("Agreement") is made and entered into this _____ day of _____ _____, 2026, by and between the CITY OF ANAHEIM, a municipal corporation ("ANAHEIM"), the CITY OF BREA, a municipal corporation ("BREA"), the CITY OF FULLERTON, a municipal corporation ("FULLERTON"), and the CITY OF ORANGE, a municipal corporation ("ORANGE").

RECITALS:

A. Anaheim, with cooperation from Brea, Fullerton, and Orange, applied for a grant from the Orange County Transportation Authority ("OCTA") as part of Renewed Measure M2 Regional Traffic Signal Synchronization Program ("RTSSP") (Project P), aimed to coordinate traffic signals across multiple jurisdictions to enhance countywide traffic flow and reduce congestion.

B. The State College Boulevard/ The City Drive Regional Traffic Signal Synchronization Project was selected by OCTA as one of the RTSSP Projects to be funded in OCTA Fiscal Year 2025-2026. The project will include timing implementation and improvements at traffic signals along State College Boulevard/The City Drive, from Cliffwood Avenue in Brea to Garden Grove Bl in City of Orange, as listed in the Project Application attached hereto as Exhibit B and incorporated herein by this reference.

C. The total budget for the project is $4,702,863.50. 80% ($3,762,290.80) is funded by the OCTA Regional Traffic Signal Synchronization Program and 20% ($940,572.70) is local agencies matching funds. The breakdown is shown in Exhibit A attached hereto and incorporated herein by this reference.

D. Anaheim, Brea, Fullerton, and Orange agree to provide twenty percent (20%) matching funds for the total project cost. Matching funds can be a combination of cash and in-kind match as defined by the RTSSP grant.

E. OCTA and Anaheim have entered into a Master Funding Agreement "Cooperative Agreement No. C-1-2754" defining the terms and conditions for approved Measure M2 projects that will be implemented by Anaheim.

F. Anaheim agrees to serve as the lead agency to oversee the design and implementation of the project.

G. Anaheim, Brea, Fullerton, and Orange desire to enter into this Cooperative Agreement to demonstrate their commitment to implement the project and improve inter-jurisdiction traffic signal synchronization on State College Boulevard/The City Drive.

H. This cooperative agreement defines the specific terms, conditions and funding responsibilities between Anaheim, Brea, Fullerton, and Orange for the implementation of the project.

NOW, THEREFORE, it is mutually understood and agreed by and between ANAHEIM, BREA, FULLERTON, and ORANGE as follows:

I. SCOPE:

This Agreement specifies the roles and responsibilities of the cities as they pertain to the subjects and projects addressed herein. The project is specifically detailed in the Project Application attached hereto as Exhibit B and incorporated herein by this reference. All of the cities agree that each will cooperate and coordinate with the other in all activities covered by this Agreement and any other supplemental agreements that may be required to facilitate purposes thereof.

II. MUTUAL RESPONSIBILITIES:

Anaheim, Brea, Fullerton, and Orange mutually agree to:

a. Designate a lead staff to act as the liaison for the project. The liaison and any other project personnel, if necessary, will attend and participate in all related project meetings.

b. Participate, cooperate and coordinate with contractors, consultants, vendors and staff in good faith using reasonable efforts to resolve any unforeseen issues and disputes arising out of the project to the extent practicable with respect to the performance of the project.

c. Maintain project related traffic signals and telecommunications equipment with high priority during the project and be responsible for repair of their own signal control systems in each of their respective jurisdictions.

d. Provide on-site support for signal control systems, timing plans, detection systems and related equipment during construction, installation and integration, and be available to change or make adjustments to timing plans when necessitated by the project.

e. Document in-kind match or dollar match funding as identified in the project application and provide verification of such expenditures as part of any review or audit process, which may include payroll records, contracts and purchase orders.

f. Monitor and operate the project traffic signals and improvements within its jurisdiction for a period of two (2) years following the completion of the Primary Implementation Phase of the project, as required by the program funding.

g. Coordinate the inclusion of other improvements and in-kind services, where necessary, that the owning agency requires for the implementation of the project but are not included in the project application. The owning agency shall be responsible for the inclusion of such elements within reason and at its own costs.

h. Unused project funds for improvements from one City can be used by another City (with matching fund responsibility) upon mutual consent of the involved parties.

III. RESPONSIBILITIES OF ANAHEIM:

Anaheim agrees to the following responsibilities:

a. Anaheim shall serve as lead agency for design, construction and construction management of the project, and shall provide oversight by establishing milestones and overseeing the project development to ensure that all standards and requirements set forth by the agreement is adhered to.

b. Anaheim shall be responsible for completing the project in accordance with the funding guidelines and any and all other OCTA requirements related to these funding programs. Anaheim shall maintain coordination with all participating agencies throughout the duration of the project.

c. Anaheim shall provide staff, consultants, and contractors deemed necessary and appropriate to manage, administer, coordinate, and oversee timing implementation, engineering design, bid and award, and construction management of the project.

d. Anaheim shall enter into an agreement with a qualified consultant and contractor to assist in the completion and monitoring of the project.

e. Anaheim shall enter into any required Cooperative Agreement with Caltrans regarding Caltrans Improvements in cities; to comply with all the terms and conditions of said Cooperative Agreement; to pay invoices for such Caltrans Improvements as required by Caltrans; and to invoice participating agencies in a timely manner with detailed documentation of said Caltrans Improvements

f. Anaheim shall coordinate the work effort of this Project, provide the day-to-day management of the consultant and manage all consultant administration and contracting. Anaheim shall review the consultant's invoices and pay them accordingly after ensuring that the work has been adequately performed by the consultant.

g. Anaheim shall provide its share of matching fund as shown in Exhibit A attached hereto and incorporated herein by this reference. The final amount may vary and will be based on the 20% of actual cost of implementing all timing, improvements and maintenance, as identified in the project application.

h. Upon issuance of a Notice to Proceed to the Consultant, Anaheim can issue invoices to Brea, Fullerton, and Orange for up to 80% of the cash match amount identified in Exhibit A. The remaining cash match amount will be invoiced after completion of the Primary Implementation Phase of the project.

i. Anaheim shall comply with all of the terms and conditions of the Cooperative Agreement with OCTA, including the Project Reporting and Audit Requirements contained therein.

IV. RESPONSIBILITIES OF BREA:

Brea agrees to the following responsibilities:

a. Brea shall provide its share of matching funds as shown in Exhibit A. The final amount may vary and will be based on the 20% of actual cost of implementing all timing, improvements, and maintenance, as identified in the project application.

b. Brea shall provide Construction Inspection on all improvements within its jurisdiction. No additional compensation from the project is provided for providing inspection services.

c. Brea shall waive all costs and fees related to any and all permits, if such permits are required to perform any project related work within its jurisdiction.

V. RESPONSIBILITIES OF FULLERTON:

Fullerton agrees to the following responsibilities:

a. Fullerton shall provide its share of matching funds as shown in Exhibit A. The final amount may vary and will be based on the 20% of actual cost of implementing all timing, improvements and maintenance, as identified in the project application.

b. Fullerton shall provide Construction Inspection on all improvements within its jurisdiction. No additional compensation from the project is provided for providing inspection services.

c. Fullerton shall waive all costs and fees related to any and all permits, if such permits are required to perform any project related work within its jurisdiction.

VI. RESPONSIBILITIES OF ORANGE:

Orange agrees to the following responsibilities:

a. Orange shall provide its share of matching funds as shown in Exhibit A. The final amount may vary and will be based on the 20% of actual cost of implementing all timing, improvements and maintenance, as identified in the project application.

b. Orange shall provide Construction Inspection on all improvements within its jurisdiction. No additional compensation from the project is provided for providing inspection services.

c. Orange shall waive all costs and fees related to any and all permits, if such permits are required to perform any project related work within its jurisdiction.

VII. COMPLETE AGREEMENT:

a. This Agreement, including any attachments incorporated herein and made applicable by reference, constitutes the complete and exclusive statement of the terms and conditions of this Agreement between ANAHEIM, BREA, FULLERTON, and ORANGE and it supersedes all prior representations, understandings, and communications between the parties. The invalidity in whole or in part of any term or condition of this Agreement shall not affect the validity of other term(s) or conditions(s) of this Agreement. The above referenced Recitals are true and correct and are incorporated by reference herein.

b. Any modification of this Agreement shall only be by amendment upon written mutual consent of all cities. All modifications, amendments, changes and revisions of this Agreement in whole or in part, and from time to time, shall be binding upon the cities so long as the same shall be in writing and executed by each agency.

c. A party's failure to insist on any instance(s) of any other party's performance of any term(s) or condition(s) of this Agreement shall not be construed as a waiver of the non-enforcing party's right to such performance or to future performance of such term(s) or condition(s), and the nonperforming party's obligation in respect thereto shall continue in full force and effect. Changes to any portion of this Agreement shall not be binding upon either party except when specifically confirmed in writing by way of a written amendment to this Agreement between the parties and issued in accordance with the provisions of this Agreement.

VIII. INSURANCE AND INDEMNIFICATION:

a. Each city shall jointly and severally indemnify, defend and hold harmless every other city, it's officers, directors, employees and agents from and against any and all claims for any loss or damages, bodily injuries, damage to, or loss of property caused by the negligent acts, omissions or willful misconduct by that city, its officers, directors, employees or agents in connection with or arising out of the performance of this Agreement.

b. Each city shall maintain adequate levels of insurance, or self-insurance to assure full indemnification of every other city.

IX. ADDITIONAL PROVISIONS:

a. Term of Agreement: This Agreement shall commence on the date first written above and continue in full force and effect until December 31, 2032. This Agreement may be extended at the mutual consent of all parties in writing.

b. ANAHEIM, BREA, FULLERTON, and ORANGE hereto affirm that they are authorized to execute this Agreement on behalf of said parties and that, by so executing this agreement, the parties hereto are formally bound to the provisions of this Agreement.

c. Severability: If any term, provision, covenant or condition of this Agreement is held to be invalid, void or otherwise unenforceable, to any extent, by any court of competent jurisdiction, the remainder of this Agreement shall not be affected thereby, and each term, provision, covenant or condition of this Agreement shall be valid and enforceable to the fullest extent permitted by law.

d. Counterparts of Agreement: This Agreement may be executed and delivered in any number of counterparts, each of which, when executed and delivered shall be deemed an original and all of which together shall constitute the same agreement. Facsimile and electronic signatures will be permitted.

e. In the event that the project costs exceed the estimates submitted in the Project Application as prepared, all parties agree to meet and determine project revisions to

meet the budget, or a revised funding proposal by the cities that shall be documented and submitted in writing as a revision to the Agreement.

f. The parties shall comply with all applicable federal, state and local laws, statutes, ordinances and regulations of any governmental agency having jurisdiction over the project.

g. Force Majeure: Any party shall be excused from performing its obligations under this Agreement during the time and to the extent that it is prevented from performing by an unforeseeable cause beyond its control, including, but not limited to: any incidence of fire, flood; acts of God; commandeering of material, products, plants or facilities by the federal, state or local government; national fuel shortage; or, a material act or omission by the other party; when satisfactory evidence of such cause is presented to the other parties, and provided further that such nonperformance is unforeseeable, beyond the control and is not due to the fault or negligence of the party not performing.

h. Assignment: Neither this Agreement, nor any of the parties' rights, obligations, or duties hereunder may be assigned in whole or in part by any party without the prior written consent of all the other parties in their sole and absolute discretion. Any such attempt of assignment shall be deemed void and of no force and effect. Consent to one assignment shall not be deemed consent to any subsequent assignment, nor the waiver of any right to consent to such subsequent assignment.

i. Obligations To Comply with Law: Nothing herein shall be deemed nor construed to authorize or require any party to issue bonds, notes or other evidences of indebtedness under the terms, in amounts, or for purposes other than as authorized by local, state or federal law.

j. Governing Law: The laws of the State of California and applicable local and federal laws, regulations and guidelines shall govern this Agreement.

k. Litigation fees: Should litigation arise out of this Agreement for the performance thereof, the court shall award costs and expenses, including attorney's fees, to the prevailing party.

l. Notices: Any notices, requests, or demands made between the parties pursuant to this Agreement are to be directed as follows:

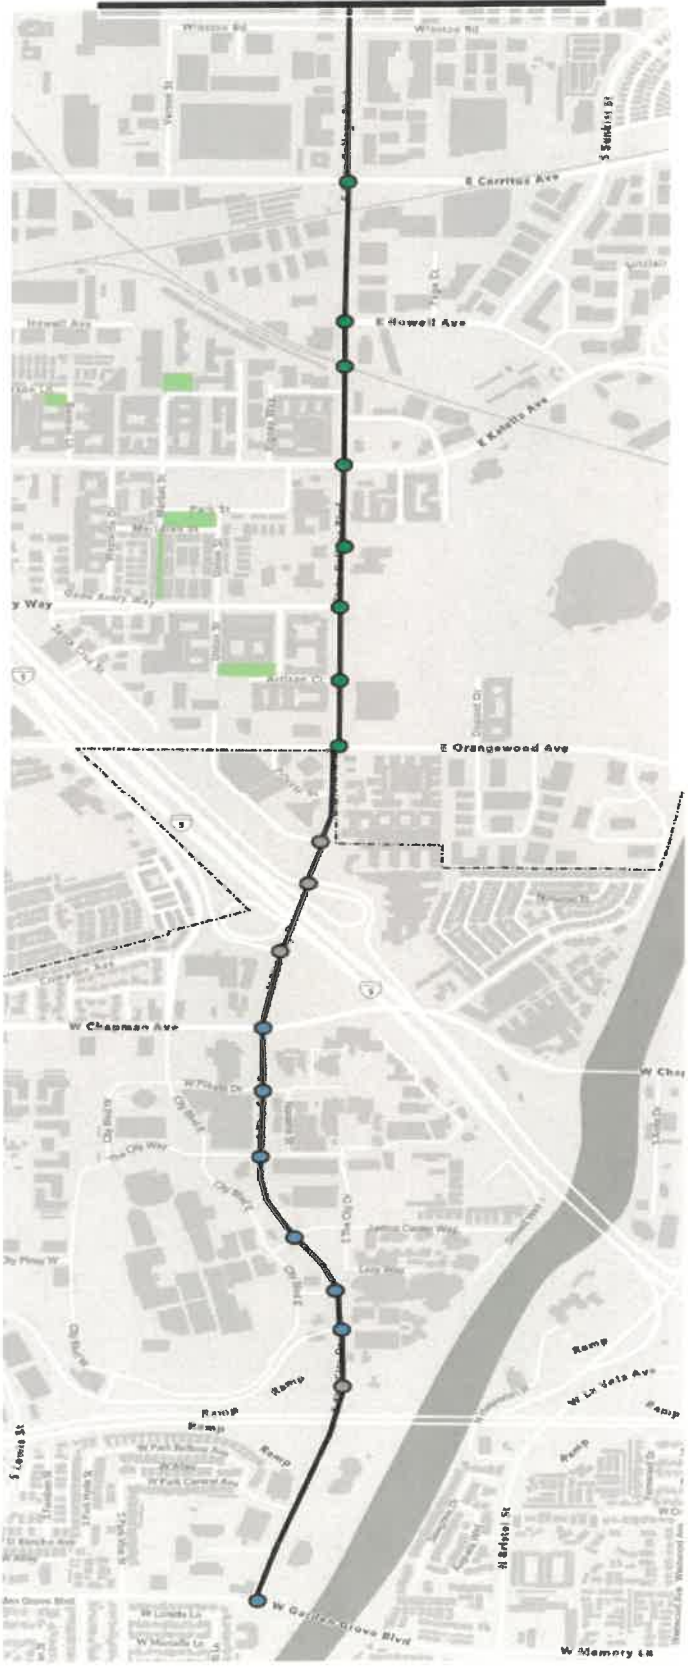
m. Project Map Depicting the Project Limits and Offset Signals

Map should clearly show project limits, operating agencies, and local juridiction boundaries. Do not use satellite maps as they are hard to read and determine location. Map should also show all offset signals (MPAH only) along corridor/grid/route. Please distinguish the offset signals (MPAH only) that will be included/excluded.Feel free to use multiple maps if necessary.



SEE PREVIOUS PAGE BOTTOM RIGHT

SEE ABOVE RIGHT

SEE BELOW LEFT

SECTION 2: REGIONAL SIGNIFICANCE

Explain why this project is regionally significant:

State College Boulevard is a north-south corridor identified in OCTA's MPAH. This corridor parallels the SR-57 freeway and is used to bypass major traffic congestion on the freeway or as a detour route if there is a major incident along the freeway. It is approximately 11.3 miles crossing four cities: Brea, Fullerton, Anaheim, and Orange and includes 58 signalized intersections. Traffic volume along this corridor ranges up to 25,000 vehicles per day. Land use varies along the corridor with major generators such as the Brea Mall, Regional Parks, and CSU Fullerton in the northern section and the Angel Stadium and the Outlets at Orange in the southern section of the corridor.

Through the City of Brea, State College Boulevard parallels the CA-57 freeway and provides primary access to the Brea Mall a regional shopping destination. It also provides connectivity between Central Avenue and Brea Boulevard/Brea Canyon Road to the CA-57 freeway ramps at Lambert Road and Imperial Highway. When there is construction or a major incident on the CA-57, State College Boulevard becomes the primary regional detour connecting Orange County to Los Angeles County through the foothills. Additionally, State College Boulevard is a key multi-modal transportation corridor providing Class II bike lanes that connect The Tracks, a regionally significant dedicated bike and pedestrian trail facility, to various key bike routes and pedestrian destinations. State College Boulevard also provides primary access to a Park-n-ride facility at the CA-57 and Lambert interchange and the Brea Mall Transit Center, which is a major destination and transfer point served by multiple transit lines from all three major transit providers in the region. State College Boulevard also provides primary access to Craig Regional Park providing various passive and active recreation opportunities and the Fullerton Dam and Reservoir. State College Boulevard also provides a key transportation alternative to CA-57 connecting neighborhoods and businesses in the region to California State University, Fullerton to the south.

Within the City of Fullerton, State College Boulevard is classified as a major arterial highway. The 57 freeway is located about a half mile east of this thoroughfare where drivers can easily access Cal State Fullerton or a plethora of shopping centers, businesses, and dining locations. Along this corridor, there are thirteen (13) intersections under the jurisdiction of the City of Fullerton and is connected from the north to Brea, where mostly residential housing can be found and from the south to Anaheim, where there is more commercial and industry. As such, this is a very heavily utilized corridor by all modes of transportation which will benefit from an updated synchronized network to help alleviate the congestion from daily demand.

In the City of Anaheim, State College Boulevard is classified as a major arterial except for the section between La Palma Ave and Ball Rd, where it is classified as a primary arterial. State College is bordered by the SR-91 freeway to the north, SR-22 freeway to the south, SR-57 to the east, and I-5 to the west, which makes it a main alternate route when the freeways are congested. Additionally, State College Boulevard is used by many visitors travelling to the Angel Stadium, the Grove and Honda Center. By upgrading the communication and signal equipment along this corridor, the City will be able to manage traffic more efficiently and provide better service to commuters, visitors, and residents.

Within the City of Orange, The City Drive is one of the busiest principal arterials and the backbone of several activity centers in west Orange. The southern limit of this corridor is surrounded with regionally significant land uses including the Outlets of Orange, University of California Irvine (UCI) Medical Center, various business centers, civic centers, and high-density housing. Additionally, The City Drive connects two major freeways within Orange County in less than a mile: State Route 22 and Interstate 5. This area sees some of the highest traffic volumes and would benefit from a well-synchronized network to meet the directional and oversaturated traffic demand.

SECTION 3: ACKNOWLEDGEMENT OF REQUIRED TASKS

a. **PROJECT TASKS**

☑ **By checking this box, the Applicant Agency, on behalf of all the participating agencies, agree to the following tasks:**

Primary Implementation (PI) Phase, lasting approximately one year shall include the following:

Task 1: Project Management - PI Phase

This task is ongoing throughout the duration of the PI Phase of the project. It includes day-to-day project management, such as meetings, progress reports, tracking of schedules, tracking of cost by agency, invoicing, and overall administration of the PROJECT.

The following list is a minimum of what is required of this task:

- *A running record of project cost broken down by Participating Agency shall be part of this task. This information will be used by the Lead Agency to bill Participating Agencies for their respective project match.*
- *A running record of all scope changes and/or any deviations from the final approved application. This information will be used by the Lead Agency to request for Scope Changes at the Semi-Annual Review (SAR).*

Task 2: Data Collection and Field Review

This task shall include collecting seven-day, 24-hour machine counts, including vehicle and bike classifications, along each 1-mile segment of the corridor(s). The project shall also produce weekday and weekend peak period intersection turning movement (ITM) counts at every signalized intersection, including pedestrian and bicycle counts. ITM counts shall be conducted for two hours of each weekday peak period (AM, mid-day, and PM) and a single four-hour Saturday mid-day peak period. All counts shall be summarized in Microsoft Excel format. All data shall adhere to the CTFP Guidelines for data compatibility.

Data collection also includes field review of before and after conditions. The floating car method shall be utilized with software and GPS for the 'Before' Study to fine-tune the corridor operation and verify integrity of system intersection clocks. Synchronized Video shall be used to compare actual conditions to anticipated conditions dictated by the time-space diagram so that any anomalies may be corrected prior to the 'After' studies task.

Field review conducted as part of this task will document the existing conditions for all signal timing, infrastructure, and system improvements on the project. This includes pre-construction pictures for comparison during the post-construction walkthrough, should there be any questions or discrepancies noted by any parties. Data Collection and Field Review Memos shall be provided to all participating agencies.

☑ ***Check this box to indicate all agencies on this application will opt out of the data collection portion of Task 3 due to participation in the Countywide Baseline Project. A Before/After study is still required. A memorandum shall be submitted to indicate completion of this task.***

Task 3: System Design and Construction

The Lead Agency will hire a consultant(s), licensed contractor(s), and/or use city staff, or extension of staff, to design, procure, install, construct, and implement all desired components of the project as described in this application in accordance with the CTFP Guidelines.

All work and equipment supplied for the project shall comply and be done in accordance with the latest standards and provisions of each Participating Agency or latest approved California Department of Transportation (Caltrans) Standard Plans and Standard Specifications.

SECTION 3: ACKNOWLEDGEMENT OF REQUIRED TASKS

As-built plans shall be provided to match the improvements. This task is not complete until all participating agencies approve the improvements implemented in their jurisdiction.

Task 4: Signal Timing Optimization and Implementation

Synchronization will be inter-jurisdictional in nature. All existing traffic patterns, flows, and conditions will be taken into account. At a minimum, synchronized timing plans will be developed for a weekday AM, Mid-day, PM, and a Weekend peak period. Special generators such as schools and businesses along with cross street traffic will be considered as part of the project. Timing plans that will be developed will assist traffic in getting to its destination without regard to physical or jurisdictional boundaries.

The following list is a minimum of what is required of this task:

- *A review of the basic timing parameters*
- *Concept of Operations documenting the recommended coordination strategies (e.g. segments, cycle lengths, etc.) based on existing data collection and simulations*
- *Existing and Optimized simulation networks in Synchro (version 10) that is also shared with OCTA using the OCTA designated ID numbers*
- *Implementation and fine-tuning of proposed timing plans*

This task will not be complete until all participating agencies approve the new timing plans

☑ ***Check this box to indicate all agencies on this application (excluding Caltrans) will opt out of the Signal Timing Optimization and Implementation task (Task 4) due to participation in the Countywide Baseline Project. The Final PI Report shall still include a section on timing optimization and implementation from the Baseline Project.Task 4 for Caltrans signals is the responsibility of the applicant.***

Task 5: Final PI Report

A Final PI Report, with an executive summary, shall provide complete documentation of the project, including, but not limited to:

- *Project scope, objectives, locations, findings, and recommendations*
- *Data collected: counts, travel time studies, and project benefits achieved in terms of fuel savings, travel time, and other measurable parameters*
- *For each intersection: lane configurations, signal phasing, turning movement data, and cycle lengths for existing and proposed timings for all peak periods*
- *All work performed for system construction and signal timing optimization*
- *Implementation schedule and improvements accomplished, including dates*
- *Procedures for continuing maintenance, surveillance, and evaluation of the coordinated signal system*

The report shall document all planned and programmed improvements on the study corridor as well as recommendations based on PI tasks for further infrastructure improvements that would likely improve the corridor signal coordination project results. The report shall be completed in accordance with the current CTFP Guidelines.

Finally, the report shall provide recommendations with cost and benefit estimates for future improvements to traffic signal infrastructure (signal controllers, vehicle detection, communications, etc.), intersection capacity (appropriate signal phasing, lane geometrics, and alleviation of physical bottlenecks that curtail arterial capacity), and traffic management strategies. These proposed improvements should be useful in determining future enhancements to the corridor.

A Project Summary Sheet, one sheet front and back, that describes the project and improvements gained shall be provided to OCTA. This sheet will be used by OCTA and Participating Agencies to present to the Board and elected officials.

SECTION 3: ACKNOWLEDGEMENT OF REQUIRED TASKS

☑ ***By checking this box, the following additional PI task(s) and/or exceptions will be made:***
Each agency is responsible for Task 4 for Caltrans intersections within their city. Each agency will coordinate with Caltrans as needed to develop and implement signal timing.

ONGOING OPERATIONS AND MAINTENANCE (O&M) PHASE, lasting approximately two (2) years, shall include the following:

Task 6: Project Management - O&M Phase
This task includes day-to-day project management, such as meetings, tracking of schedules, invoicing, and overall administration of the project. This task shall continue in full force as specified in the Primary Implementation Phase.

Task 7: Continuing Support
During this 24-month period, the signal timing along the corridor/route/grid shall be observed and fine-tuned. This task shall also include the monitoring, maintaining, and repair of detection and communication implemented as part of this project. Monthly drives shall be conducted along the length of the project during all designated corridor synchronization timing plan hours of operation in order to verify that the synchronization timing is working as designed and complete any necessary adjustments. This is followed by a monthly memorandum summarizing the status and trends of the corridor based on the runs conducted. Trip logs for the month shall be provided to the Participating Agencies. The memorandum shall include all additional tasks requested and completed during that month. Performance metrics comparisons from ATSPM, where available, shall also be included in the

Task 8: Final O&M Report
At the end of the O&M Phase, a Final O&M Report documenting the Ongoing Operations and Maintenance efforts and procedures for continuing maintenance shall be prepared. At the minimum, the memorandum shall include when travel runs were conducted and issues and solutions throughout the phase. The memorandum shall document all planned and programmed improvements on the study corridor as well as recommendations for further infrastructure improvements that would likely improve the corridor signal coordination project results.

☐ ***By checking this box, the following additional O&M task(s) and/or exceptions will be made:***
<Insert Text>

b. **ENVIRONMENTAL CLEARANCE AND OTHER PERMITS**
☑ By checking this box, the Applicant Agency, on behalf of all the participating agencies, agree to obtain environmental clearance and other permits (if needed) for this project

c. **ACKNOWLEDGMENT OF MEETING CTFP GUIDELINES**
☑ By checking this box, the Applicant Agency, on behalf of all the participating agencies, certify that all current CTFP guidelines were met for this project.

SECTION 4: FUNDING NEEDS / COSTS FOR PROPOSED PROJECT BY TASK

a. Summary of Project Cost

Project Tasks	Total Cost
Task 1: Project Management - PI Phase	$ 145,000.00
Task 2: Data Collection	$ 58,000.00
Task 3: System Design and Construction	$ 4,070,463.50
Task 4: Signal Timing Optimization and Implementation	$ 35,000.00
Task 5: Project Report	$ 58,000.00
Task 6: Project Management - O&M Phase	$ 29,000.00
Task 7: Continuing Support	$ 290,000.00
Task 8: Final Technical Memorandum	$ 17,400.00
Total Project Cost:	**$ 4,702,863.50**

Match Commitment: 20% *(minimum 20%)*

Total Project Cost (PI and O&M for a total of 3 years):

	Project Total

PART 2: MATCH BREAKDOWN (CASH vs IN-KIND SERVICES)

A. Cash Match

Agency	Funding Source	Amount of Cash Contribution
Brea	Developer Funds, Measure M, Gas Tax	$88,048.50
Fullerton	Gas Tax	$202,615.00
Anaheim	Gas Tax	$464,288.00
Orange	Gas Tax, Measure M2 Fairshare	$185,621.20
		$0.00
		$0.00
	TOTAL CASH MATCH:	$754,951.50

B. In-Kind Services

i. Specific Improvements (List items and Cost):

Agency	Description	Expenditure
Select a City		
	Total Specific Improvements (i):	$0.00

SECTION 5: DETAILED LOCAL MATCH COMMITMENT

ii. Staffing Commitment:

Agency	Staff Position	Type of Service to Project	No. of Hours	Fully Burdened Hourly Rate	Total*
Select a City					$0.00
					$0.00
					$0.00
					$0.00
				Total for City of Select a City:	*$0.00*
Select a City					$0.00
					$0.00
					$0.00
					$0.00
				Total for City of Select a City:	*$0.00*
Select a City					$0.00
					$0.00
					$0.00
					$0.00
				Total for City of Select a City:	*$0.00*
Select a City					$0.00
					$0.00
					$0.00
					$0.00
				Total for City of Select a City:	*$0.00*
Select a City					$0.00
					$0.00
					$0.00
					$0.00
				Total for City of Select a City:	*$0.00*
Select a City					$0.00
					$0.00
					$0.00
					$0.00
				Total for City of Select a City:	*$0.00*
				Total Staffing Commitment (ii):	*$0.00*

TOTAL IN-KIND MATCH* (i + ii):	$0.00

*Total amount is the required participation by the identified agency. The number of hours and hourly rate will be based on each agency's actual fully burdened billing rates, which must collectively equal the same value of the assigned "Total" dollars. Each agency will be responsible for keeping detailed records of hours worked and description of work. An accounting record of personnel, hours at fully burdened rate shall be included with the in-kind report submittals. Records will be subject to auditing. In-kind match can be converted to Cash Match, but Cash Match cannot be converted to in-kind match.

SECTION 6: PROJECT SCHEDULE BY TASK

a. Projected Start and End Dates:

Project start date: October 1, 2025

Project end date: December 31, 2029

b. Projected Schedule by Task

Task	Starting Date	Ending Date
Task 1: Project Management - PI Phase	October 1, 2025	December 31, 2027
Task 2: Data Collection	October 1, 2025	May 30, 2026
Task 3: System Design and Construction	October 1, 2025	December 31, 2027
Task 4: Signal Timing Optimization and Implementation	October 1, 2025	December 31, 2027
Task 5: Project Report	August 1, 2027	December 31, 2027
Task 6: Project Management - O&M Phase	January 1, 2027	December 31, 2029
Task 7: Continuing Support	January 1, 2027	December 31, 2029
Task 8: Final Technical Memorandum	September 1, 2029	December 31, 2029

Appendix A
CALCULATIONS AND ESTIMATED POINTS

APPENDIX A: CALCULATIONS AND ESTIMATED POINTS

Criteria (Max Points)	Estimated Points
1. Transportation Significance (25 points) Yes, all agencies are participating in the Countywide Baseline Project Inclusion of offset signals on MPAH w/in 2,700' # of offset signals on project / total # of offset signals: 0 / 35 = 100.0% = 10 Vehicle Miles Traveled (VMT): 280,700 = 15	25
2. Economic Effectiveness (Cost to Benefit Ratio): (10 points) Calculation for Total Project Cost / VMT = $4,702,864 / 280,700 = 16.75	5
3. Project Characteristics: (20 points) Average project improvement score = 33.6	10
4. Project Scale: (20 points) # of signals along entire length of corridor(s): 78 = 10 # of signals being synched / total # of corridor signals: 58 / 78 = 74.4% = 6	16
5. Number of Jurisdictions: (15 points) 5 Participating Jurisdiction(s)	15
6. Current Project Status (5 points) None = 0	0
7. Funding Match: (5 points) $940,572.70 / $4,702,863.50 = 20.00%	0
Total Estimated Points:	**71**

Appendix B

AGENCY IMPROVEMENT CALCULATIONS

TABLE I: AGENCY IMPROVEMENT PREFERENCES ☐ Yes ☑ No

CATEGORIES	ID	ITEM DESCRIPTION	UNIT PRICE (MATERIAL + LABOR)				APPLICABLE DESIGN COST PER UNIT				VENDOR/BRAND & ADDITIONAL NOTES			
			Anaheim	Brea	Fullerton	Orange	Anaheim	Brea	Fullerton	Orange	Anaheim	Brea	Fullerton	Orange
Comm	1	Above ground (e.g. wireless, cellular, etc.)												
	2	Fiber Optic underground	$10,000	$4,000	$24,000	$6,000				$1,200	upgrade fiber optic cable with Etherwan switches with SPF and FDUs	New Etherwan Fiber Switches with SFP Modules.	Corning cables, housing & connectors, jumpers, splice trays & enclosures, switches, power supply, cat6E cables	Fiber Switch & power supply, SFPs, Fiber Patch Panel
	3	All other (e.g. copper, aerial fiber, GPS, etc.)												
Field Elements	4	ATC signal controller	$6,000	$7,500	$8,000	$7,000				$1,400	2070L/2070LN with EOS	Furnish and Install New Cubic Commander ATC NT2 Controller with Scout Software. Convert signal timing (incudling adaptive parameters) to new format and integrate with ATMS/Synchrogreen.	Q-Free	Econolite Cobalt w/ ASC3
	5	Signal cabinet on existing foundation	$24,000	$45,000		$40,000				$8,000	Type P Cabinet w/new service	Cubic NEMA P cabinet with Service and SCE Design Fee.		Use existing foundation as is or modify foundation, Econolite TS Type II P Cabinet, reuse existing SCE service
	6	Signal cabinet on new foundation	$60,000	$55,000	$45,000						Type 333 Cabinet w/new service	Cubic NEMA P cabinet with Service and SCE Design Fee.	Type P or P+, Type 332 and Type 352i cabinets	
	7	BBS/USP (attached)			$11,000								Alpha	
	8	BBS/UPS on existing foundation												
	9	BBS/UPS on new foundation												
	10	CCTV	$10,000	$10,000	$10,000						Axis	Axis Q6000 series (multisensor 360) & Axis PTZ	Axis	
	11	Vehicle detection (ATSPM inputs + counts)												
	12	Vehicle detection (ATSPM inputs)												
	13	Vehicle detection + bicycle detection	$25,000	$35,000	$28,000						Econolite	Iteris Vantage Next System	Iteris Next	
	14	Vehicle detection				$40,000				$8,000				Iteris or Econolite VDS
	15	Bicycle detection												
	16	Pedestrian detection (audible)	$2,000								APS			
	17	Pedestrian detection												
	18	Active transportation/pedestrian safety												
	19	Transit Signal Priority												
	20	EVP (hybrid or GPS)	$12,000								GPS EVP			
	21	EVP (infrared)												
	22	Speed feedback signs (existing post)												
	23	Speed feedback signs (new post)												
	24	Signal Performance Monitoring	$50,000								SPMs and RSUs			
Minor Signal Op Improve	25	Channelization												
	26	Signal phasing improvement

AGENCY RESOLUTIONS AND LETTERS OF SUPPORT

RESOLUTION NO. 2024-130

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ANAHEIM AUTHORIZING THE PUBLIC WORKS DIRECTOR OR HIS DESIGNEE TO SUBMIT A GRANT APPLICATION ON BEHALF OF THE CITY OF ANAHEIM TO THE ORANGE COUNTY TRANSPORTATION AUTHORITY FOR FUNDING UNDER THE M2 REGIONAL TRAFFIC SIGNAL SYNCHRONIZATION PROGRAM FOR STATE COLLEGE BOULEVARD/ THE CITY DRIVE REGIONAL TRAFFIC SIGNAL SYNCHRONIZATION PROGRAM (RTSSP) PROJECT, AND IF AWARDED, AUTHORIZING THE ACCEPTANCE OF SUCH GRANT FUNDS ON BEHALF OF THE CITY AND AMENDING THE BUDGET ACCORDINGLY, AND DETERMINE THE ACTION IS EXEMPT FROM THE CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) PURSUANT TO REGULATION NO. 15301(B) CLASS 1

WHEREAS, the City of Anaheim ("City") wishes to submit funding application to Orange County Transportation Authority ("OCTA") for the Measure M2 Traffic Signal Synchronization Program (the "Grant") to implement signal coordination and upgrade traffic signal communications; and

WHEREAS, if selected, the City will fund the upgrade of signal improvements and synchronize signals on State College Boulevard in the City of Anaheim; and

WHEREAS, the City of Anaheim is the lead agency, in partnership with the cities of Brea, Fullerton, Orange and Caltrans, for the State College Boulevard/ the City Drive Regional Traffic Signal Synchronization Program (RTSSP) Project to synchronize 58 total signals on State College Boulevard/ the City Drive (the "Project"); and

WHEREAS, the City of Anaheim has been declared by the Orange County Transportation Authority to meet the eligibility requirements to receive revenues as part of Measure M2;

WHEREAS, the City Council finds that the acceptance of Measure M2 grant funds and upgrading the signal improvements and synchronizing signals along State College Boulevard in the City of Anaheim is exempt from the California Environmental Quality Act (CEQA) pursuant to Regulation No. 15301(b) Class 1, incorporated herein by this reference which provides CEQA applies only to projects which have the potential for causing a significant effect on the environment; and

WHEREAS, the City of Anaheim has a currently adopted Local Signal Synchronization Plan consistent with the Regional Traffic Signal Synchronization Master Plan as a key component of local agencies' efforts to synchronize traffic signals across local agencies' boundaries; and

WHEREAS, the City of Anaheim will not use Measure M2 funds to supplant Developer Fees or other commitments; and

WHEREAS, Measure M2 Regional Traffic Synchronization Program targets over 2,000 signalized intersections across Orange County to maintain traffic signal synchronization, improve traffic flow and reduce congestion across jurisdictions; and

WHEREAS, the City of Anaheim will provide matching funds for the Project as required by the Comprehensive Transportation Funding Program Procedures Manual; and

WHEREAS, the City of Anaheim desires to implement signal coordination and upgrade traffic signal communications on State College Boulevard in the City of Anaheim.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Anaheim as follows:

1. The Anaheim Public Works Director, or his designee, is hereby authorized to submit a grant application for and on behalf of the City of Anaheim, a public entity established under the laws of the State of California, and is further authorized to execute any actions necessary for the purpose of obtaining the Grant funds, including any extensions and amendments thereof. Said funds shall be matched by funds from City as required and shall be used as supplemental funding to aid the City in the signal improvements and synchronize signals on State College Boulevard in the City of Anaheim.

2. The Anaheim Public Works Director, or his/her designee, is hereby authorized to co-sign the funding application including the commitment of matching funds or in-kind services and is authorized and directed to execute any agreements, assurances, or other documents as may be necessary in connection with the acceptance of said Grant as may be required by the OCTA.

3. Contingent upon the award of said Grant, the annual budget of the City of Anaheim is hereby amended, in the year in which the Grant is awarded, by increasing revenue and expenditures in an amount equal to the amount of the Grant Funds awarded.

THE FOREGOING RESOLUTION is approved and adopted by the City Council of the City of Anaheim this 17th day of December, 2024, by the following roll call vote:

AYES: Mayor Aitken and Council Members Kurtz, Balius, Leon, Rubalcava, Maahs and Meeks

Principal Traffic Engineer
City of Anaheim
200 South Anaheim Boulevard
2nd Floor, Suite 276
Anaheim, CA 92805

Subject: Letter of Support for the Regional Traffic Signal Synchronization Application – State College Boulevard Corridor

Dear Mr. Thai:

The Orange County Transportation Authority recently issued the 2025 Comprehensive Transportation Funding Program (CTFP) Call for Projects for the Regional Traffic Signal Synchronization Program (RTSSP) to coordinate traffic signals across jurisdictional boundaries in the county.

The City of Brea is excited to team with the City of Anaheim, the City of Fullerton, and the City of Orange to submit an RTSSP funding application for the State College Boulevard Corridor. We recognize that revised traffic signal synchronization patterns and improvements to traffic signal control and communications equipment along State College Boulevard between Garden Grove Boulevard in the City of Orange, through the City of Anaheim and the City of Fullerton, to Cliffwood Avenue in the City of Brea will significantly improve traffic operations and safety along this important regional corridor.

The City of Brea is hereby in support of City of Anaheim's effort in pursuing Measure M funds for this project. It is also our intent to provide the required 20% matching funds utilizing a combination of developer funds, Measure M funds, and gas tax funds for work completed within the City of Brea, and to seek City Council adoption of a resolution before the end of the year in support of implementing and funding our portion of this multi-agency project. We will forward the adopted resolution as soon as it is available.

Sincerely,

Ryan Chapman
City Engineer
City of Brea

RESOLUTION NO. 2024-067

A RESOLUTION OF THE CITY OF BREA CITY COUNCIL APPROVING THE SUBMITTAL OF AN APPLICATION FOR THE STATE COLLEGE BOULEVARD/THE CITY DRIVE REGIONAL TRAFFIC SIGNAL SYNCHRONIZATION PROGRAM IMPROVEMENT PROJECT TO THE ORANGE COUNTY TRANSPORTATION AUTHORITY FOR FUNDING UNDER THE COMPETITIVE MEASURE M2 REGIONAL TRAFFIC SIGNAL SYNCHRONIZATION PROGRAM

A. RECITALS:

THE CITY COUNCIL OF THE CITY OF BREA HEREBY RESOLVES, DETERMINES, AND ORDERS AS FOLLOWS THAT:

a) WHEREAS, the Measure M2 Regional Traffic Signal Synchronization Program targets over 2,000 signalized intersections across Orange County to maintain traffic signal synchronization, improve traffic flow, and reduce congestion across jurisdictions; and

b) WHEREAS, the City of Brea has been declared by the Orange County Transportation Authority to meet the eligibility requirements to receive revenues as part of Measure M2;

c) WHEREAS, the CITY must include all projects funded by Net Revenues in the seven-year Capital Improvement Program as part of the Renewed Measure M Ordinance eligibility requirement.

d) WHEREAS, the CITY authorizes a formal amendment to the seven-year Capital Improvement Program to add projects approved for funding upon approval from the Orange County Transportation Authority Board of Directors, if necessary.

e) WHEREAS, the City of Brea has currently adopted a Local Signal Synchronization Plan consistent with the Regional Traffic Signal Synchronization Master Plan as a key component of local agencies' efforts to synchronizing traffic signals across local agencies' boundaries; and

f) WHEREAS, the City of Brea will provide matching funds for each project as required by the Comprehensive Transportation Funding Programs Procedures Manual; and

g) WHEREAS, the City of Brea will not use Renewed Measure M funds to supplant Developer Fees or other commitments; and

h) Whereas, the City of Brea desires to implement multi-jurisdictional signal synchronization listed below; and

B. RESOLUTION:

NOW, THEREFORE, BE IT RESOLVED THAT:

The City Council of the City of Brea hereby requests the Orange County Transportation Authority allocate funds in the amounts specified in the City's application to said City from the Regional Traffic Signal Synchronization Program. Said funds, if approved, shall be matched by funds from said City as required and shall be used as supplemental funding to aid the City in signal synchronization along the following street(s):

State College Boulevard / The City Drive

Regional Traffic Signal Synchronization Program Project

APPROVED AND ADOPTED this 3rd day of December 2024.

2nd Floor, Suite 276
Anaheim, CA 92805

Subject: Letter of Support for the Regional Traffic Signal Synchronization Application – State College Boulevard Corridor

Dear Mr. Thai:

The Orange County Transportation Authority recently issued the 2025 Comprehensive Transportation Funding Program (CTFP) Call for Projects for the Regional Traffic Signal Synchronization Program (RTSSP) to coordinate traffic signals across jurisdictional boundaries in the County.

The City of Fullerton, in coordination with the City of Anaheim, identified the State College Boulevard Corridor for Project P application. Signal synchronization and upgraded traffic signal operational equipment and communication at locations between the intersection of Central Avenue & Cliffwood Avenue in the City of Brea; through the City of Fullerton; and, terminating at the intersection of The City Drive & Garden Grove Boulevard/Memory Lane in the City of Orange will improve the traffic operations along this corridor.

The City of Fullerton is in support of the City of Anaheim's effort in pursuing Renewed Measure M funds for this project. The City is committed to provide the required matching funds (Gas Tax) and will be seeking City Council's adoption of a resolution by December 3, 2024 in support of implementing and funding this project. We will forward the adopted resolution as soon as it is available.

Sincerely,

CITY OF FULLERTON

Michael Plotnik, PE, TE
City Traffic Engineer

2024-10-18 - State College RTSSP - Fullerton Letter of Support

RESOLUTION NO. 2024-053

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF FULLERTON, CALIFORNIA, AUTHORIZING PARTICIPATION IN AN APPLICATION FOR FUNDS FOR THE STATE COLLEGE BOULEVARD REGIONAL TRAFFIC SIGNAL SYNCHRONIZATION PROGRAM TO THE ORANGE COUNTY TRANSPORTATION AUTHORITY UNDER THE COMPETITIVE MEASURE M2 REGIONAL TRANSPORTATION SIGNAL SYNCHRONIZATION PROGRAM

WHEREAS, the Measure M2 Regional Traffic Signal Synchronization Program targets over 2000 signalized intersections across Orange County to maintain traffic signal synchronization, improve traffic flow and reduce congestion across jurisdictions.

WHEREAS, the City of Anaheim is the lead agency, in partnership with the cities of Brea, Fullerton and Orange and Caltrans for the State College Boulevard Regional Traffic Signal Synchronization Program (RTSSP) Project to synchronize 58 total signals on State College Boulevard (the "Project").

WHEREAS, The Orange County Transportation Authority has declared the City of Fullerton met eligibility requirements to receive revenues as part of Measure M2.

WHEREAS, the City of Fullerton has adopted Local Synchronization Plan consistent with the Regional Traffic Signal Synchronization Master Plan as a key component of local agencies' efforts to synchronize traffic signals across local agencies' boundaries.

WHEREAS, the City of Fullerton will provide matching funds for each project as required by the Orange County Comprehensive Transportation Funding Programs Manual.

WHEREAS, the City of Fullerton will not use Measure M funds to supplement Developer Fees or other commitments.

WHEREAS, the City of Fullerton desires to implement multi-jurisdictional signal synchronization listed in this resolution.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF FULLERTON RESOLVES AS FOLLOWS:

1. The City Council of the City of Fullerton requests the Orange County Transportation Authority allocate funds in the amounts specified in the project application to said City from the Regional Transportation Signal Synchronization Program to implement regional signal synchronization along the State College Boulevard Corridor.

Anaheim, CA 92805

Subject: Letter of Intent for Regional Traffic Signal Synchronization Program Application – State College Boulevard/The City Drive Corridor

Dear Mr. Thai:

The Orange County Transportation Authority recently issued the 2025 Comprehensive Transportation Funding Program Call for Projects for Regional Traffic Signal Synchronization Program (Project P) to coordinate traffic signals across jurisdictional boundaries in the County.

The City of Orange, in coordination with the cities of Anaheim, Brea and Fullerton, identified the State College Boulevard/The City Drive corridor for Project P application. Signal synchronization on this corridor between Cliffwood Avenue in the City of Brea and Garden Grove Boulevard in the City of Orange will improve the signal coordination along this heavily traveled corridor.

The City of Orange is in support of the City of Anaheim's effort in pursuing Renewed Measure M funds for this project.

The City of Orange is committed to providing the required matching funds (cash match only) and will be seeking City Council adoption of a resolution on December 10, 2024, in support of implementing and funding this project. The source of the cash match will be a combination of Gas Tax (local funding) and Measure M2 Fair Share. We will forward the adopted resolution as soon as it is available.

Sincerely,

Christopher S. Cash
Director of Public Works
City of Orange

Agenda Item

Orange City Council

Item #: 3.5. 3/10/2026 **File #:** 26-0119

TO: **Honorable Mayor and Members of the City Council**

FROM: **Jarad Hildenbrand, City Manager**

1. SUBJECT

Production agreement for the inaugural Celebrate Orange event: A collaborative event combining the Orange May Parade, Taste of Orange, and Orange Plaza Rotary Club Car Show

2. SUMMARY

At December 9, 2025, Orange City Council meeting, the Orange Chamber of Commerce Foundation, the Assistance League of Orange, and the Orange Plaza Rotary Club made a presentation to the City Council requesting authorization to combine their respective events into a single two-day event. After the presentation, the City Council unanimously approved their request and directed staff to develop a production agreement for the Celebrate Orange event.

3. RECOMMENDED ACTION

Approve the Celebrate Orange Production Agreement (combining the Orange May Parade, Taste of Orange, & Orange Plaza Rotary Car Show); and authorize the Mayor and City Clerk to execute on behalf of the City.

4. FISCAL IMPACT

None.

5. STRATEGIC PLAN GOALS

Goal 3. Enhance Public Communication Strategy and Quality of Life.

6. DISCUSSION AND BACKGROUND

The Orange May Parade, Taste of Orange, and Orange Plaza Rotary Club Car Show are springtime events that have been held in the Old Towne Orange Plaza area for many years. At the December 9, 2025, City Council Meeting, all three event organizers made a presentation to Council requesting authorization to combine their respective events into a single two-day event. Upon hearing the presentation, the City Council directed staff to develop a production agreement. Attached is the production agreement for the City Council's consideration.

Understanding the event will take place in less than two months, staff have been working with all three groups to plan and finalize event details while this production agreement was being developed. Should the City Council approve this production agreement, staff will continue to work with all three groups and ensure Celebrate Orange proceeds as expected.

Agenda Item

Orange City Council

Item #: 3.5. 3/10/2026 **File #:** 26-0119

TO: **Honorable Mayor and Members of the City Council**

FROM: **Jarad Hildenbrand, City Manager**

1. SUBJECT

Production agreement for the inaugural Celebrate Orange event: A collaborative event combining the Orange May Parade, Taste of Orange, and Orange Plaza Rotary Club Car Show

2. SUMMARY

At December 9, 2025, Orange City Council meeting, the Orange Chamber of Commerce Foundation, the Assistance League of Orange, and the Orange Plaza Rotary Club made a presentation to the City Council requesting authorization to combine their respective events into a single two-day event. After the presentation, the City Council unanimously approved their request and directed staff to develop a production agreement for the Celebrate Orange event.

3. RECOMMENDED ACTION

Approve the Celebrate Orange Production Agreement (combining the Orange May Parade, Taste of Orange, & Orange Plaza Rotary Car Show); and authorize the Mayor and City Clerk to execute on behalf of the City.

4. FISCAL IMPACT

None.

5. STRATEGIC PLAN GOALS

Goal 3. Enhance Public Communication Strategy and Quality of Life.

6. DISCUSSION AND BACKGROUND

The Orange May Parade, Taste of Orange, and Orange Plaza Rotary Club Car Show are springtime events that have been held in the Old Towne Orange Plaza area for many years. - Production Agreement for Celebrate Orange

AGREEMENT FOR PRODUCTION OF CELEBRATE ORANGE (ORANGE MAY PARADE, TASTE OF ORANGE, & ORANGE PLAZA ROTARY CAR SHOW COLLAB)

This **AGREEMENT FOR PRODUCTION OF CELEBRATE ORANGE** ("Agreement") is made at Orange, California, on this _____ day of _____, 2026 ("Effective Date") by and between the CITY OF ORANGE, a municipal corporation ("City"), and THE ORANGE CHAMBER OF COMMERCE FOUNDATION, a California non-profit public benefit corporation, THE ASSISTANCE LEAGUE OF ORANGE, a California non-profit public benefit corporation, and THE ORANGE PLAZA ROTARY, a California non- profit public benefit corporation (collectively, "Parties").

RECITALS

A. For many years, the named non-profit organizations above have separately worked with the City to present quality family-friendly events to the Orange community throughout the spring season, such as the Orange May Parade, Taste of Orange, and the Orange Plaza Rotary Car Show.

B. At the Orange City Council meeting on December 9, 2025, the Chamber of Commerce Foundation, the Assistance League of Orange, and the Orange Plaza Rotary proposed a collaborative Celebrate Orange event which essentially unites these three individual spring events into one two-day event to be held the first weekend of May.

C. The collaboration of these three staple community events will provide many benefits to the City including, but not limited to, tax revenue, a well-attended community event, fundraising for local charities, and bringing new people to the City to take part in some of the experiences that make Orange unique.

D. The Celebrate Orange event proposed by the Orange Chamber of Commerce Foundation, the Assistance League of Orange, and the Orange Plaza Rotary Club was unanimously agreed to and supported by the Orange City Council.

NOW, THEREFORE, for and in consideration of the mutual and respective covenants and promises hereinafter contained and made, and subject to all of the terms and conditions hereof, the Parties hereto do agree as follows:

1. Term and Termination of Agreement.

A. The initial term of this Agreement shall commence upon execution and shall terminate December 31, 2031, unless amended or sooner terminated as provided herein. The City has the right to extend the term of this Agreement for up to two (2) additional years upon the same terms and conditions as the initial term, terminating no later than December 31, 2033. Any Extension shall be approved by the City Council and memorialized in the form of an amendment to this Agreement.

B. The Parties or City, acting through its City Manager, reserves the right to terminate this Agreement for any reason by providing a written notice of intent to terminate to the non-terminating party no fewer than 60-days prior to the commencement of Celebrate Orange for said year. The Parties

and/or City shall not be liable to other for any claim of damages or lost profits relating to any such termination.

2. Location.

Celebrate Orange shall take place only on those public streets and rights-of-way in the City, generally described as the area of Chapman Avenue from the center line of Grand Street to the center line of Lemon Street; and Glassell Street, Olive Street, and Orange Street from the center line of Almond Avenue to the center line of Maple Avenue, as well as the surrounding areas identified in the maps attached hereto and incorporated herein as Exhibits "A-C."

3. Dates and Times.

Celebrate Orange shall take place the first weekend of May each year as follows:

- Orange Plaza closure - Saturday from 4:00 a.m. to 11:00 p.m. Sunday
- Orange May Parade event time – Saturday 10:00-11:30 a.m.
- Taste of Orange event time – Saturday 3:00-7:00 p.m.
  Alcohol sales and live musical entertainment will take place during this time
- Orange Plaza Car Show event time – Sunday 8:00 a.m. – 3:00 p.m.

Detailed timelines must be submitted to and approved by the City sixty (60) days prior to the event occurring.

4. The Parties Obligations.

A. Production of Celebrate Orange.

1) The Parties shall produce Celebrate Orange during the days and times stated in Section 3.

2) The "production of Celebrate Orange" as used herein means all aspects of the planning, coordination, and execution of said Celebrate Orange including, but not limited to reviewing and approving applications for booths; preparing and distributing advertising; obtaining all licenses, permits and other applicable governmental approvals; obtaining all insurance set forth in Section 7; and developing a budget and fee schedule.

3) The Parties shall work with designated City representatives for business involving Celebrate Orange to ensure compliance with this Agreement.

B. Staging Layout.

1) The proposed logistics map(s) is contained in Exhibit "B" attached hereto and incorporated herein. Each year, no fewer than sixty (60) days prior to Celebrate Orange, the Parties shall submit a detailed booth layout map for approval by the City Police Department, Fire Department, Community Development, and Public Works Department.

2) All fire lanes, fire breaks, and space between booths shown on the approved plan shall remain free and clear of all objects, materials, vehicles, and other obstructions during set up, throughout the duration of the event and at break down of the event.

3) The Parties shall not block or obstruct public sidewalks with tables, chairs, canopies, or any other equipment preventing pedestrian circulation.

4) The Parties shall not block pedestrian or delivery access to a merchant that is within or immediately adjacent to the event area.

C. Noise.

1) The Parties shall ensure all reasonable measures will be taken to mitigate noise between the hours of 4:00 – 8:00 a.m.

D. Event Ingress/Egress.

1) The Parties shall ensure all vendors and entrants adhere to the designated Ingress and Egress routes identified in the event logistic map(s) contained in Exhibit "B."

E. Protection of Plaza Park.

If the City determines that protection measures are necessary, including temporary closure of Plaza Park or any portion thereof, the Parties shall pay all associated costs, including fencing rental, delivery, installation, labor, and removal. The determination of necessity is within the City's sole discretion.

F. Site Inspection.

1) No fewer than thirty (30) days prior to the event, at least one (1) authorized representative from the Parties, the City Manager's Office or its designee, Community Development, Fire Department, Police Department, and Public Works Department shall walk the footprint of the event to ensure the footprint meets safety standards.

2) At 8:00 a.m. on Saturday, representatives from the Fire Department shall conduct a final inspection of Parade floats to ensure compliance with all Fire Code requirements. Immediately following these inspections, the Fire Department shall conduct inspections with authorized representatives from the Parties and contracted rental vendor(s). This includes tent structure, weight, and fire lane inspections.

G. Parking Lots.

1) The Parties shall have exclusive use of public parking lot 2 on Saturday, from 8:00 a.m. – 8:00 p.m. The public parking lot location shall be located as described in Exhibit "A."

2) The Parties shall have exclusive use of public parking lot 12 on Saturday, from 4:00 a.m. – 1:00 p.m. The public parking location shall be located as described in Exhibit "A".

H. Sanitation.

1) Unless otherwise stated herein, the Parties shall comply with all of the provisions of the Orange Municipal Code and all applicable state and federal mandates as they relate to all storm water issues and as directed by the City.

2) The Parties are responsible for procuring temporary trash receptacles and a separate dumpster for the event.

3) The Parties are expected to collect and dispose of trash throughout the event, as well as upon its conclusion.

4) The Parties are prohibited from disposing of event trash in the dumpsters that are located within the event footprint that are intended for use by the downtown merchants.

I. Alcoholic Beverages.

1) The Parties are responsible for obtaining the proper licensing for public alcohol sales and are expected to provide the City with proof of licensing one-week prior to the event.

2) Alcohol sales shall begin no earlier than Saturday at 3:00 p.m. and conclude by 7:00 p.m.

3) All persons purchasing, consuming, or possessing an alcoholic beverage must be of legal age and wearing an event wristband. Proper signage must be in place at all selling booths informing consumers of this requirement.

4) Only beer, wine, and hard seltzers may be sold. Glass containers and cans are prohibited; all beverages sold shall be served in plastic cups.

5) Open alcohol containers and alcohol consumption are prohibited outside of the event footprint.

6) The Parties shall provide a list of booths permitted to sell alcoholic beverages to the City no fewer than thirty (30) days prior to the event.

7) Vendors selling alcohol must attend an alcohol awareness training as required by the Police Department. This training shall be sponsored and scheduled by the Parties.

J. Vendors and Entertainment.

1) The Parties shall furnish a complete list of vendors and entertainment to the City no fewer than sixty (60) days prior to the event.

2) Both the Police Department and Fire Department have the right to deny or stop vendor operations and/or live entertainment based on conditions that, in their discretion, may cause or create a hazardous situation to the public.

3) The City shall notify the Parties no fewer than thirty (30) days prior to the event of its acceptance or denial of any vendors or performers. If the City rejects any performer, the Parties may request approval for a replacement performer no later than fourteen (14) days prior to the event.

K. Code of Conduct.

The Parties shall comply with and enforce the following guidelines related to its employees and volunteers, the general public, and all vendors within the event.

1) With the exception of parade participants and ADA-recognized service animals, animals are not permitted.

2) With the exception of parade participants, skateboards, roller skates, recreational scooters, bikes, or any motorized or self-propelled device (other than wheelchairs) for the purpose of personal motion are not permitted.

3) Footwear, shirts, and family-friendly clothing are expected to be worn at all times by event attendees.

4) Signs with the information noted above in subsections 1, 2, and 3 must be posted at the event entries.

5) Event representatives and volunteers shall wear clothing that identifies them as event staff. Event staff are also expected to wear appropriate footwear while working/volunteering.

L. Maintenance and Inspection of Records.

1) The Parties shall maintain all records relating to this Agreement and the production of Celebrate Orange for a minimum of three (3) years following the expiration of termination of Agreement. All such records shall be available for inspection or review by an authorized representative of the City within ten (10) days of written notice to the Parties.

M. Equipment, Supplies, Costs.

1) The Parties agree to pay for all actual costs incurred for production of Celebrate Orange including pre and post planning of the event.

a. "Planning" is defined as the process and staff time coordinating the production of Celebrate Orange between the City and the Parties.

2) The Parties agree to furnish all equipment and supplies and shall bear all other costs and expenses reasonably necessary to carry out the purpose of this Agreement except as otherwise provided herein.

3) The Parties agree to reimburse City for all costs and expenses incurred by City in providing materials and services for Celebrate Orange, including public safety and miscellaneous personnel.

a. The number of public safety personnel assigned is at the discretion of the Police Department and Fire Department. If possible, the City will notify the Parties a week prior to the event when public safety personnel levels will exceed those utilized in previous years.

b. Said materials and services may include costs incurred by the City related to damage and cleanup of public and private property directly related to Celebrate Orange activities within the event footprint as set forth in Exhibit "A."

c. Reimbursement for said materials and services shall be due and payable within sixty (60) days of receipt of an itemized statement from the City.

N. Communications and Contacts.

1) The Parties shall designate an individual(s) to serve as a public contact for any and all inquiries, including but not limited to complaints related to the production of Celebrate Orange, and shall provide a list of contacts and phone numbers to the City no fewer than thirty (30) days prior to commencement of the event.

2) The Parties will make reasonable efforts to engage with and educate downtown businesses and residents regarding the event footprint, hours, entertainment schedule, and any other event logistics that may interfere with local business operations and/or resident daily activities.

5. City Obligations.

A. City agrees that the Parties shall have the sole and exclusive right to produce Celebrate Orange.

B. City agrees to prepare the event footprint to a mutually acceptable condition at the City's expense, prior to commencement Celebrate Orange which includes closing the event footprint to vehicular traffic beginning at 4:00 a.m.

C. City agrees to assign a liaison from each of the following departments: Public Works, Police, Fire, City Manager's Office or its designee, and Community Development. The City Manager's Office or its designee will act as a direct liaison with the Parties as it pertains to the production, planning, and follow-up of Celebrate Orange.

D. City agrees that any vendors or merchants within the event footprint and not otherwise participating in Celebrate Orange through the Parties approval process will be required to apply for and obtain a Special Event Permit from the City.

E. If as a result of the Celebrate Orange event, the City responds to a clean-up request made by a local business or neighbor within twenty four (24) hours post event, the City will provide an itemized bill, as well as photos of the area(s) not cleaned to the Parties.

F. City shall reopen all intersections in the Car Show area to through traffic no later than Sunday at 11:00 p.m.

G. City shall provide the Parties with a detailed break-down of the actual costs incurred by City for labor, material, and equipment related to Celebrate Orange by July 30. If there are any delays resulting from unforeseen circumstances or events, the City will communicate when they expect to have the detailed break-down in writing to Celebrate Orange.

6. Insurance.

A. The Parties shall carry workers' compensation insurance as required by law for the protection of its employees during the progress of the work. The Parties understand that it is an independent contractor and not entitled to any worker's compensation benefits under any City program.

B. The Parties shall maintain during the life of this Agreement the following minimum amount of comprehensive general liability insurance or commercial general liability insurance: the greater of (1) One Million Dollars ($1,000,000) per occurrence with a Two Million Dollar ($2,000,000) aggregate; or (2) all the insurance coverage and/or limits carried by or available to the Parties. Said insurance shall cover bodily injury, death, property damage products and completed operations, host liquor liability, and personal & advertising injury and be written on an occurrence basis.

C. The Parties shall maintain during the life of this Agreement, the following minimum amount of automotive liability insurance: the greater of (1) a combined single limit of One Million Dollars ($1,000,000); or (2) all the insurance coverage and/or limits carried by or available to the Parties. Said insurance shall cover bodily injury, death and property damage for all owned, non-owned and hired vehicles and be written on an occurrence basis.

D. Any insurance proceeds in excess of or broader coverage than the minimum required coverage and/or minimum required limits which are applicable to a given loss shall be available to the City. No representation is made that the minimum insurance requirements of this Agreement are sufficient to cover the obligations of The Parties under this Agreement.

E. Each policy of general liability and automotive liability shall provide that City, its officers, officials, agents, and employees are declared to be additional insureds under the terms of the policy, but only with respect to the work performed by the Parties and/or their subcontractors under this Agreement. A policy endorsement to that effect shall be provided to City along with the certificate of insurance. In lieu of an endorsement, City will accept a copy of the policy(ies) which evidences that City is an additional insured as a contracting party. The minimum coverage required by Subsection B and C, above, shall provide that the insurance in force will not be canceled or allowed to lapse without at least ten (10) days prior to written notice to City.

F. The insurance policies maintained by the Parties shall be primary insurance and no insurance held or owned by City shall be called upon to cover any loss under the policy. The Parties will determine their own needs in the procurement of insurance to cover liabilities other than as stated above.

G. Before the Parties perform any work or prepares or delivers any materials, the Parties shall furnish certificates of insurance and endorsements, as required by City, evidencing the aforementioned minimum insurance coverages on forms acceptable to City, which shall provide that the insurance in force will not be canceled or allowed to lapse without at least ten (10) days' prior written notice to City.

H. All insurance maintained by the Parties shall be issued by companies admitted to conduct the pertinent line of insurance business in California.

I. The Parties shall immediately notify City if any required insurance lapses or is otherwise modified and cease performance of this Agreement unless otherwise directed by City.

J. The Parties agree that in the event of loss due to any of the perils for which it has agreed to provide insurance, the Parties shall look solely to their insurance for recovery. The Parties hereby grants to City, on behalf of any insurer providing insurance to either the Parties or City with respect to the services of the Parties herein, a waiver of any right to subrogation which any such insurer may acquire against City by virtue of the payment of any loss under such insurance. Any right of subrogation against the City, its elected officials, officers, employees, volunteers, boards, agents, and representatives shall be waived.

K. The Parties shall include all Parties subcontractors, if any, and Celebrate Orange vendors as additional insureds under their policies or shall require that said subcontractors and Celebrate Orange vendors maintain their own insurance consistent with the requirements stated herein.

8. Indemnity.

A. To the fullest extent permitted by law, the Parties agree to indemnify, defend and hold City, its City Council and each member thereof, and the officers, officials, agents and employees of City (collectively the "Indemnitees") entirely harmless from all liability arising out of:

1) Any and all claims under worker's compensation acts and other employee benefit acts with respect to the Parties employees or subcontractor's employees arising out of the Parties work under this Agreement; and

2) Any claim, loss, injury to or death of persons or damage to property caused by any act, neglect, default, or omission of the Parties, or person, firm or corporation employed by the Parties, either directly or by independent contract, including all damages due to loss or theft sustained by any person, firm or corporation including the Indemnitees, or any of them, arising out of, or in any way connected with the work or services which are the subject of this Agreement, including injury or damage either on or off City's property. The Parties, at their own expense, cost and risk, shall indemnify any and all claims, actions, suits or other proceedings that may be brought or instituted against the Indemnitees on any such claim or liability covered by this Subsection, and shall pay or satisfy any judgment that may be rendered against the Indemnitees, or any of them, in any action, suit or other proceedings as a result of coverage under this Subsection.

B. Except for the Indemnitees, the indemnifications provided in this Agreement shall not be construed to extend any third-party indemnification rights of any kind to any person or entity which is not a signatory to this Agreement.

C. The indemnitees set forth in this section shall survive any closing, rescission, or termination of this Agreement, and shall continue to be binding and in full force and effect in perpetuity with respect to the Parties and its successors.

9. Standard Provisions.

A. Licenses. The Parties represent that it and any subcontractors it may engage possess any and all licenses which are required under state or federal law to perform the work contemplated by this Agreement and that the Parties and subcontractors, if any, shall maintain all appropriate licenses, including a City of Orange business license, at its cost, during the performance of this Agreement.

B. Independent Contractor. At all times during the term of this Agreement, the Parties shall be an independent contractor and not an employee of City. City shall have the right to control the Parties only insofar as the result of the Parties services rendered pursuant to this Agreement. City shall not have the right to control the means by which the Parties accomplishes services rendered pursuant to this Agreement. The Parties shall, at its sole cost and expense, furnish all facilities, materials and equipment which may be required for furnishing services pursuant to this Agreement. The Parties shall be solely responsible for, and shall indemnify, defend and save City harmless from all matters relating to the payment of its subcontractors, agents and employees, including compliance with social security, withholding and all other wages, salaries, benefits, taxes, exactions, and regulations of any nature whatsoever. The Parties acknowledge that the Parties and any subcontractors, agents or employees employed by the Parties shall not, under any circumstances, be considered employees of City, and that they shall not be entitled to any of the benefits or rights afforded employees of City, including, but not limited to, sick leave, vacation leave, holiday pay, Public Employees Retirement System benefits, or health, life, dental, long-term disability or workers' compensation insurance benefits.

C. The Parties Not Agent. Except as City may specify in writing, The Parties shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. The Parties shall have no authority, express or implied, to bind City to any obligation whatsoever.

D. Amendment. No amendment of this Agreement or its Exhibits shall be effective unless in writing, signed by the Parties and City. City Manager is specifically authorized to execute amendments to this Agreement on behalf of City.

E. Assignment or Subcontracting. No assignment or subcontracting by the Parties of any part of this Agreement or of funds to be received under this Agreement shall be of any force or effect unless the assignment has had the prior written approval of City. City may terminate this Agreement rather than accept any proposed assignment or subcontracting. Such assignment or subcontracting may be approved by the City Manager.

F. Equal Employment Opportunity. During the performance of this Agreement, The Parties agree as follows:

1) The Parties shall not discriminate against any employee or applicant for employment because of race, color, religion, sex, national origin, mental or physical disability, or any other basis prohibited by applicable law. The Parties shall ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, national origin, mental or physical disability, or any other basis prohibited by applicable law. Such actions shall include, but not be limited to the following: employment, upgrading, demotion or transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation and selection for training, including apprenticeship. The Parties agree to post in conspicuous places, available to employees and applicants for employment, a notice setting forth provisions of this non-discrimination clause.

2) The Parties shall, in all solicitations and advertisements for employees placed by, or on behalf of the Parties, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, mental or physical disability, or any other basis prohibited by applicable law.

3) The Parties shall cause the foregoing paragraphs 1) and 2) to be inserted in all subcontracts for any work covered by this Agreement, provided that the foregoing provisions shall not apply to subcontracts for standard commercial supplies or raw materials.

G. Conflicts of Interest. The Parties agree it shall not make, participate in the making, or in any way attempt to use its position as a contractor to influence any decision of City in which The Parties know or has reason to know that The Parties, its officers, partners, or employees have a financial interest as defined in Section 87103 of the Government Code. The Parties further agree it shall not be eligible to work as the design/build firm for the project that is the subject of this Agreement.

H. Compliance with all Laws/Immigration Laws.

1) The Parties shall be knowledgeable of and comply with all local, state and federal laws which may apply to the performance of this Agreement.

2) The Parties shall comply with all applicable Fire Department guidelines in effect January 1st of any given year during which Celebrate Orange is produced. Additional requirements may be added by the Fire Department as necessary, and at the Fire Department's discretion.

3) The Parties represent and warrant that The Parties:

a. Has complied and shall at all times during the term of this Agreement comply, in all respects, with all immigration laws, regulations, statutes, rules, codes, and orders, including, without limitation, the Immigration Reform and Control Act of 1986 (IRCA); and

b. Has not and will not knowingly employ any individual to perform services under this Agreement who is ineligible to work in the United States or under the terms of this Agreement; and

c. Has properly maintained, and shall at all times during the term of this Agreement properly maintain, all related employment documentation records including, without limitation, the completion and maintenance of the Form I-9 for each of the Parties employees; and

d. Has responded, and shall at all times during the term of this Agreement respond, in a timely fashion to any government inspection requests relating to immigration law compliance and/or Form I-9 compliance and/or worksite enforcement by the Department of Homeland Security, the Department of Labor, or the Social Security Administration.

4) The Parties shall require all subcontractors to make the same representations and warranties as set forth in Subsection 3 above.

5) The Parties shall require all subcontractors to make the same verification as set forth in Subsection 5 above.

6) If the Parties or subcontractor knowingly employs an employee providing work under this Agreement who is not authorized to work in the United States, and/or fails to follow federal laws to determine the status of such employee, that shall constitute a material breach of this Agreement and may be cause for immediate termination of this Agreement by City.

7) The Parties agree to indemnify and hold City, its officials, and employees harmless for, of and from any loss, including but not limited to fines, penalties and corrective measures, City may sustain by reason of the Contractor's failure to comply with said laws, rules and regulations in connection with the performance of this Agreement.

I. Governing Law and Venue. This Agreement shall be construed in accordance with and governed by the laws of the State of California and the Parties agree to submit to the jurisdiction of California courts. Venue for any dispute arising under this Agreement shall be in Orange County, California.

J. Integration. This Agreement constitutes the entire agreement of the parties. No other agreement, oral or written, pertaining to the work to be performed under this Agreement shall be of any force or effect unless it is in writing and signed by both parties.

10. Notice.

Except as otherwise provided herein, all notices required under this Agreement shall be in writing and delivered personally, by e-mail, or by first class mail, postage prepaid, to each party at the address listed below. Either party may change the notice address by notifying the other party in writing. Notices shall be deemed received upon receipt of same or within 3 days of deposit in the U.S. Mail, whichever is earlier. Notices sent by e-mail shall be deemed received on the date of the e-mail transmission.

Orange May Parade Timeline 2026

- 6:30 am. Upbeat parade Production crew begins to place staging numbers throughout staging area. City has closed parade streets. are closed.
- By 7:00 a.m., OPW drops off trash liners and boxes.
- By 8:00 a.m., OCCF assembles and distributes trash boxes with liners throughout Celebrate Orange
- footprint.
- 8:00 am Floats begin to arrive on Chapman Ave
- 8:30 am Other parade participants arrive (staggered times)
- Between 9:00 a.m. – 9:30 a.m., representatives from Orange Fire Department conduct a final
- inspection of Parade floats to ensure compliance with all Fire Code requirements.
- By 9:00 a.m., OCCF sets up seating, tents, audio equipment, and any other equipment or
- materials related to the Parade not provided by City.
- 9:45 am First entries brought up to starting line.
- OPW places traffic signals on flash.
- OPW provides and places barricades and coordinates with Police for the removal of vehicles
- from the closure area and other posted parking within the footprint of the Parade.
- OPW staff periodically monitors right-of-way areas within Parade footprint for cleanliness and
- safety items.
- OPW notifies OCCF of any areas out of compliance.
- OPW monitors trash boxes throughout the Parade footprint.
- OPW remains on-site to assist critical intersections (Grand/Chapman, Almond/Orange).
- OCCF inspects Parade footprint and reports areas in need of OPW assistance.
- OCCF provides directional signs to portable restrooms throughout the Parade footprint.
- 10:00am Parade starts
- 10:25 am First entries hit disbanding area
- 11:15 am Last entry pulls out of staging area
    - Cleanup of staging area and parade route begins
- 11:45am Last entry hits disbanding area

- **Post Event**
- OCCF coordinates removal of portable toilets and related directional signage.
- OCCF removes seating, tents, audio equipment, and any other equipment or materials set
- up by Chamber and not by City.
- OPW sweeps entire Parade footprint.

THRU: **Jarad Hildenbrand, City Manager**

FROM: **Christopher Cash, Public Works Director**

1. SUBJECT
First Amendment to agreement with HF&H Consultants, LLC for Solid Waste Consulting Services

2. SUMMARY
The City engaged HF&H Consultants, LLC to support SB 1383 compliance, including program development and regulatory audits. As requirements and complexity increased, the City expanded HF&H's scope and now recommends a $60,000 amendment to continue essential consulting services and ensure ongoing support and compliance with State regulations.

3. RECOMMENDED ACTION
Approve the First Amendment to Agreement No. 7697.A with HF&H Consultants, LLC in the amount of $60,000 for Solid Waste Consulting Services; and authorize the Mayor and the City Clerk to execute on behalf of the City

4. FISCAL IMPACT
The expense for this amendment is $60,000 and will be funded through General Fund (100):
100-5001-55999-255041 Other Prof/Technical Services

5. STRATEGIC PLAN GOALS
Goal 3: Enhance Public Communication Strategy and Quality of Life

6. DISCUSSION AND BACKGROUND
The passage of Senate Bill 1383 established statewide methane-reduction targets and requires local jurisdictions to implement comprehensive organic-waste diversion regulations. To adhere to these requirements, jurisdictions must monitor, record, inspect, address contamination, educate the public, track procurement activities, and document enforcement efforts.

On September 17, 2025, the City entered into an agreement with HF&H Consultants, LLC (HF&H) for $30,000 to prepare for a CalRecycle Jurisdictional Annual Compliance Evaluation review. As the complexity of the documentation and regulatory requirements became apparent, it was clear that additional support was necessary. Under this amendment, HF&H will assist the City with program implementation, preparation of compliance documentation, development of recordkeeping systems, and preparation for CalRecycle audits. Their expertise has helped ensure the City meets State

mandate requirements and significantly reduces the risk of enforcement actions and penalties.

As SB 1383 regulations continue to evolve, the City faces ongoing obligations to monitor, report, administer ordinances, and adapt programs. The technical and ever-changing regulatory landscape requires continuous consulting support. HF&H remains essential to maintaining effective, adaptable organics compliance and fulfilling State reporting requirements.

To sustain proactive compliance and allow HF&H to continue providing critical support, staff recommends approving a First Amendment in the amount of $60,000, which will bring the total agreement amount to $90,000. This support includes ongoing SB 1383 monitoring, annual reporting and recordkeeping, program implementation guidance, regulatory advice, franchise fee valuation, and preparation for future CalRecycle inspections and audits.

- First Amendment to Agreement with HF&H Consultants, LLC

FIRST AMENDMENT
TO
PROFESSIONAL SERVICES AGREEMENT
[SB 1383 Solid Waste Consulting Services]

THIS FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT (the "First Amendment") is made and entered into as of _____, 2026, by and between the CITY OF ORANGE, a municipal corporation ("City"), and HF&H CONSULTANTS, LLC, a California limited liability company ("Contractor"), with reference to the following.

A. City and Contractor entered into a Professional Services Agreement (Agreement No. AGR-7697.A) dated as of September 17, 2025, which is incorporated herein by this reference (the "Original Agreement"); and

B. City and Contractor desire to amend the Original Agreement to modify, amend, and supplement certain portions of the Original Agreement by revising the Scope of Services and increasing the compensation.

NOW, THEREFORE, the parties hereby agree as follows:

Section 1. **Defined Terms.** Except as otherwise defined herein, all capitalized terms used herein shall have the meanings set forth for such terms in the Original Agreement.

Section 2. **Cross-References.** City and Contractor agree that all references in this First Amendment are deemed and construed to refer to the Original Agreement, as implemented by this First Amendment.

Section 3. **Revised Scope of Services**. The Scope of Services, Section 1, Exhibit A of the Original Agreement, is hereby amended, modified and supplemented to include the services described on Exhibit A attached hereto and incorporated herein by this reference.

Section 4. **Compensation**. The total not-to-exceed compensation for the services to be rendered as set forth in Section 2.a of the Original Agreement is increased by SIXTY THOUSAND DOLLARS and 00/100 ($60,000.00) and Section 2.a is hereby amended in its entirety to read as follows:

> "Contractor's total compensation for all services performed under this Agreement, shall not exceed NINETY THOUSAND DOLLARS and 00/100 ($90,000.00) without the prior written authorization of City."

Section 5. **Integration**. This First Amendment amends, as set forth herein, the Original Agreement and, except as specifically amended hereby, the Original Agreement shall remain in full force and effect. To the extent that there is any conflict or inconsistency between the terms and provisions of this First Amendment and the terms and provisions of the Original

Agreement, the terms and provisions of this First Amendment shall control and govern the rights and obligations of the parties.

IN WITNESS of this Agreement, the parties enter into this Agreement on the year and day first above written.

Orange, CA 92866

Subject: Proposal to Perform Franchise Fee Valuation Analysis for the City of Orange

Dear Christopher Cash,

HF&H Consultants, LLC (HF&H) is pleased to submit this proposal to the City of Orange (City) to assist with an analysis of the value and costs associated with the City's solid waste franchise and other expenses incurred by the City's General Fund to provide solid waste-related services to its residents and businesses. This proposal describes the reason for this work, HF&H's proposed scope of work, and our estimated fees to perform the work. HF&H has made a best effort to define the work to be performed and the costs associated therewith. Due to the lack of clarity in the legal decisions that are driving the City's need for this work, it is important to understand that the early work with the City's legal team on defining valuation methodology(ies) may require changes to the approach described here.

Scope of Work

PHASE I: METHODOLOGY DEVELOPMENT

Task 1a: Kick-off Meeting. HF&H will facilitate a virtual project kick-off meeting with all City stakeholders to the project. It is critical for all members of the project team to attend the initial meeting to thoroughly review and reach consensus on the project's scope and schedule. This meeting should also clarify individual roles, delineate responsibilities concerning information sharing and participation, establish confidentiality requirements, and define the project's critical success factors. Additionally, this meeting is an opportunity for all team members to share their thoughts about approaches, risks, opportunities, and other relevant context that may impact the project.

Task 1b: Methodology Development. HF&H will facilitate a series of up to two scoping and methodology definition meetings with the City Attorney's office, any outside legal counsel, and staff from the City's solid waste and recycling operations to present potential methodologies following the kick-off meeting described in Task 1a. Prior to the first scoping meeting, HF&H will develop options for the valuation methodology using economic principles, and methodologies used in similar settings.

These meetings will also be used to review the detailed methodology required to perform the enterprise reimbursement study. That approach will be customized for the City's unique considerations.

It is also possible that more than one approach will be selected for testing. Conducting multiple valuation analyses is not included in our scope or budget assumptions and including such analyses would require scope and budget modification.

Task 1c: Request for Information. HF&H will prepare a request for information (RFI) to collect data required to conduct the various analyses contemplated by this study. It is our goal to gather all required information at the beginning of the project; however, due to the somewhat novel nature of this work, HF&H may find additional data needs during the performance of the analytical work that warrants the solicitation of additional information from specific data providers, which may require the issuance of a supplemental RFI to gather the required clarification or additional detail.

PHASE II: CONDUCT FRANCHISE FEE COST REVIEW

Task 2a: Develop Franchise Fee Cost Model. HF&H will develop an analytical model (using Microsoft Excel) specific to the franchise fee valuation methodology selected by the stakeholder team in Task 1b. The analytical model will be prepared in a transparent and easy-to-follow manner to allow the City's various stakeholders to fully digest the information and communicate it out to interested parties. HF&H will submit the analytical framework to the City's stakeholder group for review and to gather input on data concerns, assumptions required, legal viability, or to further refine the approach. HF&H will use the information gathered from that input cycle to finalize the model.

HF&H will conduct a comprehensive review and quantification of various costs currently borne by the City's General Fund associated with the City's franchise agreement with CR&R Incorporated (CR&R). This assessment will include expenses related to solid waste collection conducted by City staff as well as costs incurred in mitigating operational impacts from CR&R. Areas of analysis may include:

- The encroachment value of containers (carts and bins) positioned within the City's right-of-way during collection days.
- City staff hours required for participation in local or regional solid waste and recycling-related commissions and for effective management of the franchise agreement with CR&R – including tasks such as rate setting, contract compliance monitoring, contract negotiations, and enforcement.
- Outreach expenditures related to recycling and organics programs not otherwise addressed through interfund transfers from the City's General Fund.
- Street tree trimming required to be performed in order for CR&R's large collection vehicles to navigate on City streets.
- City code enforcement efforts concerning anti-scavenging and other solid waste code provisions, such as those pertaining to SB 1383.

The specific areas of analysis will be based on feedback received from the City Attorney and/or outside legal counsel received during Phase I.

Task 2b Calculate Franchise Fee Valuation. HF&H will calculate the franchise fee value based on the methodology approved by the City Attorney's office in Task 1b, the analytical framework prepared by HF&H and reviewed by the City in Task 2a, and the data gathered in Task 1c from the City and outside parties. The preliminary calculations will be shared with appropriate members of the City's stakeholder team. HF&H staff will be happy to discuss the model with City staff to ensure that they are satisfied with our methodology; however, we do not propose including this model as a work product. HF&H anticipates two rounds of review and comments on the calculations prior to finalizing the calculations and preparing the report (Task 2c).

Task 2c Report on Franchise Fee Value. HF&H will prepare a franchise fee valuation report or memorandum (depending on approach selected by City Attorney/outside legal counsel) documenting the franchise fee valuation methodology and results of the calculations.

LIMITATIONS

Every engagement includes certain limitations and HF&H has attempted to document the scope of those limitations as they pertain to this engagement (e.g., number of meetings, number of review cycles for work products) in the description of the tasks in the "Scope of Work" section of this proposal. Our analysis relies in part on documents prepared by City staff whom we believe to be knowledgeable as well as professionally and technically qualified to perform the work. This study does not entail independent verification of the accuracy or completeness of all the sources of documents provided by the City or CR&R. Our study is based on reasonable assumptions about future events; however, actual results are often different than anticipated and that difference can be significant HF&H is not a law firm and does not provide legal advice. HF&H will rely upon the City Attorney or other outside legal counsel to review and approve the methodology(ies) used in this study to ensure compliance with applicable law and judicial decisions.

FIXED FEE

We propose to complete the above scope of work for a fixed fee of $60,000. HF&H will bill twenty five percent (25%) upon completion of Task 1, fifty percent (50%) upon delivery of a draft report, and the remaining twenty five percent (25%) billed upon delivery of a final report or sixty days after submittal of the draft if the City provides no response to the draft or chooses not to finalize the report.

SCHEDULE

The schedule will be approximately two months from the time HF&H receives all of the requested data from the City and CR&R. If the data is not provided within the mutually-agreed-upon timeline, HF&H will meet and confer with the City to discuss representative data as placeholder values until accurate data can be provided. We plan to adjust the timeline as needed upon completion of the initial kick-off meeting and discussions with City staff.

* * * * *

Should you have any questions regarding this submittal, please call me directly at (925) 977-6959 or rchilton@hfh-consultants.com.

Very truly yours,
HF&H CONSULTANTS, LLC

Rob Hilton
President

Orange City Council

Item #: 3.7. 3/10/2026 **File #:** 26-0114

TO: **Honorable Mayor and Members of the City Council**

THRU: **Jarad Hildenbrand, City Manager**

FROM: **Christopher Cash, Public Works Director**

1. SUBJECT

Approval of plans and specifications for Almond Avenue and Collins Avenue Street Improvements and authorization to advertise for bids; and finding of California Environmental Quality Act (CEQA) exemption

2. SUMMARY

Plans and specifications have been completed, and the project is ready to be advertised for bids. The total estimated construction cost, including contingencies and construction engineering is $1,997,732.

3. RECOMMENDED ACTION

1. Approve the plans and specifications and authorize advertising for Bid No. 25-26.13 (SP-4327), Almond Avenue and Collins Avenue Street Improvements.
2. Find that the proposed project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA) per State CEQA Guidelines 15301 (Class 1(c) - Existing Facilities).

4. FISCAL IMPACT

No fiscal impact with this action. Construction funding will be requested at award.

5. STRATEGIC PLAN GOALS

Goal 5: Improve infrastructure, mobility, and technology.

6. DISCUSSION AND BACKGROUND

Almond Avenue from Main Street to Cypress Street, and Collins Avenue from Tustin Street to Handy Street Improvements project is part of the City's Pavement Management Program activities and is designed to prolong pavement life of city streets. This portion of the annual pavement project is being advanced separately to allow construction to begin in July and be completed prior to the start of the upcoming school year.

The pavement rehabilitation methods vary depending on the sustained damage, but in general, consist of asphalt concrete overlays with localized areas of pavement reconstruction, replacement of damaged curb and gutter, cross gutter, sidewalk, and access ramps within the project limits to conform to federal guidelines, and construction of new curb and gutter at locations that are missing or in need of replacement. The rehabilitated pavement will have a longer service life and will provide a

safe and smooth ride for the public.

The streets selected for maintenance are in accordance with the City's pavement management plan and generally fall into the "poor to fair" category, requiring work at this time to prevent total pavement failure and avoid the significantly higher cost of complete reconstruction in the future. Advancing this segment of the annual project separately allows the City to minimize impacts to school traffic circulation and improves the effectiveness of the traffic control plan by scheduling construction during the summer recess.

The total cost is estimated at $1,997,732, including construction engineering and a 15% contingency. Upon receipt of public bids, staff will return to the City Council and recommend award of contract and any necessary funding adjustments based on the outcome of the public bid.

Construction is anticipated to begin in July 2026 and is expected to be completed prior to the start of the new school year.

Specifications and cost estimates are available for review in the Public Works Department.

7. ENVIRONMENTAL REVIEW

The proposed project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA) per state CEQA guidelines 15301 (Class 1(c) - Existing Facilities) in that it involves pavement maintenance and rehabilitation of existing streets and does not create additional roadway capacity. No public review is required.

1. SUBJECT

Award of contracts to ABM Electrical & Lighting Solutions, Inc. and Interior Resources, Inc., dba Commercial Interior Resources for lighting, paint, and flooring improvements at the Police Department

2. SUMMARY

Purchase and install lighting at the Police Department through Sourcewell Master Contract No. CA-R8-E-101723AEL with ABM Electrical & Lighting Solutions for $199,971. Purchase and installation of flooring and paint services at the Police Department through OMNIA Partners Contract 2020002149 with Commercial Interior Resources for $204,763.

3. RECOMMENDED ACTION

1. Approve the contract with ABM Electrical & Lighting Solutions, Inc. in the total amount of $199,971, representing a cost of $198,971, plus a contingency of $1,000; and authorize the Mayor and City Clerk to execute on behalf of the City.

2. Approve the contract with Interior Resources, Inc., dba Commercial Interior Resources, in the amount of $204,763, representing a cost of $186,148, plus a contingency of 10% or $18,615; and authorize the Mayor and City Clerk to execute on behalf of the City.

3. Authorize the appropriation of $204,763 from the Developer Impact Fees-Police (570) fund balance to:

   570-5601-84101-255019 Developer Impact Fees-Police

4. Authorize the appropriation of $199,971 from the Merged 2008 Tax Exempt Bonds (954) fund balance to:

   954-5601-84101-255019 Merged 2008 Tax Exempt Bonds

4. FISCAL IMPACT

The total expenditure for both contracts is $404,734 and will be funded through Developer Impact Fees-Police (570) and Merged 2008 Tax Exempt Bonds (954), respectively:

570-5601-84101-255019 Police Facility Improvements $204,763

954-5601-84101-255019 Police Facility Improvements $199,971

Upon approval of this appropriation, the estimated Developer Impact Fees-Police (570) and Merged 2008 Tax Exempt Bonds (954) fund balances at June 30, 2026 will be $731,739 and $2,801,089, respectively.

5. STRATEGIC PLAN GOALS

Goal 1: Maintain Strong Emergency and Safety Services

Objective 1.9: Police facility improvements to the Field and Support Services Division to improve workflow.

6. DISCUSSION AND BACKGROUND

On December 9, 2025, the City Council authorized the replacement of furniture in the Police Department Field Services Division workspace at the Police Department. This phase of the project prioritizes upgrading lighting and flooring, along with comprehensive interior refreshment, before furniture installation. Key initiatives include removing outdated wall sconces and downlights, installing energy-efficient LED fixtures in the drop ceiling to optimize lighting performance, repainting the space, and replacing nearly 20-year-old flooring. These enhancements are part of a strategic effort to extend the facility's lifespan and ensure compliance with contemporary operational and safety standards.

Staff conducted a thorough review of the references and qualifications for ABM Electrical & Lighting Solutions and Interior Resources, Inc., dba Commercial Interior Resources, confirming their credentials and extensive experience with comparable projects. The Public Works Department, in conjunction with the Police Department, recommends approval of the agreement with ABM Electrical & Lighting Solutions, Inc., using Sourcewell Master Contract No. CA-R8-E-101723AEL for lighting installation in the amount of $199,971, representing a cost of $198,971 for interior facility lighting improvements plus a $1,000 contingency.

Staff also recommend approval of the agreement with Interior Resources, Inc., dba Commercial Interior Resources, in the amount of $204,763, using OMNIA Partners Contract 2020002149, for interior facility flooring and paint improvements representing a cost of $186,148, plus a 10% contingency.

Construction is projected to commence in June 2026 and be completed by September 2026.

Agenda Item

Orange City Council

Item #: 3.8. 3/10/2026 **File #:** 26-0085

TO: **Honorable Mayor and Members of the City Council**

THRU: **Jarad Hildenbrand, City Manager**

FROM: **Christopher Cash, Public Works Director**

1. SUBJECT

Award of Contracts to ABM Electrical & Lighting Solutions, Inc. and Interior Resources, Inc., dba Commercial Interior Resources for lighting, paint, and flooring improvements at the Police Department

2. SUMMARY

Purchase and install lighting at the Police Department through Sourcewell Master Contract No. CA-R8-E-101723AEL with ABM Electrical & Lighting Solutions for $199,971. Purchase and installation of flooring and paint services at the Police Department through OMNIA Partners Contract 2020002149 with Commercial Interior Resources for $204,763.

3. RECOMMENDED ACTION

1. Approve the contract with ABM Electrical & Lighting Solutions, Inc. in the total amount of $199,971, representing a cost of $198,971, plus a contingency of $1,000; and authorize the Mayor and City Clerk to execute on behalf of the City.

2. Approve the contract with Interior Resources, Inc., dba Commercial Interior Resources, in the amount of $204,763, representing a cost of $186,148, plus a contingency of 10% or $18,615; and authorize the Mayor and City Clerk to execute on behalf of the City.

3. Authorize the appropriation of $204,763 from the Developer Impact Fees-Police (570) fund balance to:

   570-5601-84101-255019 Developer Impact Fees-Police

4. Authorize the appropriation of $199,971 from the Merged 2008 Tax Exempt Bonds (954) fund balance to:

   954-5601-84101-255019 Merged 2008 Tax Exempt Bonds

4. FISCAL IMPACT

The total expenditure for both contracts is $404,734 and will be funded through Developer Impact Fees-Police (570) and Merged 2008 Tax Exempt Bonds (954), respectively:

570-5601-84101-255019 Police Facility Improvements $204,763

954-5601-84101-255019 Police Facility Improvements $199,971

Upon approval of this appropriation, the estimated Developer Impact Fees-Police (570) and Merged 2008 Tax Exempt Bonds (954) fund balances at June 30, 2026 will be $731,739 and $2,801,089, respectively.

5. STRATEGIC PLAN GOALS

Goal 1: Maintain Strong Emergency and Safety Services

Objective 1.9: Police facility improvements to the Field and Support Services Division to improve workflow.

6. DISCUSSION AND BACKGROUND

On December 9, 2025, the City Council authorized the replacement of furniture in the Police Department Field Services Division workspace at the Police Department. This phase of the project prioritizes upgrading lighting and flooring, along with comprehensive interior refreshment, before furniture installation. Key initiatives include removing outdated wall sconces and downlights, installing energy-efficient LED fixtures in the drop ceiling to optimize lighting performance, repainting the space, and replacing nearly 20-year-old flooring. These enhancements are part of a strategic effort to extend the facility's lifespan and ensure compliance with contemporary operational and safety standards.

Staff conducted a thorough review of the references and qualifications for ABM Electrical & Lighting Solutions and Interior Resources, Inc., dba Commercial Interior Resources, confirming their credentials and extensive experience with comparable projects. The Public Works Department, in conjunction with the Police Department, recommends approval of the agreement with ABM Electrical & Lighting Solutions, Inc., using Sourcewell Master Contract No. CA-R8-E-101723AEL for lighting installation in the amount of $199,971, representing a cost of $198,971 for interior facility lighting improvements plus a $1,000 contingency.

Staff also recommend approval of the agreement with Interior Resources, Inc., dba Commercial Interior Resources, in the amount of $204,763, using OMNIA Partners Contract 2020002149, for interior facility flooring and paint improvements representing a cost of $186,148, plus a 10% contingency.

Construction is projected to commence in June 2026 and be completed by September 2026.

CONTRACT
[Facility Lighting Improvements for Police Department
Sourcewell EZIQC Contract No. CA-R8-E-101723-AEL (SP-4325)]

THIS CONTRACT (the "Contract") is made and entered into as of _____, 2026 ("Effective Date") by and between the CITY OF ORANGE, a municipal corporation ("City"), and ABM ELECTRICAL & LIGHTING SOLUTIONS, INC., a Delaware corporation ("Contractor"), who agree as follows.

ARTICLE 1
Work Performed

a. For and in consideration of the payments and agreements hereinafter mentioned, to be made and performed by City, and under the conditions expressed in the two (2) bonds presented to City with this Contract and incorporated herein by this reference, Contractor hereby agrees to and shall do all the work and furnish all the labor, materials, tools and equipment, except such as are mentioned in the specifications to be furnished by City to Contractor, necessary to complete in good workmanship and substantial manner the work (the "Work") described in:

(1) The latest edition of the "City of Orange Standard Plans and Specifications" (the "Orange Book") with the term "Engineer," as used in the Orange Book and in this Contract, to specifically include the City Engineer (or designee);

(2) The "Standard Specifications for Public Works Construction" (the "Greenbook"), and all amendments thereto, except the definition of "Subcontractor" in Section 1.2 (General – Terms and Definitions) of Part 1 (General Provisions) of the Greenbook, which is hereby amended in its entirety to read as follows: "Subcontractor – An individual, firm, or corporation having a direct contract with the Contractor for the performance of a part of the Work;"

(3) The "City of Orange Standard Special Provisions;"

(4) The Standard Plans; and

(5) Contractor's Bid Proposal, which is on file with City's Department of Public Works.

b. Contractor acknowledges that it has received the Plans from City and that a complete copy of the Plans are in its possession and are hereby specifically referred to and by such reference made a part hereof. The Orange Book, Greenbook and City of Orange Standard Special Provisions and Standard Plans are on file with City's Public Works Director and are hereby specifically referred to and by such reference made a part hereof. Contractor hereby acknowledges that it has read, reviewed and understands the Plans, the Orange Book, the Greenbook, the Special Provisions, the Standard Plans, and the Encroachment Permit as they relate to the Work, all of which documents shall be referred to herein collectively as the "Plans and Specifications."

c. Contractor acknowledges the provisions of Chapter 8.28 of the Orange Municipal Code which requires, among other things, that Contractor utilize City's exclusive solid waste hauler for the rental of bins for trash and debris removal and imposes mandatory recycling requirements for self-hauled construction and demolition waste. The terms and conditions set forth in this Contract shall control over any terms and conditions in the Plans and Specifications to the contrary.

d. The Work shall be performed in conformity with the Plans and Specifications and the Bid Proposal, referenced as Exhibit A and all applicable laws, including any and all applicable federal and state labor laws and standards and applicable prevailing wage requirements and any and all state, federal and local statutes, regulations and ordinances relating to the protection of human health or the environment.

e. Unless and until otherwise notified in writing by City's Public Works Director, City's Assistant Field Services Manager, Rachael Gomez ("Authorized City Representative"), shall be the person to whom Contractor will report for the performance of the Work hereunder. It is understood that Contractor's performance hereunder shall be under the direction and supervision of the Authorized City Representative or such other person as City's Public Works Director may designate from time to time, that Contractor shall coordinate the Work hereunder with the Authorized City Representative to the extent required by the Authorized City Representative, and that all performances required hereunder by Contractor shall be performed to the satisfaction of the Authorized City Representative or City's Public Works Director.

f. It is expressly agreed by and between the parties hereto that should there be any conflict between the terms of this instrument and Contractor's Bid Proposal, then this instrument shall control and nothing herein shall be considered as an acceptance of the said terms of said Bid Proposal conflicting herewith.

ARTICLE 2
Commencement of Work

Contractor shall commence the Work provided for in this Contract within fifteen (15) days of the date of the issuance by City of a Notice to Proceed and diligently prosecute completion of the Work within thirty (30) calendar days from such date, unless legal extension is granted in accordance with the terms set forth in the Greenbook. Time is of the essence in this Contract. Contractor shall do all things necessary and incidental to the prosecution of Contractor's Work.

ARTICLE 3
Compensation

a. Contractor agrees to receive and accept an amount not to exceed ONE HUNDRED NINETY-EIGHT THOUSAND NINE HUNDRED SEVENTY-ONE DOLLARS and 00/100 ($198,971.00) as compensation for furnishing all materials and doing all the Work contemplated and embraced in this Contract. Said compensation covers (1) all loss or damage arising out of the nature of the Work, from the acts of the elements; (2) any unforeseen difficulties or obstructions which may arise or be encountered in the prosecution of the Work until its acceptance by City,

other than as provided below; (3) all risks of every description connected with the Work; (4) all expenses incurred by or in consequence of the suspension or discontinuance of the Work; and (5) well and faithfully completing the Work, and for the whole thereof, in the manner and according to the Plans and Specifications, and requirements of the Authorized City Representative under them. Retention amounts shall be withheld from progress payments as required by law unless Contractor provides securities in lieu of retention.

b. In addition to the scheduled Work to be performed by the Contractor, the parties recognize that additional, unforeseen work and services may be required by the Authorized City Representative. In anticipation of such contingencies, the sum of ONE THOUSAND DOLLARS and 00/100 ($1,000.00) has been added to the total compensation of this Contract. The Authorized City Representative may approve the additional work and the actual costs incurred by the Contractor in performance of additional work or services in accordance with such amount as the Authorized City Representative and the Contractor may agree upon in advance. Said additional work or services and the amount of compensation therefor, up to the amount of the authorized contingency, shall be memorialized in the form of a Contract Amendment approved by the City Manager on a form acceptable to the City Attorney. The Contractor agrees to perform only that work or those services that are specifically requested by the Authorized City Representative. Any and all additional work and services performed under this Contract shall be completed in such sequence as to assure their completion as expeditiously as is consistent with professional skill and care in accordance with a cost estimate or proposal submitted to and approved by the Authorized City Representative prior to the commencement of such Work or services.

c. The total amount of compensation under this Contract, including contingencies, shall not exceed ONE HUNDRED NINETY-NINE THOUSAND NINE HUNDRED SEVENTY-ONE DOLLARS and 00/100 ($199,971.00).

ARTICLE 4
Licenses

Contractor represents that it and any subcontractors it may engage, possess any and all licenses which are required under state or federal law to perform the Work contemplated by this Contract and that Contractor and subcontractors shall maintain all appropriate licenses, including a City of Orange business license, at its cost, during the performance of this Contract.

ARTICLE 5
Guarantees

a. Contractor guarantees the construction and installation of all Work included in the Plans and Specifications for which Contractor has been awarded this Contract.

b. Should any of the materials or equipment installed pursuant to this Contract prove defective or should the Work as a whole prove defective, due to faulty equipment, workmanship, materials furnished or methods of installations, or should said Work or any part thereof fail to function properly, as designed, due to any of the above causes within twelve (12) months after the date on which said Work is accepted by City, Contractor shall make repairs and furnish such

materials and equipment as are necessary to be furnished and installed within fifteen (15) calendar days after the receipt of a demand from City.

c. Said Work will be deemed defective within the meaning of this guarantee in the event that it fails to function as originally intended either by the Plans and Specifications of this Contract or by the manufacturer(s) of the equipment incorporated into the Work.

d. In the event repairs are not made within fifteen (15) calendar days after Contractor's receipt of a demand from City, City shall have the unqualified option to make any needed repairs or replacements itself or by any other contractor. Contractor shall reimburse City, upon demand, for all expenses incurred in restoring said Work to the condition contemplated in this Contract, including the cost of any equipment or materials replaced.

e. It is understood that emergency repairs may, by necessity, be made by City. Therefore, when defective equipment, materials or workmanship result in emergency repairs by City, Contractor shall reimburse City, upon demand, for all expenses incurred. Emergency repairs will be deemed as those repairs determined by City's Director of Public Works to be necessary due to an immediate detriment to the health, safety, welfare or convenience of the residents of City.

ARTICLE 6
Water Quality

a. The Santa Ana Regional Water Quality Control Board ("RWQCB") has issued National Pollutant Discharge Elimination System ("NPDES") Permit No. R8-2009-0030 (the "Permit"), which governs storm water and non-storm water discharges resulting from municipal activities performed by City or its contractors. In order to comply with the Permit requirements, the County of Orange has prepared a Drainage Area Management Plan ("DAMP"), containing Model Maintenance Procedures with Best Management Practices ("BMPs") that City and its contractors must adhere to. The Model Maintenance Procedures contain pollution prevention and source control techniques to minimize the impact of those activities upon dry-weather urban runoff, storm water runoff, and receiving water quality. Examples include: wash water from cleaning of sidewalks or parking lots must be collected and disposed of in the sewer or landscaped areas.

b. The Permit, the DAMP and the Model Maintenance Procedures are on file in the office of City's Director of Public Works. Contractor hereby acknowledges that it has read, reviewed and understands the Permit, the DAMP and the Model Maintenance Procedures, as they relate to the Work and hereby shall perform the Work in conformance therewith.

ARTICLE 7
Independent Contractor; Contractor not Agent

a. At all times during the term of this Contract, Contractor shall be an independent contractor and not an employee of City. City shall have the right to control Contractor only insofar as the result of Contractor's services rendered pursuant to this Contract. City shall not have the

right to control the means by which Contractor accomplishes services rendered pursuant to this Contract. Contractor shall, at its sole cost and expense, furnish all facilities, materials and equipment which may be required for furnishing services pursuant to this Contract. Contractor shall be solely responsible for, and shall indemnify, defend and save City harmless from all matters relating to the payment of its subcontractors, agents and employees, including compliance with social security, withholding and all other wages, salaries, benefits, taxes, exactions, and regulations of any nature whatsoever. Contractor acknowledges that Contractor and any subcontractors, agents or employees employed by Contractor shall not, under any circumstances, be considered employees of City, and that they shall not be entitled to any of the benefits or rights afforded employees of City, including, but not limited to, sick leave, vacation leave, holiday pay, Public Employees Retirement System benefits, or health, life, dental, long-term disability or workers' compensation insurance benefits.

b. Except as City may specify in writing, Contractor shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. Contractor shall have no authority, express or implied, to bind City to any obligation whatsoever.

ARTICLE 8
Public Work; Prevailing Wage

a. The Work which is the subject of this Contract is a "public work," as that term is defined in Section 1720 of the California Labor Code, for which prevailing wages must be paid. To the extent Contractor's employees will perform any work that falls within any of the classifications for which the Department of Labor Relations of the State of California promulgates prevailing wage determinations, Contractor hereby agrees that Contractor, and any subcontractor under it, shall pay not less than the specified prevailing rates of wages to all such workers. The general prevailing wage determinations for crafts can be located on the website of the Department of Industrial Relations (www.dir.ca.gov/DLSR). Additionally, to perform work under this Contract, Contractor must meet all State registration requirements and criteria, including project compliance monitoring.

b. Attached hereto as Attachment No. 1 and incorporated herein by this reference is a copy of the provisions of Sections 1725.5, 1771, 1771.1, 1771.4, 1775, 1776, 1777.5, 1813 and 1815 of the California Labor Code. Contractor hereby acknowledges that it has read, reviewed and understands those provisions of the Labor Code and shall prosecute and complete the Work under this Contract in strict compliance with all of those terms and provisions.

c. Contractor shall secure the payment of compensation to its employees in accordance with the provisions of Section 3700 of the California Labor Code. Accordingly, and as required by Section 1861 of the California Labor Code, Contractor hereby certifies as follows:

> "I am aware of the provisions of Section 3700 of the Labor Code which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the work of this contract."

d. Contractor shall indemnify, protect, defend and hold harmless City and its officers, employees, contractors and agents, with counsel reasonably acceptable to City, from and against any and all loss, liability, damage, claim, cost, expense, and/or "increased costs" (including reasonable attorney's fees, court and litigation costs, and fees of expert witnesses) which result or arise in any way from the noncompliance by Contractor of any applicable local, state and/or federal law, including, without limitation, any applicable federal and/or state labor laws (including, without limitation, the requirement to pay state prevailing wages). It is agreed by the parties that, in connection with the construction of the Work which is the subject of this Contract, Contractor shall bear all risks of payment or non-payment of state prevailing wages. "Increased costs" as used in this paragraph shall have the meaning ascribed to it in Labor Code Section 1781, as the same may be enacted, adopted or amended from time to time. The foregoing indemnity shall survive termination of this Contract.

ARTICLE 9
Equal Employment Opportunity

During the performance of this Contract, Contractor agrees as follows:

a. Contractor shall not discriminate against any employee or applicant for employment because of race, color, religion, sex, national origin, mental or physical disability, or any other basis prohibited by applicable law. Contractor shall ensure that applicants are employed and that employees are treated during employment, without regard to their race, color, religion, sex, national origin, mental or physical disability, or any other basis prohibited by applicable law. Such actions shall include, but not be limited to the following: employment, upgrading, demotion or transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation and selection for training, including apprenticeship. Contractor shall post in conspicuous places, available to employees and applicants for employment, a notice setting forth provisions of this non-discrimination clause.

b. Contractor shall, in all solicitations and advertisements for employees placed by, or on behalf of Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, mental or physical disability, or any other basis prohibited by applicable law.

c. Contractor shall cause the foregoing paragraphs (a) and (b) to be inserted in all subcontracts for any Work covered by this Contract, provided that the foregoing provisions shall not apply to subcontracts for standard commercial supplies or raw materials.

ARTICLE 10
Conflicts of Interest

Contractor agrees that it shall not make, participate in the making, or in any way attempt to use its position as a contractor to influence any decision of City in which Contractor knows or has reason to know that Contractor, its officers, partners, or employees have a financial interest as

defined in Section 87103 of the Government Code. Contractor further agrees that it shall not be eligible to work as the builder for any project for which the design work is part of this Contract.

ARTICLE 11
Indemnity

Contractor shall defend, indemnify and hold harmless City and its officers, officials, agents, and employees from and against:

a. Any and all claims, liabilities, losses, damages, penalties, costs or expenses (including reasonable attorneys' fees and court costs) which City may directly or indirectly sustain or suffer arising from or as a result of the death of any person or any accident, injury, loss or damage whatsoever caused to any person or the property of any person which shall occur on or adjacent to the real property which is the subject of this Contract, or in connection with performance of this Contract which may be directly or indirectly caused by the acts or omissions of Contractor or its officers, employees, contractors or agents, or as a consequence of any use, generation, manufacture, storage, disposal, release or threatened release of a hazardous waste or substance. Contractor shall not be responsible for (and such indemnity shall not apply to) any willful misconduct, negligence or breach of this Contract by City or its officers, officials, agents, and employees. The foregoing indemnity shall survive termination of this Contract.

b. Any and all claims under workers' compensation acts and other employee benefit acts with respect to Contractor's employees or Contractor's subcontractor's employees arising out of Contractor's Work under this Contract, including any and all claims under any law pertaining to Contractor's status as an independent contractor.

ARTICLE 12
Insurance

a. Contractor shall procure and maintain for the duration of this Contract insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the Work hereunder and the results of that Work by Contractor, its agents, representatives, employees or subcontractors. Any umbrella liability insurance that is provided as part of the general or automobile liability minimums set forth below shall be maintained for the duration of the Contract.

b. Contractor shall maintain the following minimum amount of insurance: the greater of either the limits set forth in (1) through (4), below; or all of the insurance coverage and/or limits carried by or available to Contractor.

(1)	General Liability	$2,000,000	per occurrence for bodily injury, personal injury and property damage. If Commercial General Liability insurance or other form with a general aggregate limit is used, either the general aggregate limit shall apply separately to this

			project/location or the general aggregate limit shall be twice the required occurrence limit.
(2)	Automobile Liability	$1,000,000	per accident for bodily injury and property damage.
(3)	Workers' Compensation		as required by the State of California.
(4)	Employer's Liability	$1,000,000	per accident for bodily injury or disease.

c. Any insurance proceeds in excess of or broader than the minimum required coverage and/or minimum required limits which are applicable to a given loss shall be available to City. No representation is made that the minimum insurance requirements of this Contract are sufficient to cover the obligations of Contractor under this Contract.

d. Any deductibles or self-insured retentions must be declared to and approved by City. At the option of City, either: the insurer shall reduce or eliminate such deductibles or self-insured retentions with respect to City, its officers, officials, agents and employees; or Contractor shall provide a financial guarantee satisfactory to City guaranteeing payment of losses and related investigations, claim administration, and defense expenses.

e. Each policy of general liability and automotive liability insurance shall contain, or be endorsed to contain, the following provisions:

(1) City, its officers, officials, agents, and employees are declared to be additional insureds under the terms of the policy, with respect to liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of Contractor (any auto), and with respect to liability arising out of Work or operations performed by or on behalf of Contractor, including materials, parts or equipment furnished in connection with such Work or operations. A policy endorsement to that effect shall be provided to City along with the certificate of insurance. In lieu of an endorsement, City will accept a copy of the policy(ies) which evidences that City is an additional insured as a contracting party. The minimum coverage required by Subsection 12.b, above, shall apply to City as an additional insured.

(2) For any claims related to this Contract, Contractor's insurance coverage shall be primary insurance with respect to City, its officers, officials, agents and employees. Any insurance or self-insurance maintained by City, its officers, officials, agents and employees shall be excess of Contractor's insurance and shall not contribute with it.

(3) Coverage shall not be canceled, except after thirty (30) days' prior written notice has been provided to City.

f. Contractor shall furnish City with original certificates of insurance and endorsements effecting coverage required by this Article 12. The endorsements shall be on forms acceptable to City. All certificates and endorsements are to be received and approved by City

before the Work commences. However, failure to do so shall not operate as a waiver of these insurance requirements. City reserves the right to require complete, certified copies of all required insurance policies, including endorsements effecting the coverage required by these specifications at any time.

g. All insurance procured and maintained by Contractor shall be issued by insurers admitted to conduct the pertinent line of insurance business in California and having a rating of Grade A or better and Class VII or better by the latest edition of Best Key Rating Guide.

h. Contractor shall immediately notify City if any required insurance lapses or is otherwise modified and cease performance of this Contract unless otherwise directed by City. In such a case, City may procure insurance or self-insure the risk and charge Contractor for such costs and any and all damages resulting therefrom by way of set-off from any sums owed Contractor.

i. Contractor agrees that in the event of loss due to any of the perils for which it has agreed to provide insurance, Contractor shall look solely to its insurance for recovery. Contractor hereby grants to City, on behalf of any insurer providing insurance to either Contractor or City with respect to the services of Contractor herein, a waiver of any right to subrogation which any such insurer may acquire against City by virtue of the payment of any loss under such insurance. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of City for all Work performed by Contractor, its employees, agents and subcontractors. Contractor shall obtain any other endorsement that may be necessary to effect this waiver of subrogation.

j. Contractor shall require and verify that all subcontractors maintain insurance meeting all of the requirements stated herein.

ARTICLE 13
Termination

City, acting through its City Manager or designee, reserves the right to terminate this Contract for any reason by giving five (5) days' written notice of intent to terminate to Contractor. Upon receipt of notice, Contractor shall immediately cease work, unless the notice provides otherwise. Should City terminate this Contract, City shall pay Contractor for services satisfactorily provided and all allowable reimbursements incurred to the date of termination in compliance with this Contract, unless such termination shall be for cause, in which event City may withhold any disputed compensation. City shall not be liable for any claim of lost profits.

ARTICLE 14
Maintenance and Inspection of Records

In accordance with generally accepted accounting principles, Contractor and its subcontractors shall maintain reasonably full and complete books, documents, papers, accounting records and other information (collectively, the "records") pertaining to the costs of and completion of services performed under this Contract. During the term of this Contract and for a period of three (3) years after termination or completion of this Contract, City shall have the right to inspect and/or audit Contractor's records pertaining to the performance of this Contract at

Contractor's office. Contractor shall make available all such records for inspection or audit at its offices during normal business hours and upon three (3) days' notice from City, and copies thereof shall be furnished if requested.

ARTICLE 15
Compliance with Laws

a. Contractor shall be knowledgeable of and comply with all local, state and federal laws pertaining to the subject matter hereof or in any way regulating the activities undertaken by Contractor or any subcontractor hereunder.

b. Contractor represents and warrants that it:

(1) Has complied and shall at all times during the term of this Contract comply, in all respects, with all immigration laws, regulations, statutes, rules, codes, and orders, including, without limitation, the Immigration Reform and Control Act of 1986 (IRCA); and

(2) Has not and will not knowingly employ any individual to perform services under this Contract who is ineligible to work in the United States or under the terms of this Contract; and

(3) Has properly maintained, and shall at all times during the term of this Contract properly maintain, all related employment documentation records including, without limitation, the completion and maintenance of the Form I-9 for each of Contractor's employees; and

(4) Has responded, and shall at all times during the term of this Contract respond, in a timely fashion to any government inspection requests relating to immigration law compliance and/or Form I-9 compliance and/or worksite enforcement by the Department of Homeland Security, the Department of Labor, or the Social Security Administration.

c. Contractor shall require all subcontractors and/or subconsultants to make the same representations and warranties required by this Article 15 when hired to perform services under this Contract.

d. Contractor shall, upon request of City, provide a list of all employees working under this Contract and shall provide, to the reasonable satisfaction of City, verification that all such employees are eligible to work in the United States. All costs associated with such verification shall be borne by Contractor. Once such request has been made, Contractor may not change employees working under this Contract without written notice to City, accompanied by the verification required herein for such employees. Contractor shall require all subcontractors and/or sub-consultants to make the same verification when hired to perform services under this Contract.

e. If Contractor, or a subcontractor or subconsultant, knowingly employs an employee providing Work under this Contract who is not authorized to work in the United States, and/or fails to follow federal laws to determine the status of such employee, such shall constitute a

material breach of this Contract and may be cause for immediate termination of this Contract by City.

f. Contractor shall indemnify and hold City, its officials and employees harmless for, of and from any loss, including but not limited to fines, penalties and corrective measures, City may sustain by reason of Contractor's failure to comply with said laws, rules and regulations in connection with the performance of this Contract.

ARTICLE 16
Governing Law and Venue

This Contract shall be construed in accordance with and governed by the laws of the State of California and Contractor shall submit to the jurisdiction of California courts. Venue for any dispute arising under this Contract shall be in Orange County, California.

ARTICLE 17
Integration and Amendment

a. This Contract constitutes the entire agreement of the parties. No other agreement, oral or written, pertaining to the Work to be performed under this Contract shall be of any force or effect unless it is in writing and signed by both parties. Any Work performed which is inconsistent with or in violation of the provisions of this Contract shall not be compensated.

b. Amendments to this Contract must be in writing and signed by both parties. The City Manager is authorized to execute amendments to this Contract up to the amounts specified in Chapter 3.08 of the Orange Municipal Code.

ARTICLE 18
Notice

Except as otherwise provided herein, all notices required under this Contract shall be in writing and delivered personally, by e-mail, or by first class mail, postage prepaid, to each party at the address listed below. Either party may change the notice address by notifying the other party in writing. Notices shall be deemed received upon receipt of same or within three (3) days of deposit in the U.S. Mail, whichever is earlier. Notices sent by e-mail shall be deemed received on the date of the e-mail transmission.

ATTACHMENT NO. 1

CALIFORNIA LABOR CODE
SECTIONS 1725.5, 1771, 1771.1, 1771.4, 1775, 1776, 1777.5, 1813 and 1815

Section 1725.5. Registration of contractors; mandatory registration; qualifications and application; fees; exempt contractors

A contractor shall be registered pursuant to this section to be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any public work contract that is subject to the requirements of this chapter. For the purposes of this section, "contractor" includes a subcontractor as defined by Section 1722.1.

(a) To qualify for registration under this section, a contractor shall do all of the following:

(1)(A) Register with the Department of Industrial Relations in the manner prescribed by the department and pay an initial nonrefundable application fee of four hundred dollars ($400) to qualify for registration under this section and an annual renewal fee on or before July 1 of each year thereafter. The annual renewal fee shall be in a uniform amount set by the Director of Industrial Relations, and the initial registration and renewal fees may be adjusted no more than annually by the director to support the costs specified in Section 1771.3.

(B) Beginning June 1, 2019, a contractor may register or renew according to this subdivision in annual increments up to three years from the date of registration. Contractors who wish to do so will be required to prepay the applicable nonrefundable application or renewal fees to qualify for the number of years for which they wish to preregister.

(2) Provide evidence, disclosures, or releases as are necessary to establish all of the following:

(A) Workers' compensation coverage that meets the requirements of Division 4 (commencing with Section 3200) and includes sufficient coverage for any worker whom the contractor employs to perform work that is subject to prevailing wage requirements other than a contractor who is separately registered under this section. Coverage may be evidenced by a current and valid certificate of workers' compensation insurance or certification of self-insurance required under Section 7125 of the Business and Professions Code.

(B) If applicable, the contractor is licensed in accordance with Chapter 9 (commencing with Section 7000) of the Business and Professions Code.

(C) The contractor does not have any delinquent liability to an employee or the state for any assessment of back wages or related damages, interest, fines, or penalties pursuant to any final judgment, order, or determination by a court or any federal, state, or local administrative agency, including a confirmed arbitration award. However, for purposes of this paragraph, the contractor shall not be disqualified for any judgment, order, or determination that is under appeal, provided that the contractor has secured the payment of any amount eventually found due through a bond or other appropriate means.

(D) The contractor is not currently debarred under Section 1777.1 or under any other federal or state law providing for the debarment of contractors from public works.

(E) The contractor has not bid on a public works contract, been listed in a bid proposal, or engaged in the performance of a contract for public works without being lawfully registered in accordance with this section, within the preceding 12 months or since the effective date of the requirements set forth in subdivision (e), whichever is earlier. If a contractor is found to be in violation of the requirements of this paragraph, the period of disqualification shall be waived if both of the following are true:

(i) The contractor has not previously been found to be in violation of the requirements of this paragraph within the preceding 12 months.

(ii) The contractor pays an additional nonrefundable penalty registration fee of two thousand dollars ($2,000).

(b) Fees received pursuant to this section shall be deposited in the State Public Works Enforcement Fund established by Section 1771.3 and shall be used only for the purposes specified in that section.

(c) A contractor who fails to pay the renewal fee required under paragraph (1) of subdivision (a) on or before the expiration of any prior period of registration shall be prohibited from bidding on or engaging in the performance of any contract for public work until once again registered pursuant to this section. If the failure to pay the renewal fee was inadvertent, the contractor may renew its registration retroactively by paying an additional nonrefundable penalty renewal fee equal to the amount of the renewal fee within 90 days of the due date of the renewal fee.

(d) If, after a body awarding a contract accepts the contractor's bid or awards the contract, the work covered by the bid or contract is determined to be a public work to which Section 1771 applies, either as the result of a determination by the director pursuant to Section 1773.5 or a court decision, the requirements of this section shall not apply, subject to the following requirements:

(1) The body that awarded the contract failed, in the bid specification or in the contract documents, to identify as a public work that portion of the work that the determination or decision subsequently classifies as a public work.

(2) Within 20 days following service of notice on the awarding body of a determination by the Director of Industrial Relations pursuant to Section 1773.5 or a decision by a court that the contract was for public work as defined in this chapter, the contractor and any subcontractors are registered under this section or are replaced by a contractor or subcontractors who are registered under this section.

(3) The requirements of this section shall apply prospectively only to any subsequent bid, bid proposal, contract, or work performed after the awarding body is served with notice of the determination or decision referred to in paragraph (2).

(e) The requirements of this section shall apply to any bid proposal submitted on or after March 1, 2015, to any contract for public work, as defined in this chapter, executed on or after April 1, 2015, and to any work performed under a contract for public work on or after January 1, 2018, regardless of when the contract for public work was executed.

(f) This section does not apply to work performed on a public works project of twenty-five thousand dollars ($25,000) or less when the project is for construction, alteration, demolition, installation, or repair work or to work performed on a public works project of fifteen thousand dollars ($15,000) or less when the project is for maintenance work.

Section 1771. Payment of general prevailing rate

Except for public works projects of one thousand dollars ($1,000) or less, not less than the general prevailing rate of per diem wages for work of a similar character in the locality in which the public work is performed, and not less than the general prevailing rate of per diem wages for holiday and overtime work fixed as provided in this chapter, shall be paid to all workers employed on public works.

This section is applicable only to work performed under contract, and is not applicable to work carried out by a public agency with its own forces. This section is applicable to contracts let for maintenance work.

Section 1771.1. Registration as a contractor or subcontractor required prior to bid submission; exceptions; violations; penalties

(a) A contractor or subcontractor shall not be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any contract for public work, as defined in this chapter, unless currently registered and qualified to perform public work pursuant to Section 1725.5. It is not a violation of this section for an unregistered contractor to submit a bid that is authorized by Section 7029.1 of the Business and Professions Code or by Section 10164 or 20103.5 of the Public Contract Code, provided the contractor is registered to perform public work pursuant to Section 1725.5 at the time the contract is awarded.

(b) Notice of the requirement described in subdivision (a) shall be included in all bid invitations and public works contracts, and a bid shall not be accepted nor any contract or subcontract entered into without proof of the contractor or subcontractor's current registration to perform public work pursuant to Section 1725.5.

(c) An inadvertent error in listing a subcontractor who is not registered pursuant to Section 1725.5 in a bid proposal shall not be grounds for filing a bid protest or grounds for considering the bid nonresponsive, provided that any of the following apply:

(1) The subcontractor is registered prior to the bid opening.

(2) Within 24 hours after the bid opening, the subcontractor is registered and has paid the penalty registration fee specified in subparagraph (E) of paragraph (2) of subdivision (a) of Section 1725.5.

(3) The subcontractor is replaced by another registered subcontractor pursuant to Section 4107 of the Public Contract Code.

(d) Failure by a subcontractor to be registered to perform public work as required by subdivision (a) shall be grounds under Section 4107 of the Public Contract Code for the contractor, with the consent of the awarding authority, to substitute a subcontractor who is registered to perform public work pursuant to Section 1725.5 in place of the unregistered subcontractor.

(e) The department shall maintain on its Internet Web site a list of contractors who are currently registered to perform public work pursuant to Section 1725.5.

(f) A contract entered into with any contractor or subcontractor in violation of subdivision (a) shall be subject to cancellation, provided that a contract for public work shall not be unlawful, void, or voidable solely due to the failure of the awarding body, contractor, or any subcontractor to comply with the requirements of Section 1725.5 or this section.

(g) If the Labor Commissioner or his or her designee determines that a contractor or subcontractor engaged in the performance of any public work contract without having been registered in accordance with this section, the contractor or subcontractor shall forfeit, as a civil penalty to the state, one hundred dollars ($100) for each day of work performed in violation of the registration requirement, not to exceed an aggregate penalty of eight thousand dollars ($8,000) in addition to any penalty registration fee assessed pursuant to clause (ii) of subparagraph (E) of paragraph (2) of subdivision (a) of Section 1725.5.

(h)(1) In addition to, or in lieu of, any other penalty or sanction authorized pursuant to this chapter, a higher tiered public works contractor or subcontractor who is found to have entered into a subcontract with an unregistered lower tier subcontractor to perform any public work in violation of the requirements of Section 1725.5 or this section shall be subject to forfeiture, as a civil penalty to the state, of one hundred dollars ($100)

for each day the unregistered lower tier subcontractor performs work in violation of the registration requirement, not to exceed an aggregate penalty of ten thousand dollars ($10,000).

(2) The Labor Commissioner shall use the same standards specified in subparagraph (A) of paragraph (2) of subdivision (a) of Section 1775 when determining the severity of the violation and what penalty to assess, and may waive the penalty for a first time violation that was unintentional and did not hinder the Labor Commissioner's ability to monitor and enforce compliance with the requirements of this chapter.

(3) A higher tiered public works contractor or subcontractor shall not be liable for penalties assessed pursuant to paragraph (1) if the lower tier subcontractor's performance is in violation of the requirements of Section 1725.5 due to the revocation of a previously approved registration.

(4) A subcontractor shall not be liable for any penalties assessed against a higher tiered public works contractor or subcontractor pursuant to paragraph (1). A higher tiered public works contractor or subcontractor may not require a lower tiered subcontractor to indemnify or otherwise be liable for any penalties pursuant to paragraph (1).

(i) The Labor Commissioner or his or her designee shall issue a civil wage and penalty assessment, in accordance with the provisions of Section 1741, upon determination of penalties pursuant to subdivision (g) and subparagraph (B) of paragraph (1) of subdivision (h). Review of a civil wage and penalty assessment issued under this subdivision may be requested in accordance with the provisions of Section 1742. The regulations of the Director of Industrial Relations, which govern proceedings for review of civil wage and penalty assessments and the withholding of contract payments under Article 1 (commencing with Section 1720) and Article 2 (commencing with Section 1770), shall apply.

(j)(1) Where a contractor or subcontractor engages in the performance of any public work contract without having been registered in violation of the requirements of Section 1725.5 or this section, the Labor Commissioner shall issue and serve a stop order prohibiting the use of the unregistered contractor or the unregistered subcontractor on all public works until the unregistered contractor or unregistered subcontractor is registered. The stop order shall not apply to work by registered contractors or subcontractors on the public work.

(2) A stop order may be personally served upon the contractor or subcontractor by either of the following methods:

(A) Manual delivery of the order to the contractor or subcontractor personally.

(B) Leaving signed copies of the order with the person who is apparently in charge at the site of the public work and by thereafter mailing copies of the order by first class mail, postage prepaid to the contractor or subcontractor at one of the following:

(i) The address of the contractor or subcontractor on file with either the Secretary of State or the Contractors' State License Board.

(ii) If the contractor or subcontractor has no address on file with the Secretary of State or the Contractors' State License Board, the address of the site of the public work.

(3) The stop order shall be effective immediately upon service and shall be subject to appeal by the party contracting with the unregistered contractor or subcontractor, by the unregistered contractor or subcontractor, or both. The appeal, hearing, and any further review of the hearing decision shall be governed by the procedures, time limits, and other requirements specified in subdivision (a) of Section 238.1.

(4) Any employee of an unregistered contractor or subcontractor who is affected by a work stoppage ordered by the commissioner pursuant to this subdivision shall be paid at his or her regular hourly prevailing wage rate by that employer for any hours the employee would have worked but for the work stoppage, not to exceed 10 days.

(k) Failure of a contractor or subcontractor, owner, director, officer, or managing agent of the contractor or subcontractor to observe a stop order issued and served upon him or her pursuant to subdivision (j) is guilty of a misdemeanor punishable by imprisonment in county jail not exceeding 60 days or by a fine not exceeding ten thousand dollars ($10,000), or both.

(l) This section shall apply to any bid proposal submitted on or after March 1, 2015, and any contract for public work entered into on or after April 1, 2015. This section shall also apply to the performance of any public work, as defined in this chapter, on or after January 1, 2018, regardless of when the contract for public work was entered.

(m) Penalties received pursuant to this section shall be deposited in the State Public Works Enforcement Fund established by Section 1771.3 and shall be used only for the purposes specified in that section.

(n) This section shall not apply to work performed on a public works project of twenty-five thousand dollars ($25,000) or less when the project is for construction, alteration, demolition, installation, or repair work or to work performed on a public works project of fifteen thousand dollars ($15,000) or less when the project is for maintenance work.

Section 1771.4. Additional requirements when bidding and awarding public works contracts

(a) All of the following are applicable to all public works projects that are otherwise subject to the requirements of this chapter:

(1) The call for bids and contract documents shall specify that the project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

(2) The awarding body shall post or require the prime contractor to post job site notices, as prescribed by regulation.

(3) Each contractor and subcontractor shall furnish the records specified in Section 1776 directly to the Labor Commissioner, in the following manner:

(A) At least monthly or more frequently if specified in the contract with the awarding body.

(B) In a format prescribed by the Labor Commissioner.

(4) If the contractor or subcontractor is not registered pursuant to Section 1725.5 and is performing work on a project for which registration is not required because of subdivision (f) of Section 1725.5, the unregistered contractor or subcontractor is not required to furnish the records specified in Section 1776 directly to the Labor Commissioner but shall retain the records specified in Section 1776for at least three years after completion of the work.

(5) The department shall undertake those activities it deems necessary to monitor and enforce compliance with prevailing wage requirements.

(b) The Labor Commissioner may exempt a public works project from compliance with all or part of the requirements of subdivision (a) if either of the following occurs:

(1) The awarding body has enforced an approved labor compliance program, as defined in Section 1771.5, on all public works projects under its authority, except those deemed exempt pursuant to subdivision (a) of Section 1771.5, continuously since December 31, 2011.

(2) The awarding body has entered into a collective bargaining agreement that binds all contractors performing work on the project and that includes a mechanism for resolving disputes about the payment of wages.

(c) The requirements of paragraph (1) of subdivision (a) shall only apply to contracts for public works projects awarded on or after January 1, 2015.

(d) The requirements of paragraph (3) of subdivision (a) shall apply to all contracts for public work, whether new or ongoing, on or after January 1, 2016.

Section 1775. Penalties for violations

(a)(1) The contractor and any subcontractor under the contractor shall, as a penalty to the state or political subdivision on whose behalf the contract is made or awarded, forfeit not more than two hundred dollars ($200) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rates as determined by the director for the work or craft in which the worker is employed for any public work done under the contract by the contractor or, except as provided in subdivision (b), by any subcontractor under the contractor.

(2)(A) The amount of the penalty shall be determined by the Labor Commissioner based on consideration of both of the following:

(i) Whether the failure of the contractor or subcontractor to pay the correct rate of per diem wages was a good faith mistake and, if so, the error was promptly and voluntarily corrected when brought to the attention of the contractor or subcontractor.

(ii) Whether the contractor or subcontractor has a prior record of failing to meet its prevailing wage obligations.

(B)(i) The penalty may not be less than forty dollars ($40) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, unless the failure of the contractor or subcontractor to pay the correct rate of per diem wages was a good faith mistake and, if so, the error was promptly and voluntarily corrected when brought to the attention of the contractor or subcontractor.

(ii) The penalty may not be less than eighty dollars ($80) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, if the contractor or subcontractor has been assessed penalties within the previous three years for failing to meet its prevailing wage obligations on a separate contract, unless those penalties were subsequently withdrawn or overturned.

(iii) The penalty may not be less than one hundred twenty dollars ($120) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, if the Labor Commissioner determines that the violation was willful, as defined in subdivision (c) of Section 1777.1.

(C) If the amount due under this section is collected from the contractor or subcontractor, any outstanding wage claim under Chapter 1 (commencing with Section 1720) of Part 7 of Division 2 against that contractor

or subcontractor shall be satisfied before applying that amount to the penalty imposed on that contractor or subcontractor pursuant to this section.

(D) The determination of the Labor Commissioner as to the amount of the penalty shall be reviewable only for abuse of discretion.

(E) The difference between the prevailing wage rates and the amount paid to each worker for each calendar day or portion thereof for which each worker was paid less than the prevailing wage rate shall be paid to each worker by the contractor or subcontractor, and the body awarding the contract shall cause to be inserted in the contract a stipulation that this section will be complied with.

(b) If a worker employed by a subcontractor on a public works project is not paid the general prevailing rate of per diem wages by the subcontractor, the prime contractor of the project is not liable for any penalties under subdivision (a) unless the prime contractor had knowledge of that failure of the subcontractor to pay the specified prevailing rate of wages to those workers or unless the prime contractor fails to comply with all of the following requirements:

(1) The contract executed between the contractor and the subcontractor for the performance of work on the public works project shall include a copy of the provisions of this section and Sections 1771, 1776, 1777.5, 1813, and 1815.

(2) The contractor shall monitor the payment of the specified general prevailing rate of per diem wages by the subcontractor to the employees, by periodic review of the certified payroll records of the subcontractor.

(3) Upon becoming aware of the failure of the subcontractor to pay his or her workers the specified prevailing rate of wages, the contractor shall diligently take corrective action to halt or rectify the failure, including, but not limited to, retaining sufficient funds due the subcontractor for work performed on the public works project.

(4) Prior to making final payment to the subcontractor for work performed on the public works project, the contractor shall obtain an affidavit signed under penalty of perjury from the subcontractor that the subcontractor has paid the specified general prevailing rate of per diem wages to his or her employees on the public works project and any amounts due pursuant to Section 1813.

(c) The Division of Labor Standards Enforcement shall notify the contractor on a public works project within 15 days of the receipt by the Division of Labor Standards Enforcement of a complaint of the failure of a subcontractor on that public works project to pay workers the general prevailing rate of per diem wages.

Section 1776. Payroll records; retention; inspection; redacted information; agencies entitled to receive nonredacted copies of certified records; noncompliance penalties; rules

(a) Each contractor and subcontractor shall keep accurate payroll records, showing the name, address, social security number, work classification, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each journeyman, apprentice, worker, or other employee employed by him or her in connection with the public work. Each payroll record shall contain or be verified by a written declaration that it is made under penalty of perjury, stating both of the following:

(1) The information contained in the payroll record is true and correct.

(2) The employer has complied with the requirements of Sections 1771, 1811, and 1815 for any work performed by his or her employees on the public works project.

(b) The payroll records enumerated under subdivision (a) shall be certified and shall be available for inspection at all reasonable hours at the principal office of the contractor on the following basis:

(1) A certified copy of an employee's payroll record shall be made available for inspection or furnished to the employee or his or her authorized representative on request.

(2) A certified copy of all payroll records enumerated in subdivision (a) shall be made available for inspection or furnished upon request to a representative of the body awarding the contract and the Division of Labor Standards Enforcement of the Department of Industrial Relations.

(3) A certified copy of all payroll records enumerated in subdivision (a) shall be made available upon request by the public for inspection or for copies thereof. However, a request by the public shall be made through either the body awarding the contract or the Division of Labor Standards Enforcement. If the requested payroll records have not been provided pursuant to paragraph (2), the requesting party shall, prior to being provided the records, reimburse the costs of preparation by the contractor, subcontractors, and the entity through which the request was made. The public may not be given access to the records at the principal office of the contractor.

(c) Unless required to be furnished directly to the Labor Commissioner in accordance with paragraph (3) of subdivision (a) of Section 1771.4, the certified payroll records shall be on forms provided by the Division of Labor Standards Enforcement or shall contain the same information as the forms provided by the division. The payroll records may consist of printouts of payroll data that are maintained as computer records, if the printouts contain the same information as the forms provided by the division and the printouts are verified in the manner specified in subdivision (a).

(d) A contractor or subcontractor shall file a certified copy of the records enumerated in subdivision (a) with the entity that requested the records within 10 days after receipt of a written request.

(e) Except as provided in subdivision (f), any copy of records made available for inspection as copies and furnished upon request to the public or any public agency by the awarding body or the Division of Labor Standards Enforcement shall be marked or obliterated to prevent disclosure of an individual's name, address, and social security number. The name and address of the contractor awarded the contract or the subcontractor performing the contract shall not be marked or obliterated. Any copy of records made available for inspection by, or furnished to, a multiemployer Taft-Hartley trust fund (29 U.S.C. Sec. 186(c)(5)) that requests the records for the purposes of allocating contributions to participants shall be marked or obliterated only to prevent disclosure of an individual's full social security number, but shall provide the last four digits of the social security number. Any copy of records made available for inspection by, or furnished to, a joint labor-management committee established pursuant to the federal Labor Management Cooperation Act of 1978 (29 U.S.C. Sec. 175a) shall be marked or obliterated only to prevent disclosure of an individual's social security number.

(f)(1) Notwithstanding any other provision of law, agencies that are included in the Joint Enforcement Strike Force on the Underground Economy established pursuant to Section 329 of the Unemployment Insurance Code and other law enforcement agencies investigating violations of law shall, upon request, be provided nonredacted copies of certified payroll records. Any copies of records or certified payroll made available for inspection and furnished upon request to the public by an agency included in the Joint Enforcement Strike Force on the Underground Economy or to a law enforcement agency investigating a violation of law shall be marked or redacted to prevent disclosure of an individual's name, address, and social security number.

(2) An employer shall not be liable for damages in a civil action for any reasonable act or omission taken in good faith in compliance with this subdivision.

(g) The contractor shall inform the body awarding the contract of the location of the records enumerated under subdivision (a), including the street address, city, and county, and shall, within five working days, provide a notice of a change of location and address.

(h) The contractor or subcontractor has 10 days in which to comply subsequent to receipt of a written notice requesting the records enumerated in subdivision (a). In the event that the contractor or subcontractor fails to comply within the 10-day period, he or she shall, as a penalty to the state or political subdivision on whose behalf the contract is made or awarded, forfeit one hundred dollars ($100) for each calendar day, or portion thereof, for each worker, until strict compliance is effectuated. Upon the request of the Division of Labor Standards Enforcement, these penalties shall be withheld from progress payments then due. A contractor is not subject to a penalty assessment pursuant to this section due to the failure of a subcontractor to comply with this section.

(i) The body awarding the contract shall cause to be inserted in the contract stipulations to effectuate this section.

(j) The director shall adopt rules consistent with the California Public Records Act (Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of the Government Code) and the Information Practices Act of 1977 (Title 1.8 (commencing with Section 1798) of Part 4 of Division 3 of the Civil Code) governing the release of these records, including the establishment of reasonable fees to be charged for reproducing copies of records required by this section.

Section 1777.5. Employment of registered apprentices; wages; standards; number; apprenticeable craft or trade; exemptions; contributions; compliance program

(a)(1) This chapter does not prevent the employment upon public works of properly registered apprentices who are active participants in an approved apprenticeship program.

(2) For purposes of this chapter, “apprenticeship program” means a program under the jurisdiction of the California Apprenticeship Council established pursuant to Section 3070.

(b)(1) Every apprentice employed upon public works shall be paid the prevailing rate of per diem wages for apprentices in the trade to which he or she is registered and shall be employed only at the work of the craft or trade to which he or she is registered.

(2) Unless otherwise provided by a collective bargaining agreement, when a contractor requests the dispatch of an apprentice pursuant to this section to perform work on a public works project and requires the apprentice to fill out an application or undergo testing, training, an examination, or other preemployment process as a condition of employment, the apprentice shall be paid for the time spent on the required preemployment activity, including travel time to and from the required activity, if any, at the prevailing rate of per diem wages for apprentices in the trade to which he or she is registered. Unless otherwise provided by a collective bargaining agreement, a contractor is not required to compensate an apprentice for the time spent on preemployment activities if the apprentice is required to take a preemployment drug or alcohol test and he or she fails to pass that test.

(c) Only apprentices, as defined in Section 3077, who are in training under apprenticeship standards that have been approved by the Chief of the Division of Apprenticeship Standards and who are parties to written

apprentice agreements under Chapter 4 (commencing with Section 3070) of Division 3 are eligible to be employed at the apprentice wage rate on public works. The employment and training of each apprentice shall be in accordance with either of the following:

(1) The apprenticeship standards and apprentice agreements under which he or she is training.

(2) The rules and regulations of the California Apprenticeship Council.

(d) If the contractor to whom the contract is awarded by the state or any political subdivision, in performing any of the work under the contract, employs workers in any apprenticeable craft or trade, the contractor shall employ apprentices in at least the ratio set forth in this section and may apply to any apprenticeship program in the craft or trade that can provide apprentices to the site of the public work for a certificate approving the contractor under the apprenticeship standards for the employment and training of apprentices in the area or industry affected. However, the decision of the apprenticeship program to approve or deny a certificate shall be subject to review by the Administrator of Apprenticeship. The apprenticeship program or programs, upon approving the contractor, shall arrange for the dispatch of apprentices to the contractor. A contractor covered by an apprenticeship program's standards shall not be required to submit any additional application in order to include additional public works contracts under that program. "Apprenticeable craft or trade," as used in this section, means a craft or trade determined as an apprenticeable occupation in accordance with rules and regulations prescribed by the California Apprenticeship Council. As used in this section, "contractor" includes any subcontractor under a contractor who performs any public works not excluded by subdivision (o).

(e) Before commencing work on a contract for public works, every contractor shall submit contract award information to an applicable apprenticeship program that can supply apprentices to the site of the public work. The information submitted shall include an estimate of journeyman hours to be performed under the contract, the number of apprentices proposed to be employed, and the approximate dates the apprentices would be employed. A copy of this information shall also be submitted to the awarding body, if requested by the awarding body. Within 60 days after concluding work on the contract, each contractor and subcontractor shall submit to the awarding body, if requested, and to the apprenticeship program a verified statement of the journeyman and apprentice hours performed on the contract. The information under this subdivision shall be public. The apprenticeship programs shall retain this information for 12 months.

(f) The apprenticeship program supplying apprentices to the area of the site of the public work shall ensure equal employment and affirmative action in apprenticeship for women and minorities.

(g) The ratio of work performed by apprentices to journeymen employed in a particular craft or trade on the public work may be no higher than the ratio stipulated in the apprenticeship standards under which the apprenticeship program operates if the contractor agrees to be bound by those standards. However, except as otherwise provided in this section, in no case shall the ratio be less than one hour of apprentice work for every five hours of journeyman work.

(h) This ratio of apprentice work to journeyman work shall apply during any day or portion of a day when any journeyman is employed at the jobsite and shall be computed on the basis of the hours worked during the day by journeymen so employed. Any work performed by a journeyman in excess of eight hours per day or 40 hours per week shall not be used to calculate the ratio. The contractor shall employ apprentices for the number of hours computed as above before the end of the contract or, in the case of a subcontractor, before the end of the subcontract. However, the contractor shall endeavor, to the greatest extent possible, to employ apprentices during the same time period that the journeymen in the same craft or trade are employed at the jobsite. When an hourly apprenticeship ratio is not feasible for a particular craft or trade, the Administrator

of Apprenticeship, upon application of an apprenticeship program, may order a minimum ratio of not less than one apprentice for each five journeymen in a craft or trade classification.

(i) A contractor covered by this section who has agreed to be covered by an apprenticeship program's standards upon the issuance of the approval certificate, or who has been previously approved for an apprenticeship program in the craft or trade, shall employ the number of apprentices or the ratio of apprentices to journeymen stipulated in the applicable apprenticeship standards, but in no event less than the 1-to-5 ratio required by subdivision (g).

(j) Upon proper showing by a contractor that he or she employs apprentices in a particular craft or trade in the state on all of his or her contracts on an annual average of not less than one hour of apprentice work for every five hours of labor performed by journeymen, the Administrator of Apprenticeship may grant a certificate exempting the contractor from the 1-to-5 hourly ratio, as set forth in this section for that craft or trade.

(k) An apprenticeship program has the discretion to grant to a participating contractor or contractor association a certificate, which shall be subject to the approval of the Administrator of Apprenticeship, exempting the contractor from the 1-to-5 ratio set forth in this section when it finds that any one of the following conditions is met:

(1) Unemployment for the previous three-month period in the area exceeds an average of 15 percent.

(2) The number of apprentices in training in the area exceeds a ratio of 1 to 5.

(3) There is a showing that the apprenticeable craft or trade is replacing at least one-thirtieth of its journeymen annually through apprenticeship training, either on a statewide basis or on a local basis.

(4) Assignment of an apprentice to any work performed under a public works contract would create a condition that would jeopardize his or her life or the life, safety, or property of fellow employees or the public at large, or the specific task to which the apprentice is to be assigned is of a nature that training cannot be provided by a journeyman.

(l) If an exemption is granted pursuant to subdivision (k) to an organization that represents contractors in a specific trade from the 1-to-5 ratio on a local or statewide basis, the member contractors shall not be required to submit individual applications for approval to local joint apprenticeship committees, if they are already covered by the local apprenticeship standards.

(m)(1) A contractor to whom a contract is awarded, who, in performing any of the work under the contract, employs journeymen or apprentices in any apprenticeable craft or trade shall contribute to the California Apprenticeship Council the same amount that the director determines is the prevailing amount of apprenticeship training contributions in the area of the public works site. A contractor may take as a credit for payments to the council any amounts paid by the contractor to an approved apprenticeship program that can supply apprentices to the site of the public works project. The contractor may add the amount of the contributions in computing his or her bid for the contract.

(2)(A) At the conclusion of the 2002-03 fiscal year and each fiscal year thereafter, the California Apprenticeship Council shall distribute training contributions received by the council under this subdivision, less the expenses of the Department of Industrial Relations for administering this subdivision, by making grants to approved apprenticeship programs for the purpose of training apprentices. The grant funds shall be distributed as follows:

(i) If there is an approved multiemployer apprenticeship program serving the same craft or trade and geographic area for which the training contributions were made to the council, a grant to that program shall be made.

(ii) If there are two or more approved multiemployer apprenticeship programs serving the same craft or trade and county for which the training contributions were made to the council, the grant shall be divided among those programs based on the number of apprentices from that county registered in each program.

(iii) All training contributions not distributed under clauses (i) and (ii) shall be used to defray the future expenses of the Department of Industrial Relations for the administration and enforcement of apprenticeship and preapprenticeship standards and requirements under this code.

(B) An apprenticeship program shall only be eligible to receive grant funds pursuant to this subdivision if the apprenticeship program agrees, prior to the receipt of any grant funds, to keep adequate records that document the expenditure of grant funds and to make all records available to the Department of Industrial Relations so that the Department of Industrial Relations is able to verify that grant funds were used solely for training apprentices. For purposes of this subparagraph, adequate records include, but are not limited to, invoices, receipts, and canceled checks that account for the expenditure of grant funds. This subparagraph shall not be deemed to require an apprenticeship program to provide the Department of Industrial Relations with more documentation than is necessary to verify the appropriate expenditure of grant funds made pursuant to this subdivision.

(C) The Department of Industrial Relations shall verify that grants made pursuant to this subdivision are used solely to fund training apprentices. If an apprenticeship program is unable to demonstrate how grant funds are expended or if an apprenticeship program is found to be using grant funds for purposes other than training apprentices, then the apprenticeship program shall not be eligible to receive any future grant pursuant to this subdivision and the Department of Industrial Relations may initiate the process to rescind the registration of the apprenticeship program.

(3) All training contributions received pursuant to this subdivision shall be deposited in the Apprenticeship Training Contribution Fund, which is hereby created in the State Treasury. Upon appropriation by the Legislature, all moneys in the Apprenticeship Training Contribution Fund shall be used for the purpose of carrying out this subdivision and to pay the expenses of the Department of Industrial Relations.

(n) The body awarding the contract shall cause to be inserted in the contract stipulations to effectuate this section. The stipulations shall fix the responsibility of compliance with this section for all apprenticeable occupations with the prime contractor.

(o) This section does not apply to contracts of general contractors or to contracts of specialty contractors not bidding for work through a general or prime contractor when the contracts of general contractors or those specialty contractors involve less than thirty thousand dollars ($30,000).

(p) An awarding body that implements an approved labor compliance program in accordance with subdivision (b) of Section 1771.5 may, with the approval of the director, assist in the enforcement of this section under the terms and conditions prescribed by the director.

Section 1813. Forfeiture for violations; contract stipulation; report of violations

The contractor or subcontractor shall, as a penalty to the state or political subdivision on whose behalf the contract is made or awarded, forfeit twenty- five dollars ($25) for each worker employed in the execution of

the contract by the respective contractor or subcontractor for each calendar day during which the worker is required or permitted to work more than 8 hours in any one calendar day and 40 hours in any one calendar week in violation of the provisions of this article. In awarding any contract for public work, the awarding body shall cause to be inserted in the contract a stipulation to this effect. The awarding body shall take cognizance of all violations of this article committed in the course of the execution of the contract, and shall report them to the Division of Labor Standards Enforcement.

Section 1815. Overtime

Notwithstanding the provisions of Sections 1810 to 1814, inclusive, of this code, and notwithstanding any stipulation inserted in any contract pursuant to the requirements of said sections, work performed by employees of contractors in excess of 8 hours per day, and 40 hours during any one week, shall be permitted upon public work upon compensation for all hours worked in excess of 8 hours per day at not less than 1 ½ times the basic rate of pay.

ATTACHMENT NO. 2

CALIFORNIA PUBLIC CONTRACT CODE SECTION 9204

Section 9204. Legislative findings and declarations regarding timely and complete payment of contractors for public works projects; claims process (Eff: January 1, 2017)

(a) The Legislature finds and declares that it is in the best interests of the state and its citizens to ensure that all construction business performed on a public works project in the state that is complete and not in dispute is paid in full and in a timely manner.

(b) Notwithstanding any other law, including, but not limited to, Article 7.1 (commencing with Section 10240) of Chapter 1 of Part 2, Chapter 10 (commencing with Section 19100) of Part 2, and Article 1.5 (commencing with Section 20104) of Chapter 1 of Part 3, this section shall apply to any claim by a contractor in connection with a public works project.

(c) For purposes of this section:

(1) "Claim" means a separate demand by a contractor sent by registered mail or certified mail with return receipt requested, for one or more of the following:

(A) A time extension, including, without limitation, for relief from damages or penalties for delay assessed by a public entity under a contract for a public works project.

(B) Payment by the public entity of money or damages arising from work done by, or on behalf of, the contractor pursuant to the contract for a public works project and payment for which is not otherwise expressly provided or to which the claimant is not otherwise entitled.

(C) Payment of an amount that is disputed by the public entity.

(2) "Contractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who has entered into a direct contract with a public entity for a public works project.

(3)(A) "Public entity" means, without limitation, except as provided in subparagraph (B), a state agency, department, office, division, bureau, board, or commission, the California State University, the University of California, a city, including a charter city, county, including a charter county, city and county, including a charter city and county, district, special district, public authority, political subdivision, public corporation, or nonprofit transit corporation wholly owned by a public agency and formed to carry out the purposes of the public agency.

(B) "Public entity" shall not include the following:

(i) The Department of Water Resources as to any project under the jurisdiction of that department.

(ii) The Department of Transportation as to any project under the jurisdiction of that department.

(iii) The Department of Parks and Recreation as to any project under the jurisdiction of that department.

(iv) The Department of Corrections and Rehabilitation with respect to any project under its jurisdiction pursuant to Chapter 11 (commencing with Section 7000) of Title 7 of Part 3 of the Penal Code.

(v) The Military Department as to any project under the jurisdiction of that department.

(vi) The Department of General Services as to all other projects.

(vii) The High-Speed Rail Authority.

(4) "Public works project" means the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement of any kind.

(5) "Subcontractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who either is in direct contract with a contractor or is a lower tier subcontractor.

(d)(1)(A) Upon receipt of a claim pursuant to this section, the public entity to which the claim applies shall conduct a reasonable review of the claim and, within a period not to exceed 45 days, shall provide the claimant a written statement identifying what portion of the claim is disputed and what portion is undisputed. Upon receipt of a claim, a public entity and a contractor may, by mutual agreement, extend the time period provided in this subdivision.

(B) The claimant shall furnish reasonable documentation to support the claim.

(C) If the public entity needs approval from its governing body to provide the claimant a written statement identifying the disputed portion and the undisputed portion of the claim, and the governing body does not meet within the 45 days or within the mutually agreed to extension of time following receipt of a claim sent by registered mail or certified mail, return receipt requested, the public entity shall have up to three days following the next duly publicly noticed meeting of the governing body after the 45-day period, or extension, expires to provide the claimant a written statement identifying the disputed portion and the undisputed portion.

(D) Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. If the public entity fails to issue a written statement, paragraph (3) shall apply.

(2)(A) If the claimant disputes the public entity's written response, or if the public entity fails to respond to a claim issued pursuant to this section within the time prescribed, the claimant may demand in writing an informal conference to meet and confer for settlement of the issues in dispute. Upon receipt of a demand in writing sent by registered mail or certified mail, return receipt requested, the public entity shall schedule a meet and confer conference within 30 days for settlement of the dispute.

(B) Within 10 business days following the conclusion of the meet and confer conference, if the claim or any portion of the claim remains in dispute, the public entity shall provide the claimant a written statement identifying the portion of the claim that remains in dispute and the portion that is undisputed. Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. Any disputed portion of the claim, as identified by the contractor in writing, shall be submitted to nonbinding mediation, with the public entity and the claimant sharing the associated costs equally. The public entity and claimant shall mutually agree to a mediator within 10 business days after the disputed portion of the claim has been identified in writing. If the parties cannot agree upon a mediator, each party shall select a mediator and those mediators shall select a qualified neutral third party to mediate with regard to the disputed portion of the claim. Each party

shall bear the fees and costs charged by its respective mediator in connection with the selection of the neutral mediator. If mediation is unsuccessful, the parts of the claim remaining in dispute shall be subject to applicable procedures outside this section.

(C) For purposes of this section, mediation includes any nonbinding process, including, but not limited to, neutral evaluation or a dispute review board, in which an independent third party or board assists the parties in dispute resolution through negotiation or by issuance of an evaluation. Any mediation utilized shall conform to the timeframes in this section.

(D) Unless otherwise agreed to by the public entity and the contractor in writing, the mediation conducted pursuant to this section shall excuse any further obligation under Section 20104.4 to mediate after litigation has been commenced.

(E) This section does not preclude a public entity from requiring arbitration of disputes under private arbitration or the Public Works Contract Arbitration Program, if mediation under this section does not resolve the parties' dispute.

(3) Failure by the public entity to respond to a claim from a contractor within the time periods described in this subdivision or to otherwise meet the time requirements of this section shall result in the claim being deemed rejected in its entirety. A claim that is denied by reason of the public entity's failure to have responded to a claim, or its failure to otherwise meet the time requirements of this section, shall not constitute an adverse finding with regard to the merits of the claim or the responsibility or qualifications of the claimant.

(4) Amounts not paid in a timely manner as required by this section shall bear interest at 7 percent per annum.

(5) If a subcontractor or a lower tier subcontractor lacks legal standing to assert a claim against a public entity because privity of contract does not exist, the contractor may present to the public entity a claim on behalf of a subcontractor or lower tier subcontractor. A subcontractor may request in writing, either on their own behalf or on behalf of a lower tier subcontractor, that the contractor present a claim for work which was performed by the subcontractor or by a lower tier subcontractor on behalf of the subcontractor. The subcontractor requesting that the claim be presented to the public entity shall furnish reasonable documentation to support the claim. Within 45 days of receipt of this written request, the contractor shall notify the subcontractor in writing as to whether the contractor presented the claim to the public entity and, if the original contractor did not present the claim, provide the subcontractor with a statement of the reasons for not having done so.

(e) The text of this section or a summary of it shall be set forth in the plans or specifications for any public works project that may give rise to a claim under this section.

(f) A waiver of the rights granted by this section is void and contrary to public policy, provided, however, that (1) upon receipt of a claim, the parties may mutually agree to waive, in writing, mediation and proceed directly to the commencement of a civil action or binding arbitration, as applicable; and (2) a public entity may prescribe reasonable change order, claim, and dispute resolution procedures and requirements in addition to the provisions of this section, so long as the contractual provisions do not conflict with or otherwise impair the timeframes and procedures set forth in this section.

(g) This section applies to contracts entered into on or after January 1, 2017.

(h) Nothing in this section shall impose liability upon a public entity that makes loans or grants available through a competitive application process, for the failure of an awardee to meet its contractual obligations.

(i) This section shall remain in effect only until January 1, 2027, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2027, deletes or extends that date.

Work Order Title: Orange PD Lighting Upgrade

Brief Scope: Lighting upgrade on first floor of Orange PD building.

☐ **Preliminary**	☐ **Revised**	☒ **Final**

The following items detail the scope of work as discussed at the site. All requirements necessary to accomplish the items set forth below shall be considered part of this scope of work.

Attn: Kirk Wudzke
Re: City of Orange PD LED Lighting Upgrade
Scope of work

- Remove and dispose of existing linear fluorescent pendant lighting throughout the PD.
- Repair and replace existing ceiling tiles as needed
- Modify existing T-bar where needed with 2’ cross bars to receive 2x2 LED Panel fixtures
- Demo back existing electrical and install new electrical infrastructure to support new fixture layout.
- Install (153) 2x2 Maxlite LED panels in the ceiling, Spec Maxlite MLFP22V15WCS, per layout supplied by customer
- Install (41) 2x4 Maxlite LED panels in the ceiling, Spec Maxlite MLFP24V25WCS, per layout supplied by customer
- Install (54) Emergency LED driver battery back ups for emergency egress lighting
- Install (7) Intermatic IOS-DOV-D-WH Occ sensor /Dimmer
- Install control wiring for fixture dimming controls
- Test all fixtures for proper operation
- Painting and drywall patch not included, to be completed by others
- Permitting, Engineered drawings and Title 24 certification not included
- Work to be performed 2nd shift prevailing wage Orange County

Material Lead time 2-3 weeks
Project Scheduling 2 weeks
Project Durations 3 weeks

Subject to the terms and conditions of EZIQC Contract **CA-R8-E-101723-AEL**.

CONTRACT
[Facility Flooring and Paint Improvements for Police Department
Omnia Partners Contract 2020002149 (SP-4326)]

THIS CONTRACT (the "Contract") is made and entered into as of _____, 2026 ("Effective Date") by and between the CITY OF ORANGE, a municipal corporation ("City"), and INTERIOR RESOURCES, INC., a California corporation, dba COMMERCIAL INTERIOR RESOURCES, ("Contractor"), who agree as follows.

ARTICLE 1
Work Performed

a. For and in consideration of the payments and agreements hereinafter mentioned, to be made and performed by City, and under the conditions expressed in the two (2) bonds presented to City with this Contract and incorporated herein by this reference, Contractor hereby agrees to and shall do all the work and furnish all the labor, materials, tools and equipment, except such as are mentioned in the specifications to be furnished by City to Contractor, necessary to complete in good workmanship and substantial manner the work (the "Work") described in:

(1) The latest edition of the "City of Orange Standard Plans and Specifications" (the "Orange Book") with the term "Engineer," as used in the Orange Book and in this Contract, to specifically include the City Engineer (or designee);

(2) The "Standard Specifications for Public Works Construction" (the "Greenbook"), and all amendments thereto, except the definition of "Subcontractor" in Section 1.2 (General – Terms and Definitions) of Part 1 (General Provisions) of the Greenbook, which is hereby amended in its entirety to read as follows: "Subcontractor – An individual, firm, or corporation having a direct contract with the Contractor for the performance of a part of the Work;"

(3) The "City of Orange Standard Special Provisions;"

(4) The Standard Plans; and

(5) Contractor's Bid Proposal, which is on file with City's Department of Public Works.

b. Contractor acknowledges that it has received the Plans from City and that a complete copy of the Plans are in its possession and are hereby specifically referred to and by such reference made a part hereof. The Orange Book, Greenbook and City of Orange Standard Special Provisions and Standard Plans are on file with City's Public Works Director and are hereby specifically referred to and by such reference made a part hereof. Contractor hereby acknowledges that it has read, reviewed and understands the Plans, the Orange Book, the Greenbook, the Special Provisions, the Standard Plans, and the Encroachment Permit as they relate to the Work, all of which documents shall be referred to herein collectively as the "Plans and Specifications."

c. Contractor acknowledges the provisions of Chapter 8.28 of the Orange Municipal Code which requires, among other things, that Contractor utilize City's exclusive solid waste hauler for the rental of bins for trash and debris removal and imposes mandatory recycling requirements for self-hauled construction and demolition waste. The terms and conditions set forth in this Contract shall control over any terms and conditions in the Plans and Specifications to the contrary.

d. The Work shall be performed in conformity with the Plans and Specifications and the Bid Proposal, reference as Exhibit A and all applicable laws, including any and all applicable federal and state labor laws and standards and applicable prevailing wage requirements and any and all state, federal and local statutes, regulations and ordinances relating to the protection of human health or the environment.

e. Unless and until otherwise notified in writing by City's Public Works Director, City's Assistant Field Services Manager, Rachael Gomez ("Authorized City Representative"), shall be the person to whom Contractor will report for the performance of the Work hereunder. It is understood that Contractor's performance hereunder shall be under the direction and supervision of the Authorized City Representative or such other person as City's Public Works Director may designate from time to time, that Contractor shall coordinate the Work hereunder with the Authorized City Representative to the extent required by the Authorized City Representative, and that all performances required hereunder by Contractor shall be performed to the satisfaction of the Authorized City Representative or City's Public Works Director.

f. It is expressly agreed by and between the parties hereto that should there be any conflict between the terms of this instrument and Contractor's Bid Proposal, then this instrument shall control and nothing herein shall be considered as an acceptance of the said terms of said Bid Proposal conflicting herewith.

ARTICLE 2
Commencement of Work

Contractor shall commence the Work provided for in this Contract within fifteen (15) days of the date of the issuance by City of a Notice to Proceed and diligently prosecute completion of the Work within sixty (60) calendar days from such date, unless legal extension is granted in accordance with the terms set forth in the Greenbook. Time is of the essence in this Contract. Contractor shall do all things necessary and incidental to the prosecution of Contractor's Work.

ARTICLE 3
Compensation

a. Contractor agrees to receive and accept an amount not to exceed ONE HUNDRED EIGHTY-SIX THOUSAND ONE HUNDRED FORTY-EIGHT DOLLARS and 00/100 ($186,148.00) as compensation for furnishing all materials and doing all the Work contemplated and embraced in this Contract. Said compensation covers (1) all loss or damage arising out of the nature of the Work, from the acts of the elements; (2) any unforeseen difficulties or obstructions which may arise or be encountered in the prosecution of the Work until its acceptance by City,

other than as provided below; (3) all risks of every description connected with the Work; (4) all expenses incurred by or in consequence of the suspension or discontinuance of the Work; and (5) well and faithfully completing the Work, and for the whole thereof, in the manner and according to the Plans and Specifications, and requirements of the Authorized City Representative under them. Retention amounts shall be withheld from progress payments as required by law unless Contractor provides securities in lieu of retention.

b. In addition to the scheduled Work to be performed by the Contractor, the parties recognize that additional, unforeseen work and services may be required by the Authorized City Representative. In anticipation of such contingencies, the sum of EIGHTEEN THOUSAND SIX HUNDRED FIFTEEN DOLLARS and 00/100 ($18,615.00) has been added to the total compensation of this Contract. The Authorized City Representative may approve the additional work and the actual costs incurred by the Contractor in performance of additional work or services in accordance with such amount as the Authorized City Representative and the Contractor may agree upon in advance. Said additional work or services and the amount of compensation therefor, up to the amount of the authorized contingency, shall be memorialized in the form of a Contract Amendment approved by the City Manager on a form acceptable to the City Attorney. The Contractor agrees to perform only that work or those services that are specifically requested by the Authorized City Representative. Any and all additional work and services performed under this Contract shall be completed in such sequence as to assure their completion as expeditiously as is consistent with professional skill and care in accordance with a cost estimate or proposal submitted to and approved by the Authorized City Representative prior to the commencement of such Work or services.

c. The total amount of compensation under this Contract, including contingencies, shall not exceed TWO HUNDRED FOUR THOUSAND SEVEN HUNDRED SIXTY-THREE DOLLARS and 00/100 ($204,763.00).

ARTICLE 4
Licenses

Contractor represents that it and any subcontractors it may engage, possess any and all licenses which are required under state or federal law to perform the Work contemplated by this Contract and that Contractor and subcontractors shall maintain all appropriate licenses, including a City of Orange business license, at its cost, during the performance of this Contract.

ARTICLE 5
Guarantees

a. Contractor guarantees the construction and installation of all Work included in the Plans and Specifications for which Contractor has been awarded this Contract.

b. Should any of the materials or equipment installed pursuant to this Contract prove defective or should the Work as a whole prove defective, due to faulty equipment, workmanship, materials furnished or methods of installations, or should said Work or any part thereof fail to function properly, as designed, due to any of the above causes within twelve (12) months after the

date on which said Work is accepted by City, Contractor shall make repairs and furnish such materials and equipment as are necessary to be furnished and installed within fifteen (15) calendar days after the receipt of a demand from City.

c. Said Work will be deemed defective within the meaning of this guarantee in the event that it fails to function as originally intended either by the Plans and Specifications of this Contract or by the manufacturer(s) of the equipment incorporated into the Work.

d. In the event repairs are not made within fifteen (15) calendar days after Contractor's receipt of a demand from City, City shall have the unqualified option to make any needed repairs or replacements itself or by any other contractor. Contractor shall reimburse City, upon demand, for all expenses incurred in restoring said Work to the condition contemplated in this Contract, including the cost of any equipment or materials replaced.

e. It is understood that emergency repairs may, by necessity, be made by City. Therefore, when defective equipment, materials or workmanship result in emergency repairs by City, Contractor shall reimburse City, upon demand, for all expenses incurred. Emergency repairs will be deemed as those repairs determined by City's Director of Public Works to be necessary due to an immediate detriment to the health, safety, welfare or convenience of the residents of City.

ARTICLE 6
Water Quality

a. The Santa Ana Regional Water Quality Control Board ("RWQCB") has issued National Pollutant Discharge Elimination System ("NPDES") Permit No. R8-2009-0030 (the "Permit"), which governs storm water and non-storm water discharges resulting from municipal activities performed by City or its contractors. In order to comply with the Permit requirements, the County of Orange has prepared a Drainage Area Management Plan ("DAMP"), containing Model Maintenance Procedures with Best Management Practices ("BMPs") that City and its contractors must adhere to. The Model Maintenance Procedures contain pollution prevention and source control techniques to minimize the impact of those activities upon dry-weather urban runoff, storm water runoff, and receiving water quality. Examples include: wash water from cleaning of sidewalks or parking lots must be collected and disposed of in the sewer or landscaped areas.

b. The Permit, the DAMP and the Model Maintenance Procedures are on file in the office of City's Director of Public Works. Contractor hereby acknowledges that it has read, reviewed and understands the Permit, the DAMP and the Model Maintenance Procedures, as they relate to the Work and hereby shall perform the Work in conformance therewith.

ARTICLE 7
Independent Contractor; Contractor not Agent

a. At all times during the term of this Contract, Contractor shall be an independent contractor and not an employee of City. City shall have the right to control Contractor only insofar

as the result of Contractor's services rendered pursuant to this Contract. City shall not have the right to control the means by which Contractor accomplishes services rendered pursuant to this Contract. Contractor shall, at its sole cost and expense, furnish all facilities, materials and equipment which may be required for furnishing services pursuant to this Contract. Contractor shall be solely responsible for, and shall indemnify, defend and save City harmless from all matters relating to the payment of its subcontractors, agents and employees, including compliance with social security, withholding and all other wages, salaries, benefits, taxes, exactions, and regulations of any nature whatsoever. Contractor acknowledges that Contractor and any subcontractors, agents or employees employed by Contractor shall not, under any circumstances, be considered employees of City, and that they shall not be entitled to any of the benefits or rights afforded employees of City, including, but not limited to, sick leave, vacation leave, holiday pay, Public Employees Retirement System benefits, or health, life, dental, long-term disability or workers' compensation insurance benefits.

b. Except as City may specify in writing, Contractor shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. Contractor shall have no authority, express or implied, to bind City to any obligation whatsoever.

ARTICLE 8
Public Work; Prevailing Wage

a. The Work which is the subject of this Contract is a "public work," as that term is defined in Section 1720 of the California Labor Code, for which prevailing wages must be paid. To the extent Contractor's employees will perform any work that falls within any of the classifications for which the Department of Labor Relations of the State of California promulgates prevailing wage determinations, Contractor hereby agrees that Contractor, and any subcontractor under it, shall pay not less than the specified prevailing rates of wages to all such workers. The general prevailing wage determinations for crafts can be located on the website of the Department of Industrial Relations (www.dir.ca.gov/DLSR). Additionally, to perform work under this Contract, Contractor must meet all State registration requirements and criteria, including project compliance monitoring.

b. Attached hereto as Attachment No. 1 and incorporated herein by this reference is a copy of the provisions of Sections 1725.5, 1771, 1771.1, 1771.4, 1775, 1776, 1777.5, 1813 and 1815 of the California Labor Code. Contractor hereby acknowledges that it has read, reviewed and understands those provisions of the Labor Code and shall prosecute and complete the Work under this Contract in strict compliance with all of those terms and provisions.

c. Contractor shall secure the payment of compensation to its employees in accordance with the provisions of Section 3700 of the California Labor Code. Accordingly, and as required by Section 1861 of the California Labor Code, Contractor hereby certifies as follows:

> "I am aware of the provisions of Section 3700 of the Labor Code which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the work of this contract."

d. Contractor shall indemnify, protect, defend and hold harmless City and its officers, employees, contractors and agents, with counsel reasonably acceptable to City, from and against any and all loss, liability, damage, claim, cost, expense, and/or "increased costs" (including reasonable attorney's fees, court and litigation costs, and fees of expert witnesses) which result or arise in any way from the noncompliance by Contractor of any applicable local, state and/or federal law, including, without limitation, any applicable federal and/or state labor laws (including, without limitation, the requirement to pay state prevailing wages). It is agreed by the parties that, in connection with the construction of the Work which is the subject of this Contract, Contractor shall bear all risks of payment or non-payment of state prevailing wages. "Increased costs" as used in this paragraph shall have the meaning ascribed to it in Labor Code Section 1781, as the same may be enacted, adopted or amended from time to time. The foregoing indemnity shall survive termination of this Contract.

ARTICLE 9
Equal Employment Opportunity

During the performance of this Contract, Contractor agrees as follows:

a. Contractor shall not discriminate against any employee or applicant for employment because of race, color, religion, sex, national origin, mental or physical disability, or any other basis prohibited by applicable law. Contractor shall ensure that applicants are employed and that employees are treated during employment, without regard to their race, color, religion, sex, national origin, mental or physical disability, or any other basis prohibited by applicable law. Such actions shall include, but not be limited to the following: employment, upgrading, demotion or transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation and selection for training, including apprenticeship. Contractor shall post in conspicuous places, available to employees and applicants for employment, a notice setting forth provisions of this non-discrimination clause.

b. Contractor shall, in all solicitations and advertisements for employees placed by, or on behalf of Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, mental or physical disability, or any other basis prohibited by applicable law.

c. Contractor shall cause the foregoing paragraphs (a) and (b) to be inserted in all subcontracts for any Work covered by this Contract, provided that the foregoing provisions shall not apply to subcontracts for standard commercial supplies or raw materials.

ARTICLE 10
Conflicts of Interest

Contractor agrees that it shall not make, participate in the making, or in any way attempt to use its position as a contractor to influence any decision of City in which Contractor knows or has reason to know that Contractor, its officers, partners, or employees have a financial interest as defined in Section 87103 of the Government Code. Contractor further agrees that it shall not be eligible to work as the builder for any project for which the design work is part of this Contract.

ARTICLE 11
Indemnity

Contractor shall defend, indemnify and hold harmless City and its officers, officials, agents, and employees from and against:

a. Any and all claims, liabilities, losses, damages, penalties, costs or expenses (including reasonable attorneys' fees and court costs) which City may directly or indirectly sustain or suffer arising from or as a result of the death of any person or any accident, injury, loss or damage whatsoever caused to any person or the property of any person which shall occur on or adjacent to the real property which is the subject of this Contract, or in connection with performance of this Contract which may be directly or indirectly caused by the acts or omissions of Contractor or its officers, employees, contractors or agents, or as a consequence of any use, generation, manufacture, storage, disposal, release or threatened release of a hazardous waste or substance. Contractor shall not be responsible for (and such indemnity shall not apply to) any willful misconduct, negligence or breach of this Contract by City or its officers, officials, agents, and employees. The foregoing indemnity shall survive termination of this Contract.

b. Any and all claims under workers' compensation acts and other employee benefit acts with respect to Contractor's employees or Contractor's subcontractor's employees arising out of Contractor's Work under this Contract, including any and all claims under any law pertaining to Contractor's status as an independent contractor.

ARTICLE 12
Insurance

a. Contractor shall procure and maintain for the duration of this Contract insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the Work hereunder and the results of that Work by Contractor, its agents, representatives, employees or subcontractors. Any umbrella liability insurance that is provided as part of the general or automobile liability minimums set forth below shall be maintained for the duration of the Contract.

b. Contractor shall maintain the following minimum amount of insurance: the greater of either the limits set forth in (1) through (4), below; or all of the insurance coverage and/or limits carried by or available to Contractor.

(1)	General Liability	$2,000,000	per occurrence for bodily injury, personal injury and property damage. If Commercial General Liability insurance or other form with a general aggregate limit is used, either the general aggregate limit shall apply separately to this project/location or the general aggregate limit shall be twice the required occurrence limit.

(2)	Automobile Liability	$1,000,000	per accident for bodily injury and property damage.
(3)	Workers' Compensation		as required by the State of California.
(4)	Employer's Liability	$1,000,000	per accident for bodily injury or disease.

c. Any insurance proceeds in excess of or broader than the minimum required coverage and/or minimum required limits which are applicable to a given loss shall be available to City. No representation is made that the minimum insurance requirements of this Contract are sufficient to cover the obligations of Contractor under this Contract.

d. Any deductibles or self-insured retentions must be declared to and approved by City. At the option of City, either: the insurer shall reduce or eliminate such deductibles or self-insured retentions with respect to City, its officers, officials, agents and employees; or Contractor shall provide a financial guarantee satisfactory to City guaranteeing payment of losses and related investigations, claim administration, and defense expenses.

e. Each policy of general liability and automotive liability insurance shall contain, or be endorsed to contain, the following provisions:

(1) City, its officers, officials, agents, and employees are declared to be additional insureds under the terms of the policy, with respect to liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of Contractor (any auto), and with respect to liability arising out of Work or operations performed by or on behalf of Contractor, including materials, parts or equipment furnished in connection with such Work or operations. A policy endorsement to that effect shall be provided to City along with the certificate of insurance. In lieu of an endorsement, City will accept a copy of the policy(ies) which evidences that City is an additional insured as a contracting party. The minimum coverage required by Subsection 12.b, above, shall apply to City as an additional insured.

(2) For any claims related to this Contract, Contractor's insurance coverage shall be primary insurance with respect to City, its officers, officials, agents and employees. Any insurance or self-insurance maintained by City, its officers, officials, agents and employees shall be excess of Contractor's insurance and shall not contribute with it.

(3) Coverage shall not be canceled, except after thirty (30) days' prior written notice has been provided to City.

f. Contractor shall furnish City with original certificates of insurance and endorsements effecting coverage required by this Article 12. The endorsements shall be on forms acceptable to City. All certificates and endorsements are to be received and approved by City before the Work commences. However, failure to do so shall not operate as a waiver of these insurance requirements. City reserves the right to require complete, certified copies of all required insurance policies, including endorsements effecting the coverage required by these specifications at any time.

g. All insurance procured and maintained by Contractor shall be issued by insurers admitted to conduct the pertinent line of insurance business in California and having a rating of Grade A or better and Class VII or better by the latest edition of Best Key Rating Guide.

h. Contractor shall immediately notify City if any required insurance lapses or is otherwise modified and cease performance of this Contract unless otherwise directed by City. In such a case, City may procure insurance or self-insure the risk and charge Contractor for such costs and any and all damages resulting therefrom by way of set-off from any sums owed Contractor.

i. Contractor agrees that in the event of loss due to any of the perils for which it has agreed to provide insurance, Contractor shall look solely to its insurance for recovery. Contractor hereby grants to City, on behalf of any insurer providing insurance to either Contractor or City with respect to the services of Contractor herein, a waiver of any right to subrogation which any such insurer may acquire against City by virtue of the payment of any loss under such insurance. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of City for all Work performed by Contractor, its employees, agents and subcontractors. Contractor shall obtain any other endorsement that may be necessary to effect this waiver of subrogation.

j. Contractor shall require and verify that all subcontractors maintain insurance meeting all of the requirements stated herein.

ARTICLE 13
Termination

City, acting through its City Manager or designee, reserves the right to terminate this Contract for any reason by giving five (5) days' written notice of intent to terminate to Contractor. Upon receipt of notice, Contractor shall immediately cease work, unless the notice provides otherwise. Should City terminate this Contract, City shall pay Contractor for services satisfactorily provided and all allowable reimbursements incurred to the date of termination in compliance with this Contract, unless such termination shall be for cause, in which event City may withhold any disputed compensation. City shall not be liable for any claim of lost profits.

ARTICLE 14
Maintenance and Inspection of Records

In accordance with generally accepted accounting principles, Contractor and its subcontractors shall maintain reasonably full and complete books, documents, papers, accounting records and other information (collectively, the "records") pertaining to the costs of and completion of services performed under this Contract. During the term of this Contract and for a period of three (3) years after termination or completion of this Contract, City shall have the right to inspect and/or audit Contractor's records pertaining to the performance of this Contract at Contractor's office. Contractor shall make available all such records for inspection or audit at its offices during normal business hours and upon three (3) days' notice from City, and copies thereof shall be furnished if requested.

ARTICLE 15
Compliance with Laws

a. Contractor shall be knowledgeable of and comply with all local, state and federal laws pertaining to the subject matter hereof or in any way regulating the activities undertaken by Contractor or any subcontractor hereunder.

b. Contractor represents and warrants that it:

(1) Has complied and shall at all times during the term of this Contract comply, in all respects, with all immigration laws, regulations, statutes, rules, codes, and orders, including, without limitation, the Immigration Reform and Control Act of 1986 (IRCA); and

(2) Has not and will not knowingly employ any individual to perform services under this Contract who is ineligible to work in the United States or under the terms of this Contract; and

(3) Has properly maintained, and shall at all times during the term of this Contract properly maintain, all related employment documentation records including, without limitation, the completion and maintenance of the Form I-9 for each of Contractor's employees; and

(4) Has responded, and shall at all times during the term of this Contract respond, in a timely fashion to any government inspection requests relating to immigration law compliance and/or Form I-9 compliance and/or worksite enforcement by the Department of Homeland Security, the Department of Labor, or the Social Security Administration.

c. Contractor shall require all subcontractors and/or subconsultants to make the same representations and warranties required by this Article 15 when hired to perform services under this Contract.

d. Contractor shall, upon request of City, provide a list of all employees working under this Contract and shall provide, to the reasonable satisfaction of City, verification that all such employees are eligible to work in the United States. All costs associated with such verification shall be borne by Contractor. Once such request has been made, Contractor may not change employees working under this Contract without written notice to City, accompanied by the verification required herein for such employees. Contractor shall require all subcontractors and/or sub-consultants to make the same verification when hired to perform services under this Contract.

e. If Contractor, or a subcontractor or subconsultant, knowingly employs an employee providing Work under this Contract who is not authorized to work in the United States, and/or fails to follow federal laws to determine the status of such employee, such shall constitute a material breach of this Contract and may be cause for immediate termination of this Contract by City.

f. Contractor shall indemnify and hold City, its officials and employees harmless for, of and from any loss, including but not limited to fines, penalties and corrective measures, City may sustain by reason of Contractor's failure to comply with said laws, rules and regulations in connection with the performance of this Contract.

ARTICLE 16
Governing Law and Venue

This Contract shall be construed in accordance with and governed by the laws of the State of California and Contractor shall submit to the jurisdiction of California courts. Venue for any dispute arising under this Contract shall be in Orange County, California.

ARTICLE 17
Integration and Amendment

a. This Contract constitutes the entire agreement of the parties. No other agreement, oral or written, pertaining to the Work to be performed under this Contract shall be of any force or effect unless it is in writing and signed by both parties. Any Work performed which is inconsistent with or in violation of the provisions of this Contract shall not be compensated.

b. Amendments to this Contract must be in writing and signed by both parties. City Manager is authorized to execute amendments to this Contract up to the amounts specified in Chapter 3.08 of the Orange Municipal Code.

ARTICLE 18
Notice

Except as otherwise provided herein, all notices required under this Contract shall be in writing and delivered personally, by e-mail, or by first class mail, postage prepaid, to each party at the address listed below. Either party may change the notice address by notifying the other party in writing. Notices shall be deemed received upon receipt of same or within three (3) days of deposit in the U.S. Mail, whichever is earlier. Notices sent by e-mail shall be deemed received on the date of the e-mail transmission.

ATTACHMENT NO. 1

CALIFORNIA LABOR CODE
SECTIONS 1725.5, 1771, 1771.1, 1771.4, 1775, 1776, 1777.5, 1813 and 1815

Section 1725.5. Registration of contractors; mandatory registration; qualifications and application; fees; exempt contractors

A contractor shall be registered pursuant to this section to be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any public work contract that is subject to the requirements of this chapter. For the purposes of this section, "contractor" includes a subcontractor as defined by Section 1722.1.

(a) To qualify for registration under this section, a contractor shall do all of the following:

(1)(A) Register with the Department of Industrial Relations in the manner prescribed by the department and pay an initial nonrefundable application fee of four hundred dollars ($400) to qualify for registration under this section and an annual renewal fee on or before July 1 of each year thereafter. The annual renewal fee shall be in a uniform amount set by the Director of Industrial Relations, and the initial registration and renewal fees may be adjusted no more than annually by the director to support the costs specified in Section 1771.3.

(B) Beginning June 1, 2019, a contractor may register or renew according to this subdivision in annual increments up to three years from the date of registration. Contractors who wish to do so will be required to prepay the applicable nonrefundable application or renewal fees to qualify for the number of years for which they wish to preregister.

(2) Provide evidence, disclosures, or releases as are necessary to establish all of the following:

(A) Workers' compensation coverage that meets the requirements of Division 4 (commencing with Section 3200) and includes sufficient coverage for any worker whom the contractor employs to perform work that is subject to prevailing wage requirements other than a contractor who is separately registered under this section. Coverage may be evidenced by a current and valid certificate of workers' compensation insurance or certification of self-insurance required under Section 7125 of the Business and Professions Code.

(B) If applicable, the contractor is licensed in accordance with Chapter 9 (commencing with Section 7000) of the Business and Professions Code.

(C) The contractor does not have any delinquent liability to an employee or the state for any assessment of back wages or related damages, interest, fines, or penalties pursuant to any final judgment, order, or determination by a court or any federal, state, or local administrative agency, including a confirmed arbitration award. However, for purposes of this paragraph, the contractor shall not be disqualified for any judgment, order, or determination that is under appeal, provided that the contractor has secured the payment of any amount eventually found due through a bond or other appropriate means.

(D) The contractor is not currently debarred under Section 1777.1 or under any other federal or state law providing for the debarment of contractors from public works.

(E) The contractor has not bid on a public works contract, been listed in a bid proposal, or engaged in the performance of a contract for public works without being lawfully registered in accordance with this section, within the preceding 12 months or since the effective date of the requirements set forth in subdivision (e), whichever is earlier. If a contractor is found to be in violation of the requirements of this paragraph, the period of disqualification shall be waived if both of the following are true:

(i) The contractor has not previously been found to be in violation of the requirements of this paragraph within the preceding 12 months.

(ii) The contractor pays an additional nonrefundable penalty registration fee of two thousand dollars ($2,000).

(b) Fees received pursuant to this section shall be deposited in the State Public Works Enforcement Fund established by Section 1771.3 and shall be used only for the purposes specified in that section.

(c) A contractor who fails to pay the renewal fee required under paragraph (1) of subdivision (a) on or before the expiration of any prior period of registration shall be prohibited from bidding on or engaging in the performance of any contract for public work until once again registered pursuant to this section. If the failure to pay the renewal fee was inadvertent, the contractor may renew its registration retroactively by paying an additional nonrefundable penalty renewal fee equal to the amount of the renewal fee within 90 days of the due date of the renewal fee.

(d) If, after a body awarding a contract accepts the contractor's bid or awards the contract, the work covered by the bid or contract is determined to be a public work to which Section 1771 applies, either as the result of a determination by the director pursuant to Section 1773.5 or a court decision, the requirements of this section shall not apply, subject to the following requirements:

(1) The body that awarded the contract failed, in the bid specification or in the contract documents, to identify as a public work that portion of the work that the determination or decision subsequently classifies as a public work.

(2) Within 20 days following service of notice on the awarding body of a determination by the Director of Industrial Relations pursuant to Section 1773.5 or a decision by a court that the contract was for public work as defined in this chapter, the contractor and any subcontractors are registered under this section or are replaced by a contractor or subcontractors who are registered under this section.

(3) The requirements of this section shall apply prospectively only to any subsequent bid, bid proposal, contract, or work performed after the awarding body is served with notice of the determination or decision referred to in paragraph (2).

(e) The requirements of this section shall apply to any bid proposal submitted on or after March 1, 2015, to any contract for public work, as defined in this chapter, executed on or after April 1, 2015, and to any work performed under a contract for public work on or after January 1, 2018, regardless of when the contract for public work was executed.

(f) This section does not apply to work performed on a public works project of twenty-five thousand dollars ($25,000) or less when the project is for construction, alteration, demolition, installation, or repair work or to work performed on a public works project of fifteen thousand dollars ($15,000) or less when the project is for maintenance work.

Section 1771. Payment of general prevailing rate

Except for public works projects of one thousand dollars ($1,000) or less, not less than the general prevailing rate of per diem wages for work of a similar character in the locality in which the public work is performed, and not less than the general prevailing rate of per diem wages for holiday and overtime work fixed as provided in this chapter, shall be paid to all workers employed on public works.

This section is applicable only to work performed under contract, and is not applicable to work carried out by a public agency with its own forces. This section is applicable to contracts let for maintenance work.

Section 1771.1. Registration as a contractor or subcontractor required prior to bid submission; exceptions; violations; penalties

(a) A contractor or subcontractor shall not be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any contract for public work, as defined in this chapter, unless currently registered and qualified to perform public work pursuant to Section 1725.5. It is not a violation of this section for an unregistered contractor to submit a bid that is authorized by Section 7029.1 of the Business and Professions Code or by Section 10164 or 20103.5 of the Public Contract Code, provided the contractor is registered to perform public work pursuant to Section 1725.5 at the time the contract is awarded.

(b) Notice of the requirement described in subdivision (a) shall be included in all bid invitations and public works contracts, and a bid shall not be accepted nor any contract or subcontract entered into without proof of the contractor or subcontractor's current registration to perform public work pursuant to Section 1725.5.

(c) An inadvertent error in listing a subcontractor who is not registered pursuant to Section 1725.5 in a bid proposal shall not be grounds for filing a bid protest or grounds for considering the bid nonresponsive, provided that any of the following apply:

(1) The subcontractor is registered prior to the bid opening.

(2) Within 24 hours after the bid opening, the subcontractor is registered and has paid the penalty registration fee specified in subparagraph (E) of paragraph (2) of subdivision (a) of Section 1725.5.

(3) The subcontractor is replaced by another registered subcontractor pursuant to Section 4107 of the Public Contract Code.

(d) Failure by a subcontractor to be registered to perform public work as required by subdivision (a) shall be grounds under Section 4107 of the Public Contract Code for the contractor, with the consent of the awarding authority, to substitute a subcontractor who is registered to perform public work pursuant to Section 1725.5 in place of the unregistered subcontractor.

(e) The department shall maintain on its Internet Web site a list of contractors who are currently registered to perform public work pursuant to Section 1725.5.

(f) A contract entered into with any contractor or subcontractor in violation of subdivision (a) shall be subject to cancellation, provided that a contract for public work shall not be unlawful, void, or voidable solely due to the failure of the awarding body, contractor, or any subcontractor to comply with the requirements of Section 1725.5 or this section.

(g) If the Labor Commissioner or his or her designee determines that a contractor or subcontractor engaged in the performance of any public work contract without having been registered in accordance with this section, the contractor or subcontractor shall forfeit, as a civil penalty to the state, one hundred dollars ($100) for each day of work performed in violation of the registration requirement, not to exceed an aggregate penalty of eight thousand dollars ($8,000) in addition to any penalty registration fee assessed pursuant to clause (ii) of subparagraph (E) of paragraph (2) of subdivision (a) of Section 1725.5.

(h)(1) In addition to, or in lieu of, any other penalty or sanction authorized pursuant to this chapter, a higher tiered public works contractor or subcontractor who is found to have entered into a subcontract with an unregistered lower tier subcontractor to perform any public work in violation of the requirements of Section 1725.5 or this section shall be subject to forfeiture, as a civil penalty to the state, of one hundred dollars ($100)

for each day the unregistered lower tier subcontractor performs work in violation of the registration requirement, not to exceed an aggregate penalty of ten thousand dollars ($10,000).

(2) The Labor Commissioner shall use the same standards specified in subparagraph (A) of paragraph (2) of subdivision (a) of Section 1775 when determining the severity of the violation and what penalty to assess, and may waive the penalty for a first time violation that was unintentional and did not hinder the Labor Commissioner's ability to monitor and enforce compliance with the requirements of this chapter.

(3) A higher tiered public works contractor or subcontractor shall not be liable for penalties assessed pursuant to paragraph (1) if the lower tier subcontractor's performance is in violation of the requirements of Section 1725.5 due to the revocation of a previously approved registration.

(4) A subcontractor shall not be liable for any penalties assessed against a higher tiered public works contractor or subcontractor pursuant to paragraph (1). A higher tiered public works contractor or subcontractor may not require a lower tiered subcontractor to indemnify or otherwise be liable for any penalties pursuant to paragraph (1).

(i) The Labor Commissioner or his or her designee shall issue a civil wage and penalty assessment, in accordance with the provisions of Section 1741, upon determination of penalties pursuant to subdivision (g) and subparagraph (B) of paragraph (1) of subdivision (h). Review of a civil wage and penalty assessment issued under this subdivision may be requested in accordance with the provisions of Section 1742. The regulations of the Director of Industrial Relations, which govern proceedings for review of civil wage and penalty assessments and the withholding of contract payments under Article 1 (commencing with Section 1720) and Article 2 (commencing with Section 1770), shall apply.

(j)(1) Where a contractor or subcontractor engages in the performance of any public work contract without having been registered in violation of the requirements of Section 1725.5 or this section, the Labor Commissioner shall issue and serve a stop order prohibiting the use of the unregistered contractor or the unregistered subcontractor on all public works until the unregistered contractor or unregistered subcontractor is registered. The stop order shall not apply to work by registered contractors or subcontractors on the public work.

(2) A stop order may be personally served upon the contractor or subcontractor by either of the following methods:

(A) Manual delivery of the order to the contractor or subcontractor personally.

(B) Leaving signed copies of the order with the person who is apparently in charge at the site of the public work and by thereafter mailing copies of the order by first class mail, postage prepaid to the contractor or subcontractor at one of the following:

(i) The address of the contractor or subcontractor on file with either the Secretary of State or the Contractors' State License Board.

(ii) If the contractor or subcontractor has no address on file with the Secretary of State or the Contractors' State License Board, the address of the site of the public work.

(3) The stop order shall be effective immediately upon service and shall be subject to appeal by the party contracting with the unregistered contractor or subcontractor, by the unregistered contractor or subcontractor, or both. The appeal, hearing, and any further review of the hearing decision shall be governed by the procedures, time limits, and other requirements specified in subdivision (a) of Section 238.1.

(4) Any employee of an unregistered contractor or subcontractor who is affected by a work stoppage ordered by the commissioner pursuant to this subdivision shall be paid at his or her regular hourly prevailing wage rate by that employer for any hours the employee would have worked but for the work stoppage, not to exceed 10 days.

(k) Failure of a contractor or subcontractor, owner, director, officer, or managing agent of the contractor or subcontractor to observe a stop order issued and served upon him or her pursuant to subdivision (j) is guilty of a misdemeanor punishable by imprisonment in county jail not exceeding 60 days or by a fine not exceeding ten thousand dollars ($10,000), or both.

(l) This section shall apply to any bid proposal submitted on or after March 1, 2015, and any contract for public work entered into on or after April 1, 2015. This section shall also apply to the performance of any public work, as defined in this chapter, on or after January 1, 2018, regardless of when the contract for public work was entered.

(m) Penalties received pursuant to this section shall be deposited in the State Public Works Enforcement Fund established by Section 1771.3 and shall be used only for the purposes specified in that section.

(n) This section shall not apply to work performed on a public works project of twenty-five thousand dollars ($25,000) or less when the project is for construction, alteration, demolition, installation, or repair work or to work performed on a public works project of fifteen thousand dollars ($15,000) or less when the project is for maintenance work.

Section 1771.4. Additional requirements when bidding and awarding public works contracts

(a) All of the following are applicable to all public works projects that are otherwise subject to the requirements of this chapter:

(1) The call for bids and contract documents shall specify that the project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

(2) The awarding body shall post or require the prime contractor to post job site notices, as prescribed by regulation.

(3) Each contractor and subcontractor shall furnish the records specified in Section 1776 directly to the Labor Commissioner, in the following manner:

(A) At least monthly or more frequently if specified in the contract with the awarding body.

(B) In a format prescribed by the Labor Commissioner.

(4) If the contractor or subcontractor is not registered pursuant to Section 1725.5 and is performing work on a project for which registration is not required because of subdivision (f) of Section 1725.5, the unregistered contractor or subcontractor is not required to furnish the records specified in Section 1776 directly to the Labor Commissioner but shall retain the records specified in Section 1776for at least three years after completion of the work.

(5) The department shall undertake those activities it deems necessary to monitor and enforce compliance with prevailing wage requirements.

(b) The Labor Commissioner may exempt a public works project from compliance with all or part of the requirements of subdivision (a) if either of the following occurs:

(1) The awarding body has enforced an approved labor compliance program, as defined in Section 1771.5, on all public works projects under its authority, except those deemed exempt pursuant to subdivision (a) of Section 1771.5, continuously since December 31, 2011.

(2) The awarding body has entered into a collective bargaining agreement that binds all contractors performing work on the project and that includes a mechanism for resolving disputes about the payment of wages.

(c) The requirements of paragraph (1) of subdivision (a) shall only apply to contracts for public works projects awarded on or after January 1, 2015.

(d) The requirements of paragraph (3) of subdivision (a) shall apply to all contracts for public work, whether new or ongoing, on or after January 1, 2016.

Section 1775. Penalties for violations

(a)(1) The contractor and any subcontractor under the contractor shall, as a penalty to the state or political subdivision on whose behalf the contract is made or awarded, forfeit not more than two hundred dollars ($200) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rates as determined by the director for the work or craft in which the worker is employed for any public work done under the contract by the contractor or, except as provided in subdivision (b), by any subcontractor under the contractor.

(2)(A) The amount of the penalty shall be determined by the Labor Commissioner based on consideration of both of the following:

(i) Whether the failure of the contractor or subcontractor to pay the correct rate of per diem wages was a good faith mistake and, if so, the error was promptly and voluntarily corrected when brought to the attention of the contractor or subcontractor.

(ii) Whether the contractor or subcontractor has a prior record of failing to meet its prevailing wage obligations.

(B)(i) The penalty may not be less than forty dollars ($40) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, unless the failure of the contractor or subcontractor to pay the correct rate of per diem wages was a good faith mistake and, if so, the error was promptly and voluntarily corrected when brought to the attention of the contractor or subcontractor.

(ii) The penalty may not be less than eighty dollars ($80) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, if the contractor or subcontractor has been assessed penalties within the previous three years for failing to meet its prevailing wage obligations on a separate contract, unless those penalties were subsequently withdrawn or overturned.

(iii) The penalty may not be less than one hundred twenty dollars ($120) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, if the Labor Commissioner determines that the violation was willful, as defined in subdivision (c) of Section 1777.1.

(C) If the amount due under this section is collected from the contractor or subcontractor, any outstanding wage claim under Chapter 1 (commencing with Section 1720) of Part 7 of Division 2 against that contractor

or subcontractor shall be satisfied before applying that amount to the penalty imposed on that contractor or subcontractor pursuant to this section.

(D) The determination of the Labor Commissioner as to the amount of the penalty shall be reviewable only for abuse of discretion.

(E) The difference between the prevailing wage rates and the amount paid to each worker for each calendar day or portion thereof for which each worker was paid less than the prevailing wage rate shall be paid to each worker by the contractor or subcontractor, and the body awarding the contract shall cause to be inserted in the contract a stipulation that this section will be complied with.

(b) If a worker employed by a subcontractor on a public works project is not paid the general prevailing rate of per diem wages by the subcontractor, the prime contractor of the project is not liable for any penalties under subdivision (a) unless the prime contractor had knowledge of that failure of the subcontractor to pay the specified prevailing rate of wages to those workers or unless the prime contractor fails to comply with all of the following requirements:

(1) The contract executed between the contractor and the subcontractor for the performance of work on the public works project shall include a copy of the provisions of this section and Sections 1771, 1776, 1777.5, 1813, and 1815.

(2) The contractor shall monitor the payment of the specified general prevailing rate of per diem wages by the subcontractor to the employees, by periodic review of the certified payroll records of the subcontractor.

(3) Upon becoming aware of the failure of the subcontractor to pay his or her workers the specified prevailing rate of wages, the contractor shall diligently take corrective action to halt or rectify the failure, including, but not limited to, retaining sufficient funds due the subcontractor for work performed on the public works project.

(4) Prior to making final payment to the subcontractor for work performed on the public works project, the contractor shall obtain an affidavit signed under penalty of perjury from the subcontractor that the subcontractor has paid the specified general prevailing rate of per diem wages to his or her employees on the public works project and any amounts due pursuant to Section 1813.

(c) The Division of Labor Standards Enforcement shall notify the contractor on a public works project within 15 days of the receipt by the Division of Labor Standards Enforcement of a complaint of the failure of a subcontractor on that public works project to pay workers the general prevailing rate of per diem wages.

Section 1776. Payroll records; retention; inspection; redacted information; agencies entitled to receive nonredacted copies of certified records; noncompliance penalties; rules

(a) Each contractor and subcontractor shall keep accurate payroll records, showing the name, address, social security number, work classification, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each journeyman, apprentice, worker, or other employee employed by him or her in connection with the public work. Each payroll record shall contain or be verified by a written declaration that it is made under penalty of perjury, stating both of the following:

(1) The information contained in the payroll record is true and correct.

(2) The employer has complied with the requirements of Sections 1771, 1811, and 1815 for any work performed by his or her employees on the public works project.

(b) The payroll records enumerated under subdivision (a) shall be certified and shall be available for inspection at all reasonable hours at the principal office of the contractor on the following basis:

(1) A certified copy of an employee's payroll record shall be made available for inspection or furnished to the employee or his or her authorized representative on request.

(2) A certified copy of all payroll records enumerated in subdivision (a) shall be made available for inspection or furnished upon request to a representative of the body awarding the contract and the Division of Labor Standards Enforcement of the Department of Industrial Relations.

(3) A certified copy of all payroll records enumerated in subdivision (a) shall be made available upon request by the public for inspection or for copies thereof. However, a request by the public shall be made through either the body awarding the contract or the Division of Labor Standards Enforcement. If the requested payroll records have not been provided pursuant to paragraph (2), the requesting party shall, prior to being provided the records, reimburse the costs of preparation by the contractor, subcontractors, and the entity through which the request was made. The public may not be given access to the records at the principal office of the contractor.

(c) Unless required to be furnished directly to the Labor Commissioner in accordance with paragraph (3) of subdivision (a) of Section 1771.4, the certified payroll records shall be on forms provided by the Division of Labor Standards Enforcement or shall contain the same information as the forms provided by the division. The payroll records may consist of printouts of payroll data that are maintained as computer records, if the printouts contain the same information as the forms provided by the division and the printouts are verified in the manner specified in subdivision (a).

(d) A contractor or subcontractor shall file a certified copy of the records enumerated in subdivision (a) with the entity that requested the records within 10 days after receipt of a written request.

(e) Except as provided in subdivision (f), any copy of records made available for inspection as copies and furnished upon request to the public or any public agency by the awarding body or the Division of Labor Standards Enforcement shall be marked or obliterated to prevent disclosure of an individual's name, address, and social security number. The name and address of the contractor awarded the contract or the subcontractor performing the contract shall not be marked or obliterated. Any copy of records made available for inspection by, or furnished to, a multiemployer Taft-Hartley trust fund (29 U.S.C. Sec. 186(c)(5)) that requests the records for the purposes of allocating contributions to participants shall be marked or obliterated only to prevent disclosure of an individual's full social security number, but shall provide the last four digits of the social security number. Any copy of records made available for inspection by, or furnished to, a joint labor-management committee established pursuant to the federal Labor Management Cooperation Act of 1978 (29 U.S.C. Sec. 175a) shall be marked or obliterated only to prevent disclosure of an individual's social security number.

(f)(1) Notwithstanding any other provision of law, agencies that are included in the Joint Enforcement Strike Force on the Underground Economy established pursuant to Section 329 of the Unemployment Insurance Code and other law enforcement agencies investigating violations of law shall, upon request, be provided nonredacted copies of certified payroll records. Any copies of records or certified payroll made available for inspection and furnished upon request to the public by an agency included in the Joint Enforcement Strike Force on the Underground Economy or to a law enforcement agency investigating a violation of law shall be marked or redacted to prevent disclosure of an individual's name, address, and social security number.

(2) An employer shall not be liable for damages in a civil action for any reasonable act or omission taken in good faith in compliance with this subdivision.

(g) The contractor shall inform the body awarding the contract of the location of the records enumerated under subdivision (a), including the street address, city, and county, and shall, within five working days, provide a notice of a change of location and address.

(h) The contractor or subcontractor has 10 days in which to comply subsequent to receipt of a written notice requesting the records enumerated in subdivision (a). In the event that the contractor or subcontractor fails to comply within the 10-day period, he or she shall, as a penalty to the state or political subdivision on whose behalf the contract is made or awarded, forfeit one hundred dollars ($100) for each calendar day, or portion thereof, for each worker, until strict compliance is effectuated. Upon the request of the Division of Labor Standards Enforcement, these penalties shall be withheld from progress payments then due. A contractor is not subject to a penalty assessment pursuant to this section due to the failure of a subcontractor to comply with this section.

(i) The body awarding the contract shall cause to be inserted in the contract stipulations to effectuate this section.

(j) The director shall adopt rules consistent with the California Public Records Act (Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of the Government Code) and the Information Practices Act of 1977 (Title 1.8 (commencing with Section 1798) of Part 4 of Division 3 of the Civil Code) governing the release of these records, including the establishment of reasonable fees to be charged for reproducing copies of records required by this section.

Section 1777.5. Employment of registered apprentices; wages; standards; number; apprenticeable craft or trade; exemptions; contributions; compliance program

(a)(1) This chapter does not prevent the employment upon public works of properly registered apprentices who are active participants in an approved apprenticeship program.

(2) For purposes of this chapter, "apprenticeship program" means a program under the jurisdiction of the California Apprenticeship Council established pursuant to Section 3070.

(b)(1) Every apprentice employed upon public works shall be paid the prevailing rate of per diem wages for apprentices in the trade to which he or she is registered and shall be employed only at the work of the craft or trade to which he or she is registered.

(2) Unless otherwise provided by a collective bargaining agreement, when a contractor requests the dispatch of an apprentice pursuant to this section to perform work on a public works project and requires the apprentice to fill out an application or undergo testing, training, an examination, or other preemployment process as a condition of employment, the apprentice shall be paid for the time spent on the required preemployment activity, including travel time to and from the required activity, if any, at the prevailing rate of per diem wages for apprentices in the trade to which he or she is registered. Unless otherwise provided by a collective bargaining agreement, a contractor is not required to compensate an apprentice for the time spent on preemployment activities if the apprentice is required to take a preemployment drug or alcohol test and he or she fails to pass that test.

(c) Only apprentices, as defined in Section 3077, who are in training under apprenticeship standards that have been approved by the Chief of the Division of Apprenticeship Standards and who are parties to written

apprentice agreements under Chapter 4 (commencing with Section 3070) of Division 3 are eligible to be employed at the apprentice wage rate on public works. The employment and training of each apprentice shall be in accordance with either of the following:

(1) The apprenticeship standards and apprentice agreements under which he or she is training.

(2) The rules and regulations of the California Apprenticeship Council.

(d) If the contractor to whom the contract is awarded by the state or any political subdivision, in performing any of the work under the contract, employs workers in any apprenticeable craft or trade, the contractor shall employ apprentices in at least the ratio set forth in this section and may apply to any apprenticeship program in the craft or trade that can provide apprentices to the site of the public work for a certificate approving the contractor under the apprenticeship standards for the employment and training of apprentices in the area or industry affected. However, the decision of the apprenticeship program to approve or deny a certificate shall be subject to review by the Administrator of Apprenticeship. The apprenticeship program or programs, upon approving the contractor, shall arrange for the dispatch of apprentices to the contractor. A contractor covered by an apprenticeship program's standards shall not be required to submit any additional application in order to include additional public works contracts under that program. "Apprenticeable craft or trade," as used in this section, means a craft or trade determined as an apprenticeable occupation in accordance with rules and regulations prescribed by the California Apprenticeship Council. As used in this section, "contractor" includes any subcontractor under a contractor who performs any public works not excluded by subdivision (o).

(e) Before commencing work on a contract for public works, every contractor shall submit contract award information to an applicable apprenticeship program that can supply apprentices to the site of the public work. The information submitted shall include an estimate of journeyman hours to be performed under the contract, the number of apprentices proposed to be employed, and the approximate dates the apprentices would be employed. A copy of this information shall also be submitted to the awarding body, if requested by the awarding body. Within 60 days after concluding work on the contract, each contractor and subcontractor shall submit to the awarding body, if requested, and to the apprenticeship program a verified statement of the journeyman and apprentice hours performed on the contract. The information under this subdivision shall be public. The apprenticeship programs shall retain this information for 12 months.

(f) The apprenticeship program supplying apprentices to the area of the site of the public work shall ensure equal employment and affirmative action in apprenticeship for women and minorities.

(g) The ratio of work performed by apprentices to journeymen employed in a particular craft or trade on the public work may be no higher than the ratio stipulated in the apprenticeship standards under which the apprenticeship program operates if the contractor agrees to be bound by those standards. However, except as otherwise provided in this section, in no case shall the ratio be less than one hour of apprentice work for every five hours of journeyman work.

(h) This ratio of apprentice work to journeyman work shall apply during any day or portion of a day when any journeyman is employed at the jobsite and shall be computed on the basis of the hours worked during the day by journeymen so employed. Any work performed by a journeyman in excess of eight hours per day or 40 hours per week shall not be used to calculate the ratio. The contractor shall employ apprentices for the number of hours computed as above before the end of the contract or, in the case of a subcontractor, before the end of the subcontract. However, the contractor shall endeavor, to the greatest extent possible, to employ apprentices during the same time period that the journeymen in the same craft or trade are employed at the jobsite. When an hourly apprenticeship ratio is not feasible for a particular craft or trade, the Administrator

of Apprenticeship, upon application of an apprenticeship program, may order a minimum ratio of not less than one apprentice for each five journeymen in a craft or trade classification.

(i) A contractor covered by this section who has agreed to be covered by an apprenticeship program's standards upon the issuance of the approval certificate, or who has been previously approved for an apprenticeship program in the craft or trade, shall employ the number of apprentices or the ratio of apprentices to journeymen stipulated in the applicable apprenticeship standards, but in no event less than the 1-to-5 ratio required by subdivision (g).

(j) Upon proper showing by a contractor that he or she employs apprentices in a particular craft or trade in the state on all of his or her contracts on an annual average of not less than one hour of apprentice work for every five hours of labor performed by journeymen, the Administrator of Apprenticeship may grant a certificate exempting the contractor from the 1-to-5 hourly ratio, as set forth in this section for that craft or trade.

(k) An apprenticeship program has the discretion to grant to a participating contractor or contractor association a certificate, which shall be subject to the approval of the Administrator of Apprenticeship, exempting the contractor from the 1-to-5 ratio set forth in this section when it finds that any one of the following conditions is met:

(1) Unemployment for the previous three-month period in the area exceeds an average of 15 percent.

(2) The number of apprentices in training in the area exceeds a ratio of 1 to 5.

(3) There is a showing that the apprenticeable craft or trade is replacing at least one-thirtieth of its journeymen annually through apprenticeship training, either on a statewide basis or on a local basis.

(4) Assignment of an apprentice to any work performed under a public works contract would create a condition that would jeopardize his or her life or the life, safety, or property of fellow employees or the public at large, or the specific task to which the apprentice is to be assigned is of a nature that training cannot be provided by a journeyman.

(l) If an exemption is granted pursuant to subdivision (k) to an organization that represents contractors in a specific trade from the 1-to-5 ratio on a local or statewide basis, the member contractors shall not be required to submit individual applications for approval to local joint apprenticeship committees, if they are already covered by the local apprenticeship standards.

(m)(1) A contractor to whom a contract is awarded, who, in performing any of the work under the contract, employs journeymen or apprentices in any apprenticeable craft or trade shall contribute to the California Apprenticeship Council the same amount that the director determines is the prevailing amount of apprenticeship training contributions in the area of the public works site. A contractor may take as a credit for payments to the council any amounts paid by the contractor to an approved apprenticeship program that can supply apprentices to the site of the public works project. The contractor may add the amount of the contributions in computing his or her bid for the contract.

(2)(A) At the conclusion of the 2002-03 fiscal year and each fiscal year thereafter, the California Apprenticeship Council shall distribute training contributions received by the council under this subdivision, less the expenses of the Department of Industrial Relations for administering this subdivision, by making grants to approved apprenticeship programs for the purpose of training apprentices. The grant funds shall be distributed as follows:

(i) If there is an approved multiemployer apprenticeship program serving the same craft or trade and geographic area for which the training contributions were made to the council, a grant to that program shall be made.

(ii) If there are two or more approved multiemployer apprenticeship programs serving the same craft or trade and county for which the training contributions were made to the council, the grant shall be divided among those programs based on the number of apprentices from that county registered in each program.

(iii) All training contributions not distributed under clauses (i) and (ii) shall be used to defray the future expenses of the Department of Industrial Relations for the administration and enforcement of apprenticeship and preapprenticeship standards and requirements under this code.

(B) An apprenticeship program shall only be eligible to receive grant funds pursuant to this subdivision if the apprenticeship program agrees, prior to the receipt of any grant funds, to keep adequate records that document the expenditure of grant funds and to make all records available to the Department of Industrial Relations so that the Department of Industrial Relations is able to verify that grant funds were used solely for training apprentices. For purposes of this subparagraph, adequate records include, but are not limited to, invoices, receipts, and canceled checks that account for the expenditure of grant funds. This subparagraph shall not be deemed to require an apprenticeship program to provide the Department of Industrial Relations with more documentation than is necessary to verify the appropriate expenditure of grant funds made pursuant to this subdivision.

(C) The Department of Industrial Relations shall verify that grants made pursuant to this subdivision are used solely to fund training apprentices. If an apprenticeship program is unable to demonstrate how grant funds are expended or if an apprenticeship program is found to be using grant funds for purposes other than training apprentices, then the apprenticeship program shall not be eligible to receive any future grant pursuant to this subdivision and the Department of Industrial Relations may initiate the process to rescind the registration of the apprenticeship program.

(3) All training contributions received pursuant to this subdivision shall be deposited in the Apprenticeship Training Contribution Fund, which is hereby created in the State Treasury. Upon appropriation by the Legislature, all moneys in the Apprenticeship Training Contribution Fund shall be used for the purpose of carrying out this subdivision and to pay the expenses of the Department of Industrial Relations.

(n) The body awarding the contract shall cause to be inserted in the contract stipulations to effectuate this section. The stipulations shall fix the responsibility of compliance with this section for all apprenticeable occupations with the prime contractor.

(o) This section does not apply to contracts of general contractors or to contracts of specialty contractors not bidding for work through a general or prime contractor when the contracts of general contractors or those specialty contractors involve less than thirty thousand dollars ($30,000).

(p) An awarding body that implements an approved labor compliance program in accordance with subdivision (b) of Section 1771.5 may, with the approval of the director, assist in the enforcement of this section under the terms and conditions prescribed by the director.

Section 1813. Forfeiture for violations; contract stipulation; report of violations

The contractor or subcontractor shall, as a penalty to the state or political subdivision on whose behalf the contract is made or awarded, forfeit twenty- five dollars ($25) for each worker employed in the execution of

the contract by the respective contractor or subcontractor for each calendar day during which the worker is required or permitted to work more than 8 hours in any one calendar day and 40 hours in any one calendar week in violation of the provisions of this article. In awarding any contract for public work, the awarding body shall cause to be inserted in the contract a stipulation to this effect. The awarding body shall take cognizance of all violations of this article committed in the course of the execution of the contract, and shall report them to the Division of Labor Standards Enforcement.

Section 1815. Overtime

Notwithstanding the provisions of Sections 1810 to 1814, inclusive, of this code, and notwithstanding any stipulation inserted in any contract pursuant to the requirements of said sections, work performed by employees of contractors in excess of 8 hours per day, and 40 hours during any one week, shall be permitted upon public work upon compensation for all hours worked in excess of 8 hours per day at not less than 1 ½ times the basic rate of pay.

ATTACHMENT NO. 2

CALIFORNIA PUBLIC CONTRACT CODE SECTION 9204

Section 9204. Legislative findings and declarations regarding timely and complete payment of contractors for public works projects; claims process (Eff: January 1, 2017)

(a) The Legislature finds and declares that it is in the best interests of the state and its citizens to ensure that all construction business performed on a public works project in the state that is complete and not in dispute is paid in full and in a timely manner.

(b) Notwithstanding any other law, including, but not limited to, Article 7.1 (commencing with Section 10240) of Chapter 1 of Part 2, Chapter 10 (commencing with Section 19100) of Part 2, and Article 1.5 (commencing with Section 20104) of Chapter 1 of Part 3, this section shall apply to any claim by a contractor in connection with a public works project.

(c) For purposes of this section:

(1) "Claim" means a separate demand by a contractor sent by registered mail or certified mail with return receipt requested, for one or more of the following:

(A) A time extension, including, without limitation, for relief from damages or penalties for delay assessed by a public entity under a contract for a public works project.

(B) Payment by the public entity of money or damages arising from work done by, or on behalf of, the contractor pursuant to the contract for a public works project and payment for which is not otherwise expressly provided or to which the claimant is not otherwise entitled.

(C) Payment of an amount that is disputed by the public entity.

(2) "Contractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who has entered into a direct contract with a public entity for a public works project.

(3)(A) "Public entity" means, without limitation, except as provided in subparagraph (B), a state agency, department, office, division, bureau, board, or commission, the California State University, the University of California, a city, including a charter city, county, including a charter county, city and county, including a charter city and county, district, special district, public authority, political subdivision, public corporation, or nonprofit transit corporation wholly owned by a public agency and formed to carry out the purposes of the public agency.

(B) "Public entity" shall not include the following:

(i) The Department of Water Resources as to any project under the jurisdiction of that department.

(ii) The Department of Transportation as to any project under the jurisdiction of that department.

(iii) The Department of Parks and Recreation as to any project under the jurisdiction of that department.

(iv) The Department of Corrections and Rehabilitation with respect to any project under its jurisdiction pursuant to Chapter 11 (commencing with Section 7000) of Title 7 of Part 3 of the Penal Code.

(v) The Military Department as to any project under the jurisdiction of that department.

(vi) The Department of General Services as to all other projects.

(vii) The High-Speed Rail Authority.

(4) "Public works project" means the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement of any kind.

(5) "Subcontractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who either is in direct contract with a contractor or is a lower tier subcontractor.

(d)(1)(A) Upon receipt of a claim pursuant to this section, the public entity to which the claim applies shall conduct a reasonable review of the claim and, within a period not to exceed 45 days, shall provide the claimant a written statement identifying what portion of the claim is disputed and what portion is undisputed. Upon receipt of a claim, a public entity and a contractor may, by mutual agreement, extend the time period provided in this subdivision.

(B) The claimant shall furnish reasonable documentation to support the claim.

(C) If the public entity needs approval from its governing body to provide the claimant a written statement identifying the disputed portion and the undisputed portion of the claim, and the governing body does not meet within the 45 days or within the mutually agreed to extension of time following receipt of a claim sent by registered mail or certified mail, return receipt requested, the public entity shall have up to three days following the next duly publicly noticed meeting of the governing body after the 45-day period, or extension, expires to provide the claimant a written statement identifying the disputed portion and the undisputed portion.

(D) Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. If the public entity fails to issue a written statement, paragraph (3) shall apply.

(2)(A) If the claimant disputes the public entity's written response, or if the public entity fails to respond to a claim issued pursuant to this section within the time prescribed, the claimant may demand in writing an informal conference to meet and confer for settlement of the issues in dispute. Upon receipt of a demand in writing sent by registered mail or certified mail, return receipt requested, the public entity shall schedule a meet and confer conference within 30 days for settlement of the dispute.

(B) Within 10 business days following the conclusion of the meet and confer conference, if the claim or any portion of the claim remains in dispute, the public entity shall provide the claimant a written statement identifying the portion of the claim that remains in dispute and the portion that is undisputed. Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. Any disputed portion of the claim, as identified by the contractor in writing, shall be submitted to nonbinding mediation, with the public entity and the claimant sharing the associated costs equally. The public entity and claimant shall mutually agree to a mediator within 10 business days after the disputed portion of the claim has been identified in writing. If the parties cannot agree upon a mediator, each party shall select a mediator and those mediators shall select a qualified neutral third party to mediate with regard to the disputed portion of the claim. Each party

shall bear the fees and costs charged by its respective mediator in connection with the selection of the neutral mediator. If mediation is unsuccessful, the parts of the claim remaining in dispute shall be subject to applicable procedures outside this section.

(C) For purposes of this section, mediation includes any nonbinding process, including, but not limited to, neutral evaluation or a dispute review board, in which an independent third party or board assists the parties in dispute resolution through negotiation or by issuance of an evaluation. Any mediation utilized shall conform to the timeframes in this section.

(D) Unless otherwise agreed to by the public entity and the contractor in writing, the mediation conducted pursuant to this section shall excuse any further obligation under Section 20104.4 to mediate after litigation has been commenced.

(E) This section does not preclude a public entity from requiring arbitration of disputes under private arbitration or the Public Works Contract Arbitration Program, if mediation under this section does not resolve the parties' dispute.

(3) Failure by the public entity to respond to a claim from a contractor within the time periods described in this subdivision or to otherwise meet the time requirements of this section shall result in the claim being deemed rejected in its entirety. A claim that is denied by reason of the public entity's failure to have responded to a claim, or its failure to otherwise meet the time requirements of this section, shall not constitute an adverse finding with regard to the merits of the claim or the responsibility or qualifications of the claimant.

(4) Amounts not paid in a timely manner as required by this section shall bear interest at 7 percent per annum.

(5) If a subcontractor or a lower tier subcontractor lacks legal standing to assert a claim against a public entity because privity of contract does not exist, the contractor may present to the public entity a claim on behalf of a subcontractor or lower tier subcontractor. A subcontractor may request in writing, either on their own behalf or on behalf of a lower tier subcontractor, that the contractor present a claim for work which was performed by the subcontractor or by a lower tier subcontractor on behalf of the subcontractor. The subcontractor requesting that the claim be presented to the public entity shall furnish reasonable documentation to support the claim. Within 45 days of receipt of this written request, the contractor shall notify the subcontractor in writing as to whether the contractor presented the claim to the public entity and, if the original contractor did not present the claim, provide the subcontractor with a statement of the reasons for not having done so.

(e) The text of this section or a summary of it shall be set forth in the plans or specifications for any public works project that may give rise to a claim under this section.

(f) A waiver of the rights granted by this section is void and contrary to public policy, provided, however, that (1) upon receipt of a claim, the parties may mutually agree to waive, in writing, mediation and proceed directly to the commencement of a civil action or binding arbitration, as applicable; and (2) a public entity may prescribe reasonable change order, claim, and dispute resolution procedures and requirements in addition to the provisions of this section, so long as the contractual provisions do not conflict with or otherwise impair the timeframes and procedures set forth in this section.

(g) This section applies to contracts entered into on or after January 1, 2017.

(h) Nothing in this section shall impose liability upon a public entity that makes loans or grants available through a competitive application process, for the failure of an awardee to meet its contractual obligations.

(i) This section shall remain in effect only until January 1, 2027, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2027, deletes or extends that date.

This Proposal is not binding upon the parties until Customer executes and returns to Commercial Interior Resources (CIR) a copy hereof or until CIR delivers to the Project any of the materials herein described or commences the herein described services.

CIR shall furnish and install materials as specified herein. Pricing includes materials, freight, labor and sales tax. The materials shall be installed in one mobilization during regular working hours, unless otherwise expressly stated herein.

This Proposal excludes repair, excess floor preparation, floor leveling, vacuuming, damp mopping, buffing, waxing, sealing, asbestos abatement, protection of completed finishes, labor to remove and replace furnishings, attic stock materials and overtime labor, unless otherwise expressly stated herein. Customer will provide areas clean and clear of all debris.

This Proposal shall be modified only to the extent specifically provided for herein, when such modification is accepted in writing by CIR and in all other respects said Proposal and all the terms and conditions thereof shall remain in full force and effect.

This Proposal shall be construed and enforced in accordance with the laws of the State of California.

CIR shall not be liable for any delay in delivery of any part of the materials herein described due to accidents, strikes, fire, war, government regulations or any other conditions or causes beyond the control of CIR.

CIR makes no warranty for merchantability or of fitness of the materials for a specific purpose unless otherwise expressly stated herein.

This Proposal constitutes the entire agreement between the parties, and cannot be orally changed, modified or discharged in whole or in part. Any change, modification or discharge to be effective must be in writing and signed by the parties hereto.

Any increase in CIR's costs due to increase in cost of labor or raw materials or due to government legislation regulation, or order providing for a tax on any materials, goods, sales, use or process or providing for any regulation or control of CIR's purchases, materials, labor, costs, sales or business or due to any delay caused by any such governmental legislation, regulation, or order, may be added to the price specified herein as to any undelivered portion of the Proposal.

In the event either party shall commence litigation to enforce any term or condition of this Proposal, the prevailing party shall be entitled to reimbursement of the actual attorney's fees and costs incurred, in addition to any other damages determined by the court.

This Proposal is valid for thirty (30) days.

A Material DEPOSIT is required for ordered material. Full payment is due ten (10) days from receipt of invoice unless otherwise specified. In the event payment is not paid as required, the unpaid amount shall incur interest or at the rate of eighteen percent (18%) per annum or the maximum allowable by law, whichever is less.

This Proposal was prepared from plans and a site visit.

1. SUBJECT

Notice of Completion and Acceptance for Annual Pavement Maintenance at Various Locations, Fiscal Year 2024-2025; Bid No. 24-25.09 (SP-4291)

2. SUMMARY

The City of Orange entered into a contract with Onyx Paving Company to rehabilitate streets at various locations throughout the City. The work was completed to the satisfaction of the Public Works Department.

The project included the rehabilitation of three arterial streets and 35 residential streets throughout the City of Orange. The rehabilitation consisted of removing and reconstruction of severely damaged pavement sections, grinding, and overlaying the rest of the roadway. Other aspects of the project included replacement of damaged curb and gutter, sidewalks, and the reconstruction of Americans with Disabilities Act sidewalk access ramps.

3. RECOMMENDED ACTION

1. Accept the Annual Pavement Maintenance at Various Locations Fiscal Year 2024-25 project as complete.
2. Authorize City Clerk to file Notice of Completion with the Orange County Clerk-Recorder's Office.

1. SUBJECT

Notice of Completion and Acceptance for Well No. 28 Equipping Project; Bid No. 22-23.33

2. SUMMARY

The City of Orange entered into a contract with Environmental Construction, Inc. for Well No. 28 Equipping Project. The scope of work consisted of completion of minor well rehabilitation, construction of electrical and chemical buildings, installation of new well pump, motor, electrical transformer, panels, sound enclosure, per- and polyfluoroalkyl treatment system, piping, and construction of a pocket public park with screen walls, metal trellis, monument sign, shade structure, landscaping and lighting. The project was completed in February 2026 to the satisfaction of the Public Works Department.

3. RECOMMENDED ACTION

1. Accept the Well No. 28 Equipping Project as complete.
2. Authorize City Clerk to file Notice of Completion with the Orange County Clerk-Recorder's Office.

FROM: **Christopher Cash, Public Works Director**

1. SUBJECT

Authorize purchase of mobile vehicle barriers and deployment components, and annual certified operator training from Meridian Rapid Defense Group Sales, LLC through General Services Administration Contract No. 47QSWA19D001F

2. SUMMARY

Purchase 50 mobile vehicle barriers and deployment components to enhance public safety at special events and emergency response incidents. The equipment will allow rapid deployment of traffic control and protective perimeter security, offsetting the need for rentals by 50%.

3. RECOMMENDED ACTION

1. Approve the purchase of 50 mobile vehicle barriers and components from Meridian Rapid Defense Group Sales, LLC in the amount of $398,599.

2. Authorize the appropriation of $400,000 from Traffic Safety (450) unreserved fund balance to:

   450-5001-80101- Furniture, Fixture, Equipment

4. FISCAL IMPACT

The expense for this purchase is $398,599 and will be funded through Traffic Safety (450):
450-5001-80101 Furniture, Fixture, Equipment

Upon approval of this appropriation, the estimated Traffic Safety Fund (450) undesignated fund balance as of June 30, 2026, will be $583,701.

5. STRATEGIC PLAN GOALS

Goal 1: Maintain Strong Emergency and Safety Services
Objective1.8: Improve Emergency Response Infrastructure

6. DISCUSSION AND BACKGROUND

The City regularly hosts community events, parades, and civic gatherings that require temporary street closures and crowd protection. Most large gatherings take place in the Plaza, where pedestrian density is highest. Recent incidents involving vehicles entering pedestrian areas have increased the need for protective barriers that can be quickly deployed and removed while maintaining emergency

access.

Historically, the City has used traffic control devices, including cones, delineators, and temporary barricades. While effective for guiding traffic, these devices do not protect against vehicle intrusion. For major Plaza events, the City has rented Meridian barriers for several years due to their engineered effectiveness to stop vehicles, their certification for crowd protection from the Department of Homeland Security, and the ease by which these barriers are deployed.

The proposed purchase includes 50 barriers, four hauling units, 45 connecting cables, and annual certified operator training. These barriers will protect the public from vehicle intrusion during Plaza events. Due to the size of each event footprint, the City will continue to rent approximately 50 additional Meridian barriers for each major event. However, owning City-operated units will allow staff to deploy barriers internally for other events and incidents, as well as reduce the cost of holding events in the Plaza.

Funds are available from the Orange Police Department through fines and forfeitures collected and deposited into the Traffic Safety Fund. These funds are used exclusively for official equipment and supplies for traffic law enforcement and traffic accident prevention. The equipment will be purchased through the General Services Administration (GSA) cooperative purchasing program (Contract No. 47QSWA19D001F) <https://www.gsaadvantage.gov/ref_text/47QSWA19D001F/47QSWA19D001F_MERIDIANRAPIDDEFENSEGROUP47QSWA19D001F.pdf>. This contract meets competitive procurement requirements and enables the City to obtain nationally bid pricing, ensuring cost-effectiveness and expedited acquisition. The cost of this purchase is $398,599 and will be funded by the Traffic Safety Fund. Future training certification renewals will be requested through the annual operating budget. Owning a deployable barrier inventory will significantly reduce reliance on vendor services. Currently, the City rents barriers and pays contractors for installation and removal. With trained staff, the City will be able to deploy barriers in-house. The City currently spends about $75,000 annually to rent and deploy 96 vehicle mitigation barriers for Plaza events. Owning the equipment is expected to reduce these costs by approximately 50%, or $37,500 per year.

1. SUBJECT

Authorize purchase of four message trailers from Applied Concepts, Inc. through the Houston-Galveston Area Council HGACBuy Cooperative Purchasing Program, Contract No. EF04-21

2. SUMMARY

Purchase of four portable message trailers to significantly enhance the City's traffic safety operations in the amount of $77,580. The City Council has previously approved the Cooperative Purchasing Agreement as the standard for vehicle and equipment procurement.

3. RECOMMENDED ACTION

1. Approve the purchase of four message trailers from Applied Concepts, Inc. for $77,580.
2. Authorize the appropriation of $77,580 from Traffic Safety (450) undesignated fund balance to expenditure account number 450-4011-80101, Traffic Safety - Furniture, Fixture, Equipment.

4. FISCAL IMPACT

The expense for this purchase is $77,580 and will be funded through Traffic Safety Fund (450):

450-4011-80101 Traffic Safety - Furniture, Fixture, Equipment

Upon approval of this appropriation, the estimated Traffic Safety Fund (450) undesignated fund balance as of June 30, 2026, will be $982,300.

5. STRATEGIC PLAN GOALS

Goal 1: Maintain Strong Emergency and Safety Services

6. DISCUSSION AND BACKGROUND

Portable message trailers are mobile electronic signs used to communicate real-time information to motorists. These trailers are critical tools for traffic control, public safety messaging, work zone management, emergency response, and community notifications.

The Public Works Department currently relies on three functional message trailers, which are frequently deployed for construction projects, increased roadway activity, emergency roadway repairs, and infrastructure improvements. Increased public safety campaigns, school zone enforcement, and special events have created a greater demand for portable message boards, resulting in scheduling conflicts and reduced availability during peak periods.

Historically, the Fire and Police Departments have had to rely on renting message trailers for an

extended period of time to provide awareness leading up to special events. Purchasing the equipment converts recurring rental costs into long-term investments that will serve multiple events and emergency scenarios.

The proposed purchase includes four solar powered portable message trailers equipped with the following:

- High-visibility full matrix LED displays
- Radar speed feedback functionality
- Solar charging systems with battery backup
- Trailer-mounted mobility for rapid deployment

These units will enhance the city's ability to improve work zone safety for motorists and city staff, provide advance warning for road closures and detours, support speed awareness initiatives, deliver timely emergency alerts, and increase public awareness during community events.

The total cost for four message trailers is $77,580, including equipment delivery, and applicable taxes. Funding is available in the Traffic Safety Fund (450) which are restricted for use on traffic-related safety improvements and equipment, making this purchase an eligible and appropriate expenditure. Applied Concepts, Inc., doing business as Stalker Radar (Stalker), is located in Richardson, TX and currently maintains a Houston-Galveston Area Council (HGACBuy) Cooperative Purchasing Program, Contract No. EF04-21. This purchase meets competitive procurement requirements and enables the City to obtain nationally bid pricing, ensuring cost-effectiveness and expedited acquisition.

The Police Department recommends the purchase of four message trailers from Stalker in the amount of $77,580.

Quitclaim of fire access easement at 500 West Collins Avenue. The proposed project has been canceled, and the easement is no longer required as the existing building will remain.

3. RECOMMENDED ACTION
Authorize the Mayor to execute a Quitclaim Deed of the fire access easement to 500 Collins, Inc.

4. FISCAL IMPACT
None

5. STRGATEGIC PLAN GOALS
Goal 5: Improve infrastructure, Mobility, and Technology.

6. DISCUSSION AND BACKGROUND
The property owner at 500 West Collins Avenue has canceled the project and requested the recorded fire access easement to be quitclaimed.

Staff recommends approval of the Quitclaim Deed of the fire access easement to 500 Collins, Inc. at 500 West Collins Avenue.

CERTIFICATE OF ACCEPTANCE

This is to certify that the interest in real property conveyed by deed or grant dated August 1, 2024 from Pisces 500 W Collins Ave, LLC, a Delaware limited liability company, to the City of Orange, a municipal corporation, is hereby accepted by the Director of Public Works of the City of Orange on behalf of the City Council of the City of Orange pursuant to authority conferred by Resolution No. 8388 of the City Council of the City of Orange adopted on the 11th day of October 1994, and the grantee consents to recordation thereof by its duly authorized officer, namely the Director of Public Works of the City of Orange.

Dated: Aug 6, 2024

Director of Public Works
City of Orange

Agenda Item

Orange City Council

Item #: 3.16. 3/10/2026 **File #:** 26-0098

TO: **Honorable Mayor and Members of the City Council**

THRU: **Jarad Hildenbrand, City Manager**

FROM: **Christopher Cash, Public Works Director**

1. SUBJECT
Designation of April 25, 2026, as Arbor Day in the City of Orange

2. SUMMARY
Adoption of Resolution No. 11659 will designate April 25, 2026, as a day to commemorate Arbor Day in the City of Orange.

3. RECOMMENDED ACTION
Adopt Resolution No. 11659. A Resolution of the City Council of the City of Orange designating April 25, 2026, as Arbor Day.

4. FISCAL IMPACT
None.

5. STRATEGIC PLAN GOALS
Goal 3: Enhance Public Communication Strategy and Quality of Life.
Goal 5: Improve Infrastructure, Mobility, and Technology.

6. DISCUSSION AND BACKGROUND
The City of Orange has celebrated Arbor Day for more than 30 years and has been recognized as a Tree City USA by the Arbor Day Foundation for 37 consecutive years. To maintain this designation, the city must observe Arbor Day annually.

Arbor Day provides an opportunity for community-wide appreciation of trees. City-sponsored Arbor Day events engage the community in learning and neighborhood beautification through tree planting. These events foster a connection with nature and encourage a lasting sense of responsibility for the City's green infrastructure. Direct participation in Arbor Day strengthens community ties and instills a sense of ownership and care for trees, which may be especially important for younger volunteers who may not yet have developed an appreciation for trees.

The upcoming Arbor Day observance and community planting event will take place on Saturday, April 25, 2026. Volunteers will plant seven 15-gallon Brisbane box trees and seven 15-gallon Quercus Tomentella trees in the right-of-way at 1300 E Almond, on the east side of Palmyra Elementary School. Staff coordinated with and invited Palmyra Elementary School to participate in the event.

West Coast Arborists donated the trees for this event. Participation in Arbor Day is essential for the city's annual certification as a Tree City USA.

RESOLUTION NO. 11659

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ORANGE DESIGNATING APRIL 25, 2026 AS ARBOR DAY

WHEREAS, in 1872, J. Sterling Morton proposed to the Nebraska Board of Agriculture that a special day be set aside for the planting of trees; and this special day, called" Arbor Day" was first observed with the planting of more than one million trees in Nebraska. This day is now observed throughout the nation and the world; and

WHEREAS, participating in Arbor Day events promotes the development of civic pride, a sense of community, highlights the importance of planting and caring for trees; and

WHEREAS, trees are living green infrastructure, which produce oxygen, clean the air of pollutants, sequester carbon, help manage storm water; provide essential habitat for wildlife; and

WHEREAS, trees in our City increase property values, and enhance economic vitality of business areas.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Orange as follows:

1. That the foregoing recitals are incorporated in and made part of this resolution by reference;

2. That the City Council does hereby designate Saturday, April 25, 2026, as Arbor Day within the City of Orange.

Orange City Council

Item #: 9.1. 3/10/2026 **File #:** 26-0038

TO: **Honorable Mayor and Members of the City Council**

THRU: **Jarad Hildenbrand, City Manager**

FROM: **Russell Bunim, Community Development Director**

1. SUBJECT

Public Hearing to consider an amendment to the Circulation and Mobility Element of the City of Orange General Plan and finding of CEQA exemption

2. SUMMARY

The City is proposing an amendment to the City of Orange General Plan Circulation and Mobility Element to reclassify the roadway designation for Santiago Canyon Road (Villa Park Road) between the shared Orange-Villa Park boundary and Cannon Street, and Fairhaven Avenue between the shared Orange-Santa Ana boundary and Tustin Street (Tustin Avenue) to reflect changing development and traffic patterns.

3. RECOMMENDED ACTION

1. Conduct and close the Public Hearing.
2. Adopt Resolution No. 11660. A Resolution of the City Council of the City of Orange approving General Plan Amendment No. 26-0001 amending the City of Orange General Plan Circulation and Mobility Element to conform to the Orange County Transportation Authority's Countywide Master Plan of Arterial Highways.
3. Find the proposal exempt from the California Environmental Quality Act (CEQA) per State CEQA Guidelines Section 15061(b)(3) (Common Sense Exemption).

4. FISCAL IMPACT

None.

5. STRATEGIC PLAN GOALS

Goal 5: Improve Infrastructure, Mobility, and Technology.

6. DISCUSSION AND BACKGROUND

The City of Orange was formally requested by adjacent agencies to update roadway classifications for two streets located along the City's jurisdictional boundaries:

- Santiago Canyon Road (Villa Park Road) between the shared Orange-Villa Park boundary and Cannon Street; and
- Fairhaven Avenue between the shared Orange-Santa Ana boundary and Tustin Street (Tustin Avenue).

These requests were initiated by the County of Orange and the City of Santa Ana, respectively, following updated traffic studies that evaluated long-term growth trends, traffic volumes, and roadway design objectives.

Both agencies have already adopted the revised roadway classifications within their own General Plans. The Orange County Transportation Authority (OCTA) has also reviewed and conditionally approved the changes as amendments to the Countywide Master Plan of Arterial Highways (MPAH).

To complete the regional planning process and maintain consistency with neighboring jurisdictions and OCTA, the City of Orange must amend its Circulation and Mobility Element to reflect the same roadway lane configuration.

The proposed General Plan amendment is limited in scope and involves the addition of two new roadway classification categories: Asymmetric Major Arterial (Five-Lane Divided) and Secondary Arterial (Two-Lane Divided). These new classifications would then be applied to the City's Master Plan of Streets and Highways for the specific roadway segments identified above. No other changes to the Circulation and Mobility Element are proposed.

7. ENVIRONMENTAL REVIEW

The proposed project is categorically exempt (Common Sense Exemption) from the provisions of the California Environmental Quality Act (CEQA) per State CEQA Guidelines Section 15061(b)(3) because there is no possibility that the revisions to the roadway designations may have a significant effect on the environment.

RESOLUTION NO. 11660

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ORANGE APPROVING GENERAL PLAN AMENDMENT NO. 26-0001 AMENDING THE CITY OF ORANGE GENERAL PLAN CIRCULATION AND MOBILITY ELEMENT TO CONFORM TO THE ORANGE COUNTY TRANSPORTATION AUTHORITY'S COUNTYWIDE MASTER PLAN OF ARTERIAL HIGHWAYS.

APPLICANT: CITY OF ORANGE

WHEREAS, the City of Orange adopted a comprehensive update to the General Plan on March 9, 2010; and

WHEREAS, the City of Orange has prepared General Plan Amendment No. 26-0001 to amend the Circulation and Mobility Element of the City of Orange General Plan to reclassify roadway designations for certain segments of Santiago Canyon Road (Villa Park Road) and Fairhaven Avenue to reflect updated traffic conditions, roadway constraints, and regional planning efforts; and

WHEREAS, the proposed roadway reclassifications are based on updated traffic analyses that evaluated long-term growth trends, traffic volumes, safety conditions, roadway design feasibility, and multimodal considerations, and determined that the existing classifications do not align with projected demand or right-of-way constraints; and

WHEREAS, the County of Orange and the City of Santa Ana have already adopted the proposed roadway reclassifications within their respective General Plans, and the Orange County Transportation Authority (OCTA) has reviewed and conditionally approved the changes as amendments to the Countywide Master Plan of Arterial Highways; and

WHEREAS, the Planning Commission, having considered the proposed changes to the General Plan Circulation and Mobility Element contained in Exhibit "A" at a public hearing held on February 19, 2026, including review of the staff report and receiving public testimony on the item, has determined that General Plan Amendment No. 26-0001 is appropriate and recommended City Council approval thereof.

NOW, THEREFORE, BE IT RESOLVED that the City Council approves General Plan Amendment No. 26-0001, amending the City of Orange General Plan Circulation and Mobility Element as depicted in Exhibit "A" attached hereto and incorporated by this reference based on the following findings:

SECTION 1 – FINDINGS

The subject General Plan Amendment updates roadway classifications within the Circulation and Mobility Element to reflect current and projected traffic conditions, roadway constraints, and multimodal considerations, while maintaining the City's required level of service standards. The amendment supports orderly growth, promotes a balanced and efficient transportation system, and ensures consistency between the City's Master Plan of Streets and Highways and regional transportation planning efforts adopted by neighboring jurisdictions and the Orange County Transportation Authority. As such, the proposed amendment furthers the intent of the General Plan by advancing coordinated regional mobility and responsible long-range transportation planning.

SECTION 2 - ENVIRONMENTAL REVIEW

The proposed project is categorically exempt (Common Sense Exemption) from the provisions of the California Environmental Quality Act (CEQA) per State CEQA Guidelines Section 15061(b)(3) because there is no possibility that the revisions to the roadway designations may have a significant effect on the environment.

ADOPTED this 10th day of March 2026.

EXHIBIT "A"

Amended General Plan Circulation and Mobility Element

CIRCULATION & MOBILITY

INTRODUCTION AND VISION FOR THE FUTURE

Orange's circulation system has been influenced by a variety of historical factors, including the presence of the Santa Fe Railroad, the vision of Alfred B. Chapman and William T. Glassell, the agricultural history of the area, and alternative transportation modes including a historic streetcar system.

In 1887, the Santa Fe Railroad came to Orange and built a station four blocks west of the Plaza. The coming of the railroad set off a real estate boom that brought hundreds of settlers to the area. The railroad also influenced the City's early economic success by providing a means to transport goods, especially citrus, to the entire country. Today, the railroad tracks continue to serve freight trains and provide a critical link to the region via the Metrolink heavy rail transit system.

In the 1870s, Alfred B. Chapman and William T. Glassell subdivided their land into residential and small farm lots centered on a roundabout known today as Plaza Park. Plaza Park was dedicated in 1886 and established the City's two main streets – Chapman Avenue and Glassell Street – as well as the compact street grid of Old Towne Orange. The street grid and railroad system were supported historically by a streetcar system that connected the small towns and settlements that make up the City today.

Over time, the small farms on the outer edges of Orange's core district began to disappear. Two factors influenced this change: the demand for housing after World War II and the appearance of "Quick Decline" disease that destroyed the local citrus industry. As each farm was developed independently, the grid system expanded outward and commercial corridors were established. Orange's roadways began to take on a more suburban pattern of collectors, connectors, and arterials. As development reached the eastern portion of the City, the grid gave way to curvilinear street patterns.

The historic roadways and railways that form the basis for the current circulation network have been complemented over the years by the development of a streetcar system, a transit service, an emerging and continually expanding bicycle trail and route network, and routes for equestrian use in the eastern portion of the City. The City will continue to be served by these multiple modes of transportation and other emerging mobility technologies.

Orange's ***Vision for the Future***, described in the General Plan Introduction, recognizes that the circulation system is a key component of the quality of life in the City. Accordingly, the vision includes the following objectives:

- Residential areas will be connected to commercial, recreational, and open space areas, as well as educational and cultural facilities via a balanced, multi-modal circulation network that accommodates vehicles, pedestrians, cyclists, hikers, and equestrians. This network will create additional opportunities for walking and biking, enhancing safety and well-being for neighborhoods and businesses.
- The City will work to define neighborhoods through the use of open space areas and a trail system that provides a source of aesthetic beauty and recreational opportunities. These open space areas support a healthy and active community.
- We will develop a connected multi-modal network for traveling from one end of town to the other that provides the option for residents from different neighborhoods to access parks, open spaces, and scenic areas by vehicle, transit, foot, bicycle or, where appropriate, horse.

Purpose of the Circulation & Mobility Element

California's General Plan Guidelines mandate that the Circulation & Mobility Element fulfill the following objectives:

- Show a direct relationship to the Land Use Element to ensure that any changes to land use as stated by the Land Use Element and growth occur with adequate circulation and transportation facilities in mind.
- Address relevant issues including the adequacy of "major thoroughfares, transportation routes, terminals, other local public utilities and facilities." The goal of the Circulation & Mobility Element is to identify circulation problems related to these facilities in the early stages and resolve them in local goals and policies without costly delays.

Other relevant issues discussed in the Circulation & Mobility Element include those that address streets, highways, public transit routes, railroads, bicycle and pedestrian routes, recreational trails, paratransit, parking, transportation system management, and air pollution. The hierarchy of streets within the residential areas helps to frame the urban form. Connections between neighborhoods can be achieved by a comprehensive network of sidewalks and trails. Also, the commercial corridors can be enhanced with adequate street capacity, public transit, and pedestrian-friendly environments.

The state also recommends that the Circulation & Mobility Element address coordination efforts among the local, regional, and state transportation plans to better resolve circulation issues. Since many transportation concerns are regional, addressing them requires intergovernmental and regional transportation management plans and policy implementation. These partnerships ensure the most efficient use of funding, infrastructure, and other resources. The state also recommends the "preservation of transportation corridors for future system improvements."

The Circulation & Mobility Element prioritizes the issues and opportunities that exist within Orange's transit network. It is directly responsive to proposed changes in land use and anticipates the impacts of those changes. This Element also seeks to reassure residents and businesses that the City recognizes the link between transportation and land uses, and provides a means to mitigate the impacts of growth.

Another goal of the Circulation & Mobility Element is to increase transportation options and provide increased access to the circulation system for all residents of Orange. This goal includes improved rail and bus transit connections and frequency, implementation of a *Bikeway Master Plan,* and completion of a trails system. Transforming many of Orange's historically auto-oriented commercial corridors, such as Katella Avenue, Main Street, and portions of La Veta Avenue, Chapman Avenue, and Glassell Street into more pedestrian-friendly mixed-use environments is an overarching goal. Where possible, the development of equestrian trails is also encouraged.

One of the main functions of the Circulation & Mobility Element is to guide and direct enhancement of the current circulation system for existing and future developments. Thus, circulation provisions correlate with the Land Use Element to avoid unchecked growth and unnecessary congestion.

Another key objective of the Element is to work toward a future circulation network that provides meaningful alternatives for getting around the community by less auto-dependent means. The City's topography, street and sidewalk system, transit and trail framework, and land use relationships provide an excellent foundation for pursuit of this objective.

The Circulation & Mobility Element does not simply determine automobile routes. It also guides the movement of people and goods, directly affecting Orange's physical, social, and economic environment. Since circulation permits accessibility to places and social amenities, it can either improve or cause deterioration in quality of life. Circulation efficiency also plays a major role in progress and development of the City's economy.

Scope and Content of the Circulation & Mobility Element

The Circulation & Mobility Element comprises three sections:

(1) Introduction;
(2) Issues, Goals, and Policies; and
(3) The Circulation & Mobility Plan.

The first section introduces the contents of the Circulation & Mobility Element. The second section presents issues, goals, and policies for improving circulation. The third section includes the Circulation & Mobility Plan, which designates locations and standards for roadways and non-motorized circulation facilities, and states the community's desired level of transportation service.

Implementation measures designed to promote achievement of the goals and policies are provided in an Appendix to the General Plan.

Relationship to other General Plan Elements

California planning law requires that the Circulation & Mobility Element correlate and maintain consistency with the other General Plan elements. The Circulation & Mobility Element relates most closely to the Land Use, Natural Resources, Noise, Economic Development, Housing, and Urban Design Elements.

The Circulation & Mobility Element is linked to the Land Use Element because the General Plan land use designations identified in the Land Use Element serve as a basis for the allocation of vehicle trips and establishment of capacity levels for circulation planning. The Land Use Element also provides land use designations that accommodate mixed commercial and residential development, which encourage shorter trips and improve the efficiency of the transportation network. The Circulation & Mobility Plan is established to define and provide for adequate levels of service and facilities to support future land uses. This Element recommends roadway and intersection improvements that may require land acquisition. Location of public transportation facilities will also influence pedestrian activity and transit-oriented development, and the physical size of streets will affect urban land uses and the physical appearance of the City.

The Natural Resources Element identifies regional air quality objectives and provides appropriate mitigation efforts that affect the Circulation & Mobility Element. Improving access, encouraging alternative modes of travel, and maintaining air quality and conservation standards are common objectives of the Natural Resources and the Circulation & Mobility Elements.

The Noise Element addresses future noise levels associated with roadways, rail, and other transportation facilities. Future volumes of traffic on the circulation system are directly related to future noise levels and mitigation strategies.

The Economic Development Element identifies desirable economic conditions and land uses that enhance and promote business activity, employment growth, and economic stability. The goals and policies of the Circulation & Mobility Element will determine road capacity in Orange, which will impact the type and location of uses, and parking and access considerations associated with future uses. Both elements share a common objective of planning for future transportation infrastructure needs. Maintaining roadways, bikeways and bus and rail transit facilities is critical to the success of both current and future businesses in Orange.

The Urban Design Element is a framework for shaping the future form and character of Orange. The quality of Orange's physical environment contributes to its identity, attracts new residents, and sets the stage for economic activity. The Urban Design Element builds on the foundation of Orange's already strong sense of place to preserve and strengthen the streetscape environment of commercial corridors and landmarks within the city. The Urban Design Element and Circulation & Mobility Element share a common objective to reinvent City streets as more functional and walkable public places.

ISSUES, GOALS, AND POLICIES

The goals, policies, and implementation programs of the Circulation & Mobility Element seek to achieve a better balance between vehicular, pedestrian, and bicycle travel, and to provide a wide range of viable transportation options to Orange residents. The following six issues are addressed: (1) enhancing the local circulation system; (2) maintaining the regional circulation system; (3) maintaining a viable public transportation network; (4) creating a comprehensive system of sidewalks, trails, and bikeways; (5) providing adequate parking facilities; and (6) improving circulation system aesthetics and safety.

Local Circulation System

The local roadway system serves the community's primary needs for mobility and access, and consists of a hierarchy of City streets to meet those needs. The City's original street system was established as a grid pattern long before a Master Plan of Arterial Highways (MPAH) was adopted. The Old Towne area and many postwar neighborhoods were designed in a classic grid configuration, while in newer parts of the City, physical features such as the Santa Ana River, Santiago Creek, hilly terrain, freeways and the presence of the City of Villa Park have resulted in a system without a definitive pattern. Some major roads do not connect the eastern and western portions of the City and consequently do not provide effective through circulation. A well-designed roadway system will provide convenient access to activities in Orange.

GOAL 1.0: **Provide a safe, efficient, and comprehensive circulation system that serves local needs, meets forecasted demands, and sustains quality of life in neighborhoods.**

Policy 1.1: Plan, build, and maintain an integrated, hierarchical, and multi-modal system of roadways, pedestrian walkways, and bicycle paths throughout the City.

Policy 1.2: Identify key intersections and streets with historical or projected traffic congestion problems and apply creative traffic management measures to improve overall circulation.

Policy 1.3: Consider various methods to increase safety on City arterials and neighborhood streets, including landscaping, provision of bike/transit lanes, and consideration of traffic calming on neighborhood streets in accordance with the City's Neighborhood Residential Traffic Management Program.

Policy 1.4: Prohibit on-street parking where possible to reduce bicycle/automobile conflicts in appropriate target areas as recommended by the *Bikeways Master Plan*.

Policy 1.5: Address possible safety and noise effects of increased rail activity on grade crossings throughout the City.

Policy 1.6: Maintain and repair roadways and sidewalks as necessary to improve circulation and safety.

Policy 1.7: Consolidate driveways along roadways that provide access to commercial uses to minimize side street interruption and promote smooth traffic flows. On-street parking is prohibited on commercial access streets to provide adequate curb-to-curb width for travel lanes.

Regional Circulation System

Mobility in Orange is directly related to the regional transportation network, as the City lies at the confluence of several regional freeways: the Santa Ana Freeway (Interstate 5), Orange Freeway (State Route [SR] 57), Garden Grove Freeway (SR-22), Costa Mesa Freeway (SR-55), Riverside Freeway (SR-91) and Eastern Transportation Corridor (SR-241). In addition to the freeways, other connections to the region include the commuter rail system known as Metrolink, a freight and goods rail transport system, and a regional bikeways system with connections to the Santa Ana River and other locations. Orange is also connected to the region via the Orange County Transportation Authority (OCTA) bus system. City infrastructure must accommodate regional through traffic originating in other communities in addition to providing local residents access to the regional network.

GOAL 2.0: Provide an effective regional transportation network.

Policy 2.1: Ensure consistency with the County MPAH in order to qualify for funding programs.

Policy 2.2: Coordinate with adjacent cities to plan and develop major east/west and north/south arterials and rapid transit to connect the City with the cities of Anaheim, Tustin, Santa Ana, Garden Grove, and Villa Park, as well as developing areas within the City's sphere of influence.

Policy 2.3: Cooperate with and support local and regional agencies' efforts to improve regional arterials and transit in order to address increasing traffic congestion.

Policy 2.4: Coordinate land use planning with anticipated future development of roadways and other transportation facility improvements as well as the expansion of commuter rail and bus service.

Policy 2.5: Ensure that transportation facilities and improvements do not degrade the quality of Orange's commercial and residential areas.

Policy 2.6: Encourage the use of regional rail, transit, bicycling, carpools, and vanpools for work trips to relieve traffic congestion.

Policy 2.7: Continue to support the use of rail corridors within the City for the movement of freight and goods, and work with rail operators to minimize associated traffic delays.

Public Transportation

Public transportation is a crucial component of a comprehensive circulation system. In addition to reducing air pollution and traffic congestion, a successful public transit system provides an alternative mode of travel for those with limited mobility, residents who may not have access to a car, and persons who choose not to drive.

GOAL 3.0: **Connect centers within the City to each other and to the region through efficient and accessible public transportation.**

Policy 3.1: Work with OCTA and other agencies to assess City public transportation needs and to ensure delivery of services when and where they are needed.

Policy 3.2: Enhance and encourage provision of convenient and attractive transit amenities and streetscapes to encourage use of public transportation (e.g., benches, trash cans, shelters, and lighting).

Policy 3.3: Require incorporation of transit-oriented design features within major commercial and employment areas as well as in medium density residential and mixed-use development areas.

Sidewalks, Trails, and Bikeways

In addition to offering recreational and public health benefits, non-vehicular modes of transportation offer commuting options. Also, the mixed-use environments advocated by Land Use Element policies will encourage increased pedestrian activity on City sidewalks for both business and pleasure. An effective pedestrian, bicycle, and equestrian network must be safe and accessible, and must connect key activity centers within the City with each other and with the regional trail system. A comprehensive network of on-street bicycle lanes, off-street bicycle paths, sidewalks, and trails should be developed and maintained to increase the safety and utility of the system, with a particular focus on the City's sidewalk deficient industrial areas

GOAL 4.0: **Provide efficient and accessible modes of pedestrian, bicycle, and equestrian transportation and improved facilities and amenities.**

Policy 4.1: Create a comprehensive bicycle network that is integrated with other transportation systems by establishing complementary on-street and off-street facilities as identified in the City of Orange *Bikeways Master Plan* and OCTA *Commuter Bikeways Strategic Plan*, including Santiago Creek, the Santa Ana River, and the Tustin Branch Trail.

Policy 4.2: Install racks and safe storage facilities at parking areas for City facilities, as appropriate, and encourage incorporation of such facilities within privately-developed projects.

Policy 4.3: Improve citywide awareness of automobile and bicycle safety.

Policy 4.4: Encourage use of the bikeway system by providing adequate signage, trail markings, and other amenities.

Policy 4.5: Ensure that pedestrian sidewalks, trails, and bikeways are safe environments through the use of crime prevention-oriented trail design features, lighting where appropriate, pedestrian and bicycle safety improvements at at-grade rail crossings, access for emergency vehicles, and links to the roadway signal system.

Policy 4.6: Explore opportunities to convert abandoned rail corridors into segments of the City's bikeway and pedestrian trail system.

Policy 4.7: Provide ADA accessible sidewalks and pedestrian amenities throughout the City.

Policy 4.8: Expand and maintain an equestrian trail network and provide for appropriate staging areas and infrastructure.

Parking Facilities

A shortage of parking can cause circulation problems and could lead to a reduction or loss of business activity. Old Towne Orange has been identified as an area of particular concern. As the City develops, providing adequate parking adjacent to other activity centers is increasingly important.

GOAL 5.0: Provide adequate parking to meet the needs of activity centers throughout the City.

Policy 5.1: Provide adequate parking to protect and support the economic vitality and diversity of Old Towne.

Policy 5.2: Plan for and design parking facilities throughout the City that are adequate to meet demand, but also consider land use-parking efficiencies, and the surrounding natural and built environment.

Policy 5.3: Encourage adjacent businesses to consolidate parking facilities and access points.

Policy 5.4: Encourage well-designed structured parking in commercial areas where such features would be economically feasible, safe, and visually integrated with existing development.

Circulation System Aesthetics

Streets that have been made or modified to include visual and pedestrian amenities can improve the overall look and feel of City streets, as well as enhancing functionality for all users. As major commercial corridors are beautified and changed to include a pleasant pedestrian environment, this will have positive effects on the feelings of safety and security for pedestrians, bicyclists, and motorists.

GOAL 6.0: Provide roadway corridors that are aesthetically pleasing and contribute to a feeling of safety, security, and comfort for motorists, bicyclists, and pedestrians.

Policy 6.1: Supply adequate, clear, and correctly placed signage to direct both motorists and non-motorists toward destinations and away from hazards.

Policy 6.2: Provide clear indicators in the right-of-way for where pedestrians and bicyclists are encouraged to walk, bike, or cross safely. These may include special paving, line stripes, and crosswalks.

Policy 6.3: Provide lighting, landscaping, street trees, and other appropriately scaled streetscape features that accommodate all users on commercial corridors. Where appropriate, lighting should be scaled for autos as well as pedestrians.

CIRCULATION & MOBILITY PLAN

The objective of the Circulation & Mobility Plan is to document existing transportation facilities in the planning area used for the movement of people and goods. The Element addresses the desired future condition of these facilities, and their relationship to future land uses identified in the Land Use Element. The Plan describes the circulation system, including the arterial network and intersections, the public transit system, bicycle paths, recreation facilities, parking, and railroad operations. The City's circulation network includes an extensive system of roadways, bus transit service, commuter rail, and freight rail.

Local Circulation System

A well-designed local arterial roadway system that connects to a well-developed regional circulation system provides safe and convenient access to employment, housing, recreation, and commercial areas in Orange. City arterial roadways located on the western side of SR-55 generally follow north-south and east-west orientations. On the eastern side of the freeway, arterials are characterized by curvilinear streets due to undulating geographical surroundings. Key north-south arterials include Tustin Street, Glassell Street, Main Street, and The City Drive. Key east-west arterials include Chapman Avenue, Katella Avenue, Taft Avenue, and parts of La Veta Avenue. These arterial roadways are in turn supported by a network of collector and local streets that provide access to homes and businesses throughout the City.

Roadway Classification System

The City's roadway network is distinguished by a hierarchical classification system that differentiates roads by size, function, and approximate daily capacity based upon Level of Service D (LOS D). LOS is a qualitative measure that characterizes traffic congestion on a scale of A to F with LOS A representing a free-flow condition and LOS F representing extreme congestion. LOS standards can apply to either intersections or links (a section of street between two intersections). Generally speaking, LOS represents the ability of a roadway or an intersection to accommodate traffic.

In the City, intersections are used as actual control points. City roadways consist of both divided and undivided roadways. Divided roadways generally contain a physical barrier or buffer, such as a raised median or a continuous two-way left turn lane, between each direction of travel. Divided roadways remove vehicles making a left turn from the travel lanes so as not to impede through traffic and constrict roadway capacity. Undivided roadways do not contain a buffer between each direction of travel, and therefore left-turning traffic can impede through traffic. Undivided roadways may provide turn movement pockets at intersections. The eight categories of roadways in Orange are summarized in Table CM-1. Proposed cross-sections for each type of roadway are shown in Figure CM-1.

The City's policy is to use a link capacity standard of LOS D. The following paragraphs represent link capacities of each roadway type at LOS D.

Table CM-1 Roadway Classifications		
Classification	**Facility Type**	**Characteristics**
Smart Street	Smart Street	4-8 lane divided, with possible signal coordination, intersection capacity improvements and/or grade separations
Principal Arterial	8 Lane Divided	Primarily serves through traffic with limited local access
Major Arterial	6 Lane Divided	Serves mostly through traffic with some local access allowed
Asymmetric Major Arterial	5 Lane Divided	Serves mostly through traffic with some local access allowed
Primary Arterial	4 Lane Divided	Serves through and local traffic
Secondary Arterial	4 Lane Undivided	Serves through and local traffic
Two-Lane Secondary Arterial	2 Lane Divided	Serves through and local traffic
Collector Street	2 Lane	Serves mostly local traffic

Smart Streets are typically four- to eight-lane roadways with enhanced capacity and smoother traffic flow than standard arterial streets. These streets have enhanced features such as traffic signal synchronization, bus bays, intersection improvements, and the addition of travel lanes by removing on-street parking and consolidating driveways. The traffic carrying capacities of Smart Streets can range from 60,000 to 79,000 vehicles per day, depending on the number of lanes, degree of access control, peak period loading, and the configurations of major intersections.

Principal Arterials are typically eight-lane divided roadways with medians or continuous two-way left turn lanes. They can accommodate up to 67,500 vehicles on an average weekday at LOS D conditions, depending on the degree of access control, peak period traffic loadings, and lane configurations at major intersections. Principal arterials prohibit on-street, curbside parking, and connect directly to freeways.

Major Arterials are six-lane divided roadways with medians or continuous two-way left turn lanes. They can accommodate up to 50,700 vehicles on an average weekday at LOS D conditions, depending on the degree of access control, peak period traffic loadings, and lane configurations at major intersections. Major arterials facilitate traffic circulation within Orange, and may prohibit on-street, curbside parking.

Asymmetric Major Arterial are five-lane asymmetrical divided roadways with medians or continuous two-way left turn lanes. They can accommodate up to 42,250 vehicles on an average weekday at LOS D conditions, depending on the degree of access control, peak period traffic loadings, and lane configurations at major intersections. Asymmetric major arterials facilitate traffic circulation within Orange, and may prohibit on-street, curbside parking. Occasionally, based on projected volumes, it is necessary to have a cross section with more lanes in one direction than the other (asymmetric lanes) along some Major arterials. The most typical application would be for arterial segments where adjacent area land uses result in higher demand in one of the peak periods. Where such demand creates

the need for an added lane to accommodate the peak surge of traffic, the addition of through lane(s) in one (asymmetric), rather than both directions of travel, is considered.

Primary Arterials are four-lane divided roadways with medians or continuous two-way left turn lanes. They can accommodate up to 33,750 vehicles on an average weekday at LOS D conditions, depending on the degree of access control and peak period loadings. Primary Arterials provide for easy circulation in the City, and allow for limited on-street, curbside parking.

Secondary Arterials are four-lane undivided roadways without medians. They can accommodate up to 21,600 vehicles on an average weekday at LOS D conditions, depending on the degree of access control and peak period loadings. Secondary arterials allow for on-street, curbside parking.

Two-Lane Secondary Arterials are two-lane divided roadways with medians or continuous two-way left turn lanes. They can accommodate up to 17,000 vehicles per average weekday at LOS D conditions, depending on the degree of access control and peak period loadings. Two-lane secondary arterials can allow for on-street, curbside parking.

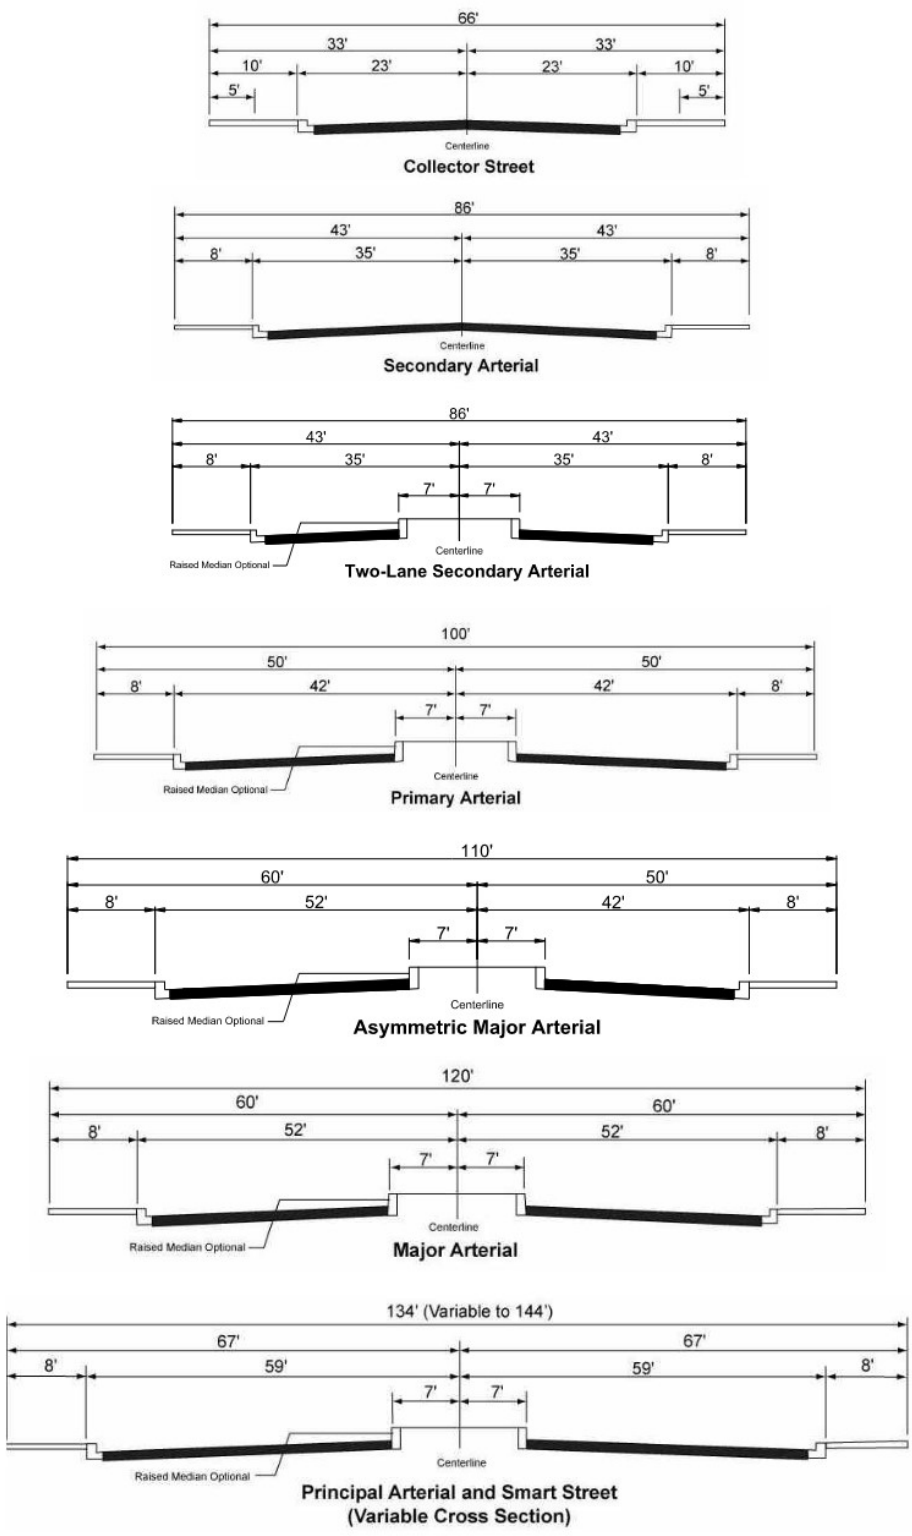

Figure CM-1
Roadway Cross Sections

Collector Streets are typically two-lane roadways without medians that gather and distribute traffic to higher-capacity arterials. They can accommodate up to 10,800 vehicles per average weekday at LOS D conditions, depending on the degree of access control and peak period traffic loadings. Centerline striping is typically not provided on collector streets, and on-street parking is allowed. There are several types of two-lane streets in the City, including divided, undivided, residential, and collector streets. Each type serves a slightly different purpose and may have different capacity thresholds based on various factors.

Performance Criteria

Evaluating the ability of the circulation system to serve residents and businesses in Orange requires establishing performance criteria. Performance criteria have a policy component that establishes a desired LOS, and a technical component that specifies how traffic forecast data can be used to measure criteria achievement.

The LOS definition for intersections is based on a volume-to-capacity (V/C) ratio and provides a more quantitative description of traffic conditions. Table CM-2 presents LOS based on traffic volumes and the design capacity of intersections.

Table CM-2
Level of Service Definitions for Intersections

Level of Service	Volume-to-Capacity Ratio	Description
A	0.00-0.60	Free Flow/Insignificant Delays: No approach phase is fully utilized by traffic and no vehicle waits longer than one red indication.
B	0.61-0.70	Stable Operation/Minimal Delays: An occasional approach phase is fully utilized. Many drivers feel somewhat restricted within platoons of vehicles.
C	0.71-0.80	Stable Operation/Acceptable Delays: Major approach phases fully utilized. Most drivers feel somewhat restricted.
D	0.81-0.90	Approaching Unstable/Tolerable Delays: Drivers may have to wait through more than one red signal indication. Queues may develop but dissipate rapidly, without excessive delays.
E	0.91-1.00	Unstable Operation/Significant Delays: Volumes at or near capacity. Vehicles may wait through several signal cycles. Long queues form upstream from intersection.
F	N/A	Forced Flow/Excessive Delays: Represents jammed conditions. Intersection operates below capacity with low volumes. Queues may block upstream intersections.

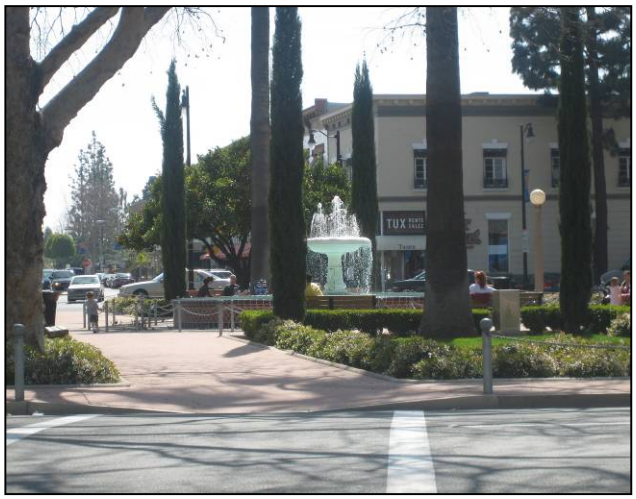
Source: Highway Capacity Manual, Transportation Research Board, Special Report No. 209, Washington DC, 2000.

Although roadway capacity is generally a function of peak hour intersection performance and the corresponding peak hour volumes, daily arterial segment capacities (link capacities) also provide a measure of the overall LOS of the arterial system. Generally, traffic impact mitigation focuses on peak hour intersection performance, since system performance is typically a function of intersection performance. The City's policy is to use a link capacity standard of LOS D. Table CM-3 presents arterial daily capacities at LOS D and LOS E.

Table CM-3
Arterial Daily Capacity Threshold Assumptions

Street Type	Daily Capacity	
	LOS D	LOS E
Smart Street – 6- to 8-lane divided	71,100	79,000
Principal – 8-lane divided	67,500	75,000
Major – 6-lane divided	50,700	56,300
Asymmetric Major – 5-lane divided	42,250	47,000
Primary – 4-lane divided	33,750	37,500
Secondary – 4- lane undivided	21,600	24,000
Two-Lane Secondary – 2-lane divided	17,000	18,750
Collector – 2-lane undivided	10,800	12,000

Source: City of Orange General Plan Update Traffic Report, 2008.



Various LOS policy standards have been established to evaluate observed traffic conditions, future development plans, and circulation system modifications. At the local level, the City of Orange has established LOS D as the lowest acceptable level of service for both roadway segments and peak-hour signalized intersection movements. At the regional planning level, Orange County's Congestion Management Plan (CMP) specifies LOS E as the operating standard for roadways and intersections on the CMP highway system. The CMP Highway System consists of the Orange County smart street network plus the state highway system. Thus, the SR-55 northbound and southbound ramps at Katella Avenue are CMP intersections within the City's jurisdiction. The City does not have an adopted LOS standard for unsignalized intersections. Performance of unsignalized intersections is evaluated on a case-by-case basis.

In addition to the LOS standards for roadways and intersections, the California Environmental Quality Act (CEQA) Guidelines (Section 15064.3), require "vehicle miles traveled" (VMT), to measure transportation impacts on the community. VMT refers to the amount and distance of automobile travel attributable to a project.

For purposes of compliance with CEQA, a significant impact would occur if the baseline and/or cumulative project-generated VMT per service population (population plus employment) exceeds the anticipated City of Orange General Plan Buildout VMT per service population. One vehicle traveling one mile would generate one VMT. Additionally, the project's effect on VMT would be considered significant if it resulted in the baseline and/or cumulative link-level boundary citywide VMT per service population increases under the plus project condition compared to the no project condition. Link-level boundary VMT is calculated by summing all weekday VMT on a roadway network within the City boundary and includes all trips including trips that pass through the City's roadway network but do not start and end with in City.

These thresholds are designed to reduce the number of miles traveled by automobiles, and are implemented within the City of Orange *Traffic Impact Analysis Guidelines*.

In order to maximize the efficiency of its circulation system, the City will look at where physical improvements to the circulation infrastructure can be made to expand capacity and increase traffic flow. To maximize efficiency of the road system, the City will support traffic signal coordination and spacing, and will also discourage on-street parking along arterials. In addition, the City will explore ways to reduce the demand for vehicular transportation, specifically through the provision and maintenance of bike lanes, bikeways, and trails, and will also encourage additional regional transit services and support facilities. The City's Transportation Demand Management (TDM) ordinance (Chapter 10.83 of the Municipal Code) further specifies a variety of techniques available to employers with 100 or more employees to advance the goals of efficiently utilizing the existing and planned transportation system and reducing vehicle emissions.

City Master Plan of Streets and Highways

Land Use Element policy will allow land use changes and intensification to occur in specific focus areas within the City. The City's Master Plan of Streets and Highways displayed in Figure CM-2 has been developed in close coordination with land use policy to ensure that traffic generated by new development will not compromise the City's goal to ensure that intersections and roadway segments operate efficiently. The map identifies components of the City's roadway circulation system. The map also indicates where augmented roads are needed, and pinpoints locations for enhanced intersections, including the future Meats Avenue interchange at SR-55. Although most of Orange is already built out, most remaining developable land is located in the eastern part of the City. New development in east Orange will require construction of new roads to provide circulation and traffic flow to residents and businesses. Land Use Element policies enabling reuse and redevelopment within established portions of the City, particularly within the focus areas, may also necessitate roadway widening and intersection enhancements. The City will continue to collect funds for necessary circulation system capital improvements through a program that sets up a fee structure for all new development and redevelopment projects. This program will require developers to pay their fair share for transportation system improvements required by new projects. The City will use the annual seven-year Capital Improvement Program (CIP) process to prioritize, fund, and complete improvements required to achieve build-out of the proposed roadway system identified in Figure CM-2.

Roadway Widening

Roadway widening in specific locations will be necessary to obtain new travel lanes. Additional travel lanes may be acquired either by obtaining additional rights-of-way as necessary or by constructing new lanes within existing rights-of-way. Parking restrictions may be applied to allow additional lanes to be provided within existing rights-of-way.

Old Towne Street Network

The Old Towne street network is a clear example of Orange's grid street pattern. Parallel roadways have been established in both the north-south and east-west direction to distribute traffic evenly. The Plaza area at Glassell Street and Chapman Avenue is a unique feature that creates discontinuous traffic flows along these two primary roadways. However, no plans have been made to modify the National Register-listed Historic Plaza to increase its traffic carrying capacity.

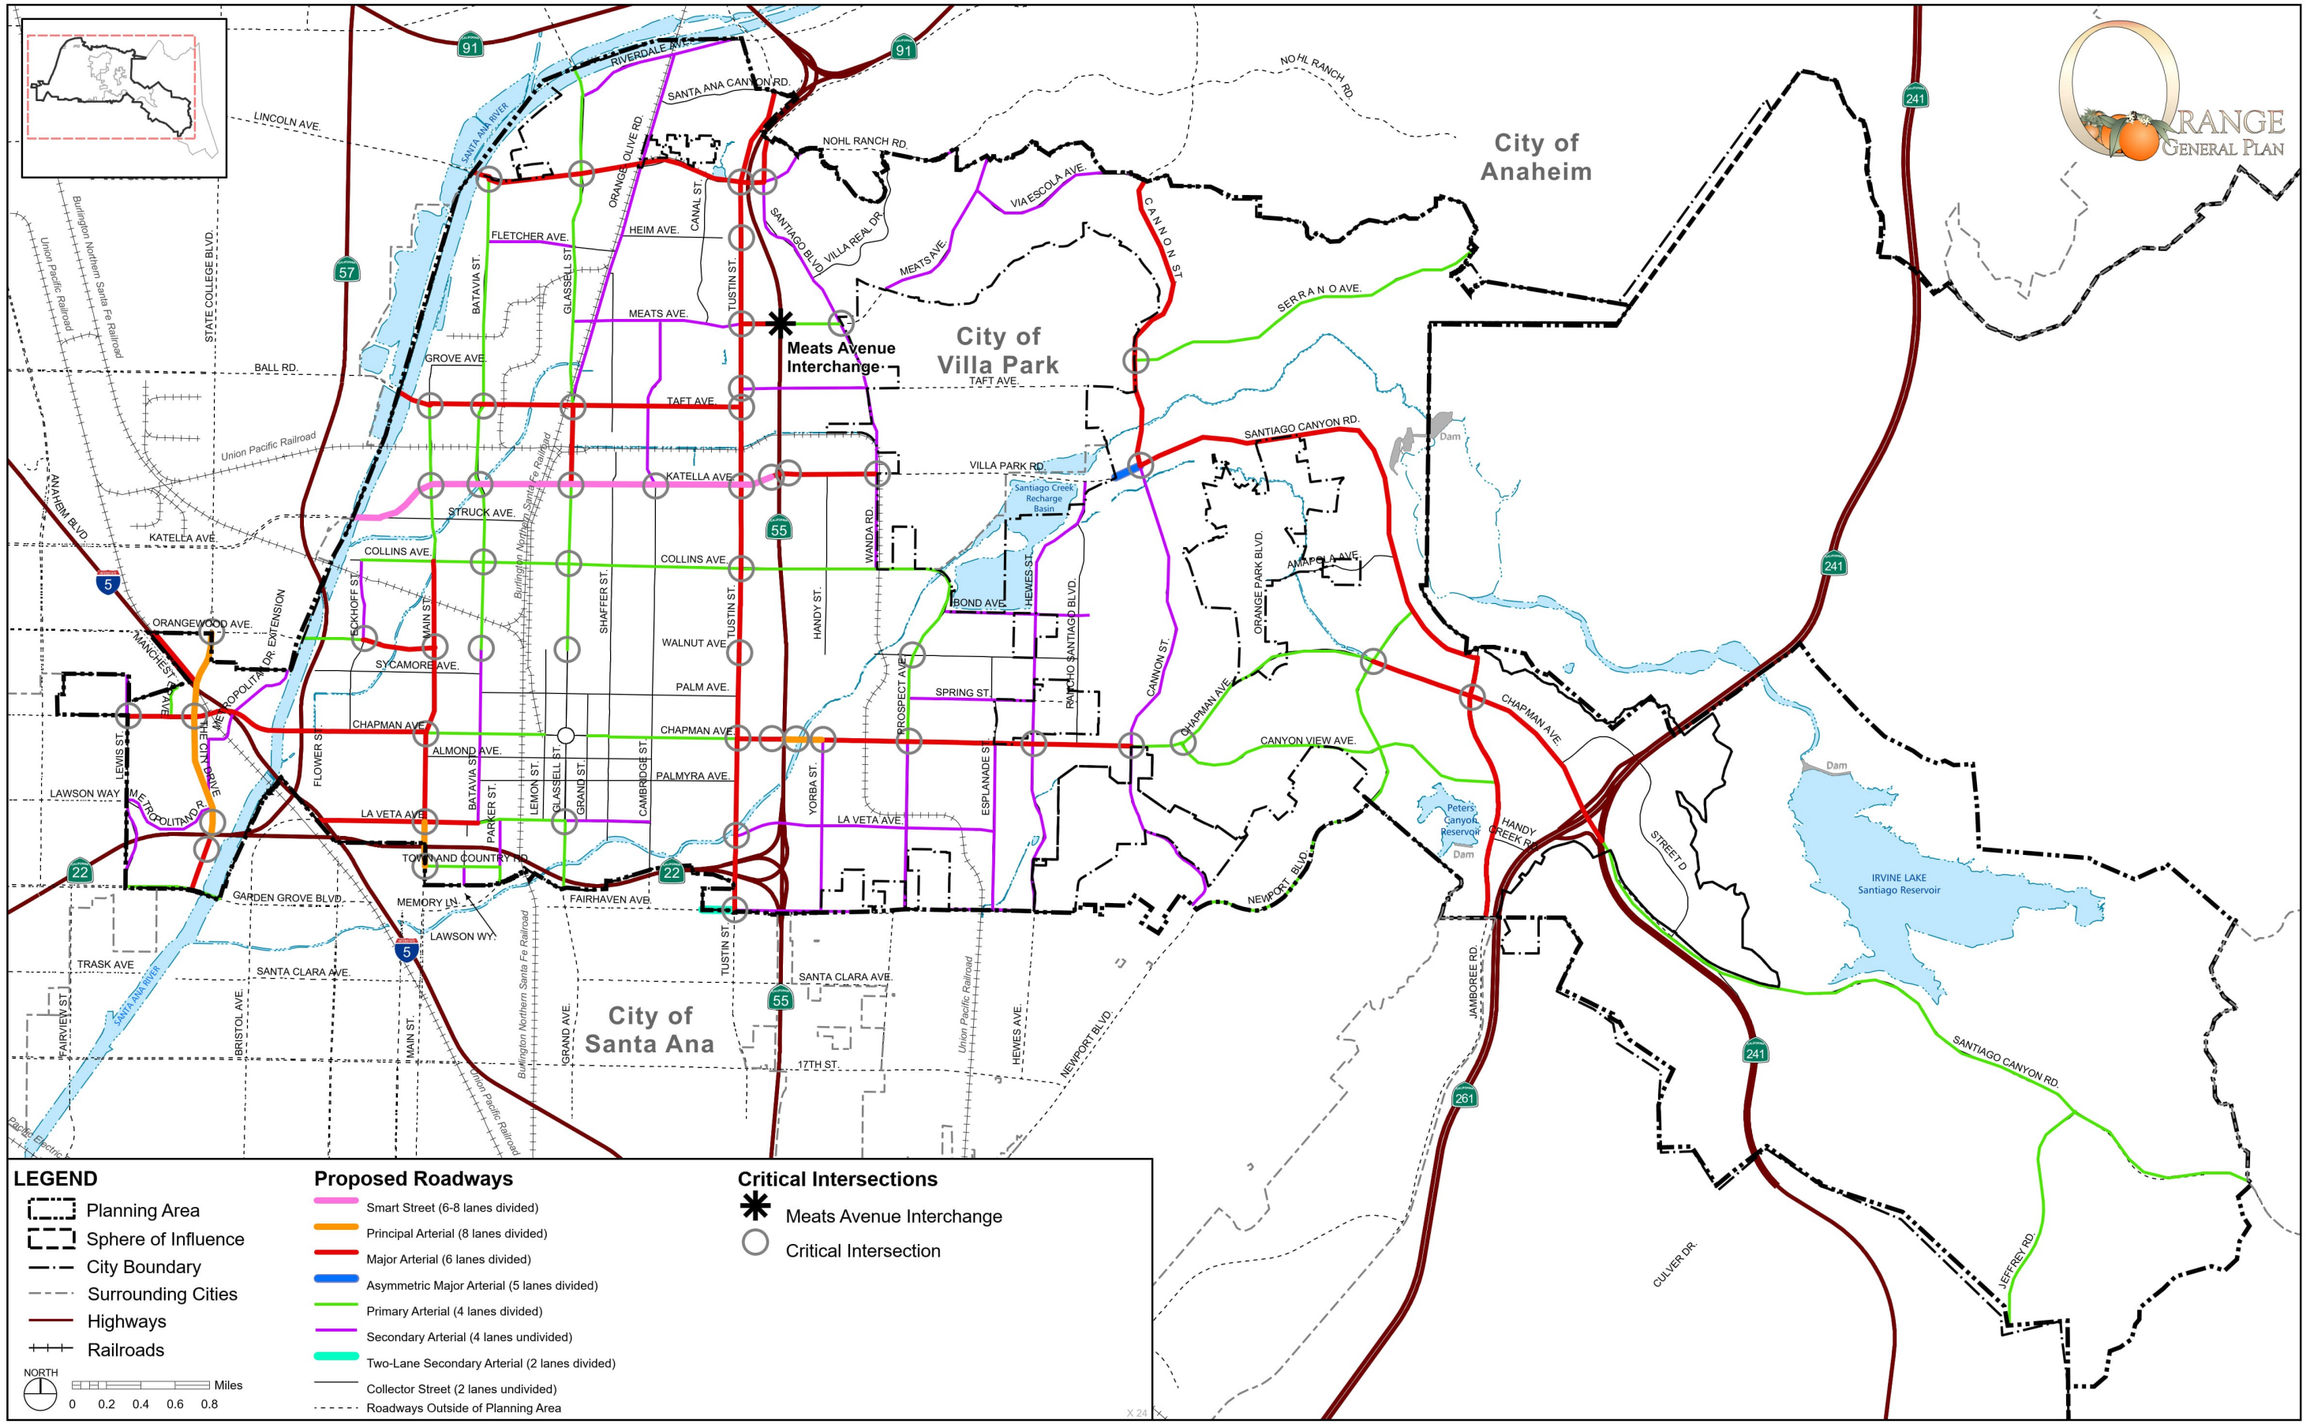


Figure CM-2 City Master Plan of Streets and Highways

GPA 2026-0001 (XX/XX/26)

GPA 2014-0001 (12/18/15)

GPA 2010-0001 (8/10/10)

(This Page Left Intentionally Blank)

In light of these conditions, parallel roadways such as Almond Avenue, Palmyra Avenue, Lemon Street, Olive Street, Shaffer Street, Grand Street, Palm Avenue, and Maple Avenue will continue to serve as local collectors around The Plaza.

Metropolitan Drive Extension

Extending Metropolitan Drive behind the University of California, Irvine (UCI) Medical Center will help facilitate the movement of north-south traffic near The Outlets at Orange shopping area, improve access to Interstate 5 (I-5), and relieve congestion on The City Drive. Metropolitan Drive will be extended from The City Drive/State College Boulevard to the Metropolitan Drive/Rampart Street connection.

Critical Intersection Program

Intersections serve as traffic control points for the circulation system, regulating the flow of vehicles along City streets and sometimes limiting the capacity of the system. In the long term, system capacity and efficiency can both be increased if intersections are designed to handle future anticipated traffic volumes. Typically, the design of the roadways forming an intersection dictates the intersection configuration. Department of Public Works standards indicate that a left-turn pocket may or may not be provided, depending on traffic volumes through the intersection. However, one pocket may not be adequate to handle vehicles during peak hours. Traffic may back up into a through travel lane, resulting in congestion at the intersection and at other locations along the roadway.

One way of providing additional intersection capacity at critical locations is through the use of special intersection configurations known as "critical intersections." Critical intersections deviate from typical City design standards by increasing the number of lanes at an intersection beyond what typically would be required. By increasing capacity at the intersection, the circulation link increases overall system capacity.

The Master Plan of Streets and Highways (Figure CM-2) identifies the locations of critical intersections within Orange. A list of these intersections and diagrams depicting their geometries are on file in the Public Works Department.

Regional Roadway System

The City's local circulation network is connected to an efficient regional circulation system. Figure CM-2 shows the freeways that traverse the Orange planning area. The Santa Ana Freeway (I-5) provides interstate and regional access to the City. In addition, SR-57, SR-55, and SR-22 all provide connections to the City from northern Orange County and neighboring Los Angeles County, San Diego County, Riverside County, and San Bernardino County. SR-91 and SR-241 provide additional, more limited freeway access. SR-241 is a toll facility controlled by the Transportation Corridor Agency (TCA).

I-5 is a northwest-southeast freeway that passes through the southwest corner of the City, and provides direct access to Los Angeles County to the north and San Diego County to the south. I-5 has two interchanges within Orange—one located at its junction with SR-57 and SR-22 (commonly known as the Orange Crush) and the other at State College Boulevard/The City Drive. The junction at the Orange Crush currently has the most severe congestion, which directly affects the roadway system in the City. With projected future growth in Orange and in the region, traffic flow at this junction is expected to worsen. The City will continue to work with and support the efforts of local and regional agencies to mitigate the increased traffic congestion in this area.

SR-91 is an east-west freeway that provides access to key arterial facilities in Orange, including interchanges at Tustin Street and Glassell Street. SR-91 also provides regional access through interchanges with SR-55 and SR-57 and SR-241.

SR-22 is an east-west freeway that crosses through the southern portion of the City. Five SR-22 interchanges are located in the City, at Tustin Street, Glassell Street, Main Street/La Veta Avenue, Bristol Street, and The City Drive.

SR-55 is a north-south freeway that passes through the center of Orange, and provides access to the coastal communities of Orange County. SR-55 has four interchanges in Orange, located at Lincoln Avenue, Katella Avenue, Chapman Avenue, and SR-22. An additional future interchange at Meats Avenue is contemplated within this General Plan.

SR-57 is a north-south freeway that originates at the junction of I-5 and SR-22 and extends to San Dimas in Los Angeles County. It provides access for the eastern parts of Los Angeles County, and central and northern parts of Orange County. SR-57 has three interchanges in Orange, at Chapman Avenue, Orangewood Avenue, and the junctions of I-5 and SR-22.

The Eastern Transportation Corridor (SR-241) is a north-south toll facility located in the eastern portion of the planning area. This facility provides direct access to east Orange. SR-241 has three toll lanes in each direction and provides regional access through an interchange at Santiago Canyon Road.

Consistency with County Master Plan of Arterial Highways

Maintaining consistency with the County's Master Plan of Arterial Highways (MPAH) is required in order to ensure that the City's circulation system develops in a manner that promotes regional mobility. At a practical level, consistency is also required in order for the City to receive transportation funding under Measure M, also known as OC Go. Orange's Master Plan of Streets and Highways (Figure CM-2) is generally consistent with the MPAH.

While the City's Master Plan of Streets and Highways has been consistent with the County MPAH to maintain funding eligibility, both the City of Orange and OCTA have the goal of a realistic and implementable MPAH. A desire of the City is to work with OCTA to downgrade La Veta Avenue between Glassell Street and Cambridge Street from a Secondary Arterial to a

Collector Street to reflect physical constraints related to historic buildings and features in the Old Towne National Register Historic District.

To initiate the MPAH amendment process, a local agency must submit a written request to OCTA describing the amendment requested and provide documentation to support the basis for the request. A copy of the request must be submitted concurrently to the City Managers of adjoining cities. For the facilities under consideration, this would require a letter to be forwarded to the City of Santa Ana.

Once the initial request is forwarded to OCTA, a conference between the City of Orange, OCTA, and potential affected jurisdictions is held to determine whether mutual agreement exists for the MPAH amendment. If mutual agreement exists, then Orange is expected to proceed with adopting this revision to the Circulation & Mobility Element. Upon adoption, the City of Orange would submit the Circulation & Mobility Element to OCTA and request OCTA Board approval of the Orange County MPAH amendment.

Public Transportation

Effective regional transportation strategies are required to successfully implement City and County plans for accommodating future growth. Such strategies must link the City of Orange with other regional employment and commercial centers, as well as airports and other transportation hubs, and should fully integrate alternatives to the automobile. Alternative modes of transportation, including public transportation, bicycling, and walking, are important components of a comprehensive circulation system. These modes of transportation also help reduce air pollution and road congestion.

Public transportation plays a key role in future land use development and mobility. As the roadway system reaches capacity, alternative modes of transportation provide additional capacity as well as an enhanced degree of mobility for residents, workers, and visitors. Existing services are expected to continue while enhancements, many of them currently in the planning stages, will increase the viability of alternative modes of travel. The integration into the circulation system of alternative modes of transportation, such as bus, rail, bicycle, and pedestrian, is essential to maximizing mobility opportunities for residents, workers, and visitors.

Bus Service

OCTA provides public bus service for the City of Orange. In addition, the Riverside Transit Agency (RTA) provides long-distance service between The Village at Orange and the Downtown Terminal in Riverside. Table CM-4 identifies local bus routes that connect various activity centers in Orange to each other and to the region.

Table CM-5 shows the different community, station link, and inter- or intra-County routes that serve Orange. Community routes are express bus routes that provide faster connections to activity centers within and outside Orange County. Station link shuttles provide services between the Orange Transportation Center (OTC) and Orange. Both community and station link routes operate only at peak commuter times.

In addition to the fixed-route service, OCTA also offers several types of specialized community transportation services, such as standard service (curb-to-curb service), door-to-door service, subscription service, and same-day taxi service. Some of these services cater to senior citizens and people with disabilities residing in the City.

OCTA has forecast bus ridership to increase by approximately 75 percent by 2030. Some of this ridership increase will be the result of enhanced services, including express bus routes and introduction of bus rapid transit service. Much of the increase will be driven by increased arterial and freeway congestion levels in conjunction with improved local bus service.

Convenient, accessible, frequent, and easy-to-use public transit is a cornerstone element of the proposed land use plan. Planned mixed-use residential and commercial areas and intensified commercial and professional office corridors must be coupled with increases in transit service. Orange's land use plan features mixed-use districts that strategically concentrate population density near alternative transit facilities, such as the OTC in Old Towne, transit hubs at The Outlets at Orange and South Main Street, and the Anaheim Regional Transportation Intermodal Center (ARTIC) station in Anaheim near the City's western boundary at Katella Avenue.

The City recognizes that ridership of both the bus and rail transit systems will increase, and has designed a land use plan that both enables and accommodates increased transit use. A large part of the City's role in accommodating additional transit use includes providing convenient and attractive transit amenities and streetscape features that improve user comfort and perception of safety, thus encouraging transit use. Transit-oriented Development (TOD) design features will be encouraged in major commercial and employment areas within the City, such as the Town and Country Road corridor, South Main Street, Katella Avenue, Uptown Orange, and Old Towne. Such TOD features may consist of streetscape measures such as bus turn-outs, benches, trash receptacles, shelters from wind and rain, and lighting. TOD features may also be more fundamental to the permitted uses and design within projects, such as incorporating child care centers, convenience stores, or personal services within the retail component of mixed-use projects, or near professional office concentrations. These and other measures help to make the transit system more accessible to a wide range of people.

The City will continue to work with OCTA to pursue expanded community circulators, such as the current Station Link service, that will connect people to rail transit, employment centers, residential areas, and commercial corridors. Additional options, such as jitney services that function as group taxis, will also be explored.

The City will also continue to support OCTA initiatives and services that promote the mobility of Orange's senior, disabled, and youth populations. To accommodate the needs of these groups, the City will continue to work with OCTA to offer para-transit services, and will seek ways to improve mobility for Orange youth through transit.

The City of Orange will continue to cooperate with OCTA and other regional providers to establish new bus routes and stops, and to provide transit amenities. New subdivision plans will be reviewed by OCTA to assess impacts on bus services, and to examine the need to provide bus stops or bays. Orange will also work with OCTA to maintain and, if needed, expand successful transfer stations in Old Towne, the Village at Orange, and The Outlets at Orange.

Rail Transit

Many current passenger and commuter fixed-rail transit options in the City will be expanded in the future, offering significant alternatives to automobile transit for many individuals who commute to or from the City for housing or employment. Rail transit now has a proven track record in Orange, and Metrolink seeks to expand rail services in support of land use transformations near current and future rail stations.

Metrolink

Metrolink operates seven commuter rail lines in Southern California, two of which pass through Orange. The Orange County Line offers direct connections to Union Station in Los Angeles to the north and to Oceanside to the south. The Inland Empire–Orange County Line provides direct connections to Riverside/San Bernardino to the east and San Juan Capistrano to the south. Roughly 30 Metrolink trains pass through the City on a daily basis. The Metrolink station in Orange is located three blocks from The Plaza at the OTC, close to a variety of stores and civic uses in Old Towne.

A much-anticipated rail service improvement is intra-county rail service along the County's core transit corridor. This service, which will be provided by Metrolink on behalf of OCTA, is an attempt to provide intra-county trips with a high degree of reliability. This 30-minute service is planned to operate between the Irvine Transportation Center (and possibly Laguna Niguel) and the Fullerton Transportation Center throughout the day to supplement Metrolink's peak period commuter service.

The City recognizes that plans to increase daily service on the current Metrolink lines, improvements to the OTC, and future expansion of Metrolink services to new destinations would be beneficial to Orange by providing multi-modal transportation options for people living and working in the community, thus reducing auto dependence for business and leisure purposes.

Anaheim Regional Transportation Intermodal Center

The Platinum Triangle, which borders Angel Stadium in the City of Anaheim, proposes a variety of high-density multiple-family high-rise housing, office space, and commercial uses. ARTIC is located adjacent to the proposed development, between Angel Stadium and the Honda Center. ARTIC is a major regional transportation center similar in scale to Union Station in Los Angeles and Ontario International Airport in Ontario. The intermodal center is be a stopping point for Amtrak, Metrolink, buses, and future high-speed rail systems that connect to Ontario

Airport, Las Vegas, and the Bay Area.

The City of Orange will coordinate with the City of Anaheim, OCTA, and others to ensure that the City is able to take full advantage of the regional mobility benefits offered by ARTIC. Potential benefits offered to the City by ARTIC include:

- a dynamic mixed-use commercial and residential center at the westernmost end of Katella Avenue; and
- bicycle and pedestrian connections to the Santa Ana River.

California High Speed Rail Corridor

The California High-Speed Rail Authority was established as a state agency in 1996 to direct the planning, design, construction, and operation of a future high-speed train system extending from Sacramento, San Francisco, and Oakland in the north to Los Angeles and San Diego in the south. This high-speed train is proposed to stop at ARTIC. OCTA estimates that by 2025, the California High Speed Rail Corridor will serve between 150,000 and 230,000 passengers each week.

Sidewalks, Trails and Bikeways

Walking and biking contribute to a healthy community, and play increasingly significant roles as alternatives to the automobile. The City recognizes this by providing and maintaining sidewalks, trails, and bikeways to support pedestrians and cyclists.

Pedestrian Facilities

In addition to providing basic transportation routes, sidewalks and pathways offer the opportunity to create appealing public spaces that reflect community pride and invite people to walk. Proposed mixed-use areas and reinvigorated commercial areas throughout the City will provide new and reinvented spaces for people to walk and shop. Walkability and access are essential components of a circulation system that easily and specifically accommodates pedestrians. Features that contribute to walkability include wide sidewalks, safe street crossings, design elements that encourage cautious driving, and a pleasant and safe walking environment. Sidewalks, walkways, well-designed pedestrian crossings, pathways, and pedestrian short-cuts allow people to get from one destination point to another with ease. Dedicated pedestrian paths can provide access between residential and activity areas, especially if streets do not connect. Access strategies for school children, seniors, and people with disabilities should also be incorporated into street and sidewalk plans. The City supports proactive integration of pedestrian improvements and amenities within the circulation system to improve walkability.

The City will create and implement a pedestrian-oriented streetscape master plan addressing key commercial corridors, including Tustin Street, Chapman Avenue, Main Street, Lincoln Avenue, and Katella Avenue. The master plan will address all functional aspects of the pedestrian environment. It will identify pedestrian links that need improvement and

strengthening, determine new pedestrian links to underserved areas, ensure adequate sidewalk widths to accommodate lighting and street trees, develop sidewalks in the industrial area that create links between bus stops, encourage safe routes to schools and recreation facilities, and minimize barriers to pedestrian and bicycle access.

Recreational Trails and Bikeways

A comprehensive network of recreational trails and bikeways greatly benefits Orange residents and visitors by providing popular modes of transportation for recreation. In addition to recreation activities, the City also supports walking and bicycling as viable commute alternatives to the automobile. The City's plan for recreational trails and bikeways is shown in Figure CM-3.

The plan includes trails maintained by the County and private homeowners associations, and is consistent with the OCTA *Commuter Bikeways Strategic Plan*. It is also consistent with the County's major riding and hiking trails and off-road paved bikeways. As described in the ***Vision for the Future,*** the plan will enable the City to connect parks to activity centers and residential areas using a combination of recreational trails and bikeways that truly allows people to travel from place to place within the City without needing an automobile.

Recreational Trails

As shown in Figure CM-3, over 70 miles of existing recreational trails are located within the City, connecting a large number of neighborhoods and community parks. In addition, 104 miles of proposed future trails are planned throughout Orange on land currently utilized for a variety of purposes, including flood control, railroad rights-of-way, and roadways.

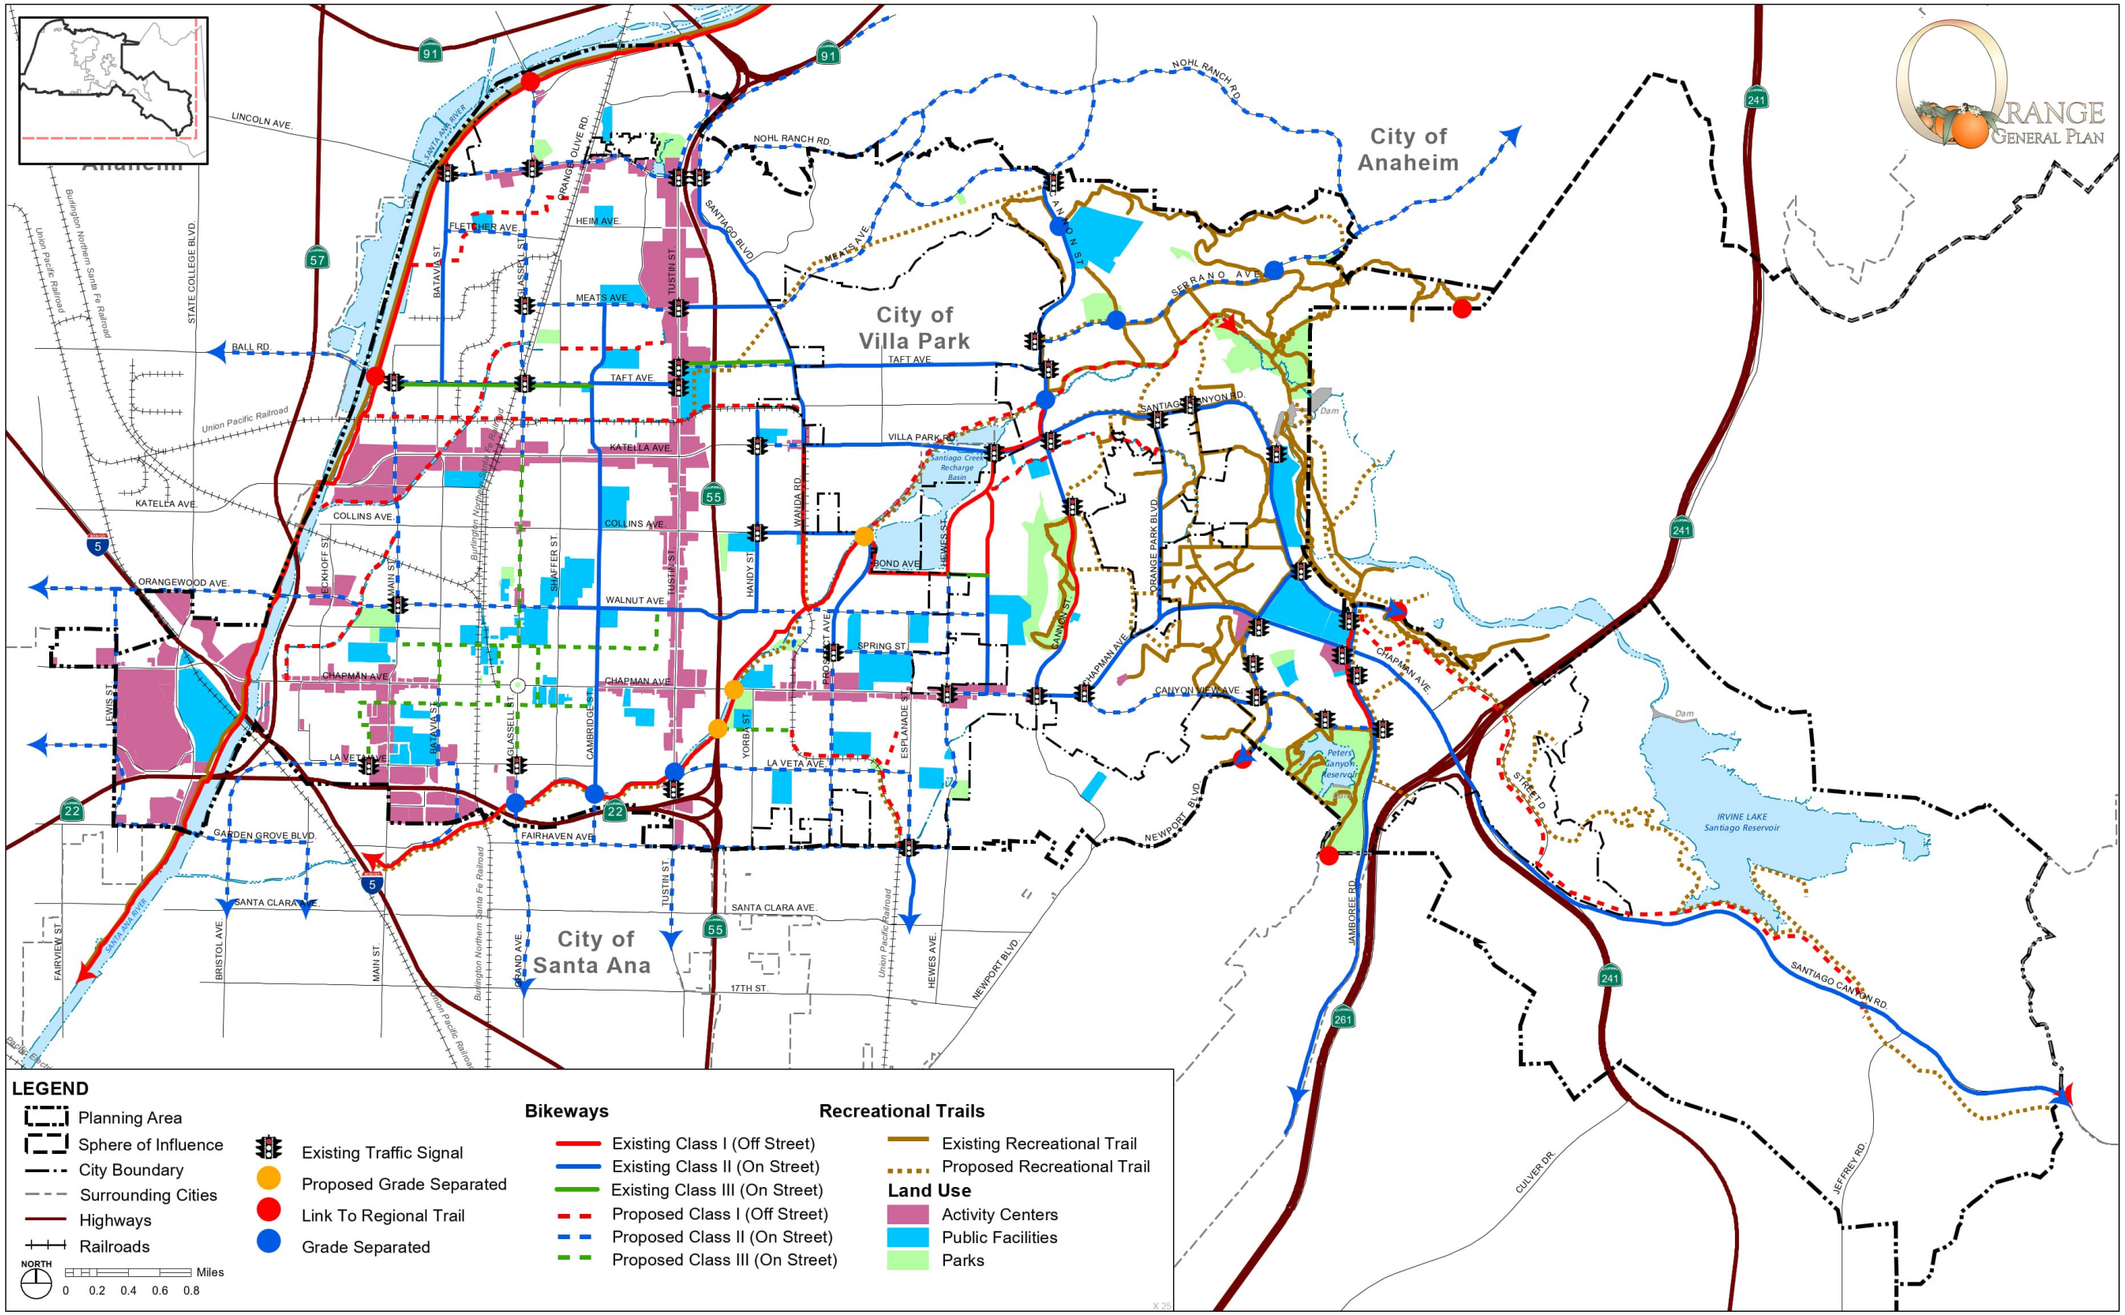
The City will use the annual five-year Capital Improvement Program (CIP) process to prioritize, fund, and build proposed trail segments identified in Figure CM-3. These trails have been and will continue to be constructed and administered through cooperative efforts of the City, County, developers, and private homeowner associations.

Desired cross-sections for recreational trails are identified in Figure CM-4. The City may require construction of portions of proposed trails identified in Figure CM-3 as a condition of development approval for projects located adjacent to the proposed trail alignments. Funding for recreational trails and associated restoration projects comes from a variety of federal, state, and regional sources. Priority for funding of trail improvements will be given to projects that complete loops within the system, provide missing links for regional and local trail systems, or serve as destination links to schools, parks, retail businesses, or regional trails.

Priorities for the recreational trail system include:

- trail connections to the Santiago Oaks Regional Park extension west of Cannon Street, consisting of a connection between Calle Grande and Cannon Street, and the Jamestown trail from the Orange Park Acres equestrian arena to Cannon Street;

- trail connection from Serrano Avenue near Fred Barrera Park to Santiago Oaks Regional Park;
- Mabury Ranch Trail connection from the proposed Cerro Villa Park to the Santiago Oaks Regional Park;
- Serrano Avenue connection near Cannon Street; and
- Additional trail connection into Santiago Oaks Regional Park from Orange Park Acres.



To increase the number of people using non-vehicular means of transportation, the City will encourage putting in place a safe network of crosswalks, grade separations, and walkways to ensure the safety of pedestrians, bicyclists, and equestrians. Where appropriate, traffic calming devices and methods such as median landscaping and provision of bike or transit lanes should be used to slow traffic, improve roadway capacity, and address potential safety issues. The City will continue to work towards improving the overall condition, appearance, and safety of both medians and sidewalks in Orange.

Bikeways

Orange's relatively mild climate permits bicycle riding year-round, and the growing popularity of bicycling has drawn enthusiasts onto the streets and bike trails throughout the City. The plan for recreational trails and bikeways (Figure CM-3) shows the planned system of bikeways within the City. The Orange *Bikeway Master Plan* has established three classes of bicycle routes that adhere to California Department of Transportation (Caltrans) standards:

- **Class I** Off-road bike paths are located on vacated rail lines, water corridors, or areas otherwise separated from streets.
- **Class II** On-road bike lanes are located along arterial roadways that are delineated by painted stripes and other features.
- **Class III** On-road bike routes share use with motor vehicle traffic. They provide a route that is signed but not striped.

Source: City of Orange Community Services Department, 2015.

Figure CM-3 Plan for Recreational Trails and Bikeways

(This Page Left Intentionally Blank)

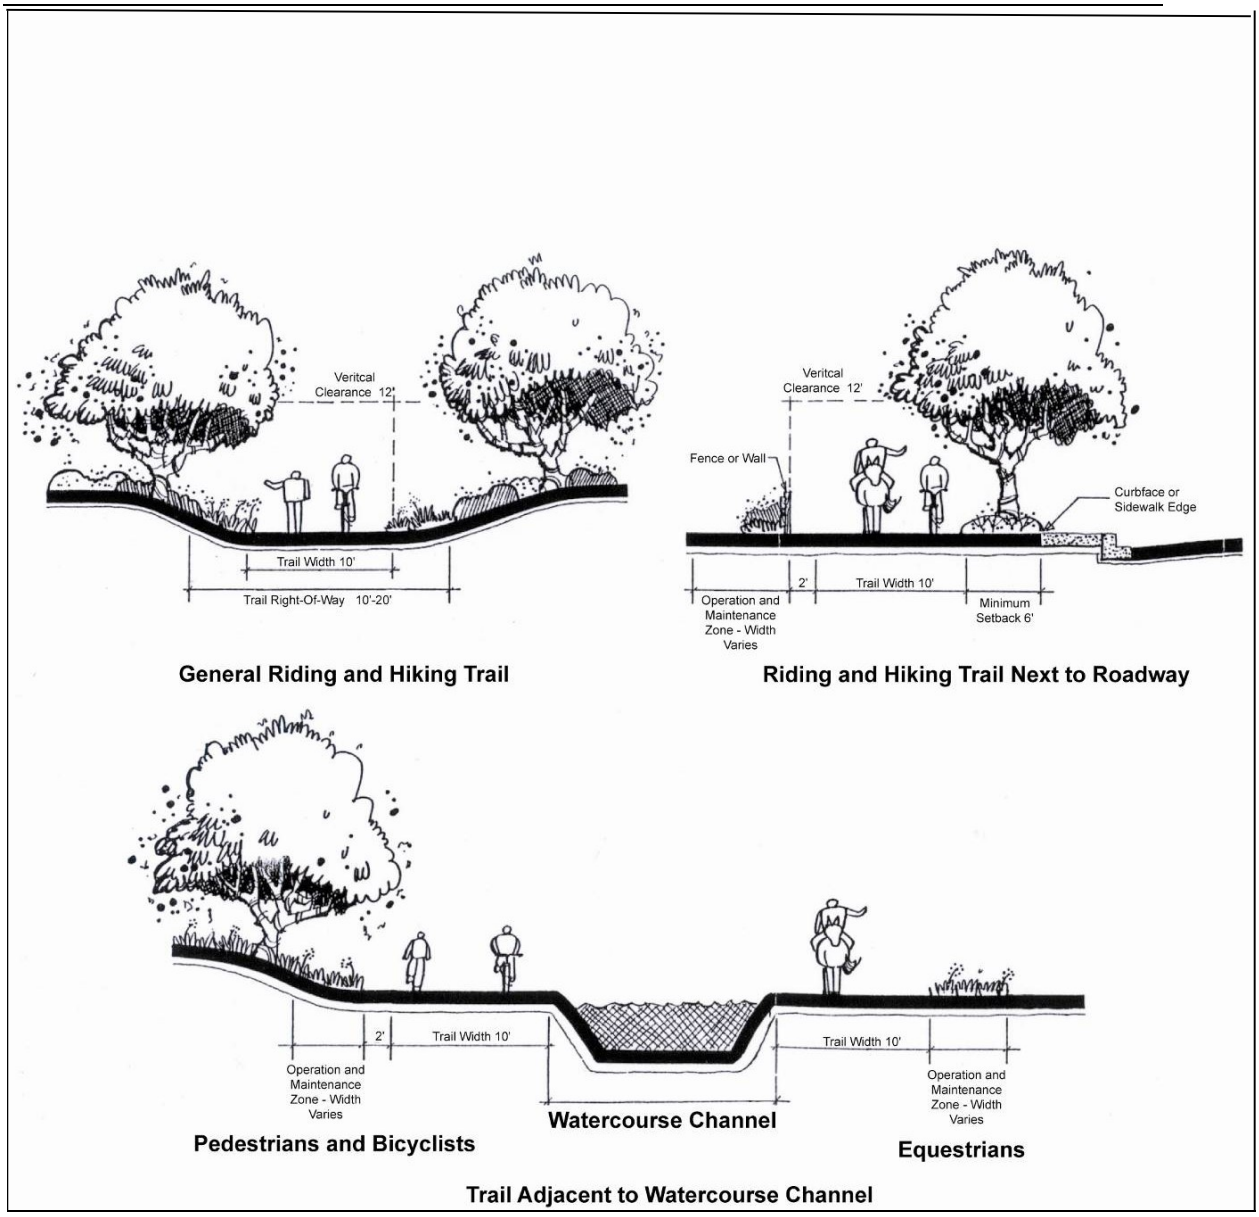


Figure CM-4
Trail Standards

Cross-sections for each type of route are shown in Figure CM-5.

As shown in Figure CM-3, several future bike routes are planned within Orange, including the following high-priority projects:

- Completing Class I bike routes along Santiago Creek and the Tustin Branch Trail
- Establishing Class II bike lanes, including:

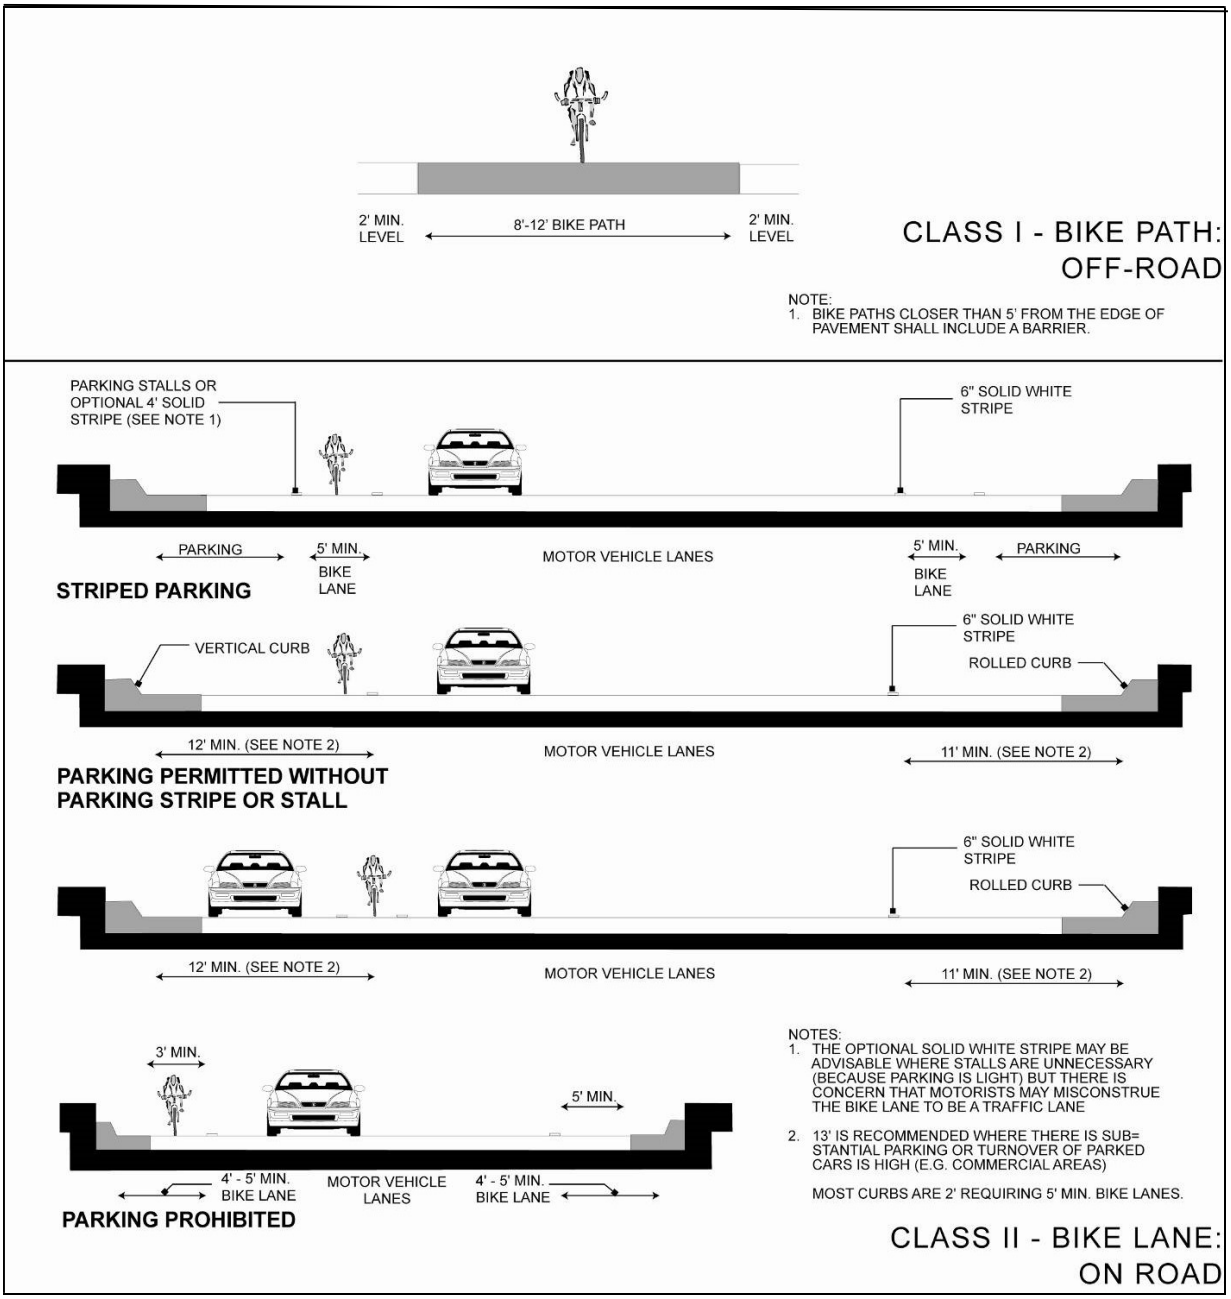

Figure CM-5
Bikeway Standards

  - An east/west corridor on Walnut Avenue from the western City limits to Santiago Boulevard
  - North/south corridors on Main Street from Taft Street to Palm Street, on Batavia Street from Chapman Avenue to La Veta Avenue, and on Parker Street from La Veta Avenue to the City limits
- Establishing Class III routes along Almond Avenue, Feldner Street, and Bedford Street

The City has completed a paved bike trail along Santiago Creek from Tustin Street to the western City limit that continues on to Main Place Mall and the Discovery Science Center as well as two additional segments to the bike trail, which extends the Santiago Creek Trail from Tustin Street to Grijalva Park, and also connect Grijalva Park at Santiago Creek to Collins Avenue along the City-owned portion of the Tustin Branch Trail right-of-way between Walnut and Collins Avenues. The Santiago Creek trail is planned to extend through and beyond the City, connecting the regional Santa Ana River Trail to Santiago Oaks Regional Park and wilderness areas east of Orange. The City will continue to work towards designing a comprehensive bike trail system that is highly accessible and safe for those who wish to use it.

The City has proposed Class II and III routes along many north-south and east-west arterials, all of which connect to pedestrian trails and Class I routes. The City responds to the need to provide safe and efficient bike travel by making every effort to provide bikeways separate from the roadway. When bicyclists must share the road with automobiles, the City will work to improve overall safety.

Currently, two bicycle parking facilities are located in Orange, at the OTC (Metrolink station) and the Old Towne West Metrolink Parking Structure. The City will work to provide greater bike amenities including delineated bike lanes and clear signage along bike trails. The City will also install bicycle racks and safe storage facilities at parking areas for City facilities, as appropriate, and will require privately developed projects to incorporate on-site bicycle facilities in accordance with the City's Zoning Code (Title 17 of the Orange Municipal Code).

Parking Facilities

Although parking is often considered a separate issue from vehicle circulation, it is important to address on-street parking because it has a direct effect on roadway capacity. In order to facilitate improved traffic flow along Orange's major arterials, the City generally plans to permit on-street parking only on streets classified as Primary or Secondary Arterials or Collector Streets.

Off-street parking deficiencies can reduce business activity, and can cause

vehicles to re-circulate on public streets, which increases traffic volumes and congestion by reducing capacity for through traffic. The City's Zoning Code includes parking requirements to ensure that an adequate number of spaces are provided on-site for most uses. The Code also establishes minimum stall dimensions consistent with current standards for other jurisdictions. These regulations apply to all new developments, and may be applied to current uses that are modified or expanded.

Particular concern has been expressed within the community regarding current and expected future parking shortages in Old Towne. Figure CM-6 identifies the location of existing public parking lots in Old Towne. Most Old Towne parking lots have a maximum time limit of three hours, with or without a permit. However, some parking lots, such as the OTC parking located off Chapman Avenue, have no time limit.

Orange will continue to provide sufficient parking to meet community demands. In Old Towne, the City will study the benefits of creating a parking district and the feasibility of developing underutilized parking lots surrounding The Plaza as public parking facilities. The City may encourage the use of shared parking, consolidated parking facilities, and underground parking or parking structures to provide additional off-street parking to meet future demands in areas throughout the City with higher concentrations of commercial uses.

Circulation System Aesthetics

The City has determined that it is necessary and desirable to improve certain roadways and their rights-of-way to enhance the experience for all users of these corridors. Major commercial corridors have been designated within the Urban Design Element to be improved with pedestrian-scale enhancements. Enhancements could include street trees, sidewalk improvements, lighting, bus shelters, and crosswalks. These improvements not only offer a more aesthetically-pleasing experience for all users in these corridors, they also may offer increased safety and security.

Streetscape improvements offer safety and security to both motorists and non-motorists through increased visual cues, better visibility, and increased activity. Many streetscape enhancements provide not only a comfortable environment for the pedestrian and bicyclist, but also offer drivers visual cues that a non-motorist could be expected in an area. Improvements such as striping, bus shelters, and pedestrian-scaled signage guide the non-motorist towards areas that are most appropriate for their use. These same cues help the motorist to see where the presence of pedestrians and bicyclists is most likely to occur. For example, a well-marked crosswalk guides the pedestrian towards the location in the right-of-way most appropriate for crossing, while also alerting the motorist to slow down and look out for pedestrian traffic.

Visibility offered by pedestrian-scaled lighting benefits non-motorists and motorists alike. Pedestrians and bicyclists are better able to see their way, which increases their feelings of security. Improvements that create a sense of security for pedestrians encourage increased use and activity. This increased activity, in turn, leads to a greater feeling of safety. The City has acknowledged the importance of improving the experience of users on many of its major commercial corridors.

GPA 2010-0001 (8/10/10)

CIRCULATION & MOBILITY IMPLEMENTATION

The goals, policies, and plans identified in this Element are implemented through a variety of City plans, ordinances, development requirements, capital improvements, and ongoing collaboration with regional agencies and neighboring jurisdictions. Specific implementation measures for this Element are contained in the General Plan Appendix.

Agenda Item

Planning Commission

Item #: 4.1. 2/2/2026 **File #:** 26-0055

TO: **Chair and Members of the Planning Commission**

THRU: **Hayden Beckman, Planning Manager**

FROM: **Arlen Beck, Associate Planner**

1. SUBJECT

Public Hearing to consider an amendment to the Circulation and Mobility Element of the City of Orange General Plan and finding of CEQA exemption.

2. SUMMARY

The City is proposing an amendment to the City of Orange General Plan Circulation and Mobility Element to reclassify the roadway designation for Santiago Canyon Road (Villa Park Road) between the shared Orange-Villa Park boundary and Cannon Street, and Fairhaven Avenue between the shared Orange-Santa-Ana boundary and Tustin Street (Tustin Avenue) to reflect changing development and traffic patterns.

3. RECOMMENDED ACTION

1. Conduct and close the Public Hearing.
2. Adopt Planning Commission Resolution No. 05-26 recommending the City Council approve General Plan Amendment No. 26-0001 amending the City of Orange General Plan Circulation and Mobility Element to conform to the Orange County Transportation Authority's Countywide Master Plan of Arterial Highways.
3. Find the proposal exempt from the California Environmental Quality Act (CEQA) per State CEQA Guidelines Section 15061(b)(3) (Common Sense Exemption).

4. PROJECT BACKGROUND

The City of Orange was formally requested by adjacent agencies to update roadway classifications for two streets located along the City's jurisdictional boundaries:

- Santiago Canyon Road (Villa Park Road) between the shared Orange-Villa Park boundary and Cannon Street; and
- Fairhaven Avenue between the shared Orange-Santa Ana boundary and Tustin Street (Tustin Avenue).

These requests were initiated by the County of Orange and the City of Santa Ana, respectively, following updated traffic studies that evaluated long-term growth trends, traffic volumes, and roadway design objectives.

Both agencies have already adopted the revised roadway classifications within their own General Plans. The Orange County Transportation Authority (OCTA) has also reviewed and conditionally approved the changes as amendments to the Countywide Master Plan of Arterial Highways (MPAH).

To complete the regional planning process and maintain consistency with neighboring jurisdictions and OCTA, the City of Orange must amend its Circulation and Mobility Element to reflect the same roadway lane configuration.

Although the City of Orange, the County of Orange, the City of Santa Ana, and the OCTA are coordinating to achieve the same roadway reclassification objectives, each agency uses slightly different roadway classification terminology. The intent is to achieve equivalency in terms of number of lanes and median type. Therefore, for clarity and consistency, this staff report uses the roadway classification naming conventions established in the Circulation and Mobility Element of the City of Orange General Plan.

5. PROJECT DESCRIPTION

Santiago Canyon Road (Villa Park Road)

A transportation assessment prepared by Fehr & Peers evaluated Santiago Canyon Road (Villa Park Road) from Wanda Street to Cannon Street, spanning multiple jurisdictions. The study analyzed:

- Traffic operations and level of service;
- Vehicle queueing;
- Safety conditions; and
- User comfort for pedestrians and bicyclists.

The analysis determined that the roadway's existing Major Arterial (6-Lane Divided) designation does not align with current traffic forecasts or the available 100-foot right-of-way. Instead, an Asymmetric Major Arterial (5-Lane Divided) configuration, three westbound lanes and two eastbound lanes, would adequately serve future demand while fitting within existing constraints and meeting General Plan level of service requirements for roadway performance.

This revised designation also allows space for buffered Class II bicycle lanes, improving multimodal safety and comfort.

Fairhaven Avenue

Through their comprehensive General Plan Update, the City of Santa Ana conducted a Transportation Impact Study which included the evaluation of Fairhaven Avenue between Tustin Street (Tustin Avenue) and Yorba Street as a distinct roadway segment for both Existing Year (2020) and Future Year (2045) conditions. The analysis provided:

- Average Daily Traffic volumes
- Roadway Level of Service based on volume-to-capacity (V/C) ratios
- Consistency between observed/forecasted traffic demand and the Circulation Element roadway classification

The Transportation Impact Study determined that Fairhaven Avenue's existing Secondary Arterial (4-Lane Undivided) designation is inconsistent with both observed and forecasted traffic volumes,

supporting its reclassification to a Two-Lane Secondary Arterial (2-Lane Divided) to better align with operational performance and Complete Streets objectives, which supports lower design speeds, and allows for enhanced pedestrian, bicycle, and streetscape features without compromising roadway performance while also meeting General Plan level of service requirements for roadway performance.

Subsequently, OCTA conditionally approved the reclassification from a Secondary Arterial (4-Lane Undivided) to a Two-Lane Secondary Arterial (2-Lane Divided). This change reflects lower than anticipated growth, updated traffic volumes, and surrounding land use context.

The amendment requires the City of Orange to update our General Plan to achieve consistency (number of lanes and median type) in order for the OCTA MPAH Amendment to become final.

6. PROJECT ANALYSIS

Reclassification of Roadways:

The City of Orange's Circulation and Mobility Element (Circulation Element) identifies goals, objectives, policies and implementation programs that affect the transportation system. The Circulation Element contains policies on the development of the transportation facilities necessary to accommodate orderly growth within the City, provides guidance for future planning efforts, and ensures a balanced transportation system. As a part of the Circulation Element, the Circulation & Mobility Plan documents existing transportation facilities and identifies the desired future conditions of these facilities. The Circulation Element defines the different classifications of roadways to accommodate various daily capacity and functions.

The existing Circulation & Mobility Plan includes six roadway classifications. For each roadway classification, the level of service (LOS) is identified to indicate the performance measure for an arterial that meets the City's required daily capacity minimum of LOS D. Finally, the City Master Plan of Streets and Highways illustrates the proposed roadway classification for each major roadway within Orange.

The proposed General Amendment will reclassify two specific roadway segments within the City as follows:

1. Santiago Canyon Road between the shared Orange-Villa Park boundary and Cannon Street to be reclassified from Major Arterial (6-lane divided) to Asymmetric Major Arterial (5-lane divided); and

2. Fairhaven Avenue, between the shared Orange-Santa Ana boundary and Tustin Street from Secondary Arterial (4-Lane Undivided) to Two-Lane Secondary Arterial (2-Lane Divided).

Attachment 2 identifies the two roadway segments to be reclassified. Additionally, this proposed General Plan Amendment will create two more roadway classifications:
1) Asymmetric Major Arterial (5-Lane Divided) and 2) Two-Lane Secondary Arterial (2-Lane Divided). Adding these two classifications will result in a total of eight roadway classifications within the Circulation & Mobility Plan. Attachment 3 contains the proposed changes to the Circulation Element, including an updated City Master Plan of Streets and Highways. The requested reclassifications for both Santiago Canyon Road and Fairhaven Avenue follow adopted reclassifications by neighboring agencies and OCTA.

The County of Orange prepared a traffic analysis for the reclassification of Santiago Canyon Road (named Villa Park Road within County limits) between Hewes and Cannon Street (Attachment 4) from a divided 6-lane to a divided 5-lane roadway. The results of this analysis support the proposed reclassification, and in May 2025, the County of Orange adopted the reclassification of Villa Park Road (Santiago Canyon Road) (Attachment 5). OCTA, in anticipation of the County of Orange's General Plan amendment, adopted this reclassification in OCTA's Master Plan of Arterial Highways in September 2024 (Attachment 6). OCTA's adoption of the reclassification of Santiago Canyon Road requires the City of Orange to update their General Plan to reclassify this road segment in kind.

As part of a recent General Plan update, the City of Santa Ana evaluated various roadway segments, including Fairhaven Avenue, for reclassification. The results of Santa Ana's traffic analysis supports the reclassification of Fairhaven Avenue, between Grand Avenue to Tustin Street, from an undivided 4-lane to a divided 2-lane roadway (Attachment 7). Santa Ana adopted an updated General Plan in April 2022 (Attachment 8), which includes an updated Mobility Element showing the reclassification of Fairhaven Avenue (Attachment 9). OCTA, in response to Santa Ana's request to reclassify Fairhaven Avenue, conditionally approved the adoption of this reclassification in OCTA's Master Plan of Arterial Highways (Attachment 10). OCTA's conditional adoption of the reclassification of Fairhaven Avenue stipulates that the City of Orange must also reclassify this segment of Fairhaven Avenue in kind.

It is important that the City's Master Plan of Streets and Highways is consistent with neighboring jurisdictions, such as the County of Orange and Santa Ana, to ensure the City's circulation system develops in a manner that promotes regional mobility. This amendment will achieve this consistency.

7. AUTHORIZING GUIDELINES

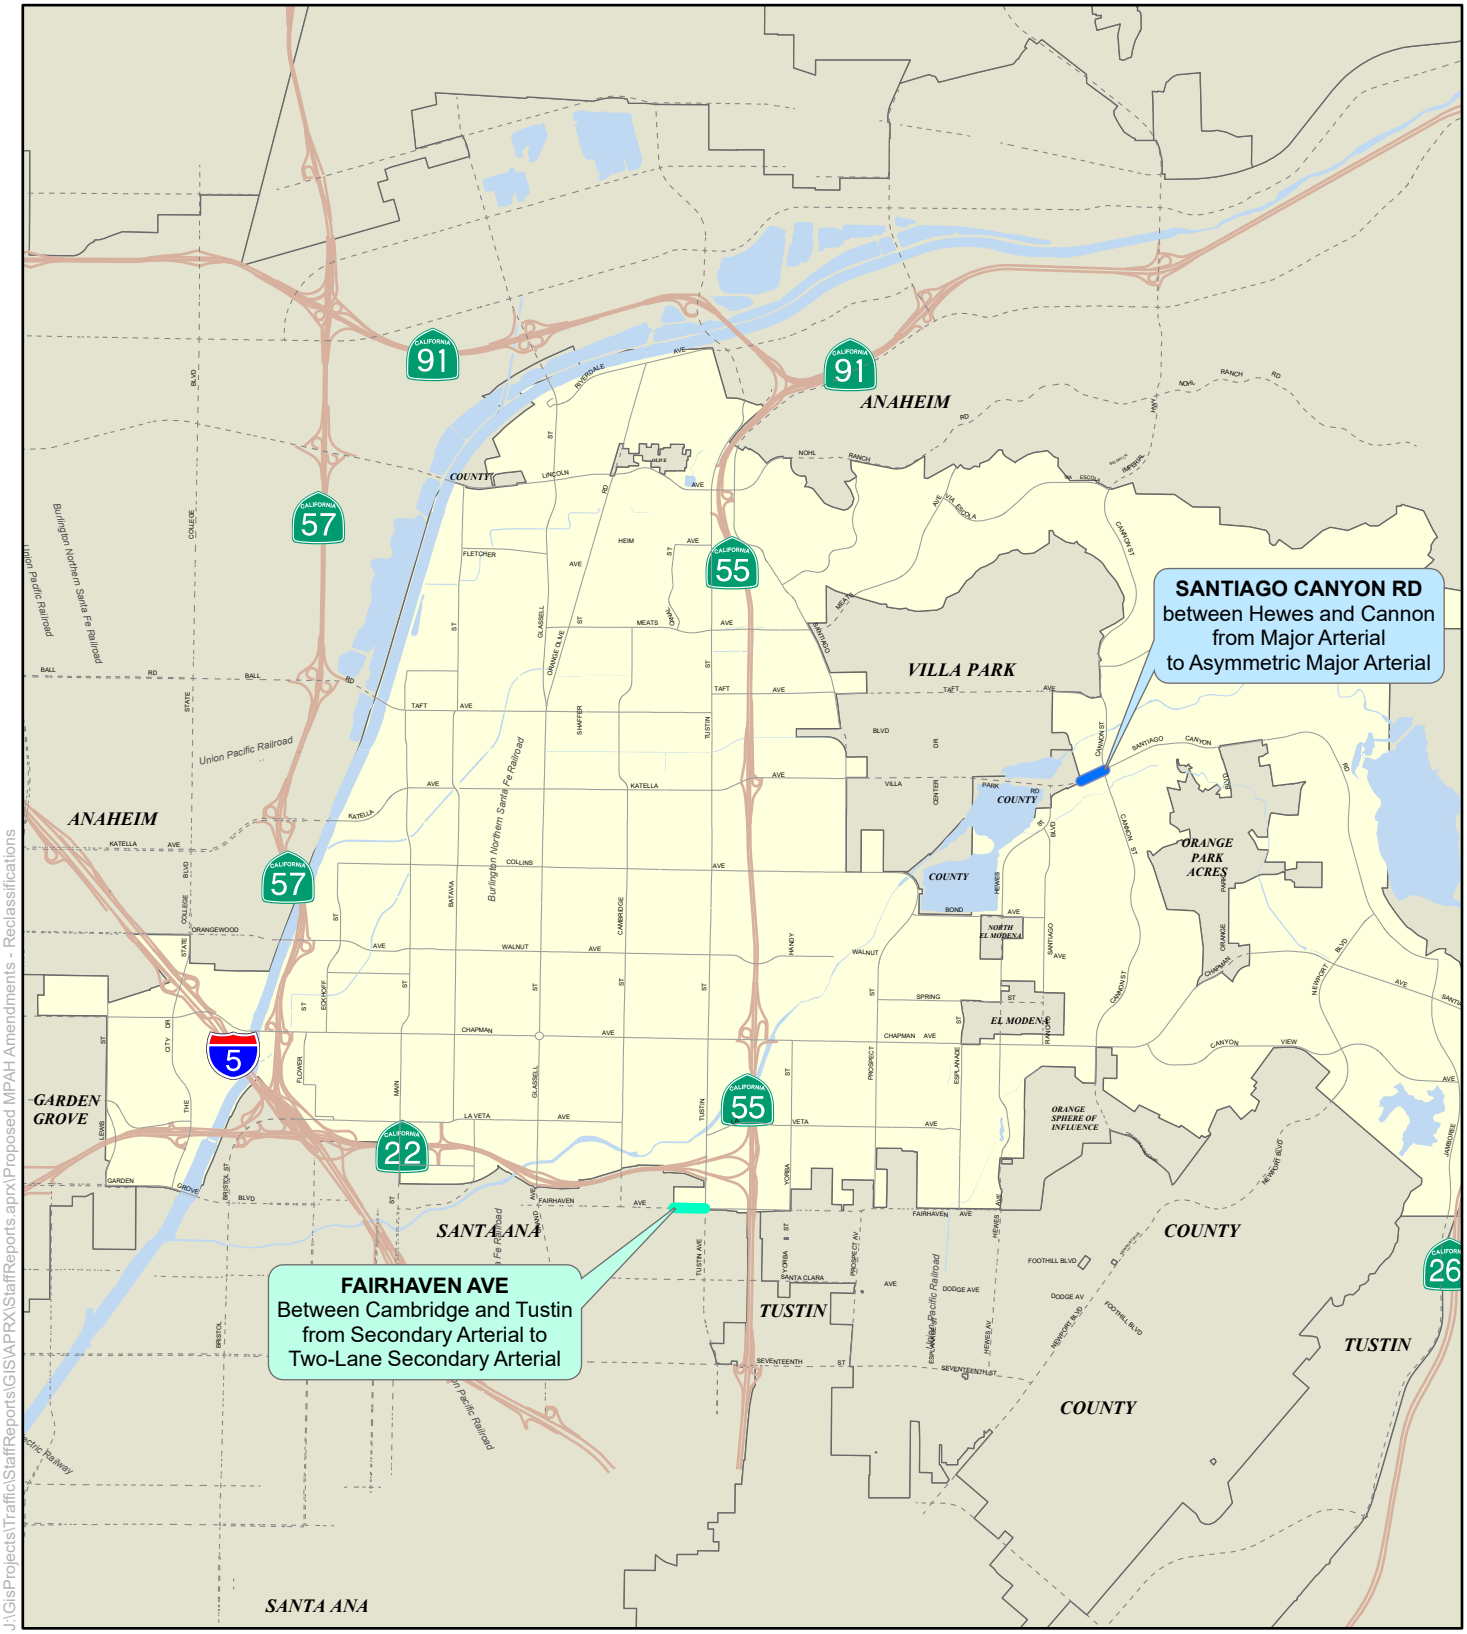
Orange Municipal Code Section 17.08.020 and 17.10.010 authorizes the Planning Commission to review and make advisory recommendations to the City Council on General Plan Amendments.

8. PUBLIC NOTICE

On January 22, 2026, a notice was published in the Orange City News newspaper for a public hearing before the Planning Commission on February 2, 2026.

9. ENVIRONMENTAL REVIEW

The proposed project is categorically exempt (Common Sense Exemption) from the provisions of the California Environmental Quality Act (CEQA) per State CEQA Guidelines Section 15061(b)(3) because there is no possibility that the revisions to the roadway designations may have a significant effect on the environment.



10. ADVISORY BOARD ACTION

None.

CITY OF ORANGE

PROPOSED CITY MASTER PLAN OF STREETS AND HIGHWAYS AMENDMENT
RECLASSIFICATIONS

CIRCULATION & MOBILITY

INTRODUCTION AND VISION FOR THE FUTURE

Orange's circulation system has been influenced by a variety of historical factors, including the presence of the Santa Fe Railroad, the vision of Alfred B. Chapman and William T. Glassell, the agricultural history of the area, and alternative transportation modes including a historic streetcar system.

In 1887, the Santa Fe Railroad came to Orange and built a station four blocks west of the Plaza. The coming of the railroad set off a real estate boom that brought hundreds of settlers to the area. The railroad also influenced the City's early economic success by providing a means to transport goods, especially citrus, to the entire country. Today, the railroad tracks continue to serve freight trains and provide a critical link to the region via the Metrolink heavy rail transit system.

In the 1870s, Alfred B. Chapman and William T. Glassell subdivided their land into residential and small farm lots centered on a roundabout known today as Plaza Park. Plaza Park was dedicated in 1886 and established the City's two main streets – Chapman Avenue and Glassell Street – as well as the compact street grid of Old Towne Orange. The street grid and railroad system were supported historically by a streetcar system that connected the small towns and settlements that make up the City today.

Over time, the small farms on the outer edges of Orange's core district began to disappear. Two factors influenced this change: the demand for housing after World War II and the appearance of "Quick Decline" disease that destroyed the local citrus industry. As each farm was developed independently, the grid system expanded outward and commercial corridors were established. Orange's roadways began to take on a more suburban pattern of collectors, connectors, and arterials. As development reached the eastern portion of the City, the grid gave way to curvilinear street patterns.

The historic roadways and railways that form the basis for the current circulation network have been complemented over the years by the development of a streetcar system, a transit service, an emerging and continually expanding bicycle trail and route network, and routes for equestrian use in the eastern portion of the City. The City will continue to be served by these multiple modes of transportation and other emerging mobility technologies.

Orange's ***Vision for the Future***, described in the General Plan Introduction, recognizes that the circulation system is a key component of the quality of life in the City. Accordingly, the vision includes the following objectives:

- Residential areas will be connected to commercial, recreational, and open space areas, as well as educational and cultural facilities via a balanced, multi-modal circulation network that accommodates vehicles, pedestrians, cyclists, hikers, and equestrians. This network will create additional opportunities for walking and biking, enhancing safety and well-being for neighborhoods and businesses.
- The City will work to define neighborhoods through the use of open space areas and a trail system that provides a source of aesthetic beauty and recreational opportunities. These open space areas support a healthy and active community.
- We will develop a connected multi-modal network for traveling from one end of town to the other that provides the option for residents from different neighborhoods to access parks, open spaces, and scenic areas by vehicle, transit, foot, bicycle or, where appropriate, horse.

Purpose of the Circulation & Mobility Element

California's General Plan Guidelines mandate that the Circulation & Mobility Element fulfill the following objectives:

- Show a direct relationship to the Land Use Element to ensure that any changes to land use as stated by the Land Use Element and growth occur with adequate circulation and transportation facilities in mind.
- Address relevant issues including the adequacy of "major thoroughfares, transportation routes, terminals, other local public utilities and facilities." The goal of the Circulation & Mobility Element is to identify circulation problems related to these facilities in the early stages and resolve them in local goals and policies without costly delays.

Other relevant issues discussed in the Circulation & Mobility Element include those that address streets, highways, public transit routes, railroads, bicycle and pedestrian routes, recreational trails, paratransit, parking, transportation system management, and air pollution. The hierarchy of streets within the residential areas helps to frame the urban form. Connections between neighborhoods can be achieved by a comprehensive network of sidewalks and trails. Also, the commercial corridors can be enhanced with adequate street capacity, public transit, and pedestrian-friendly environments.

The state also recommends that the Circulation & Mobility Element address coordination efforts among the local, regional, and state transportation plans to better resolve circulation issues. Since many transportation concerns are regional, addressing them requires intergovernmental and regional transportation management plans and policy implementation. These partnerships ensure the most efficient use of funding, infrastructure, and other resources. The state also recommends the "preservation of transportation corridors for future system improvements."

The Circulation & Mobility Element prioritizes the issues and opportunities that exist within Orange's transit network. It is directly responsive to proposed changes in land use and anticipates the impacts of those changes. This Element also seeks to reassure residents and businesses that the City recognizes the link between transportation and land uses, and provides a means to mitigate the impacts of growth.

Another goal of the Circulation & Mobility Element is to increase transportation options and provide increased access to the circulation system for all residents of Orange. This goal includes improved rail and bus transit connections and frequency, implementation of a *Bikeway Master Plan,* and completion of a trails system. Transforming many of Orange's historically auto-oriented commercial corridors, such as Katella Avenue, Main Street, and portions of La Veta Avenue, Chapman Avenue, and Glassell Street into more pedestrian-friendly mixed-use environments is an overarching goal. Where possible, the development of equestrian trails is also encouraged.

One of the main functions of the Circulation & Mobility Element is to guide and direct enhancement of the current circulation system for existing and future developments. Thus, circulation provisions correlate with the Land Use Element to avoid unchecked growth and unnecessary congestion.

Another key objective of the Element is to work toward a future circulation network that provides meaningful alternatives for getting around the community by less auto-dependent means. The City's topography, street and sidewalk system, transit and trail framework, and land use relationships provide an excellent foundation for pursuit of this objective.

The Circulation & Mobility Element does not simply determine automobile routes. It also guides the movement of people and goods, directly affecting Orange's physical, social, and economic environment. Since circulation permits accessibility to places and social amenities, it can either improve or cause deterioration in quality of life. Circulation efficiency also plays a major role in progress and development of the City's economy.

Scope and Content of the Circulation & Mobility Element

The Circulation & Mobility Element comprises three sections:

(1) Introduction;
(2) Issues, Goals, and Policies; and
(3) The Circulation & Mobility Plan.

The first section introduces the contents of the Circulation & Mobility Element. The second section presents issues, goals, and policies for improving circulation. The third section includes the Circulation & Mobility Plan, which designates locations and standards for roadways and non-motorized circulation facilities, and states the community's desired level of transportation service.

Implementation measures designed to promote achievement of the goals and policies are provided in an Appendix to the General Plan.

Relationship to other General Plan Elements

California planning law requires that the Circulation & Mobility Element correlate and maintain consistency with the other General Plan elements. The Circulation & Mobility Element relates most closely to the Land Use, Natural Resources, Noise, Economic Development, Housing, and Urban Design Elements.

The Circulation & Mobility Element is linked to the Land Use Element because the General Plan land use designations identified in the Land Use Element serve as a basis for the allocation of vehicle trips and establishment of capacity levels for circulation planning. The Land Use Element also provides land use designations that accommodate mixed commercial and residential development, which encourage shorter trips and improve the efficiency of the transportation network. The Circulation & Mobility Plan is established to define and provide for adequate levels of service and facilities to support future land uses. This Element recommends roadway and intersection improvements that may require land acquisition. Location of public transportation facilities will also influence pedestrian activity and transit-oriented development, and the physical size of streets will affect urban land uses and the physical appearance of the City.

The Natural Resources Element identifies regional air quality objectives and provides appropriate mitigation efforts that affect the Circulation & Mobility Element. Improving access, encouraging alternative modes of travel, and maintaining air quality and conservation standards are common objectives of the Natural Resources and the Circulation & Mobility Elements.

The Noise Element addresses future noise levels associated with roadways, rail, and other transportation facilities. Future volumes of traffic on the circulation system are directly related to future noise levels and mitigation strategies.

The Economic Development Element identifies desirable economic conditions and land uses that enhance and promote business activity, employment growth, and economic stability. The goals and policies of the Circulation & Mobility Element will determine road capacity in Orange, which will impact the type and location of uses, and parking and access considerations associated with future uses. Both elements share a common objective of planning for future transportation infrastructure needs. Maintaining roadways, bikeways and bus and rail transit facilities is critical to the success of both current and future businesses in Orange.

The Urban Design Element is a framework for shaping the future form and character of Orange. The quality of Orange's physical environment contributes to its identity, attracts new residents, and sets the stage for economic activity. The Urban Design Element builds on the foundation of Orange's already strong sense of place to preserve and strengthen the streetscape environment of commercial corridors and landmarks within the city. The Urban Design Element and Circulation & Mobility Element share a common objective to reinvent City streets as more functional and walkable public places.

ISSUES, GOALS, AND POLICIES

The goals, policies, and implementation programs of the Circulation & Mobility Element seek to achieve a better balance between vehicular, pedestrian, and bicycle travel, and to provide a wide range of viable transportation options to Orange residents. The following six issues are addressed: (1) enhancing the local circulation system; (2) maintaining the regional circulation system; (3) maintaining a viable public transportation network; (4) creating a comprehensive system of sidewalks, trails, and bikeways; (5) providing adequate parking facilities; and (6) improving circulation system aesthetics and safety.

Local Circulation System

The local roadway system serves the community's primary needs for mobility and access, and consists of a hierarchy of City streets to meet those needs. The City's original street system was established as a grid pattern long before a Master Plan of Arterial Highways (MPAH) was adopted. The Old Towne area and many postwar neighborhoods were designed in a classic grid configuration, while in newer parts of the City, physical features such as the Santa Ana River, Santiago Creek, hilly terrain, freeways and the presence of the City of Villa Park have resulted in a system without a definitive pattern. Some major roads do not connect the eastern and western portions of the City and consequently do not provide effective through circulation. A well-designed roadway system will provide convenient access to activities in Orange.

GOAL 1.0: **Provide a safe, efficient, and comprehensive circulation system that serves local needs, meets forecasted demands, and sustains quality of life in neighborhoods.**

Policy 1.1: Plan, build, and maintain an integrated, hierarchical, and multi-modal system of roadways, pedestrian walkways, and bicycle paths throughout the City.

Policy 1.2: Identify key intersections and streets with historical or projected traffic congestion problems and apply creative traffic management measures to improve overall circulation.

Policy 1.3: Consider various methods to increase safety on City arterials and neighborhood streets, including landscaping, provision of bike/transit lanes, and consideration of traffic calming on neighborhood streets in accordance with the City's Neighborhood Residential Traffic Management Program.

Policy 1.4: Prohibit on-street parking where possible to reduce bicycle/automobile conflicts in appropriate target areas as recommended by the *Bikeways Master Plan*.

Policy 1.5: Address possible safety and noise effects of increased rail activity on grade crossings throughout the City.

Policy 1.6: Maintain and repair roadways and sidewalks as necessary to improve circulation and safety.

Policy 1.7: Consolidate driveways along roadways that provide access to commercial uses to minimize side street interruption and promote smooth traffic flows. On-street parking is prohibited on commercial access streets to provide adequate curb-to-curb width for travel lanes.

Regional Circulation System

Mobility in Orange is directly related to the regional transportation network, as the City lies at the confluence of several regional freeways: the Santa Ana Freeway (Interstate 5), Orange Freeway (State Route [SR] 57), Garden Grove Freeway (SR-22), Costa Mesa Freeway (SR-55), Riverside Freeway (SR-91) and Eastern Transportation Corridor (SR-241). In addition to the freeways, other connections to the region include the commuter rail system known as Metrolink, a freight and goods rail transport system, and a regional bikeways system with connections to the Santa Ana River and other locations. Orange is also connected to the region via the Orange County Transportation Authority (OCTA) bus system. City infrastructure must accommodate regional through traffic originating in other communities in addition to providing local residents access to the regional network.

GOAL 2.0: Provide an effective regional transportation network.

Policy 2.1: Ensure consistency with the County MPAH in order to qualify for funding programs.

Policy 2.2: Coordinate with adjacent cities to plan and develop major east/west and north/south arterials and rapid transit to connect the City with the cities of Anaheim, Tustin, Santa Ana, Garden Grove, and Villa Park, as well as developing areas within the City's sphere of influence.

Policy 2.3: Cooperate with and support local and regional agencies' efforts to improve regional arterials and transit in order to address increasing traffic congestion.

Policy 2.4: Coordinate land use planning with anticipated future development of roadways and other transportation facility improvements as well as the expansion of commuter rail and bus service.

Policy 2.5: Ensure that transportation facilities and improvements do not degrade the quality of Orange's commercial and residential areas.

Policy 2.6: Encourage the use of regional rail, transit, bicycling, carpools, and vanpools for work trips to relieve traffic congestion.

Policy 2.7: Continue to support the use of rail corridors within the City for the movement of freight and goods, and work with rail operators to minimize associated traffic delays.

Public Transportation

Public transportation is a crucial component of a comprehensive circulation system. In addition to reducing air pollution and traffic congestion, a successful public transit system provides an alternative mode of travel for those with limited mobility, residents who may not have access to a car, and persons who choose not to drive.

GOAL 3.0: **Connect centers within the City to each other and to the region through efficient and accessible public transportation.**

Policy 3.1: Work with OCTA and other agencies to assess City public transportation needs and to ensure delivery of services when and where they are needed.

Policy 3.2: Enhance and encourage provision of convenient and attractive transit amenities and streetscapes to encourage use of public transportation (e.g., benches, trash cans, shelters, and lighting).

Policy 3.3: Require incorporation of transit-oriented design features within major commercial and employment areas as well as in medium density residential and mixed-use development areas.

Sidewalks, Trails, and Bikeways

In addition to offering recreational and public health benefits, non-vehicular modes of transportation offer commuting options. Also, the mixed-use environments advocated by Land Use Element policies will encourage increased pedestrian activity on City sidewalks for both business and pleasure. An effective pedestrian, bicycle, and equestrian network must be safe and accessible, and must connect key activity centers within the City with each other and with the regional trail system. A comprehensive network of on-street bicycle lanes, off-street bicycle paths, sidewalks, and trails should be developed and maintained to increase the safety and utility of the system, with a particular focus on the City's sidewalk deficient industrial areas

GOAL 4.0: **Provide efficient and accessible modes of pedestrian, bicycle, and equestrian transportation and improved facilities and amenities.**

Policy 4.1: Create a comprehensive bicycle network that is integrated with other transportation systems by establishing complementary on-street and off-street facilities as identified in the City of Orange *Bikeways Master Plan* and OCTA *Commuter Bikeways Strategic Plan*, including Santiago Creek, the Santa Ana River, and the Tustin Branch Trail.

Policy 4.2: Install racks and safe storage facilities at parking areas for City facilities, as appropriate, and encourage incorporation of such facilities within privately-developed projects.

Policy 4.3: Improve citywide awareness of automobile and bicycle safety.

Policy 4.4: Encourage use of the bikeway system by providing adequate signage, trail markings, and other amenities.

Policy 4.5: Ensure that pedestrian sidewalks, trails, and bikeways are safe environments through the use of crime prevention-oriented trail design features, lighting where appropriate, pedestrian and bicycle safety improvements at at-grade rail crossings, access for emergency vehicles, and links to the roadway signal system.

Policy 4.6: Explore opportunities to convert abandoned rail corridors into segments of the City's bikeway and pedestrian trail system.

Policy 4.7: Provide ADA accessible sidewalks and pedestrian amenities throughout the City.

Policy 4.8: Expand and maintain an equestrian trail network and provide for appropriate staging areas and infrastructure.

Parking Facilities

A shortage of parking can cause circulation problems and could lead to a reduction or loss of business activity. Old Towne Orange has been identified as an area of particular concern. As the City develops, providing adequate parking adjacent to other activity centers is increasingly important.

GOAL 5.0: Provide adequate parking to meet the needs of activity centers throughout the City.

Policy 5.1: Provide adequate parking to protect and support the economic vitality and diversity of Old Towne.

Policy 5.2: Plan for and design parking facilities throughout the City that are adequate to meet demand, but also consider land use-parking efficiencies, and the surrounding natural and built environment.

Policy 5.3: Encourage adjacent businesses to consolidate parking facilities and access points.

Policy 5.4: Encourage well-designed structured parking in commercial areas where such features would be economically feasible, safe, and visually integrated with existing development.

Circulation System Aesthetics

Streets that have been made or modified to include visual and pedestrian amenities can improve the overall look and feel of City streets, as well as enhancing functionality for all users. As major commercial corridors are beautified and changed to include a pleasant pedestrian environment, this will have positive effects on the feelings of safety and security for pedestrians, bicyclists, and motorists.

GOAL 6.0: Provide roadway corridors that are aesthetically pleasing and contribute to a feeling of safety, security, and comfort for motorists, bicyclists, and pedestrians.

Policy 6.1: Supply adequate, clear, and correctly placed signage to direct both motorists and non-motorists toward destinations and away from hazards.

Policy 6.2: Provide clear indicators in the right-of-way for where pedestrians and bicyclists are encouraged to walk, bike, or cross safely. These may include special paving, line stripes, and crosswalks.

Policy 6.3: Provide lighting, landscaping, street trees, and other appropriately scaled streetscape features that accommodate all users on commercial corridors. Where appropriate, lighting should be scaled for autos as well as pedestrians.

CIRCULATION & MOBILITY PLAN

The objective of the Circulation & Mobility Plan is to document existing transportation facilities in the planning area used for the movement of people and goods. The Element addresses the desired future condition of these facilities, and their relationship to future land uses identified in the Land Use Element. The Plan describes the circulation system, including the arterial network and intersections, the public transit system, bicycle paths, recreation facilities, parking, and railroad operations. The City's circulation network includes an extensive system of roadways, bus transit service, commuter rail, and freight rail.

Local Circulation System

A well-designed local arterial roadway system that connects to a well-developed regional circulation system provides safe and convenient access to employment, housing, recreation, and commercial areas in Orange. City arterial roadways located on the western side of SR-55 generally follow north-south and east-west orientations. On the eastern side of the freeway, arterials are characterized by curvilinear streets due to undulating geographical surroundings. Key north-south arterials include Tustin Street, Glassell Street, Main Street, and The City Drive. Key east-west arterials include Chapman Avenue, Katella Avenue, Taft Avenue, and parts of La Veta Avenue. These arterial roadways are in turn supported by a network of collector and local streets that provide access to homes and businesses throughout the City.

Roadway Classification System

The City's roadway network is distinguished by a hierarchical classification system that differentiates roads by size, function, and approximate daily capacity based upon Level of Service D (LOS D). LOS is a qualitative measure that characterizes traffic congestion on a scale of A to F with LOS A representing a free-flow condition and LOS F representing extreme congestion. LOS standards can apply to either intersections or links (a section of street between two intersections). Generally speaking, LOS represents the ability of a roadway or an intersection to accommodate traffic.

In the City, intersections are used as actual control points. City roadways consist of both divided and undivided roadways. Divided roadways generally contain a physical barrier or buffer, such as a raised median or a continuous two-way left turn lane, between each direction of travel. Divided roadways remove vehicles making a left turn from the travel lanes so as not to impede through traffic and constrict roadway capacity. Undivided roadways do not contain a buffer between each direction of travel, and therefore left-turning traffic can impede through traffic. Undivided roadways may provide turn movement pockets at intersections. The ~~six~~ eight categories of roadways in Orange are summarized in Table CM-1. Proposed cross-sections for each type of roadway are shown in Figure CM-1.

The City's policy is to use a link capacity standard of LOS D. The following paragraphs represent link capacities of each roadway type at LOS D.

Table CM-1 Roadway Classifications		
Classification	**Facility Type**	**Characteristics**
Smart Street	Smart Street	4-8 lane divided, with possible signal coordination, intersection capacity improvements and/or grade separations
Principal Arterial	8 Lane Divided	Primarily serves through traffic with limited local access
Major Arterial	6 Lane Divided	Serves mostly through traffic with some local access allowed
Asymmetric Major Arterial	5 Lane Divided	Serves mostly through traffic with some local access allowed
Primary Arterial	4 Lane Divided	Serves through and local traffic
Secondary Arterial	4 Lane Undivided	Serves through and local traffic
Two-Lane Secondary Arterial	2 Lane Divided	Serves through and local traffic
Collector Street	2 Lane	Serves mostly local traffic

Smart Streets are typically four- to eight-lane roadways with enhanced capacity and smoother traffic flow than standard arterial streets. These streets have enhanced features such as traffic signal synchronization, bus bays, intersection improvements, and the addition of travel lanes by removing on-street parking and consolidating driveways. The traffic carrying capacities of Smart Streets can range from 60,000 to 79,000 vehicles per day, depending on the number of lanes, degree of access control, peak period loading, and the configurations of major intersections.

Principal Arterials are typically eight-lane divided roadways with medians or continuous two-way left turn lanes. They can accommodate up to 67,500 vehicles on an average weekday at LOS D conditions, depending on the degree of access control, peak period traffic loadings, and lane configurations at major intersections. Principal arterials prohibit on-street, curbside parking, and connect directly to freeways.

Major Arterials are six-lane divided roadways with medians or continuous two-way left turn lanes. They can accommodate up to 50,700 vehicles on an average weekday at LOS D conditions, depending on the degree of access control, peak period traffic loadings, and lane configurations at major intersections. Major arterials facilitate traffic circulation within Orange, and may prohibit on-street, curbside parking.

Asymmetric Major Arterial are five-lane asymmetrical divided roadways with medians or continuous two-way left turn lanes. They can accommodate up to 42,250 vehicles on an average weekday at LOS D conditions, depending on the degree of access control, peak period traffic loadings, and lane configurations at major intersections. Asymmetric major arterials facilitate traffic circulation within Orange, and may prohibit on-street, curbside parking. Occasionally, based on projected volumes, it is necessary to have a cross section with more lanes in one direction than the other (asymmetric lanes) along some Major arterials. The most typical application would be for arterial segments where adjacent area land uses result in higher demand in one of the peak periods. Where such demand creates

the need for an added lane to accommodate the peak surge of traffic, the addition of through lane(s) in one (asymmetric), rather than both directions of travel, is considered.

Primary Arterials are four-lane divided roadways with medians or continuous two-way left turn lanes. They can accommodate up to 33,750 vehicles on an average weekday at LOS D conditions, depending on the degree of access control and peak period loadings. Primary Arterials provide for easy circulation in the City, and allow for limited on-street, curbside parking.

Secondary Arterials are four-lane undivided roadways without medians. They can accommodate up to 21,600 vehicles on an average weekday at LOS D conditions, depending on the degree of access control and peak period loadings. Secondary arterials allow for on-street, curbside parking.

Two-Lane Secondary Arterials are two-lane divided roadways with medians or continuous two-way left turn lanes. They can accommodate up to 17,000 vehicles per average weekday at LOS D conditions, depending on the degree of access control and peak period loadings. Two-lane secondary arterials can allow for on-street, curbside parking.

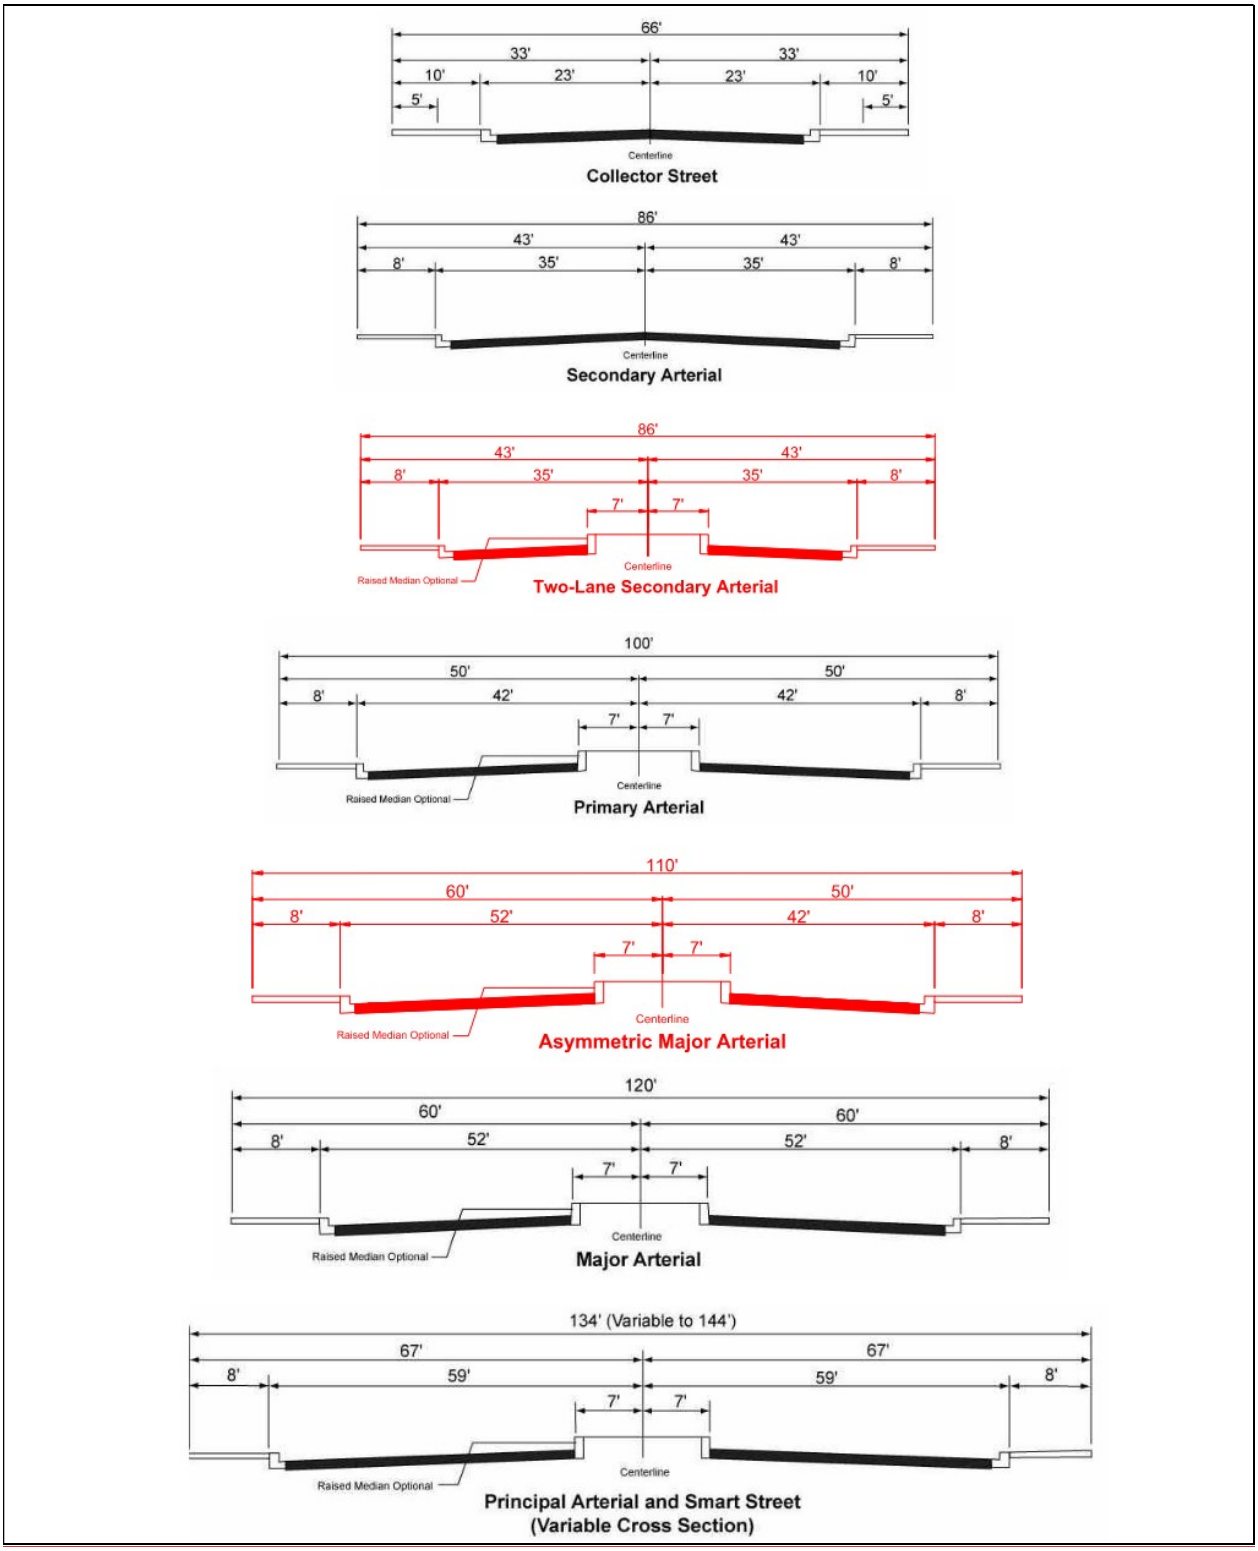

Figure CM-1
Roadway Cross Sections

Collector Streets are typically two-lane roadways without medians that gather and distribute traffic to higher-capacity arterials. They can accommodate up to 10,800 vehicles per average weekday at LOS D conditions, depending on the degree of access control and peak period traffic loadings. Centerline striping is typically not provided on collector streets, and on-street parking is allowed. There are several types of two-lane streets in the City, including divided, undivided, residential, and collector streets. Each type serves a slightly different purpose and may have different capacity thresholds based on various factors.

Performance Criteria

Evaluating the ability of the circulation system to serve residents and businesses in Orange requires establishing performance criteria. Performance criteria have a policy component that establishes a desired LOS, and a technical component that specifies how traffic forecast data can be used to measure criteria achievement.

The LOS definition for intersections is based on a volume-to-capacity (V/C) ratio and provides a more quantitative description of traffic conditions. Table CM-2 presents LOS based on traffic volumes and the design capacity of intersections.

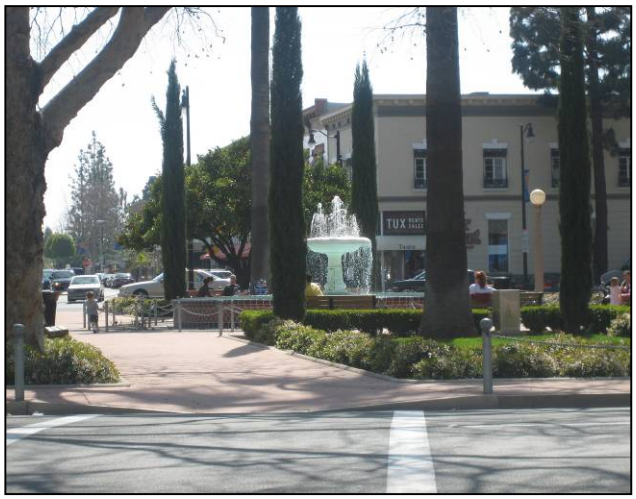
Table CM-2
Level of Service Definitions for Intersections

Level of Service	Volume-to-Capacity Ratio	Description
A	0.00-0.60	Free Flow/Insignificant Delays: No approach phase is fully utilized by traffic and no vehicle waits longer than one red indication.
B	0.61-0.70	Stable Operation/Minimal Delays: An occasional approach phase is fully utilized. Many drivers feel somewhat restricted within platoons of vehicles.
C	0.71-0.80	Stable Operation/Acceptable Delays: Major approach phases fully utilized. Most drivers feel somewhat restricted.
D	0.81-0.90	Approaching Unstable/Tolerable Delays: Drivers may have to wait through more than one red signal indication. Queues may develop but dissipate rapidly, without excessive delays.
E	0.91-1.00	Unstable Operation/Significant Delays: Volumes at or near capacity. Vehicles may wait through several signal cycles. Long queues form upstream from intersection.
F	N/A	Forced Flow/Excessive Delays: Represents jammed conditions. Intersection operates below capacity with low volumes. Queues may block upstream intersections.

Source: Highway Capacity Manual, Transportation Research Board, Special Report No. 209, Washington DC, 2000.

Although roadway capacity is generally a function of peak hour intersection performance and the corresponding peak hour volumes, daily arterial segment capacities (link capacities) also provide a measure of the overall LOS of the arterial system. Generally, traffic impact mitigation focuses on peak hour intersection performance, since system performance is typically a function of intersection performance. The City's policy is to use a link capacity standard of LOS D. Table CM-3 presents arterial daily capacities at LOS D and LOS E.

Table CM-3 Arterial Daily Capacity Threshold Assumptions		
Street Type	Daily Capacity	
	LOS D	LOS E
Smart Street – 6- to 8-lane divided	71,100	79,000
Principal – 8-lane divided	67,500	75,000
Major – 6-lane divided	50,700	56,300
Asymmetric Major – 5-lane divided	42,250	47,000
Primary – 4-lane divided	33,750	37,500
Secondary – 4- lane undivided	21,600	24,000
Two-Lane Secondary – 2-lane divided	17,000	18,750
Collector – 2-lane undivided	10,800	12,000
Source: City of Orange General Plan Update Traffic Report, 2008.		



Various LOS policy standards have been established to evaluate observed traffic conditions, future development plans, and circulation system modifications. At the local level, the City of Orange has established LOS D as the lowest acceptable level of service for both roadway segments and peak-hour signalized intersection movements. At the regional planning level, Orange County's Congestion Management Plan (CMP) specifies LOS E as the operating standard for roadways and intersections on the CMP highway system. The CMP Highway System consists of the Orange County smart street network plus the state highway system. Thus, the SR-55 northbound and southbound ramps at Katella Avenue are CMP intersections within the City's jurisdiction. The City does not have an adopted LOS standard for unsignalized intersections. Performance of unsignalized intersections is evaluated on a case-by-case basis.

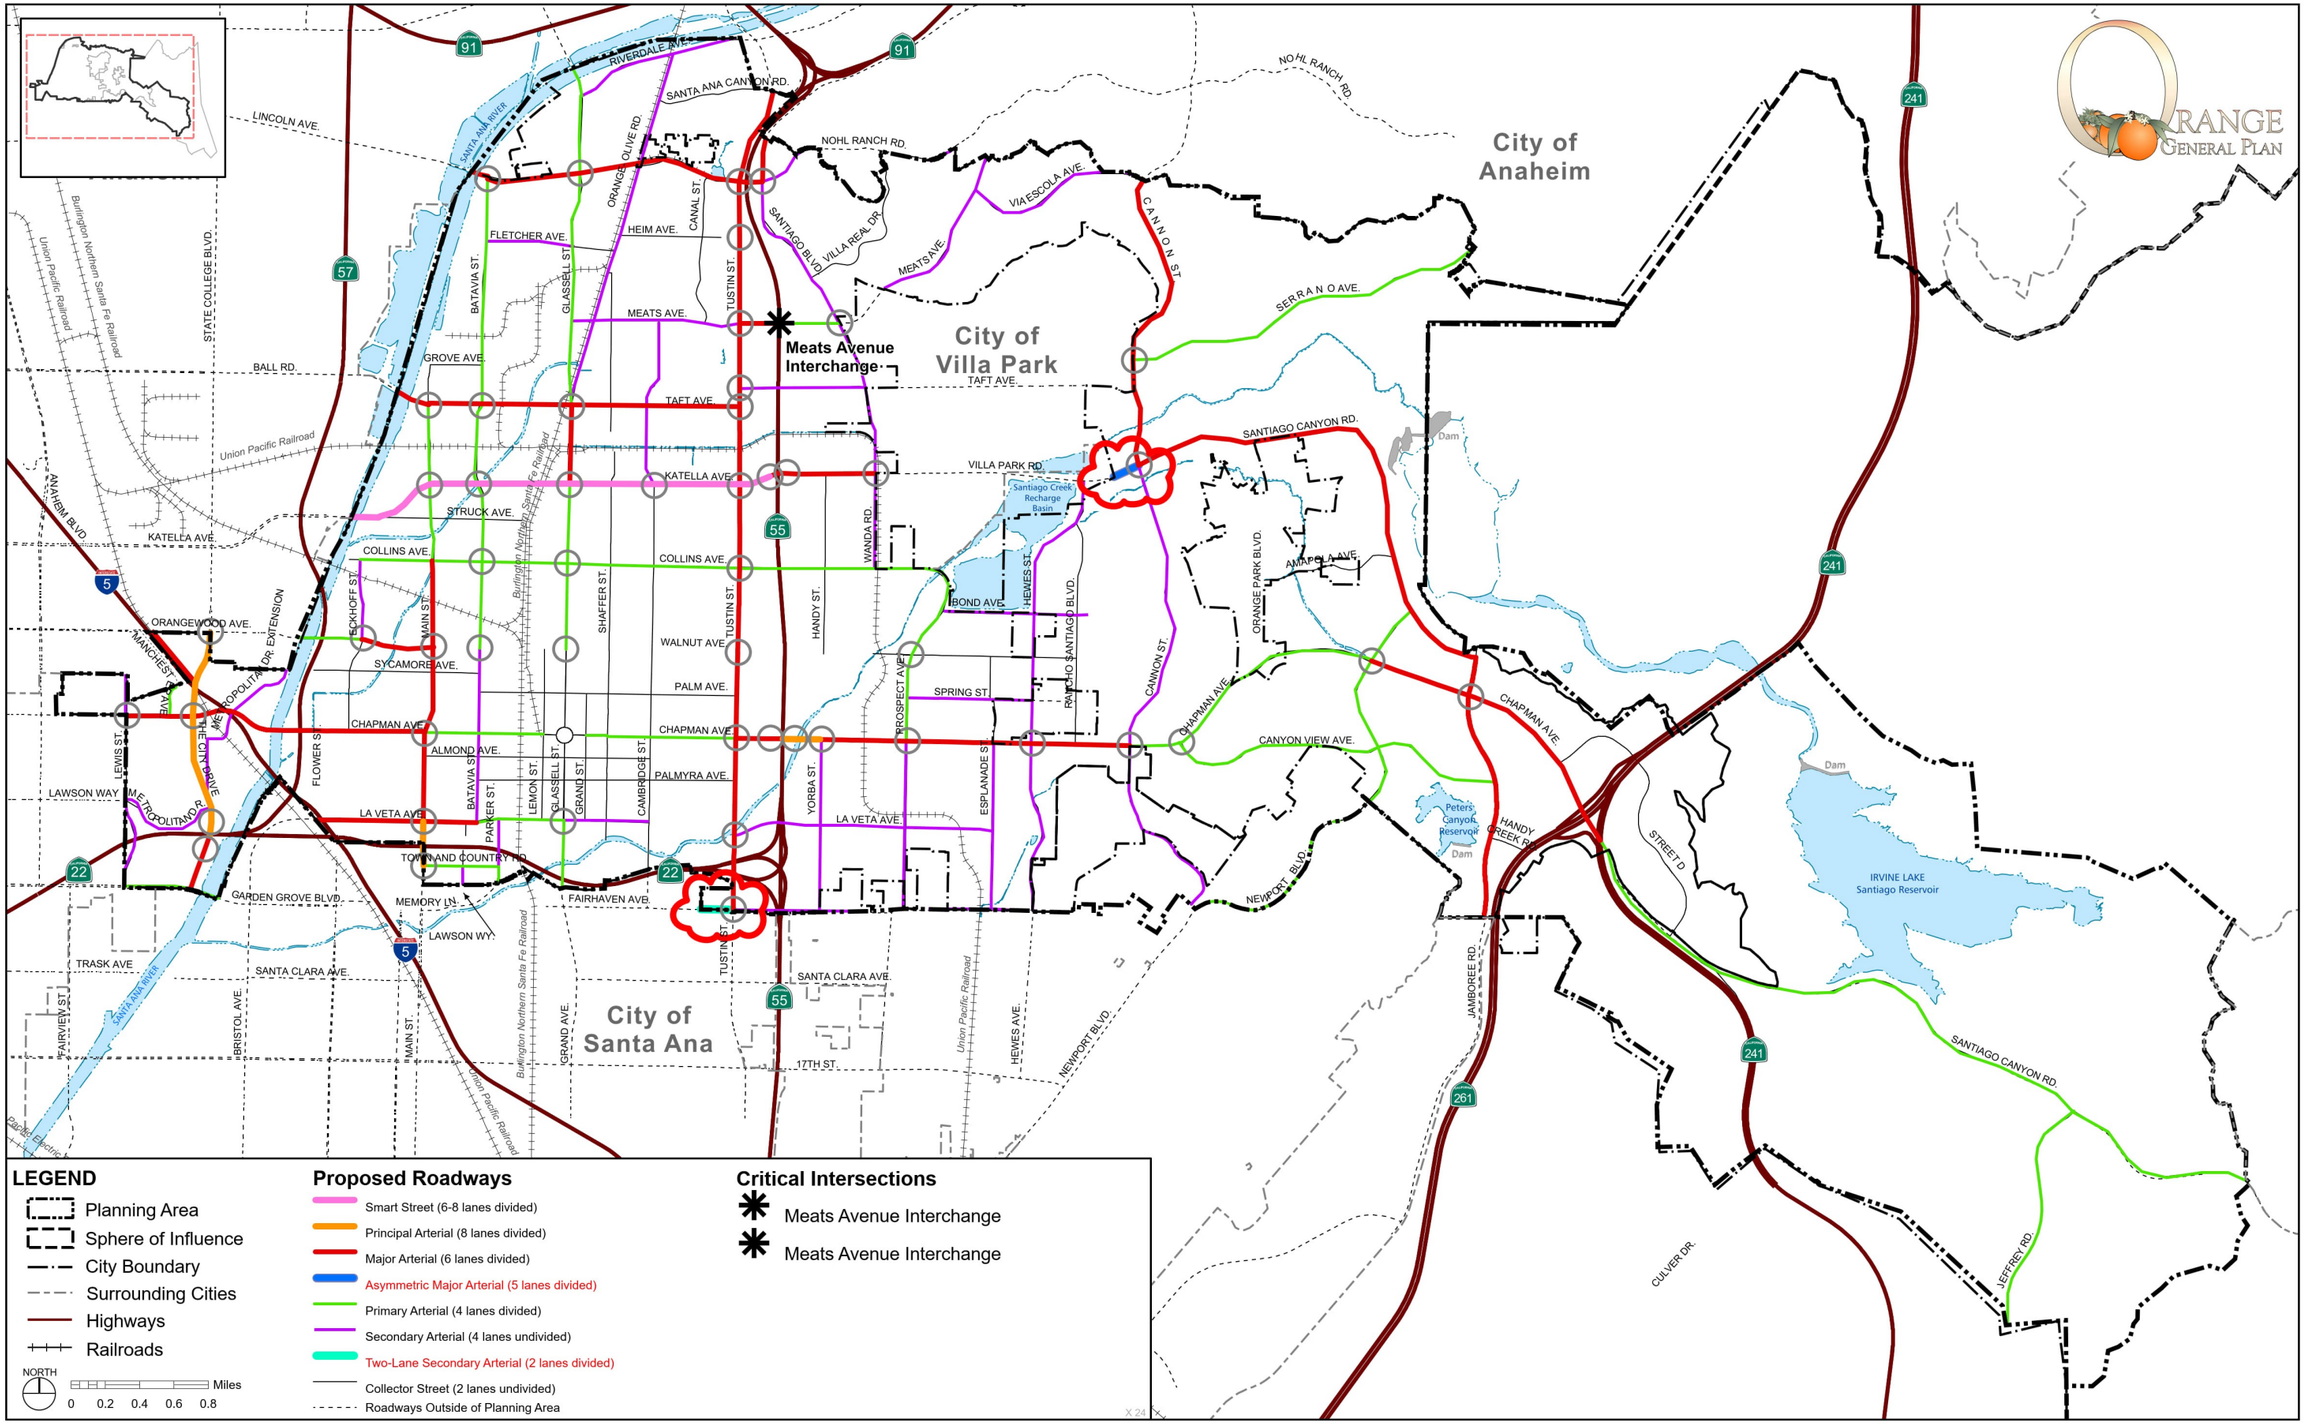
In addition to the LOS standards for roadways and intersections, the California Environmental Quality Act (CEQA) Guidelines (Section 15064.3), require "vehicle miles traveled" (VMT), to measure transportation impacts on the community. VMT refers to the amount and distance of automobile travel attributable to a project.

For purposes of compliance with CEQA, a significant impact would occur if the baseline and/or cumulative project-generated VMT per service population (population plus employment) exceeds the anticipated City of Orange General Plan Buildout VMT per service population. One vehicle traveling one mile would generate one VMT. Additionally, the project's effect on VMT would be considered significant if it resulted in the baseline and/or cumulative link-level boundary citywide VMT per service population increases under the plus project condition compared to the no project condition. Link-level boundary VMT is calculated by summing all weekday VMT on a roadway network within the City boundary and includes all trips including trips that pass through the City's roadway network but do not start and end with in City.

These thresholds are designed to reduce the number of miles traveled by automobiles, and are implemented within the City of Orange *Traffic Impact Analysis Guidelines*.

In order to maximize the efficiency of its circulation system, the City will look at where physical improvements to the circulation infrastructure can be made to expand capacity and increase traffic flow. To maximize efficiency of the road system, the City will support traffic signal coordination and spacing, and will also discourage on-street parking along arterials. In addition, the City will explore ways to reduce the demand for vehicular transportation, specifically through the provision and maintenance of bike lanes, bikeways, and trails, and will also encourage additional regional transit services and support facilities. The City's Transportation Demand Management (TDM) ordinance (Chapter 10.83 of the Municipal Code) further specifies a variety of techniques available to employers with 100 or more employees to advance the goals of efficiently utilizing the existing and planned transportation system and reducing vehicle emissions.

City Master Plan of Streets and Highways



Land Use Element policy will allow land use changes and intensification to occur in specific focus areas within the City. The City's Master Plan of Streets and Highways displayed in Figure CM-2 has been developed in close coordination with land use policy to ensure that traffic generated by new development will not compromise the City's goal to ensure that intersections and roadway segments operate efficiently. The map identifies components of the City's roadway circulation system. The map also indicates where augmented roads are needed, and pinpoints locations for enhanced intersections, including the future Meats Avenue interchange at SR-55. Although most of Orange is already built out, most remaining developable land is located in the eastern part of the City. New development in east Orange will require construction of new roads to provide circulation and traffic flow to residents and businesses. Land Use Element policies enabling reuse and redevelopment within established portions of the City, particularly within the focus areas, may also necessitate roadway widening and intersection enhancements. The City will continue to collect funds for necessary circulation system capital improvements through a program that sets up a fee structure for all new development and redevelopment projects. This program will require developers to pay their fair share for transportation system improvements required by new projects. The City will use the annual seven-year Capital Improvement Program (CIP) process to prioritize, fund, and complete improvements required to achieve build-out of the proposed roadway system identified in Figure CM-2.

Roadway Widening

Roadway widening in specific locations will be necessary to obtain new travel lanes. Additional travel lanes may be acquired either by obtaining additional rights-of-way as necessary or by constructing new lanes within existing rights-of-way. Parking restrictions may be applied to allow additional lanes to be provided within existing rights-of-way.

Old Towne Street Network

The Old Towne street network is a clear example of Orange's grid street pattern. Parallel roadways have been established in both the north-south and east-west direction to distribute traffic evenly. The Plaza area at Glassell Street and Chapman Avenue is a unique feature that creates discontinuous traffic flows along these two primary roadways. However, no plans have been made to modify the National Register-listed Historic Plaza to increase its traffic carrying capacity.

(Redlined) Figure CM-2 City Master Plan of Streets and Highways

GPA 2026-0001 (XX/XX/26)
GPA 2014-0001 (12/8/15)
GPA 2010-0001 (8/10/10)

(This Page Left Intentionally Blank)

In light of these conditions, parallel roadways such as Almond Avenue, Palmyra Avenue, Lemon Street, Olive Street, Shaffer Street, Grand Street, Palm Avenue, and Maple Avenue will continue to serve as local collectors around The Plaza.

Metropolitan Drive Extension

Extending Metropolitan Drive behind the University of California, Irvine (UCI) Medical Center will help facilitate the movement of north-south traffic near The Outlets at Orange shopping area, improve access to Interstate 5 (I-5), and relieve congestion on The City Drive. Metropolitan Drive will be extended from The City Drive/State College Boulevard to the Metropolitan Drive/Rampart Street connection.

Critical Intersection Program

Intersections serve as traffic control points for the circulation system, regulating the flow of vehicles along City streets and sometimes limiting the capacity of the system. In the long term, system capacity and efficiency can both be increased if intersections are designed to handle future anticipated traffic volumes. Typically, the design of the roadways forming an intersection dictates the intersection configuration. Department of Public Works standards indicate that a left-turn pocket may or may not be provided, depending on traffic volumes through the intersection. However, one pocket may not be adequate to handle vehicles during peak hours. Traffic may back up into a through travel lane, resulting in congestion at the intersection and at other locations along the roadway.

One way of providing additional intersection capacity at critical locations is through the use of special intersection configurations known as "critical intersections." Critical intersections deviate from typical City design standards by increasing the number of lanes at an intersection beyond what typically would be required. By increasing capacity at the intersection, the circulation link increases overall system capacity.

The Master Plan of Streets and Highways (Figure CM-2) identifies the locations of critical intersections within Orange. A list of these intersections and diagrams depicting their geometries are on file in the Public Works Department.

Regional Roadway System

The City's local circulation network is connected to an efficient regional circulation system. Figure CM-2 shows the freeways that traverse the Orange planning area. The Santa Ana Freeway (I-5) provides interstate and regional access to the City. In addition, SR-57, SR-55, and SR-22 all provide connections to the City from northern Orange County and neighboring Los Angeles County, San Diego County, Riverside County, and San Bernardino County. SR-91 and SR-241 provide additional, more limited freeway access. SR-241 is a toll facility controlled by the Transportation Corridor Agency (TCA).

I-5 is a northwest-southeast freeway that passes through the southwest corner of the City, and provides direct access to Los Angeles County to the north and San Diego County to the south. I-5 has two interchanges within Orange—one located at its junction with SR-57 and SR-22 (commonly known as the Orange Crush) and the other at State College Boulevard/The City Drive. The junction at the Orange Crush currently has the most severe congestion, which directly affects the roadway system in the City. With projected future growth in Orange and in the region, traffic flow at this junction is expected to worsen. The City will continue to work with and support the efforts of local and regional agencies to mitigate the increased traffic congestion in this area.

SR-91 is an east-west freeway that provides access to key arterial facilities in Orange, including interchanges at Tustin Street and Glassell Street. SR-91 also provides regional access through interchanges with SR-55 and SR-57 and SR-241.

SR-22 is an east-west freeway that crosses through the southern portion of the City. Five SR-22 interchanges are located in the City, at Tustin Street, Glassell Street, Main Street/La Veta Avenue, Bristol Street, and The City Drive.

SR-55 is a north-south freeway that passes through the center of Orange, and provides access to the coastal communities of Orange County. SR-55 has four interchanges in Orange, located at Lincoln Avenue, Katella Avenue, Chapman Avenue, and SR-22. An additional future interchange at Meats Avenue is contemplated within this General Plan.

SR-57 is a north-south freeway that originates at the junction of I-5 and SR-22 and extends to San Dimas in Los Angeles County. It provides access for the eastern parts of Los Angeles County, and central and northern parts of Orange County. SR-57 has three interchanges in Orange, at Chapman Avenue, Orangewood Avenue, and the junctions of I-5 and SR-22.

The Eastern Transportation Corridor (SR-241) is a north-south toll facility located in the eastern portion of the planning area. This facility provides direct access to east Orange. SR-241 has three toll lanes in each direction and provides regional access through an interchange at Santiago Canyon Road.

Consistency with County Master Plan of Arterial Highways

Maintaining consistency with the County's Master Plan of Arterial Highways (MPAH) is required in order to ensure that the City's circulation system develops in a manner that promotes regional mobility. At a practical level, consistency is also required in order for the City to receive transportation funding under Measure M, also known as OC Go. Orange's Master Plan of Streets and Highways (Figure CM-2) is generally consistent with the MPAH.

While the City's Master Plan of Streets and Highways has been consistent with the County MPAH to maintain funding eligibility, both the City of Orange and OCTA have the goal of a realistic and implementable MPAH. A desire of the City is to work with OCTA to downgrade La Veta Avenue between Glassell Street and Cambridge Street from a Secondary Arterial to a

Collector Street to reflect physical constraints related to historic buildings and features in the Old Towne National Register Historic District.

To initiate the MPAH amendment process, a local agency must submit a written request to OCTA describing the amendment requested and provide documentation to support the basis for the request. A copy of the request must be submitted concurrently to the City Managers of adjoining cities. For the facilities under consideration, this would require a letter to be forwarded to the City of Santa Ana.

Once the initial request is forwarded to OCTA, a conference between the City of Orange, OCTA, and potential affected jurisdictions is held to determine whether mutual agreement exists for the MPAH amendment. If mutual agreement exists, then Orange is expected to proceed with adopting this revision to the Circulation & Mobility Element. Upon adoption, the City of Orange would submit the Circulation & Mobility Element to OCTA and request OCTA Board approval of the Orange County MPAH amendment.

Public Transportation

Effective regional transportation strategies are required to successfully implement City and County plans for accommodating future growth. Such strategies must link the City of Orange with other regional employment and commercial centers, as well as airports and other transportation hubs, and should fully integrate alternatives to the automobile. Alternative modes of transportation, including public transportation, bicycling, and walking, are important components of a comprehensive circulation system. These modes of transportation also help reduce air pollution and road congestion.

Public transportation plays a key role in future land use development and mobility. As the roadway system reaches capacity, alternative modes of transportation provide additional capacity as well as an enhanced degree of mobility for residents, workers, and visitors. Existing services are expected to continue while enhancements, many of them currently in the planning stages, will increase the viability of alternative modes of travel. The integration into the circulation system of alternative modes of transportation, such as bus, rail, bicycle, and pedestrian, is essential to maximizing mobility opportunities for residents, workers, and visitors.

Bus Service

OCTA provides public bus service for the City of Orange. In addition, the Riverside Transit Agency (RTA) provides long-distance service between The Village at Orange and the Downtown Terminal in Riverside. Table CM-4 identifies local bus routes that connect various activity centers in Orange to each other and to the region.

Table CM-5 shows the different community, station link, and inter- or intra-County routes that serve Orange. Community routes are express bus routes that provide faster connections to activity centers within and outside Orange County. Station link shuttles provide services between the Orange Transportation Center (OTC) and Orange. Both community and station link routes operate only at peak commuter times.

In addition to the fixed-route service, OCTA also offers several types of specialized community transportation services, such as standard service (curb-to-curb service), door-to-door service, subscription service, and same-day taxi service. Some of these services cater to senior citizens and people with disabilities residing in the City.

OCTA has forecast bus ridership to increase by approximately 75 percent by 2030. Some of this ridership increase will be the result of enhanced services, including express bus routes and introduction of bus rapid transit service. Much of the increase will be driven by increased arterial and freeway congestion levels in conjunction with improved local bus service.

Convenient, accessible, frequent, and easy-to-use public transit is a cornerstone element of the proposed land use plan. Planned mixed-use residential and commercial areas and intensified commercial and professional office corridors must be coupled with increases in transit service. Orange's land use plan features mixed-use districts that strategically concentrate population density near alternative transit facilities, such as the OTC in Old Towne, transit hubs at The Outlets at Orange and South Main Street, and the Anaheim Regional Transportation Intermodal Center (ARTIC) station in Anaheim near the City's western boundary at Katella Avenue.

Table CM-4
Local Bus Routes

Route #	Route Type	Route Service	Service Corridors	Key Orange Activity Centers Served
24	Local	Fullerton–Orange	Malvern Ave. / Chapman Ave. / Tustin St..	The Village at Orange Lincoln Park and Ride

The City recognizes that ridership of both the bus and rail transit systems will increase, and has designed a land use plan that both enables and accommodates increased transit use. A large part of the City's role in accommodating additional transit use includes providing convenient and attractive transit amenities and streetscape features that improve user comfort and perception of safety, thus encouraging transit use. Transit-oriented Development (TOD) design features will be encouraged in major commercial and employment areas within the City, such as the Town and Country Road corridor, South Main Street, Katella Avenue, Uptown Orange, and Old Towne. Such TOD features may consist of streetscape measures such as bus turn-outs, benches, trash receptacles, shelters from wind and rain, and lighting. TOD features may also be more fundamental to the permitted uses and design within projects, such as incorporating child care centers, convenience stores, or personal services within the retail component of mixed-use projects, or near professional office concentrations. These and other measures help to make the transit system more accessible to a wide range of people.

The City will continue to work with OCTA to pursue expanded community circulators, such as the current Station Link service, that will connect people to rail transit, employment centers, residential areas, and commercial corridors. Additional options, such as jitney services that function as group taxis, will also be explored.

The City will also continue to support OCTA initiatives and services that promote the mobility of Orange's senior, disabled, and youth populations. To accommodate the needs of these groups, the City will continue to work with OCTA to offer para-transit services, and will seek ways to improve mobility for Orange youth through transit.

The City of Orange will continue to cooperate with OCTA and other regional providers to establish new bus routes and stops, and to provide transit amenities. New subdivision plans will be reviewed by OCTA to assess impacts on bus services, and to examine the need to provide bus stops or bays. Orange will also work with OCTA to maintain and, if needed, expand successful transfer stations in Old Towne, the Village at Orange, and The Outlets at Orange.

Rail Transit

Many current passenger and commuter fixed-rail transit options in the City will be expanded in the future, offering significant alternatives to automobile transit for many individuals who commute to or from the City for housing or employment. Rail transit now has a proven track record in Orange, and Metrolink seeks to expand rail services in support of land use transformations near current and future rail stations.

Metrolink

Metrolink operates seven commuter rail lines in Southern California, two of which pass through Orange. The Orange County Line offers direct connections to Union Station in Los Angeles to the north and to Oceanside to the south. The Inland Empire–Orange County Line provides direct connections to Riverside/San Bernardino to the east and San Juan Capistrano to the south. Roughly 30 Metrolink trains pass through the City on a daily basis. The Metrolink station in Orange is located three blocks from The Plaza at the OTC, close to a variety of stores and civic uses in Old Towne.

A much-anticipated rail service improvement is intra-county rail service along the County's core transit corridor. This service, which will be provided by Metrolink on behalf of OCTA, is an attempt to provide intra-county trips with a high degree of reliability. This 30-minute service is planned to operate between the Irvine Transportation Center (and possibly Laguna Niguel) and the Fullerton Transportation Center throughout the day to supplement Metrolink's peak period commuter service.

The City recognizes that plans to increase daily service on the current Metrolink lines, improvements to the OTC, and future expansion of Metrolink services to new destinations would be beneficial to Orange by providing multi-modal transportation options for people living and working in the community, thus reducing auto dependence for business and leisure purposes.

Anaheim Regional Transportation Intermodal Center

The Platinum Triangle, which borders Angel Stadium in the City of Anaheim, proposes a variety of high-density multiple-family high-rise housing, office space, and commercial uses. ARTIC is located adjacent to the proposed development, between Angel Stadium and the Honda Center. ARTIC is a major regional transportation center similar in scale to Union Station in Los Angeles and Ontario International Airport in Ontario. The intermodal center is be a stopping point for Amtrak, Metrolink, buses, and future high-speed rail systems that connect to Ontario

Airport, Las Vegas, and the Bay Area.

The City of Orange will coordinate with the City of Anaheim, OCTA, and others to ensure that the City is able to take full advantage of the regional mobility benefits offered by ARTIC. Potential benefits offered to the City by ARTIC include:

- a dynamic mixed-use commercial and residential center at the westernmost end of Katella Avenue; and
- bicycle and pedestrian connections to the Santa Ana River.

California High Speed Rail Corridor

The California High-Speed Rail Authority was established as a state agency in 1996 to direct the planning, design, construction, and operation of a future high-speed train system extending from Sacramento, San Francisco, and Oakland in the north to Los Angeles and San Diego in the south. This high-speed train is proposed to stop at ARTIC. OCTA estimates that by 2025, the California High Speed Rail Corridor will serve between 150,000 and 230,000 passengers each week.

Sidewalks, Trails and Bikeways

Walking and biking contribute to a healthy community, and play increasingly significant roles as alternatives to the automobile. The City recognizes this by providing and maintaining sidewalks, trails, and bikeways to support pedestrians and cyclists.

Pedestrian Facilities

In addition to providing basic transportation routes, sidewalks and pathways offer the opportunity to create appealing public spaces that reflect community pride and invite people to walk. Proposed mixed-use areas and reinvigorated commercial areas throughout the City will provide new and reinvented spaces for people to walk and shop. Walkability and access are essential components of a circulation system that easily and specifically accommodates pedestrians. Features that contribute to walkability include wide sidewalks, safe street crossings, design elements that encourage cautious driving, and a pleasant and safe walking environment. Sidewalks, walkways, well-designed pedestrian crossings, pathways, and pedestrian short-cuts allow people to get from one destination point to another with ease. Dedicated pedestrian paths can provide access between residential and activity areas, especially if streets do not connect. Access strategies for school children, seniors, and people with disabilities should also be incorporated into street and sidewalk plans. The City supports proactive integration of pedestrian improvements and amenities within the circulation system to improve walkability.

The City will create and implement a pedestrian-oriented streetscape master plan addressing key commercial corridors, including Tustin Street, Chapman Avenue, Main Street, Lincoln Avenue, and Katella Avenue. The master plan will address all functional aspects of the pedestrian environment. It will identify pedestrian links that need improvement and

strengthening, determine new pedestrian links to underserved areas, ensure adequate sidewalk widths to accommodate lighting and street trees, develop sidewalks in the industrial area that create links between bus stops, encourage safe routes to schools and recreation facilities, and minimize barriers to pedestrian and bicycle access.

Recreational Trails and Bikeways

A comprehensive network of recreational trails and bikeways greatly benefits Orange residents and visitors by providing popular modes of transportation for recreation. In addition to recreation activities, the City also supports walking and bicycling as viable commute alternatives to the automobile. The City's plan for recreational trails and bikeways is shown in Figure CM-3.

The plan includes trails maintained by the County and private homeowners associations, and is consistent with the OCTA *Commuter Bikeways Strategic Plan*. It is also consistent with the County's major riding and hiking trails and off-road paved bikeways. As described in the ***Vision for the Future,*** the plan will enable the City to connect parks to activity centers and residential areas using a combination of recreational trails and bikeways that truly allows people to travel from place to place within the City without needing an automobile.

Recreational Trails

As shown in Figure CM-3, over 70 miles of existing recreational trails are located within the City, connecting a large number of neighborhoods and community parks. In addition, 104 miles of proposed future trails are planned throughout Orange on land currently utilized for a variety of purposes, including flood control, railroad rights-of-way, and roadways.

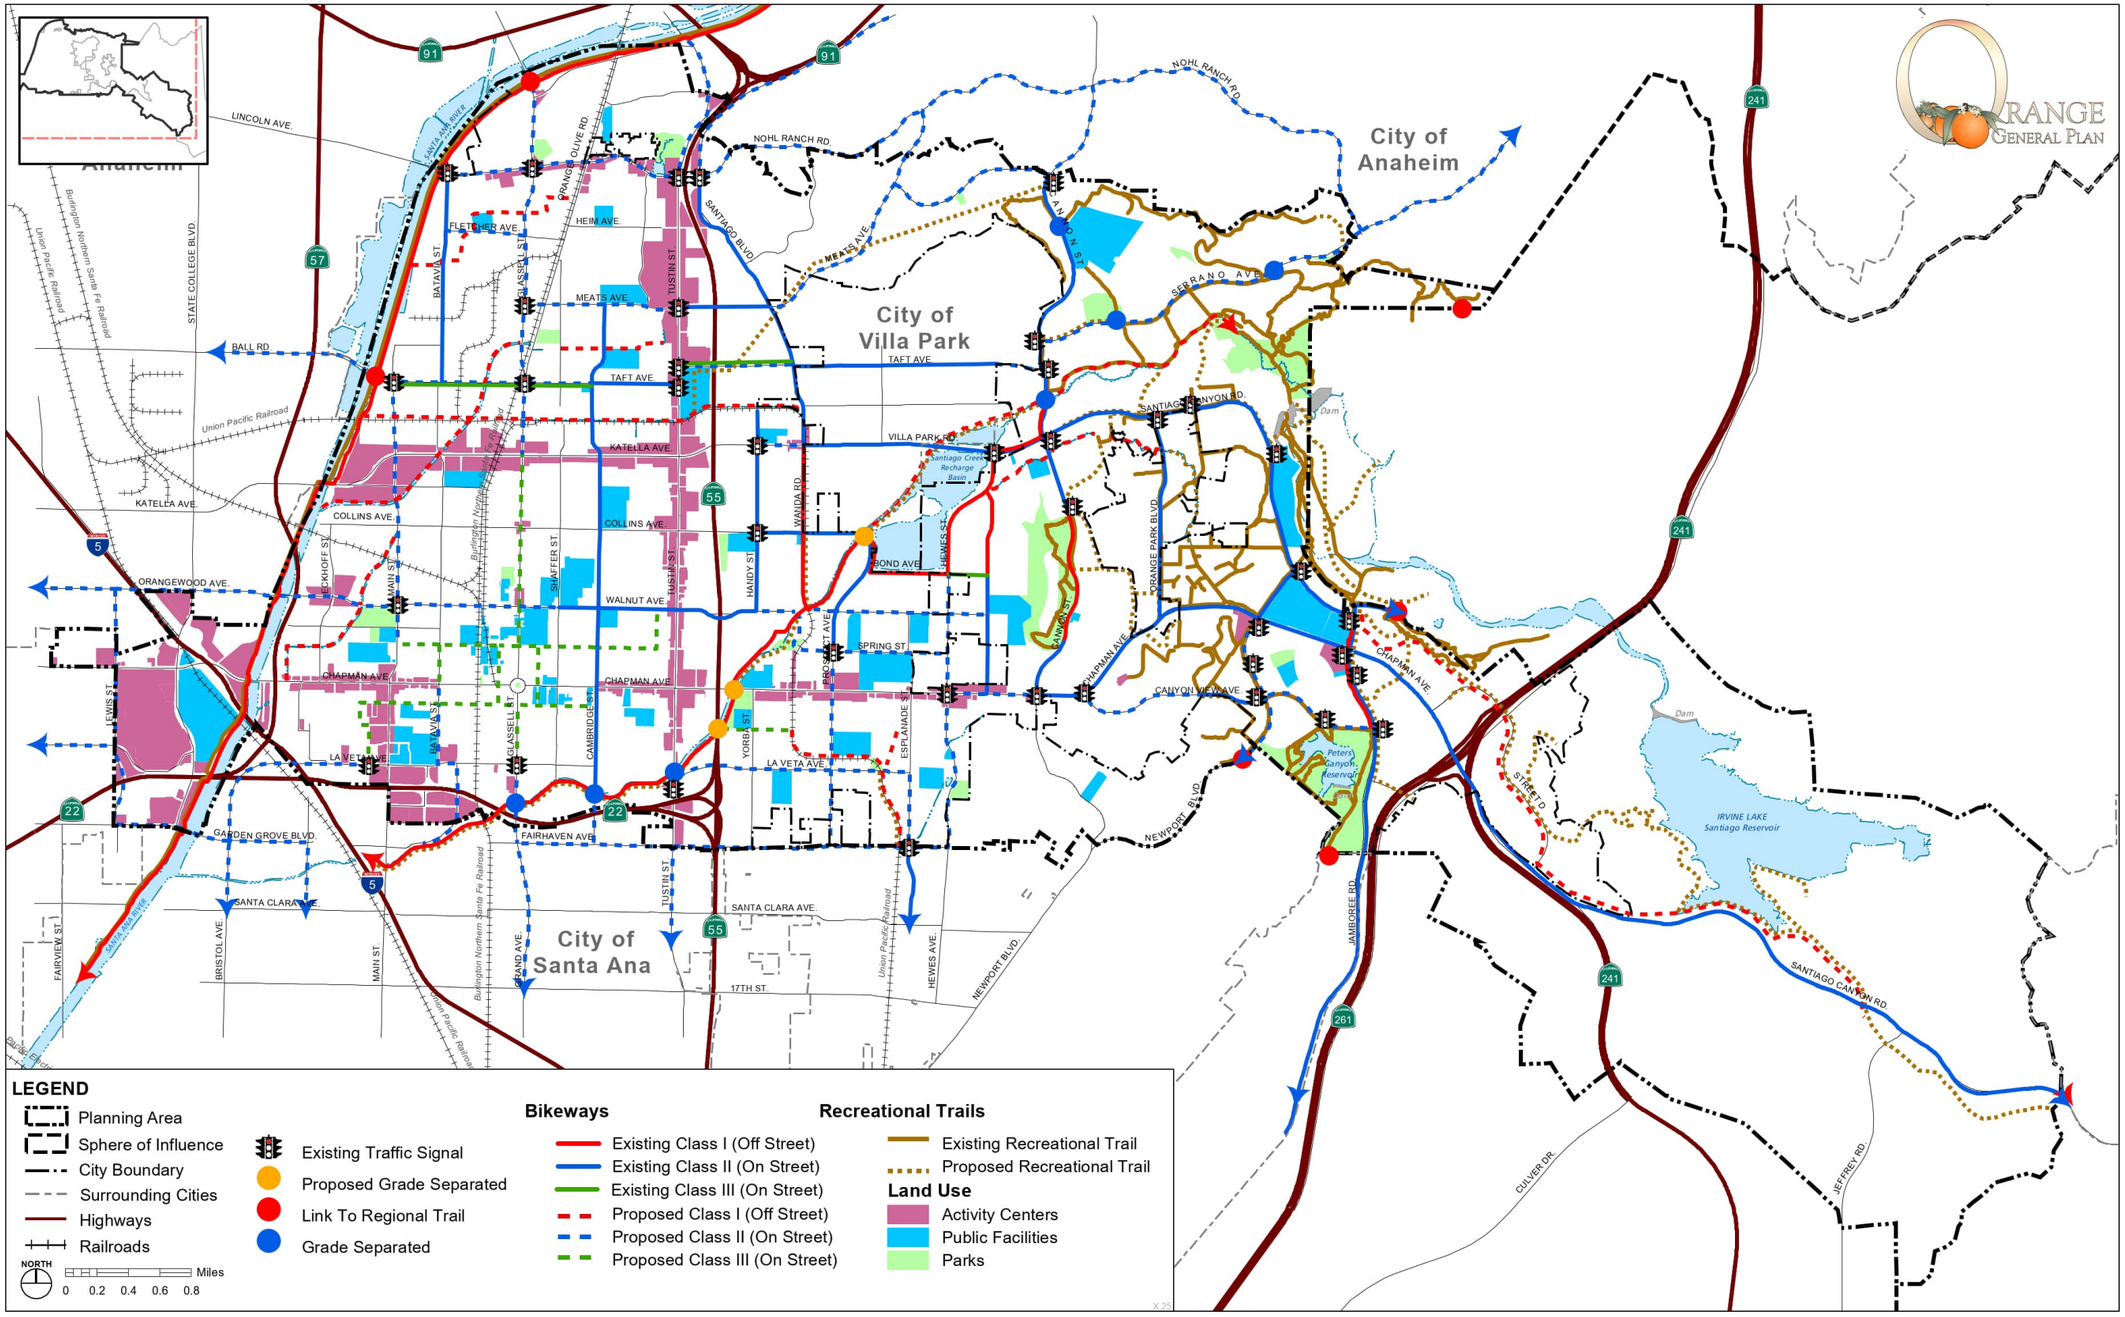
The City will use the annual five-year Capital Improvement Program (CIP) process to prioritize, fund, and build proposed trail segments identified in Figure CM-3. These trails have been and will continue to be constructed and administered through cooperative efforts of the City, County, developers, and private homeowner associations.

Desired cross-sections for recreational trails are identified in Figure CM-4. The City may require construction of portions of proposed trails identified in Figure CM-3 as a condition of development approval for projects located adjacent to the proposed trail alignments. Funding for recreational trails and associated restoration projects comes from a variety of federal, state, and regional sources. Priority for funding of trail improvements will be given to projects that complete loops within the system, provide missing links for regional and local trail systems, or serve as destination links to schools, parks, retail businesses, or regional trails.

Priorities for the recreational trail system include:

- trail connections to the Santiago Oaks Regional Park extension west of Cannon Street, consisting of a connection between Calle Grande and Cannon Street, and the Jamestown trail from the Orange Park Acres equestrian arena to Cannon Street;

- trail connection from Serrano Avenue near Fred Barrera Park to Santiago Oaks Regional Park;
- Mabury Ranch Trail connection from the proposed Cerro Villa Park to the Santiago Oaks Regional Park;
- Serrano Avenue connection near Cannon Street; and
- Additional trail connection into Santiago Oaks Regional Park from Orange Park Acres.



To increase the number of people using non-vehicular means of transportation, the City will encourage putting in place a safe network of crosswalks, grade separations, and walkways to ensure the safety of pedestrians, bicyclists, and equestrians. Where appropriate, traffic calming devices and methods such as median landscaping and provision of bike or transit lanes should be used to slow traffic, improve roadway capacity, and address potential safety issues. The City will continue to work towards improving the overall condition, appearance, and safety of both medians and sidewalks in Orange.

Bikeways

Orange's relatively mild climate permits bicycle riding year-round, and the growing popularity of bicycling has drawn enthusiasts onto the streets and bike trails throughout the City. The plan for recreational trails and bikeways (Figure CM-3) shows the planned system of bikeways within the City. The Orange *Bikeway Master Plan* has established three classes of bicycle routes that adhere to California Department of Transportation (Caltrans) standards:

- **Class I** Off-road bike paths are located on vacated rail lines, water corridors, or areas otherwise separated from streets.
- **Class II** On-road bike lanes are located along arterial roadways that are delineated by painted stripes and other features.
- **Class III** On-road bike routes share use with motor vehicle traffic. They provide a route that is signed but not striped.

Source: City of Orange Community Services Department, 2015.

Figure CM-3 Plan for Recreational Trails and Bikeways

(This Page Left Intentionally Blank)

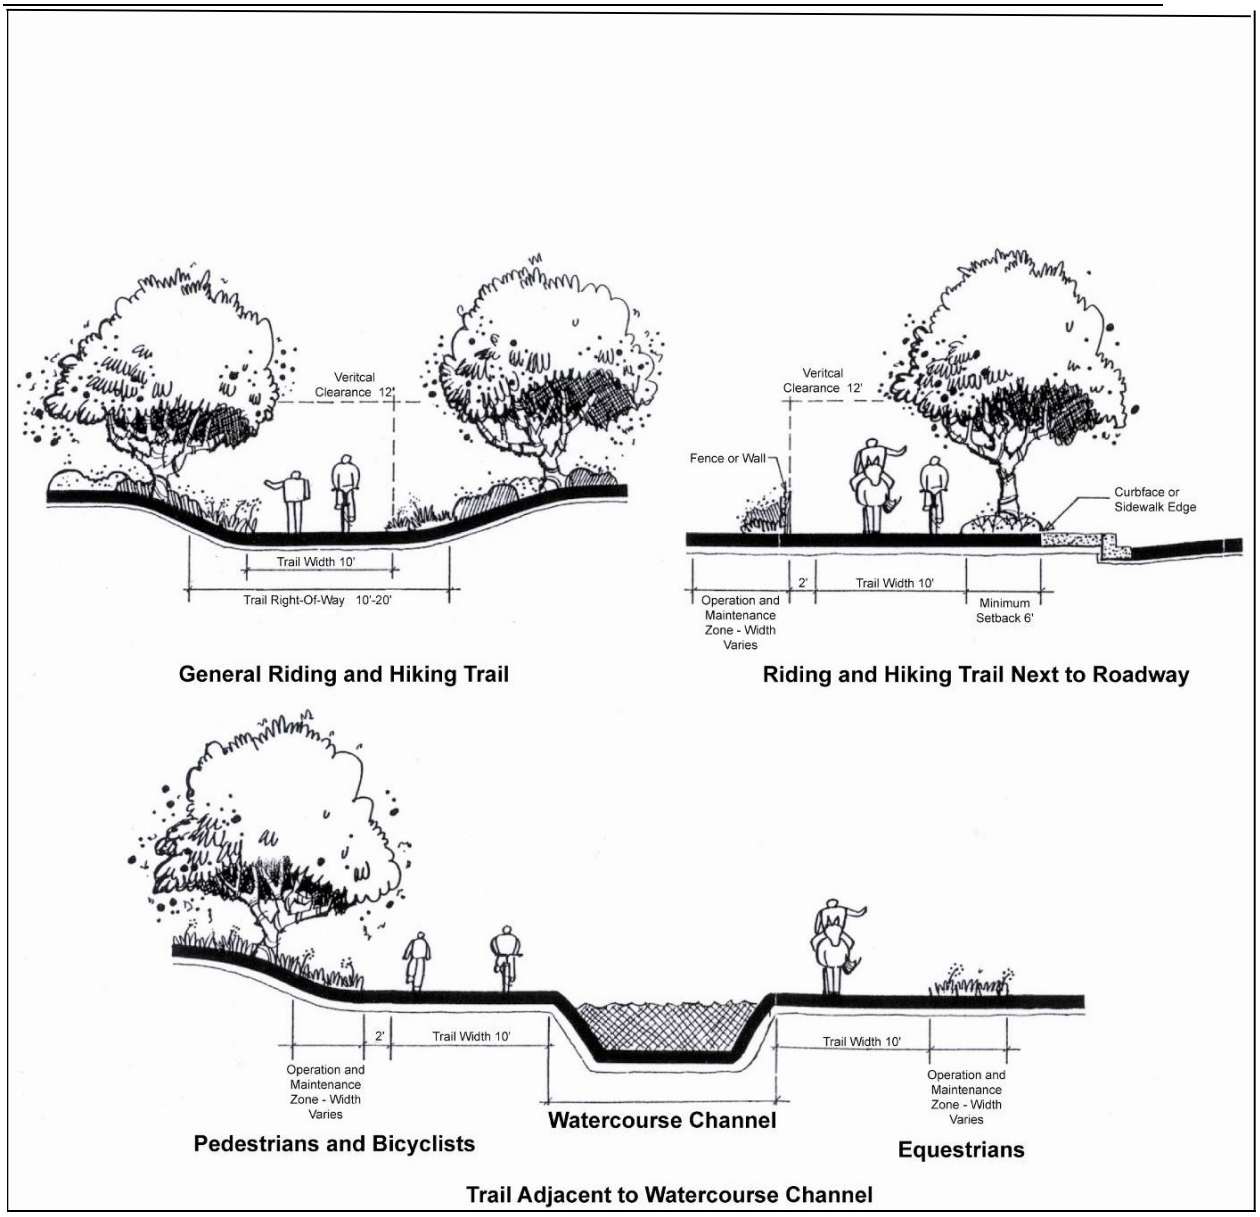


Figure CM-4
Trail Standards

Cross-sections for each type of route are shown in Figure CM-5.

As shown in Figure CM-3, several future bike routes are planned within Orange, including the following high-priority projects:

- Completing Class I bike routes along Santiago Creek and the Tustin Branch Trail
- Establishing Class II bike lanes, including:

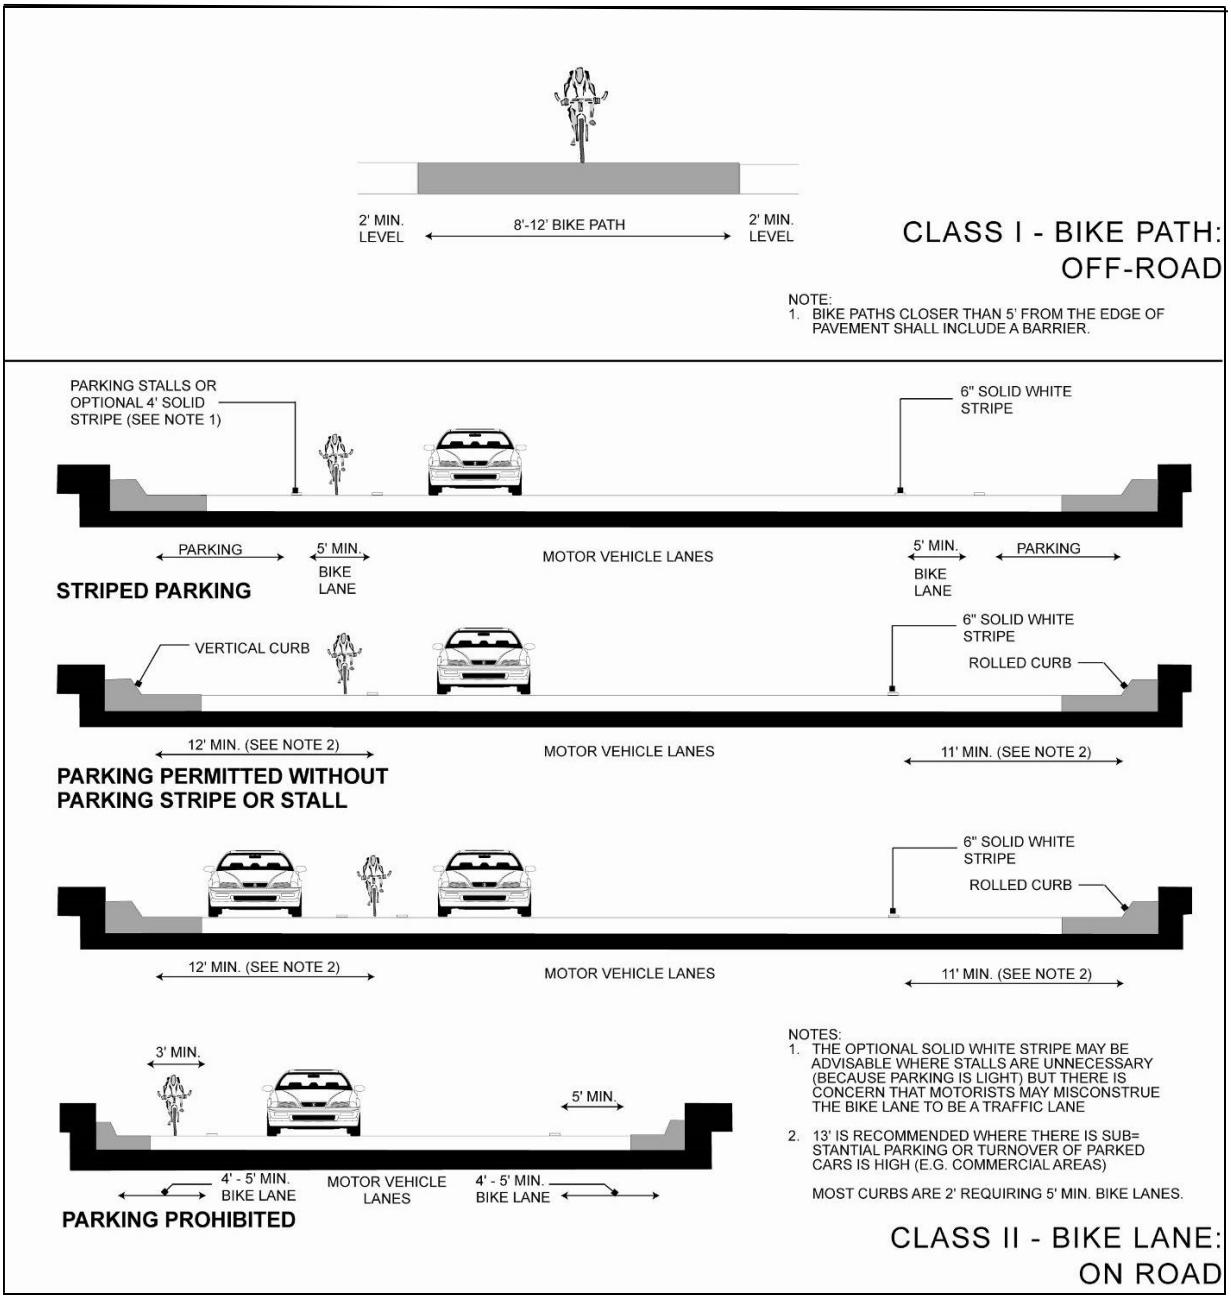

Figure CM-5
Bikeway Standards

- An east/west corridor on Walnut Avenue from the western City limits to Santiago Boulevard
- North/south corridors on Main Street from Taft Street to Palm Street, on Batavia Street from Chapman Avenue to La Veta Avenue, and on Parker Street from La Veta Avenue to the City limits

- Establishing Class III routes along Almond Avenue, Feldner Street, and Bedford Street

The City has completed a paved bike trail along Santiago Creek from Tustin Street to the western City limit that continues on to Main Place Mall and the Discovery Science Center as well as two additional segments to the bike trail, which extends the Santiago Creek Trail from Tustin Street to Grijalva Park, and also connect Grijalva Park at Santiago Creek to Collins Avenue along the City-owned portion of the Tustin Branch Trail right-of-way between Walnut and Collins Avenues. The Santiago Creek trail is planned to extend through and beyond the City, connecting the regional Santa Ana River Trail to Santiago Oaks Regional Park and wilderness areas east of Orange. The City will continue to work towards designing a comprehensive bike trail system that is highly accessible and safe for those who wish to use it.

The City has proposed Class II and III routes along many north-south and east-west arterials, all of which connect to pedestrian trails and Class I routes. The City responds to the need to provide safe and efficient bike travel by making every effort to provide bikeways separate from the roadway. When bicyclists must share the road with automobiles, the City will work to improve overall safety.

Currently, two bicycle parking facilities are located in Orange, at the OTC (Metrolink station) and the Old Towne West Metrolink Parking Structure. The City will work to provide greater bike amenities including delineated bike lanes and clear signage along bike trails. The City will also install bicycle racks and safe storage facilities at parking areas for City facilities, as appropriate, and will require privately developed projects to incorporate on-site bicycle facilities in accordance with the City's Zoning Code (Title 17 of the Orange Municipal Code).

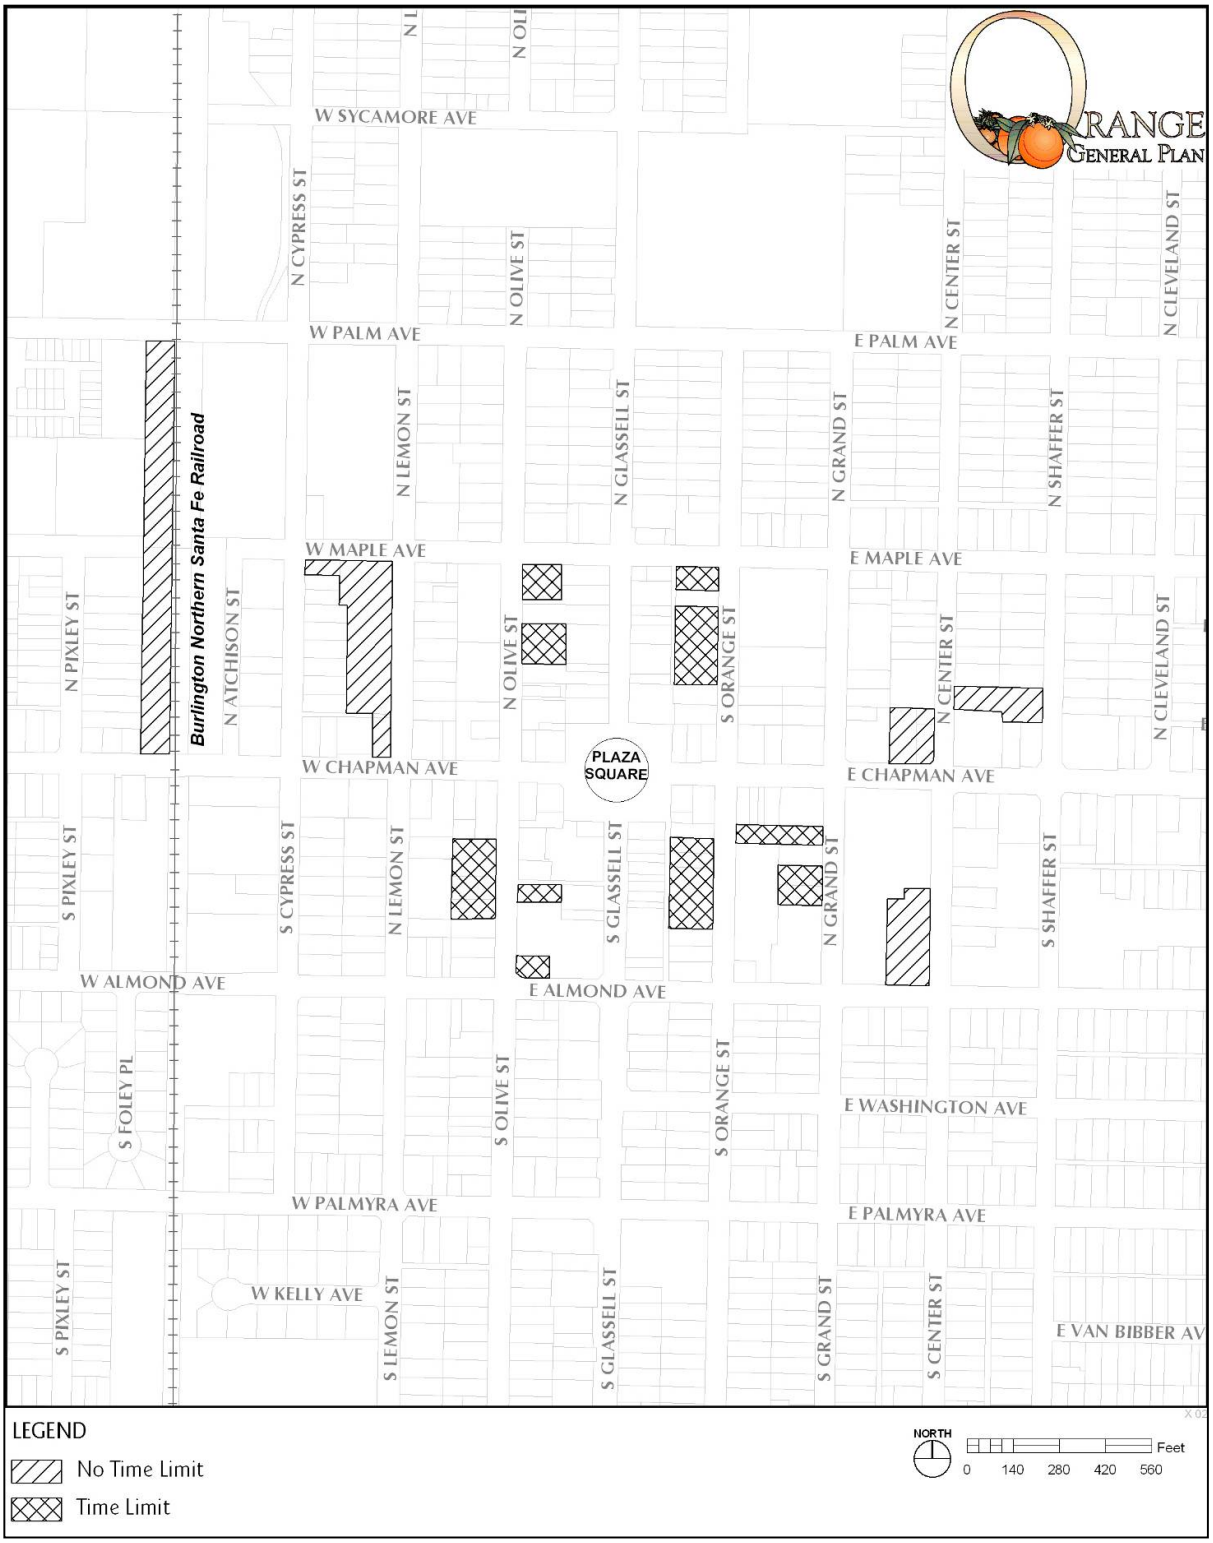
Parking Facilities

Although parking is often considered a separate issue from vehicle circulation, it is important to address on-street parking because it has a direct effect on roadway capacity. In order to facilitate improved traffic flow along Orange's major arterials, the City generally plans to permit on-street parking only on streets classified as Primary or Secondary Arterials or Collector Streets.

Off-street parking deficiencies can reduce business activity, and can cause

vehicles to re-circulate on public streets, which increases traffic volumes and congestion by reducing capacity for through traffic. The City's Zoning Code includes parking requirements to ensure that an adequate number of spaces are provided on-site for most uses. The Code also establishes minimum stall dimensions consistent with current standards for other jurisdictions. These regulations apply to all new developments, and may be applied to current uses that are modified or expanded.

Particular concern has been expressed within the community regarding current and expected future parking shortages in Old Towne. Figure CM-6 identifies the location of existing public parking lots in Old Towne. Most Old Towne parking lots have a maximum time limit of three hours, with or without a permit. However, some parking lots, such as the OTC parking located off Chapman Avenue, have no time limit.



Orange will continue to provide sufficient parking to meet community demands. In Old Towne, the City will study the benefits of creating a parking district and the feasibility of developing underutilized parking lots surrounding The Plaza as public parking facilities. The City may encourage the use of shared parking, consolidated parking facilities, and underground parking or parking structures to provide additional off-street parking to meet future demands in areas throughout the City with higher concentrations of commercial uses.

Circulation System Aesthetics

The City has determined that it is necessary and desirable to improve certain roadways and their rights-of-way to enhance the experience for all users of these corridors. Major commercial corridors have been designated within the Urban Design Element to be improved with pedestrian-scale enhancements. Enhancements could include street trees, sidewalk improvements, lighting, bus shelters, and crosswalks. These improvements not only offer a more aesthetically-pleasing experience for all users in these corridors, they also may offer increased safety and security.

Streetscape improvements offer safety and security to both motorists and non-motorists through increased visual cues, better visibility, and increased activity. Many streetscape enhancements provide not only a comfortable environment for the pedestrian and bicyclist, but also offer drivers visual cues that a non-motorist could be expected in an area. Improvements such as striping, bus shelters, and pedestrian-scaled signage guide the non-motorist towards areas that are most appropriate for their use. These same cues help the motorist to see where the presence of pedestrians and bicyclists is most likely to occur. For example, a well-marked crosswalk guides the pedestrian towards the location in the right-of-way most appropriate for crossing, while also alerting the motorist to slow down and look out for pedestrian traffic.

Visibility offered by pedestrian-scaled lighting benefits non-motorists and motorists alike. Pedestrians and bicyclists are better able to see their way, which increases their feelings of security. Improvements that create a sense of security for pedestrians encourage increased use and activity. This increased activity, in turn, leads to a greater feeling of safety. The City has acknowledged the importance of improving the experience of users on many of its major commercial corridors.

*Note: Possession of City issued parking permit enables holder to exceed specified time limit

GPA 2010-0001 (8/10/10)

Public Parking Lots in Old Towne Orange

CIRCULATION & MOBILITY IMPLEMENTATION

The goals, policies, and plans identified in this Element are implemented through a variety of City plans, ordinances, development requirements, capital improvements, and ongoing collaboration with regional agencies and neighboring jurisdictions. Specific implementation measures for this Element are contained in the General Plan Appendix.

Transportation Assessment of Proposed Amendment to the Master Plan of Arterial Highways (MPAH) for Villa Park Road

Executive Summary

Fehr & Peers completed a transportation assessment to evaluate the roadway designation in the Master Plan of Arterial Highways (MPAH) for Villa Park Road. The study covers Villa Park Road from Wanda Street to Cannon Street, spanning the jurisdictions of the City of Orange, City of Villa Park, and Unincorporated Orange County. This assessment consisted of a review of operations (in the form of LOS and queueing), safety, and user comfort (particularly for non-auto modes). This led to us identifying suggested future lane configurations and bike/ped facilities, which in turn, led to a recommendation regarding the most appropriate MPAH designation.

Villa Park Road between Hewes Street and Cannon Street is a four-lane Primary Arterial and is planned to be a six-lane Major Arterial based on the current MPAH designation. The Orange County Transportation Authority (OCTA) MPAH Guideline (August 2017), designates a Major Arterial highway as a six-lane divided (raised or painted) roadway, with a typical right-of-way width of 120 feet. The right-of-way for Villa Park Road between Hewes Street and Cannon Street is 100 feet, which excludes the off-street trail on the north side of the roadway **(Table 1)**. According to our operations and cross-section analysis, a five-lane Primary Arterial (three westbound lanes and two eastbound lanes) will be sufficient to serve future traffic demand and can fit within the available right-of-way.

Table 1: MPAH Designation

Facility	Extent	Current Designation	Proposed Designation
Villa Park Road	Hewes Street to Cannon Street	Major Arterial (Divided 6-lane)	**Primary Arterial (Divided 5-lane)**
Villa Park Road	Wanda Street to Hewes Street	Primary Arterial (Divided 4-lane)	Primary Arterial (Divided 4-lane)

*Note: Proposed designation that differ from the current MPAH designation is highlighted in **bold**.*

1. Introduction

Study Area

Through coordination with Orange County Transportation Authority (OCTA), Orange County Public Works, and the cities of Villa Park and Orange, 15 study intersections and 15 study roadway segments were identified for this assessment **(Figure 1)**. This study evaluated parallel roadway segments and intersections along the corridor to better understand traffic operations in the area and to help guide recommendations along Villa Park Road.

Study Intersections

1. Wanda Road and Villa Park Road (Signalized)
2. Kathleen Lane and Villa Park Road (Side-Street Stop Control [SSSC])[1]
3. Morrow Circle and Villa Park Road (SSSC)
4. Prado Woods Drive and Villa Park Road (SSSC)
5. Kenwick Drive and Villa Park Road (SSSC)
6. Radec Court and Villa Park Road (SSSC)
7. Center Drive and Villa Park Road (Signalized)
8. Park Villa Lane and Villa Park Road (SSSC)
9. Lemon Street and Villa Park Road (Signalized)
10. Hewes Street and Villa Park Road (Signalized)
11. Linda Vista Street and Villa Park Road (SSSC)
12. Cannon Street and Santiago Canyon Road (Signalized)
13. Cannon Street and Taft Avenue (Signalized)
14. Cannon Street and Serrano Avenue (Signalized)
15. Cannon Street and Loma Street (SSSC)

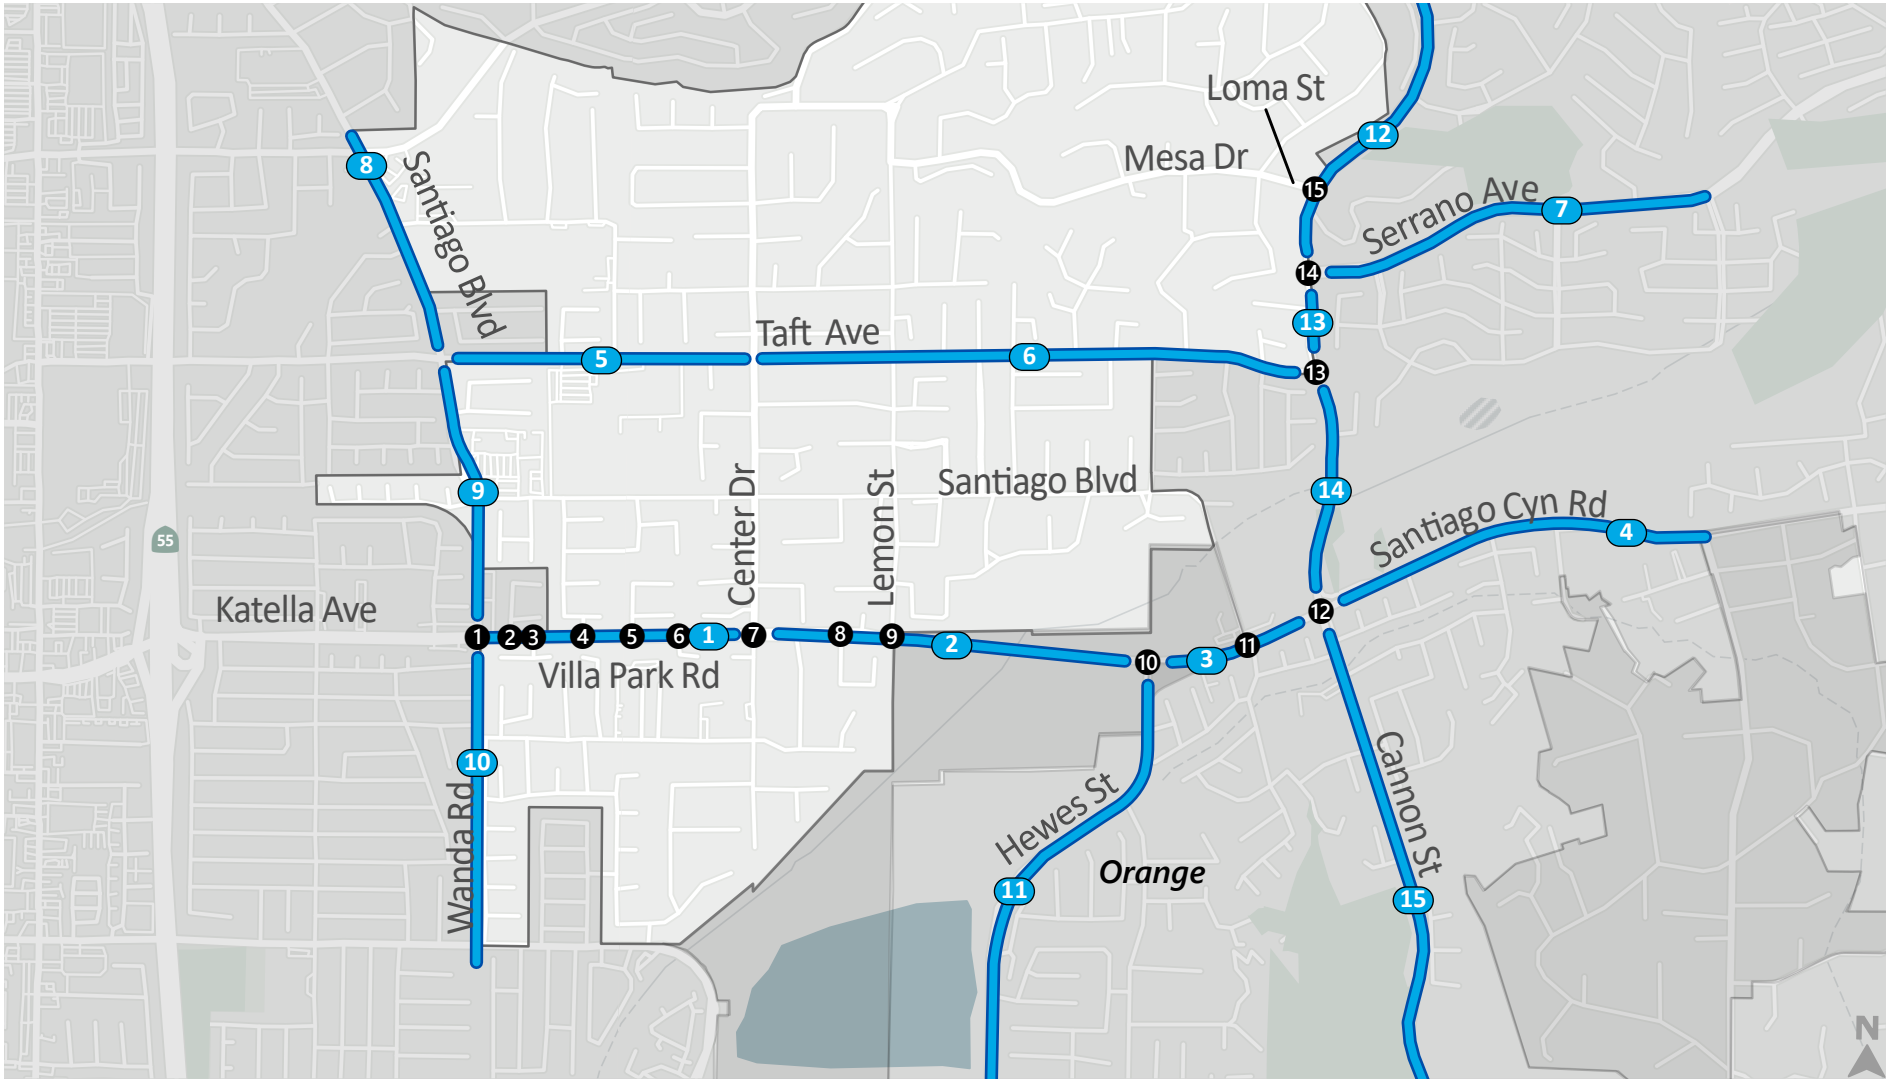
Study Segments

1. Villa Park Road between Wanda Road and Center Drive
2. Villa Park Road between Center Drive and Hewes Street
3. Villa Park Road between Hewes Street and Cannon Street
4. Santiago Canyon Road east of Cannon Street
5. Taft Avenue between Santiago Boulevard and Center Drive
6. Taft Avenue between Center Drive and Cannon Street

[1] In the HCM methodology, Side-Street Stop Controlled (SSSC) intersection is analyzed as Two-Way Stop Control (TWSC).

7. Serrano Avenue east of Cannon Road
8. Santiago Boulevard north of Taft Avenue
9. Wanda Road between Villa Park Road and Taft Avenue
10. Wanda Road south of Villa Park Road
11. Hewes Street south of Villa Park Road
12. Cannon Street north of Serrano Avenue
13. Cannon Street between Taft Avenue and Serrano Avenue
14. Cannon Street between Santiago Canyon Road and Taft Avenue
15. Cannon Street south of Santiago Canyon Road

Analysis Scenarios



To determine the existing and future needs of the transportation network, Fehr & Peers considered the following scenarios in the analysis:

- Existing (2023) Conditions – Consists of traffic counts collected on April 26, 2023, a typical weekday during an event at Angels Stadium.
- Future Year (2045) Conditions – Consists of traffic forecasts estimated using the County of Orange's travel demand forecasting model, OCTAM.

Report Outline

The remainder of this report contains the following chapters:

- Chapter 2 – Analysis Methodology
- Chapter 3 – Existing (2023) Conditions
- Chapter 4 – Future Year (2045) Conditions
- Chapter 5 – Recommendations
- Chapter 6 – Vehicle Miles Traveled (VMT) Assessment

Figure 1: Study Intersections and Segments
Villa Park Road MPAH Amendment

2. Analysis Methodology

This study provides a review of vehicle and multi-modal traffic operations through the corridor.

Roadway LOS Methodology

Study segments were evaluated based on V/C ratios, which were calculated by comparing Average Daily Traffic (ADT) to the theoretical daily capacity. This calculation does not indicate the service level throughout the course of the day, but rather provides a rough estimate of what the service level will be at the primary intersections during peak hours. Roadway capacities for all existing and planned facilities were referenced from the *Guidance for Administration of Orange County Master Plan of Arterial Highways, Orange County Transportation Authority (2017)*, which documents capacities necessary to achieve LOS A through LOS E for various roadway classifications. A threshold of LOS E was utilized for all V/C calculations in conformance with the MPAH. The LOS grades and descriptions for segments are summarized in **Table 2**. Per each jurisdiction's requirements, LOS C is used as the limit of acceptable performance.

Intersection LOS Methodology

Consistent with the County's *Transportation Implementation Manual (2020),* all signalized study intersections within the study area were analyzed utilizing the ICU methodology. ICU methodology reports the volume-to-capacity (V/C) ratio for signalized intersections. The V/C ratio is determined by evaluating the critical movements for each intersection and comparing them to the critical movement capacity of the intersection. For all ICU calculations, a saturation flow rate of 1,700 vehicles per hour per lane (vphpl) and 5% lost time was used.

As the ICU methodology doesn't account for signal timing parameters and several other factors, all signalized intersections were also analyzed using the Transportation Research Board (TRB) *Highway Capacity Manual, 7th Edition* (HCM) methodology. HCM methodology uses signal timing inputs to estimate the average control delay for vehicles at signalized intersections.

All unsignalized intersections were analyzed using HCM methodology, which estimates the worst-case lane delay for side-street stop-controlled intersections. Traffic signal warrants were conducted for unsignalized intersections operating worse than the LOS standards.

After the quantitative V/C or delay estimates are complete, the methodologies assign a qualitative letter grade which represents the operations of the intersection. These grades range from level of service (LOS) A (minimal delay) to LOS F (excessive congestion). LOS E represents at-capacity operations. Descriptions of the LOS letter grades for intersections are provided in **Table 2**.

All ICU and HCM intersection operation analysis was performed using the PTV Vistro 2020 and Synchro 11 software, respectively. Per each jurisdiction's requirements, LOS D is used as the limit of acceptable performance.

Table 2: Intersection LOS Grades

Level Of Service	Description	Signalized Volume-to-Capacity (V/C)	Signalized Delay (Seconds)	Unsignalized Delay (Seconds)
A	Operations with very low delay occurring with favorable progression and/or short cycle length	0.000-0.600	≤ 10.0	≤ 10.0
B	Operations with low delay occurring with good progression and/or short cycle lengths	0.601-0.700	> 10.0 to 20.0	> 10.0 to 15.0
C	Operations with average delays resulting from fair progression and/or longer cycle lengths. Individual cycle failures begin to appear	0.701-0.800	> 20.0 to 35.0	> 15.0 to 25.0
D	Operations with longer delays due to a combination of unfavorable progression, long cycle lengths, or high V/C ratios. Many vehicles stop and individual cycle failures are noticeable	0.801-0.900	> 35.0 to 55.0	> 25.0 to 35.0
E	Operations with high delay values indicating poor progression, long cycle lengths, and high V/C ratios. Individual cycle failures are frequent occurrences	0.901-1.000	> 55.0 to 80.0	> 35.0 to 50.0
F	Operation with delays unacceptable to most drivers occurring due to over saturation, poor progression, or very long cycle lengths	Greater than 1.000	> 80.0	> 50.0

Source: Fehr & Peers, 2023.

Signalized Intersection Queueing Methodology

The HCM methodology was also used to evaluate signalized intersection turn-lane storage capacities. Storage capacities were compared against 95th percentile queue estimates using the Synchro 11 software.

Peak Hour Traffic Signal Warrants

The Peak Hour Traffic Signal Warrant (*California Manual on Uniform Traffic Control Devices (MUTCD) 2014 Edition)* is intended to examine whether a signal is justifiable, but it does not mandate that a signal be installed. Peak hour traffic signal warrants were conducted for all unsignalized intersections operating below acceptable LOS standards.

Multi-modal LOS Methodology

In an effort to provide quantitative data for all user groups, Fehr & Peers developed PersonDelay+, a tool utilizing HCM methodology that provides a more complete picture of how all users are affected by intersection operations. PersonDelay+ reports person delay for all users: vehicle drivers and passengers, pedestrians, and bicyclists for signalized intersections. The data needed is routinely collected as part of the traffic analyses and Complete Streets studies, including capacity, average passenger occupancy, cycle length and effective green time. The LOS grades and descriptions are consistent with the information

provided in **Table 2**. None of the jurisdictions have adopted standards for multi-modal LOS analysis. Therefore, we assumed that LOS D is used as the limit of acceptable performance.

LOS grades below LOS D indicate that on average each person waits over a minute to cross the intersection on foot or by bike. Generally, bike delays are similar to vehicle delays, but that average intersection delay is weighted by measured bicycle counts. Pedestrian delay is a factor of the intersection cycle length and green times that cause the pedestrians to wait for a walk signal.

Collision Review

Vehicle collisions with bicycles and pedestrians along the corridor were reviewed to evaluate potential trends. Data was pulled from the last five years from the Transportation Injury Mapping System (TIMS) database which summarizes reported California crash data from the Statewide Integrated Traffic Records System (SWITRS).

Data Collection

Turning movement and daily traffic counts were collected on Wednesday, April 26th, 2023. Counts were collected on this day to represent peak travel demand in the area. On this day school was in session and a special event (baseball game) was happening at Angels Stadium. This later condition, an event at Angels Stadium or Honda Center, occurs on over a third of the days per calendar year.

Turning movement counts were collected during typical peak commute periods (7:00 AM – 9:00 AM and 4:00 PM to 6:00 PM), and vehicle classifications and bicycle and pedestrian counts were collected at select roadway segments and intersections, respectively. Signal timings were obtained from appropriate jurisdictions.

Future Year Forecasting Methodology

The Orange County Transportation Analysis Model (OCTAM) version 5.0 was utilized to prepare traffic forecasts. OCTAM is consistent with the 2020 SCAG Regional Transportation Plan/Sustainable Communities Strategy (2020 RTP/SCS) with a 2016 base year and a 2045 future year and is the most appropriate model for use in this project because it includes the most recent land use and roadway information for the area. Pending development proposals in the surrounding study area were confirmed with the City of Orange, City of Villa Park, and County staff to account for major pending and approved land use projects **(Table 3).**

Table 3: Pending/Approved Developments

Project Name	Jurisdictions	Location	Quantity	Units
Milan Property	City of Orange	North of Santiago Canyon Road between Cannon Street and Orange Park Boulevard	200	Dwelling Units
Orange Heights	City of Orange	South of Santiago Canyon Road, east of Jamboree Road	1,180	Dwelling Units
Villa Park RV Parking	Orange County	Southeast Corner of Hewes Street and Villa Park Road	69,095	Square Feet

Source: Fehr & Peers, 2023.

Traffic forecasts for study intersections and segments were developed using the Difference Method which is consistent with methodologies delineated in the *National Cooperative Highway Research Program Report (NCHRP) 765* published by the *Transportation Research Board (TRB): Analytical Travel Forecasting Approaches for Project Level Planning and Design (Transportation Research Board, 2014)*. In this study, the Base Year and Future Year model outputs were used to calculate a model growth for the study area, which was then applied to existing traffic volumes to develop 2045 forecasts. Bicycle and pedestrian volumes were assumed to be similar in future conditions.

3. Existing (2023) Conditions

LOS Analysis

The existing turning movements and daily traffic volumes are summarized in **Attachment A**. Existing volumes were utilized along with existing lane configurations to conduct the ICU and HCM analysis. The existing segment, intersection LOS, and multi-modal LOS results are summarized in **Attachment B**, respectively. LOS worksheets are provided in **Attachment C**.

All **roadway segments** operate at LOS C or better except the following:

13. Cannon Street between Taft Avenue and Serrano Avenue (LOS E)
14. Cannon Street between Santiago Canyon Road and Taft Avenue (LOS D)

All **unsignalized intersections** operate at LOS E or F, except Trenton Avenue and Villa Park Road. These intersections have stop control for the side-street, and HCM uses the worst-case movement delay to estimate the intersection LOS. All side-streets have relatively low volumes, which results in only a few vehicles experiencing high delays at the intersections. Since adjacent traffic signals typically meter traffic and provide gaps for stop-controlled movements to be made, gaps in traffic are likely resulting in less delay for the stop-controlled movements than reflected in the LOS analysis.

The following three **signalized intersections** operate at worse than LOS D in the ICU and/or HCM analysis:

12. Cannon Street and Santiago Canyon Road (HCM PM LOS E)
13. Cannon Street and Taft Avenue (ICU PM LOS E and HCM AM LOS E)
14. Cannon Street and Serrano Avenue (ICU PM LOS E)

The following two **signalized intersections** along the Villa Park Road operate at worse than LOS D in the multi-modal LOS analysis. The intersection Wanda Road and Villa Park Road has the highest pedestrian and bike volumes in the corridor (26 at the peak in the AM and 21 at the peak in the PM). Pedestrians on average wait approximately a minute to cross the intersection. The intersection of Hewes Street and Villa Park Road has fewer bikes and peds (5 at the peak in the AM and 9 at the peak in the PM) with the greatest delays for those crossing Villa Park Road.

1. Wanda Road and Villa Park Road (Pedestrian AM and PM LOS E)
10. Hewes Street and Villa Park Road (Bike and Pedestrian AM and PM LOS E)

Queuing Analysis

The queuing analysis was prepared for the intersection of Cannon Street and Villa Park Road since it is the only signalized intersection along Villa Park Road that doesn't meet the County's LOS standard. The intersections queuing analysis is summarized in **Attachment B** and detailed queueing worksheets are

provided in **Attachment D**. The northbound left and southbound left exceed the available storage, and the eastbound left is at capacity.

Signal Warrants

We evaluated the signal warrants for the seven unsignalized intersections which don't meet the County's LOS standards along Villa Park Road. Only the intersection of Linda Vista Street and Villa Park Road meets the peak hour signal warrant[2] (**Attachment E**).

Collision Review

The bicyclist and pedestrian collisions were reviewed from 2018 to 2022, acquired from the Transportation Injury Mapping System (TIMS), which is the most recent data available. There were three reported bike collisions and one pedestrian-involved collision along Villa Park Road between Wanda Road and Cannon Road from 2018 to 2022, which accounts for 29% of the total 14 collisions (**Attachment F**). The three bike collisions all occurred at the Villa Park Road and Wanda Road intersection, while the pedestrian involved collision occurred at Villa Park Road, 225 feet west of Cannon Street. The severity level of the four collisions was "visible injury".

[2] Traffic Signal Warrant Disclaimer: This analysis is intended to examine the general correlation between the planned level of existing facility and the need to install new traffic signals. It estimates existing traffic compared against a sub-set of the standard traffic signal warrants recommended in the Federal Highway Administration *Manual on Uniform Traffic Control Devices* and associated State guidelines. This analysis should not serve as the only basis for deciding whether and when to install a signal. To reach such a decision, the full set of warrants should be investigated based on field-measured, rather than forecast, traffic data and a thorough study of traffic and roadway conditions by an experienced engineer. Furthermore, the decision to install a signal should not be based solely upon the warrants, since the installation of signals can lead to certain types of collisions. The responsible state or local agency should undertake regular monitoring of actual traffic conditions and accident data, and timely re-evaluation of the full set of warrants in order to prioritize and program intersections for signalization.

4. Future Year (2045) Conditions

LOS Analysis

To accurately model the future year roadway network, Fehr & Peers referenced the OCTA 2023 MPAH, 2020 SCAG Regional Transportation Plan and Sustainable Communities Strategy (RTP/SCS), and coordinated with relevant jurisdictions to identify roadway improvements in the study area. The following roadway improvements were assumed in the future year assessment:

- Wanda Road south of Villa Park Road is widened from three to four lanes (MPAH)
- Cannon Street between Santiago Canyon Road and Serrano Avenue is widened in the northbound direction from two to three lanes (City of Orange)

The MPAH identifies Villa Park Road, between Hewes Street and Cannon Street, as six lanes (currently four lanes). The widening was assumed in the modeling and forecasting efforts to analyze unconstrained demand but was not assumed in the intersection and segment operations analysis.

Future year turning movements and daily traffic volumes are provided in **Attachment A** and were utilized along with future year lane configurations to conduct the ICU and HCM analysis. Consistent with standard practice, the HCM analysis assumes routine traffic signal maintenance would occur, and signal timing parameters would be optimized to accommodate future traffic volumes.

The future year roadway segment, intersection LOS, and multi-modal LOS results are summarized in **Attachment B**. LOS worksheets are provided in **Attachment C**.

The following **roadway segments** are forecast to operate below County's LOS C standard:

3. Villa Park Road between Hewes Street and Cannon Street (LOS D)
4. Santiago Canyon Road east of Cannon Street (LOS D)
13. Cannon Street between Taft Avenue and Serrano Avenue (LOS D)

The roadways surrounding Villa Park Road have sufficient capacity to accommodate increased traffic, but Villa Park Road provides the most desirable east/west street in the area and is forecast to have high demand. The segments between Hewes Street and Cannon Street are estimated to not meet the County's LOS standard. There is a significant demand for northbound/southbound traffic on Cannon Street north of Villa Park Road and Hewes Street south of Villa Park Road. This analysis confirms widening Villa Park Road between Hewes Street and Cannon Street is necessary for it to operate within the County's LOS standards.

The side street movements for all **unsignalized intersections** are forecast to operate at LOS E or F or worse. However, all the side-streets have relatively low volumes, which results in only a few vehicles experiencing high delays at the intersections. Since adjacent traffic signals typically meter traffic and

provide gaps for stop-controlled movements to be made, gaps in traffic are likely being underestimated and conditions will be better than the analysis suggests.

The following four **signalized intersections** are forecast to operate at LOS E or F in the ICU and/or HCM analysis:

10. Hewes Street and Villa Park Road (ICU and HCM AM LOS E)
12. Cannon Street and Santiago Canyon Road (ICU AM and PM LOS E)
13. Cannon Street and Taft Avenue (ICU and HCM AM LOS E)
14. Cannon Street and Serrano Avenue (ICU AM LOS F)

The following three **signalized intersections** along the Villa Park Road are forecast to operate at LOS E using a multi-modal LOS analysis. Similar to existing conditions, the pedestrian wait time to cross is on average over a minute at Wanda Street and Hewes Street. The wait times to cross at the intersection of Villa Park Road and Cannon Street is also forecast to be over a minute on average which is worse than existing conditions.

1. Wanda Road and Villa Park Road (Pedestrian AM and PM LOS E)
10. Hewes Street and Villa Park Road (Bike and Pedestrian AM and PM LOS E)
12. Cannon Street and Santiago Canyon Road (Bike and Pedestrian PM LOS E)

Queueing Analysis

The intersections of Hewes Street/Villa Park Road and Cannon Street/Villa Park Road are the only signalized intersections along Villa Park Road that will fail to meet the County's LOS standards. The queuing analysis is summarized in **Attachment B** and detailed queueing worksheets are provided in **Attachment D**. The queues at the following movements exceed available storage capacities:

- Hewes Street and Villa Park Road: westbound left-turn
- Cannon Street and Santiago Canyon Road: eastbound left-turn, northbound left-turn and southbound right-turn

Signal Warrants

Peak hour signal warrants for the unsignalized intersections which operate below County's standards along Villa Park Road are provided in **Attachment E**. Only the intersection of Linda Vista Street and Villa Park Road meets peak hour signal warrant.

5. Recommendations

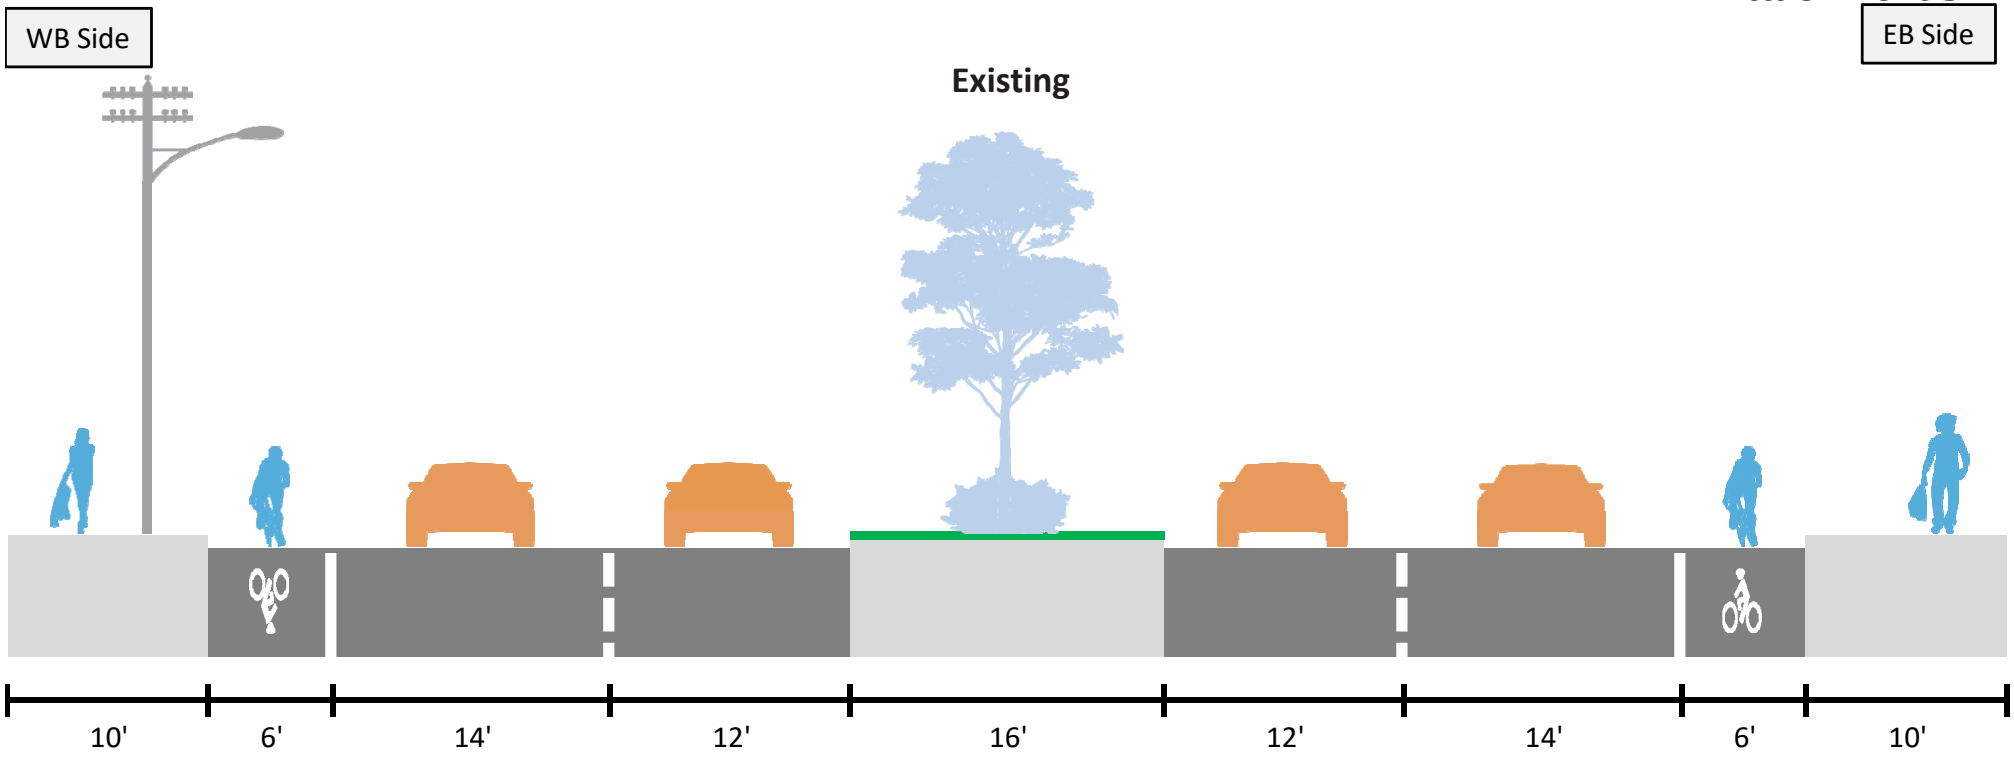
The recommendations below will provide acceptable operating conditions within the existing right-of-way and built curb-to-curb width.

The future forecasts along Villa Park Road indicate that more capacity is needed between Hewes Street and Cannon Street to effectively serve the future demand. This assessment concluded that an additional westbound through lane on Villa Park Road between Hewes Street and Cannon Street would be the best use of the available right-of-way to increase capacity, meet operational goals, and limit impacts to adjacent properties.

In addition to capacity improvements, we recommend bicycle and pedestrian treatments to improve conditions along the corridor.

Villa Park Road Between Wanda Street and Hewes Street

This segment of Villa Park Road has sufficient capacity to meet future traffic demands. While the unsignalized intersections are not forecast to meet the County's standards, they are also not anticipated to meet the warrants for a signal. The analysis does not consider the effects of upstream signals in creating gaps, and the County should monitor the unsignalized intersections for potential signalization if delays become unreasonable.



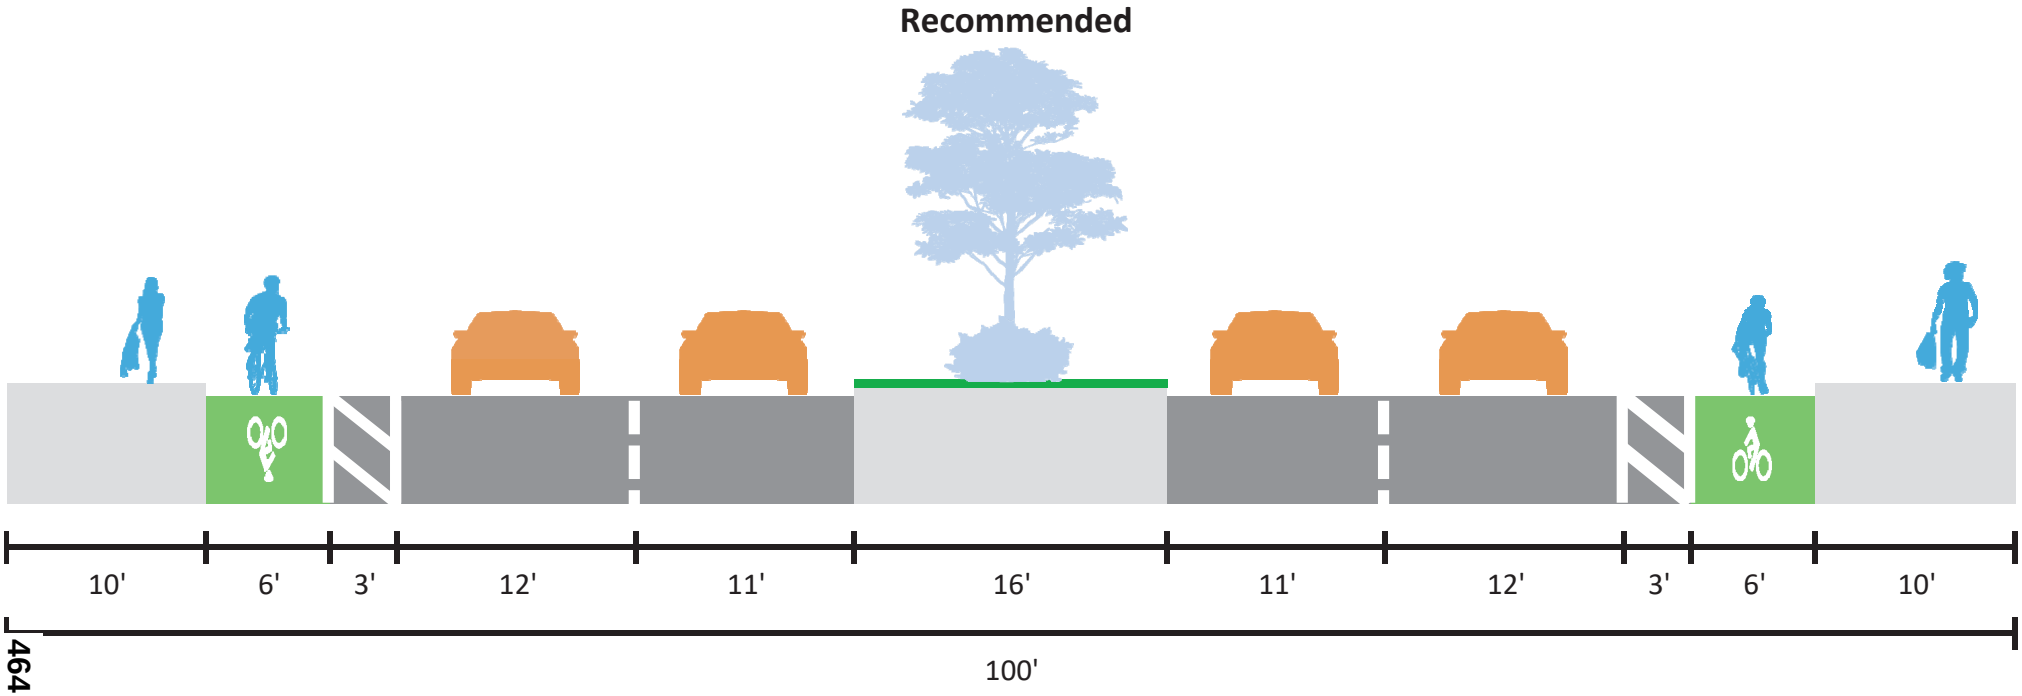
To improve bicyclist and pedestrian safety and comfort, we recommend restriping the corridor to provide a three-foot buffer between the bike lane and travel lanes, narrowing the two vehicle lanes to 12 feet and 11 feet. The recommended restriping can occur within the available right-of-way and existing curb-to-curb width, without affecting the exiting raised median. This design would provide a six-foot bike lane between Wanda Street and Lemon Street and an eight-foot bike lane between Lemon Street and Hewes Street. The recommended roadway cross-section for Villa Park Road between Wanda Street and Lemon Street is shown on **Figure 2**, and the recommended cross-section for Villa Park Road between Lemon Street and Hewes Street is shown on **Figure 3**.

The buffer will enhance the visibility of the bike lane and increase the separation between motor vehicles and bicyclists. The buffered bike lane also provides space for bicyclists to pass another bicyclist without encroaching into the adjacent motor vehicle lane. According to the guidelines from U.S. Department of Transportation Federal Highway Administration (FHWA), the range of lane widths for urban arterials and collectors ranges from 10 to 12 feet.[3] The Orange County Highway Design Manual Section 1003.2 requires a Class II bike lane on a curbed street to be a minimum of five feet.

[3] Table 3: Range for Lane Width, U.S. Department of Transportation Federal Highway Administration, https://safety.fhwa.dot.gov/geometric/pubs/mitigationstrategies/chapter3/3_lanewidth.cfm

Figure 2: Roadway Cross-section for Villa Park Road Between Wanda Street and Lemon Street

Attachment 5



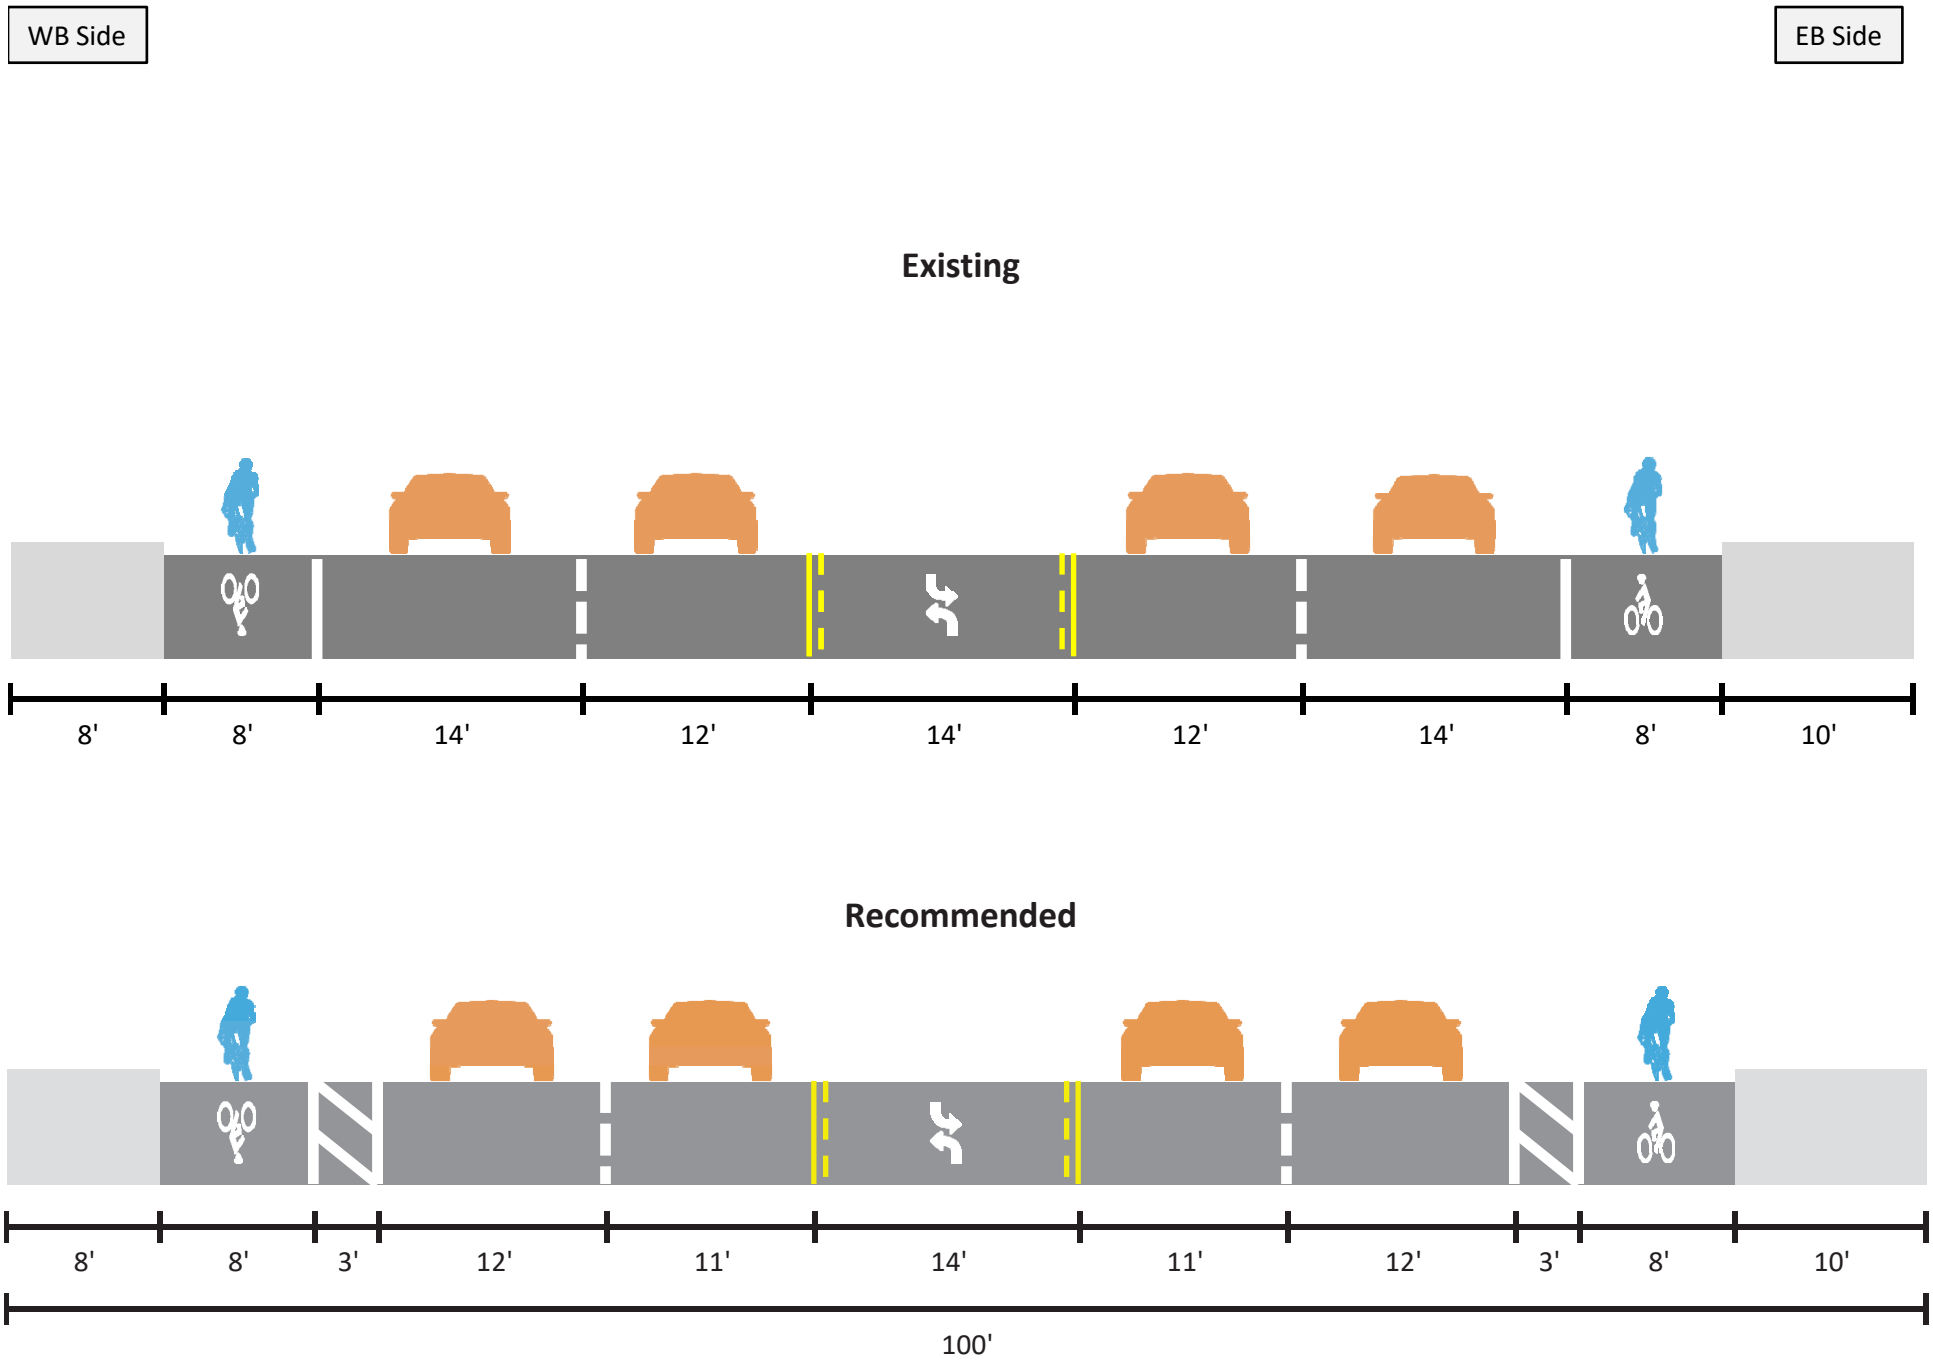


Figure 3: Recommended Roadway Cross-section for Villa Park Road Between Lemon Street and Hewes Street

Villa Park Road Between Hewes Street and Cannon Street

This segment of Villa Park Road will degrade to LOS D, which is below the County's standard. The signalized intersection of Hewes Street and Villa Park Road will not meet the County's standard, and conditions are forecast to worsen at the signalized intersection of Cannon Street and Villa Park Road and unsignalized intersection of Linda Vista Street and Villa Park Road. Vehicle queues at each of these intersections are forecast to extend past available storage, in some cases as far as to adjacent intersections.

To provide conditions that meet the County's operating standards, we recommend the westbound direction of the segment be restriped from two to three lanes between Hewes Street and Cannon Street. This recommendation requires the narrowing of through travel lanes and the center median to 11 feet each to accommodate a third 11-foot westbound vehicle lane. Further, we recommend extending the bike buffer to Cannon Street from Hewes Street by modifying the existing eight-foot Class II bike lane to a five-foot bike lane and a three-foot striped buffer. The recommended cross-section for Villa Park Road between Hewes Street and Cannon Street is shown on **Figure 4**.

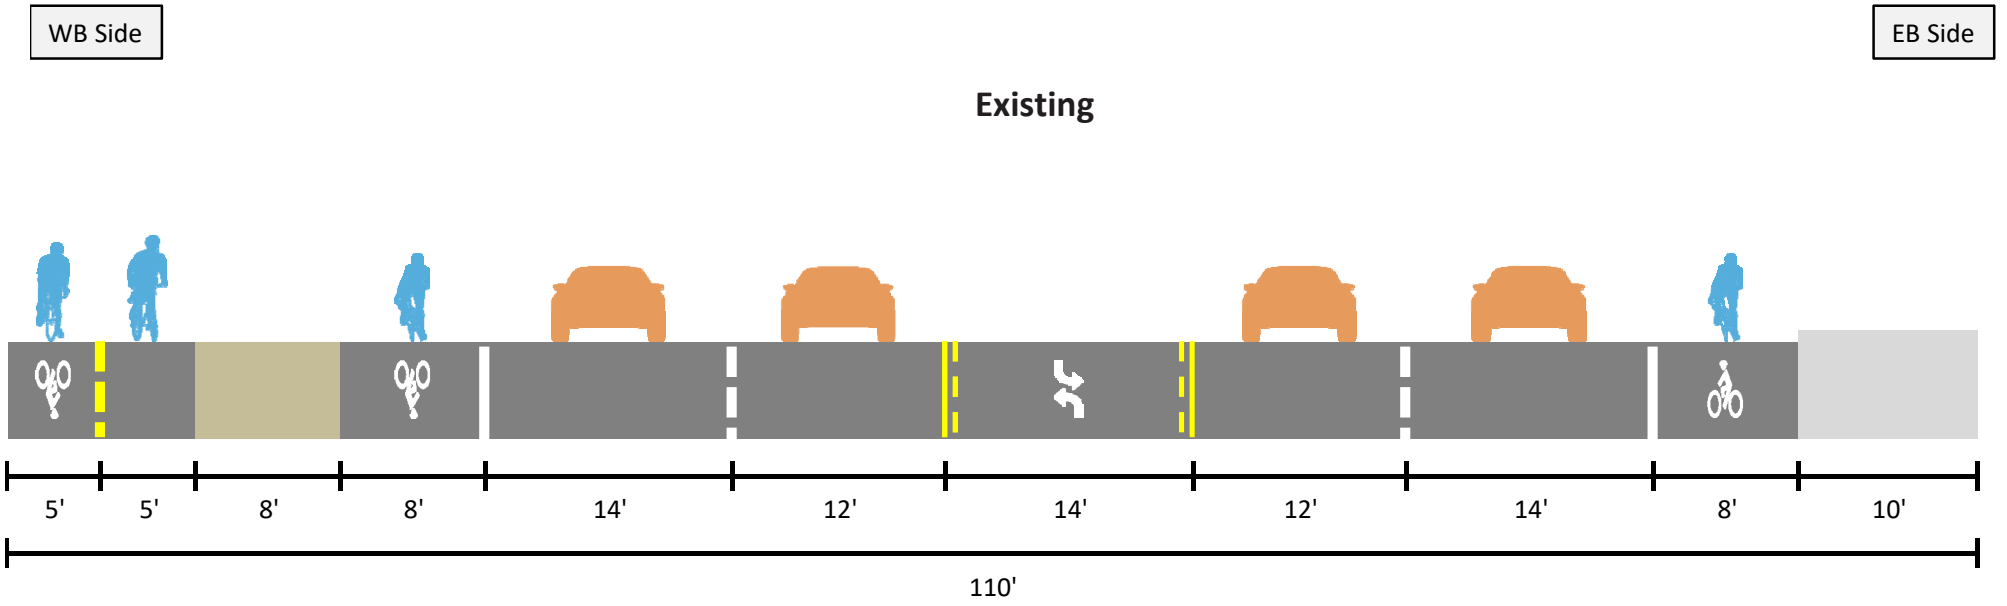
In addition to the broader recommendations of a third westbound through lane and bike buffer, these elements should be included in future plans which are shown in **Attachment G**:

Hewes Street and Villa Park Road

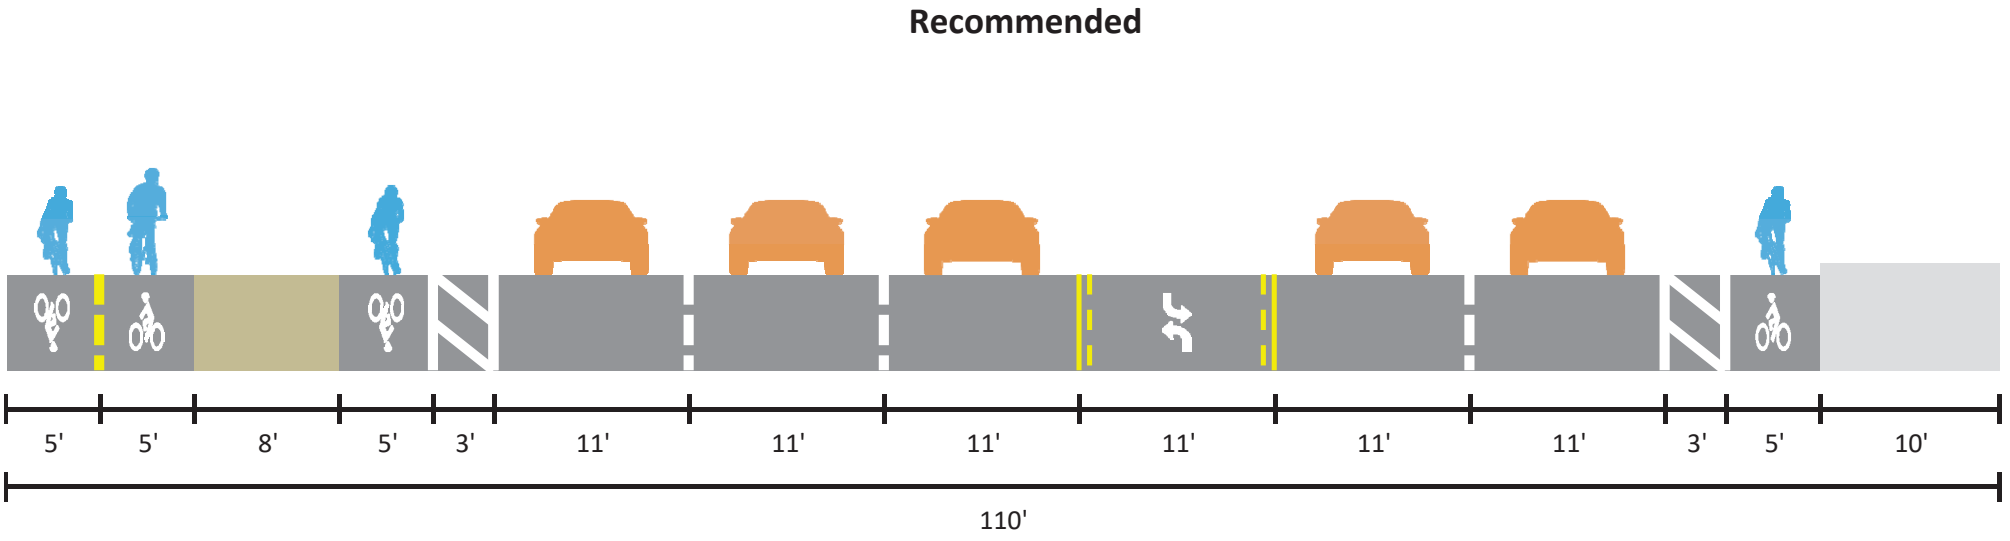
- Restripe the westbound approach to add a trap westbound left-turn lane (two total left-turn lanes)
- Extend the westbound left-turn pocket to 450 feet

Linda Vista Street and Villa Park Road

- Signalize the intersection
- Restripe the intersection to add a westbound through lane (three total through lanes)



Cannon Street and Santiago Canyon Road



- Stripe a westbound through lane (three total through lanes)
- Add a westbound receiving lane (three total through lanes)
- Restripe one southbound through lane into a trap right-turn lane (two total right-turn lanes)
- Restripe shared southbound through/left lane into a southbound through lane (one total through lane)
- Restripe the existing Class II bike lane between the southbound left-most right-turn lane and the through lane
- Update northbound and southbound signal phasing from split to protected phasing.

The recommended improvement above would meet operational goals and balance multimodal needs along the corridor without requiring roadway widening or additional right-of-way. The recommended cross section provides fewer lanes than what is currently planned in the City of Orange's General Plan Circulation Element. This improvement would not prevent a future project from consideration if future traffic conditions warranted three lanes in each direction.

Fehr & Peers considered other alternatives for the Cannon Street and Santiago Canyon Road intersection but found them to operate inadequately during the PM peak hour. These alternatives were similar to the recommended improvement with a reduction in westbound through lanes and a southbound channelized right turn lane (that would provide a free southbound right movement). A focused alternatives analysis that summarizes average delay results for these alternatives is provided in **Table 8** and was used to screen these alternatives for further consideration.

Figure 4: Recommended Roadway Cross-section for Villa Park Road Between Hewes Street and Cannon Street

LOS Results with Recommended Improvements

The recommended improvements above will provide acceptable daily roadway LOS, peak hour LOS and queues within provided storage. The bicycle and pedestrian delays will also be reduced by the capacity improvements, though not to better than LOS D conditions. **Table 4** summarizes the daily roadway segment LOS results with the improvement. The intersection peak hour LOS and queueing results for the proposed improvements are summarized in **Tables 5, 6,** and **7**, and LOS and queuing worksheets are provided in **Attachments C** and **D**.

Additional directional traffic volume and capacity calculations are provided for Villa Park Road between Hewes Street and Cannon Street. The westbound direction ADT volumes are approximately 1,700 vehicles higher in the existing condition traffic counts and the future forecast westbound ADT is approximately 2,600 vehicles higher than the eastbound direction. As shown, the capacity assessment for the 5-lane cross section as well as the eastbound or westbound isolated direction capacity assessment all result in LOS C or better conditions, further justifying the recommendation for the additional lane in only the westbound direction.

Table 4: Future Year Roadway LOS with Improvements

Segment	Lanes	ADT	Capacity	V/C	LOS
No Improvements					
Villa Park Road between Hewes Street and Cannon Street	4	30,400	37,500	0.81	**D**
With Improvements					
Villa Park Road between Hewes Street and Cannon Street	5	30,400	46,900	0.65	B
Villa Park Road between Hewes Street and Cannon Street (Eastbound)	2	13,900	18,760	0.74	C
Villa Park Road between Hewes Street and Cannon Street (Westbound)	3	16,500	28,140	0.59	A

Note(s):

1. **Bold** symbolizes segment operates below Jurisdictions' LOS standards.
2. Capacities for LOS E were referenced for arterial types from the MPAH.
3. The MPAH does not list capacities for five-lane facilities. The five-lane capacity was estimated by interpolating between the four-lane and 6-lane divided arterial types.

Table 5: Future Year Intersection LOS with Improvements

Intersection	Control	Methodology	Peak Hour	Future Year without Improvements		Future Year with Improvements	
				V/C / Delay	LOS	V/C / Delay	LOS
10. Hewes Street and Villa Park Road	Signalized	ICU / HCM	AM	**0.955 / 70**	**E / E**	0.733 / 41	C / D
			PM	0.889 / 25	D / C	0.791 / 19	C / B
11. Linda Vista Street and Villa Park Road	TWSC/ Signalized	HCM	AM	**>100**	**F**	0.495 / 14	A / B
			PM	**>100**	**F**	0.526 / 6	A / A
12. Cannon Street and Santiago Canyon Road	Signalized	ICU / HCM	AM	**0.914** / 49	**E** / D	0.768 / 36	C / D
			PM	**0.935** / 47	**E** / D	0.828 / 54	D / D

Note(s):

1. ">100" is reported for highly congested movements where more than 100 seconds is reported.
2. **Bold** symbolizes segment operates below Jurisdictions' LOS standards.

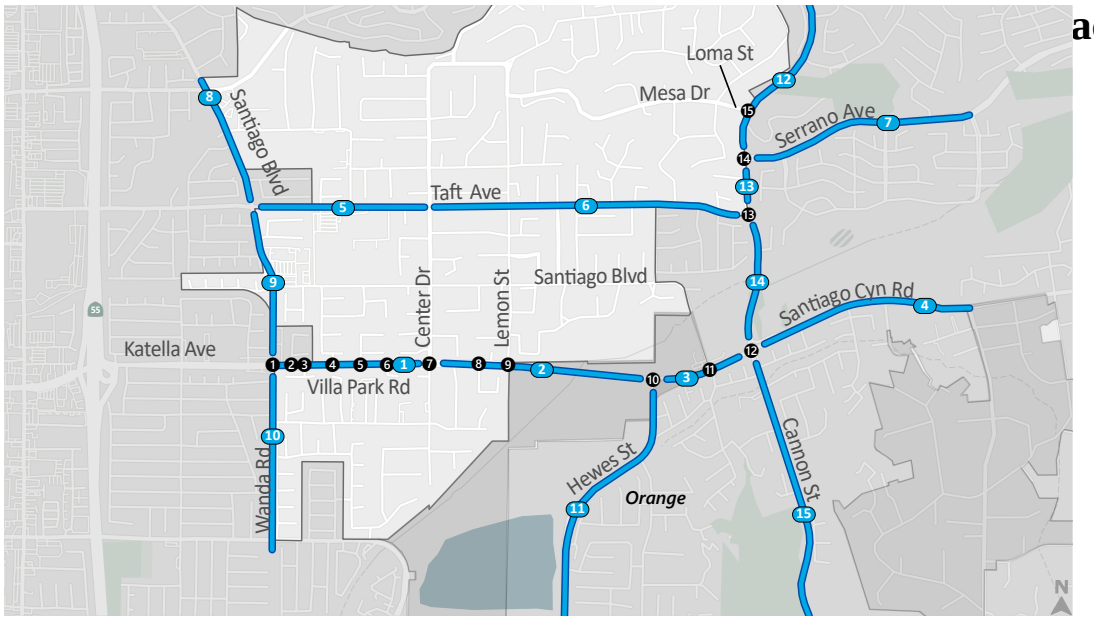
			PM	275	300
	SBR	400	AM	**1,025**	75
			PM	**600**	75

Notes:
1. Queues were calculated using HCM 7th methodologies and are rounded up to the nearest 25-foot increment.
2. "EB" = eastbound, "WB" = westbound, "NB" = northbound, "SB" = southbound, "L" = left, "T" = through, "R" = right.
3. Hewes Street and Villa Park Road WBL turn pocket is proposed to be widened to 450' under Future Year with Improvements conditions.
4. **Bold** symbolizes movement is at or exceeds available storage capacity.
5. Underlined symbolizes movement is at capacity.

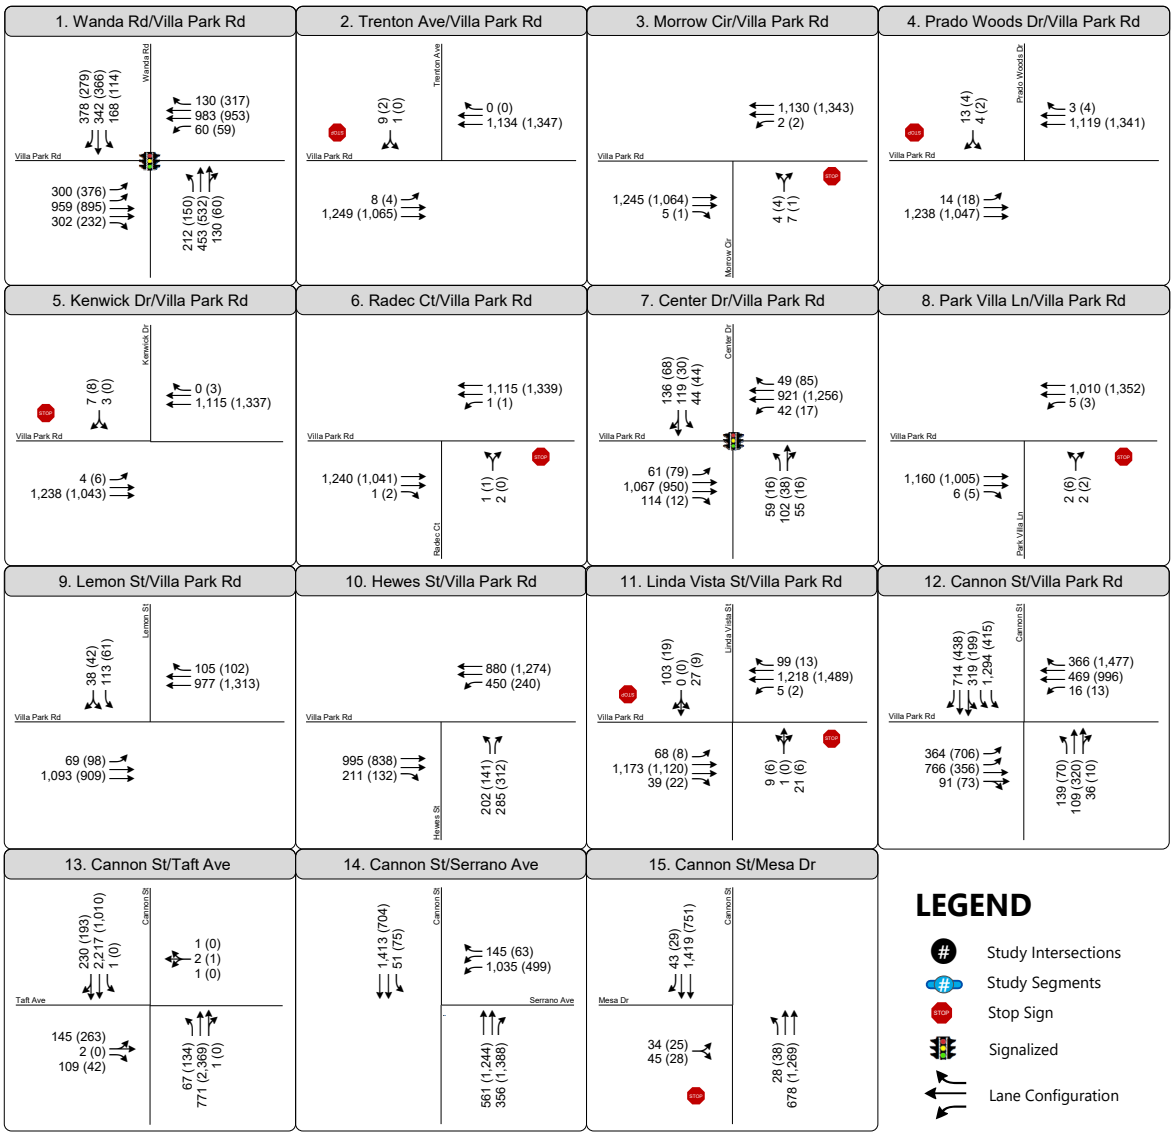
Source: Fehr & Peers, 2023.

Table 8 shows the forecasted intersection operations at Intersection 12: Cannon Street and Santiago Canyon Road under the three considered alternatives. Only Alternative 1 provides acceptable conditions during the PM peak hour.

Table 8: Cannon Street/Santiago Canyon Road Future Year Intersection LOS Alternative Results, PM Peak Hour



Alternative	Methodology	Future Year with Improvements	
		Delay (sec)	LOS
Alternative 1 (Recommended): Three WB Through Lanes Two SB Right Turn Lanes	HCM	36	D
Alternative 2: Two WB Through Lanes Two SB Right Turn Lanes	HCM	**59**	**E**
Alternative 3: Two WB Through Lanes One SB Right Turn Lane (Channelized)	HCM	**64**	**E**



Source: Fehr & Peers, 2024.

6. Vehicle Miles Traveled (VMT) Assessment

Villa Park Road from Lemon Street to west of Cannon Street is planned to be a six-lane Major Arterial in the current MPAH. According to the operations and cross-section analysis, a five-lane design (three westbound lanes and two eastbound lanes) along Villa Park Road between Hewes Street and Cannon Street is sufficient to serve future traffic demand. The above recommendation won't add additional capacity than what has been assumed in adopted Circulation Plans and EIRs for the County and City of Orange and Villa Park. Since no capacity is being added we can conclude that no VMT will be induced, and that the change to the MPAH designation would result in a less-than-significant transportation impact.

Attachment B: Analysis Results

Attachment B Analysis Results

Existing Roadway Segment LOS

	Segment	Lanes	ADT	Capacity[2]	V/C	LOS
1.	Villa Park Road between Wanda Road and Center Drive	4	25,828	37,500	0.69	B
2.	Villa Park Road between Center Drive and Hewes Street	4	23,840	37,500	0.64	B
3.	Villa Park Road between Hewes Street and Cannon Street	4	26,178	37,500	0.7	B
4.	Santiago Canyon Road east of Cannon Street	4	27,610	37,500	0.74	C
5.	Taft Avenue between Santiago Boulevard and Center Drive	2	11,979	22,000	0.54	A
6.	Taft Avenue between Center Drive and Cannon Street	2	6,217	22,000	0.28	A
7.	Serrano Avenue east of Cannon Road	4	18,826	37,500	0.5	A
8.	Santiago Boulevard north of Taft Avenue	4	17,846	37,500	0.48	A
9.	Wanda Road between Villa Park Road and Taft Avenue	4	21,089	37,500	0.56	A
10.	Wanda Road south of Villa Park Road	3	16,529	25,000	0.66	B
11.	Hewes Street south of Villa Park Road	4	9,458	25,000	0.38	A
12.	Cannon Street north of Serrano Avenue	4	19,345	37,500	0.52	A
13.	Cannon Street between Taft Avenue and Serrano Avenue	4	34,370	37,500	0.92	**E**
14.	Cannon Street between Villa Park Road and Taft Avenue	4	31,792	37,500	0.85	**D**
15.	Cannon Street south of Santiago Canyon Road	4	6,155	25,500	0.25	A

Note(s):

1. **Bold** symbolizes segment operates below OCTA MPAH LOS standards.
2. Capacities for LOS E were referenced for arterial types from the MPAH.

Existing 95th Percentile Queues

Intersection	Movement	Storage (ft)	Peak Hour	Queue (ft)
12. Cannon Street and Santiago Canyon Road	EBL	425	AM	225
			PM	<u>425</u>
	EBT	675	AM	550
			PM	200
	WBL	225	AM	50
			PM	50
	WBT	>1000	AM	275
			PM	750
	WBR	700	AM	0
			PM	500
	NBL	150	AM	**200**
			PM	125
	NBT	500	AM	100
			PM	250
	SBL	550	AM	**600**
			PM	200
	SBT	>1000	AM	450
			PM	200
	SBR	400	AM	300
			PM	150

Notes:
1. Queues were calculated using HCM 7th methodologies and are rounded up to the nearest 25-foot increment.
2. "EB" = eastbound, "WB" = westbound, "NB" = northbound, "SB" = southbound, "L" = left, "T" = through, "R" = right.
3. **Bold** symbolizes movement exceeds available storage capacity.
4. <u>Underlined</u> symbolizes movement is at capacity.

Future Year Roadway Segment LOS

	Segment	Lanes	ADT	Capacity[2]	V/C	LOS
1.	Villa Park Road between Wanda Road and Center Drive	4	27,670	37,500	0.74	C
2.	Villa Park Road between Center Drive and Hewes Street	4	25,700	37,500	0.69	B
3.	Villa Park Road between Hewes Street and Cannon Street	4	30,400	37,500	0.81	**D**
4.	Santiago Canyon Road east of Cannon Street	4	30,170	37,500	0.8	**D**
5.	Taft Avenue between Santiago Boulevard and Center Drive	2	11,700	22,000	0.53	A
6.	Taft Avenue between Center Drive and Cannon Street	2	5,530	22,000	0.25	A
7.	Serrano Avenue east of Cannon Road	4	19,270	37,500	0.51	A
8.	Santiago Boulevard north of Taft Avenue	4	18,250	37,500	0.49	A
9.	Wanda Road between Villa Park Road and Taft Avenue	4	21,910	37,500	0.58	A
10.	Wanda Road south of Villa Park Road	4	16,160	25,000	0.65	B
11.	Hewes Street south of Villa Park Road	4	11,770	25,000	0.47	A
12.	Cannon Street north of Serrano Avenue	4	22,660	37,500	0.6	B
13.	Cannon Street between Taft Avenue and Serrano Avenue	5	39,120	46,900	0.83	**D**
14.	Cannon Street between Villa Park Road and Taft Avenue	5	36,890	46,900	0.79	C
15.	Cannon Street south of Santiago Canyon Road	4	7,800	25,500	0.31	A

Note(s):

1. **Bold** symbolizes segment operates below County's LOS standards.
2. Capacities for LOS E were referenced for arterial types from the MPAH.

Report File: N:\...\01_EXAM.pdf

Scenario 1 Existing AM Peak Hour
7/21/2023

Intersection Analysis Summary

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
1	Villa Park Rd & Wanda Rd	Signalized	ICU 2	WB Thru	0.743	-	C
7	Villa Park Rd & Center Dr	Signalized	ICU 2	EB Thru	0.553	-	A
9	Villa Park Rd & Lemon St	Signalized	ICU 2	EB Thru	0.390	-	A
10	Villa Park Rd & Hewes St	Signalized	ICU 2	EB Thru	0.767	-	C
12	Santiago Canyon Rd & Cannon St	Signalized	ICU 2	SB Right	0.694	-	B
13	Taft Ave & Cannon St	Signalized	ICU 2	SB Right	0.893	-	D
14	Serrano Ave & Cannon St	Signalized	ICU 2	SB Thru	0.758	-	C

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [WBR] is excluded from calculations of the approach delay and intersection delay.

Report File: N:\...\02_EXPM.pdf

Scenario 2 Exisitng PM Peak Hour
7/21/2023

Intersection Analysis Summary

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
1	Villa Park Rd & Wanda Rd	Signalized	ICU 2	WB Thru	0.731	-	C
7	Villa Park Rd & Center Dr	Signalized	ICU 2	WB Thru	0.511	-	A
9	Villa Park Rd & Lemon St	Signalized	ICU 2	WB Thru	0.497	-	A
10	Villa Park Rd & Hewes St	Signalized	ICU 2	WB Thru	0.605	-	B
12	Santiago Canyon Rd & Cannon St	Signalized	ICU 2	WB Thru	0.758	-	C
13	Taft Ave & Cannon St	Signalized	ICU 2	NB Thru	0.900	-	E
14	Serrano Ave & Cannon St	Signalized	ICU 2	NB Right	0.909	-	E

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

Notes

User approved pedestrian interval to be less than phase max green.
User approved volume balancing among the lanes for turning movement.
* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [WBR] is excluded from calculations of the approach delay and intersection delay.

Report File: N:\...\03_FYNoImprovementAM.pdf

Scenario 3 Future AM Peak Hour
7/21/2023

Intersection Analysis Summary

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
1	Villa Park Rd & Wanda Rd	Signalized	ICU 2	WB Thru	0.836	-	D
7	Villa Park Rd & Center Dr	Signalized	ICU 2	EB Thru	0.585	-	A
9	Villa Park Rd & Lemon St	Signalized	ICU 2	WB Thru	0.450	-	A
10	Villa Park Rd & Hewes St	Signalized	ICU 2	WB Left	0.955	-	E
12	Santiago Canyon Rd & Cannon St	Signalized	ICU 2	SB Right	0.914	-	E
13	Taft Ave & Cannon St	Signalized	ICU 2	SB Thru	1.064	-	F
14	Serrano Ave & Cannon St	Signalized	ICU 2	SB Thru	0.910	-	E

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

Notes

User approved pedestrian interval to be less than phase max green.
User approved volume balancing among the lanes for turning movement.
* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [WBR] is excluded from calculations of the approach delay and intersection delay.

MPAH Amendment Study - Villa Park Rd

Vistro File: N:\...\Villa Park_v6.vistro — Scenario 4 Future PM Peak Hour
Report File: N:\...\04_FYNoImprovementPM.pdf — 7/21/2023

Intersection Analysis Summary

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
1	Villa Park Rd & Wanda Rd	Signalized	ICU 2	EB Thru	0.774	-	C
7	Villa Park Rd & Center Dr	Signalized	ICU 2	WB Thru	0.547	-	A
9	Villa Park Rd & Lemon St	Signalized	ICU 2	WB Thru	0.524	-	A
10	Villa Park Rd & Hewes St	Signalized	ICU 2	WB Thru	0.889	-	D
12	Santiago Canyon Rd & Cannon St	Signalized	ICU 2	WB Thru	0.935	-	E
13	Taft Ave & Cannon St	Signalized	ICU 2	NB Thru	0.783	-	C
14	Serrano Ave & Cannon St	Signalized	ICU 2	NB Thru	0.696	-	B

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

Intersection Summary	
HCM 6th Ctrl Delay	36.4
HCM 6th LOS	D

Notes

User approved pedestrian interval to be less than phase max green.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [WBR] is excluded from calculations of the approach delay and intersection delay.

MPAH Amendment Study - Villa Park Rd

Report File: N:\...\05_FYBAM.pdf
7/21/2023

Intersection Analysis Summary

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
10	Villa Park Rd & Hewes St	Signalized	ICU 2	WB Thru	0.733	-	C
11	Villa Park Rd & Linda Vista St	Signalized	ICU 2	EB Thru	0.495	-	A
12	Santiago Canyon Rd & Cannon St	Signalized	ICU 2	SB Left	0.768	-	C

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

Intersection Summary	
HCM 6th Ctrl Delay	53.7
HCM 6th LOS	D

Notes

User approved pedestrian interval to be less than phase max green.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [WBR] is excluded from calculations of the approach delay and intersection delay.

Scenario 18 Future PM Peak Hour - Recommendation

Report File: N:\...\05_FYBPM.pdf
7/21/2023

Intersection Analysis Summary

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
10	Villa Park Rd & Hewes St	Signalized	ICU 2	WB Thru	0.791	-	C
11	Villa Park Rd & Linda Vista St	Signalized	ICU 2	EB Thru	0.526	-	A
12	Santiago Canyon Rd & Cannon St	Signalized	ICU 2	EB Left	0.828	-	D

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Prior Board Action: 10/8/2024 #15, 1/12/2021 #44-45, 11/17/2020 #30, 2/25/2020 #17-18

RECOMMENDED ACTION(S):

1. Find that the proposed project is exempt from the provisions of the CEQA, Common Sense Exemption pursuant to CEQA Guidelines Section 15061 (b)(3).

2. Conduct public hearing.

3. Consider the matter and adopt Resolution which will adopt General Plan Amendment TGPA 24-03 - Transportation Element.

SUMMARY:

Adoption of General Plan Amendment TGPA 24-03 - Transportation Element will reclassify roadway designation for Villa Park Road/Santiago Canyon Road to accurately reflect changing development and traffic patterns.

BACKGROUND INFORMATION:

The County of Orange (County) Transportation Element identifies goals, objectives, policies and implementation programs that affect the transportation system. The Transportation Element contains policies on the development of the transportation facilities necessary to accommodate orderly growth within

the County, provides guidance for future planning efforts within the unincorporated area and ensures a balanced transportation system.

OC Public Works initiated a Master Plan of Arterial Highways (MPAH) amendment request with the Orange County Transportation Authority (OCTA) after evaluation of a Transportation Assessment (TA) (Fehr and Peers, March 2024, Attachment D). The MPAH depicts a Countywide roadway network intended to ensure coordinated transportation system development among local jurisdictions in the County. The TA compared the existing MPAH roadway designations for Villa Park Road/Santiago Canyon Road against proposed modifications to those roadway designations to conform the designations to reduced growth projections through the year 2045. Villa Park Road/Santiago Canyon Road between Hewes Street and Cannon Street is a four-lane Primary Arterial. The MPAH designates the roadway as a six-lane Major Arterial.

The proposed reclassification of the roadway segment is meant to support the County's effort to improve traffic conditions and conform to changing traffic patterns and growth estimates. Over the last ten years, the population growth projections have indicated reduced future growth compared to previous years. As a result, some of the future planned roadway infrastructure to support the previously assumed higher population growth may no longer be necessary.

The TA analyzed future forecasts along Villa Park Road/Santiago Canyon Road and indicated that more capacity is needed between Hewes Street and Cannon Street to effectively serve future demand. However, the current Major Arterial designation does not fit within the existing right of way. The TA concluded that the roadway designation of a five lane Asymmetric Primary Arterial (three westbound lanes and two eastbound lanes) on Villa Park Road/Santiago Canyon Road between Hewes Street and Cannon Street will be sufficient to serve future traffic demand on the roadway, be the best use of the available right-of-way to increase capacity, meet operational goals of the County and limit impacts to adjacent properties. Further explanation of this review is detailed in Planning Commission Staff Report and Resolution No. 2025-03 (Attachment D). The five lane Asymmetric Primary Arterial roadway can fit within the existing 100-foot right-of-way.

Proposed Project:
The proposed General Plan Amendment TGPA 24-03 - Transportation Element (Amendment) includes the following revisions, including the Circulation Plan (Attachment C):

1. Reclassify the existing classification of Major Arterial (divided six-lane) to Asymmetric Primary Arterial (divided five-lane) for Villa Park Road/Santiago Canyon Road between Hewes Street and Cannon Street. The reclassification would provide three westbound lanes and two eastbound lanes and provide adequate right-of-way to accommodate a Class II bicycle lanes with three-foot painted buffers to improve traffic conditions on Villa Park Road/Santiago Canyon Road.

2. Include the definition of Asymmetric Lanes in the Transportation Element (Attachment B).

    a. Asymmetric Lanes: Capacity augmentation may be needed that creates more lanes in one direction than the other (asymmetric lanes) along some Smart Streets, Principal, Major and/or Primary arterials.

The MPAH amendment request was conditionally approved by OCTA's Regional Transportation Planning Committee on August 29, 2024, and by OCTA's Board on September 9, 2024. OCTA's conditional approval action remains conditional until OCTA receives documentation that the County has amended their General Plan and complies with the requirements of CEQA. OC Public Works recommends the Board adopt the Resolution to adopt the Amendment.

Planning Commission (Commission) Action:
OC Public Works received authorization from the Commission on December 11, 2024, to initiate the Amendment, including the Circulation Plan. On February 26, 2025, the Commission held a public hearing, considered the Amendment and voted to adopt Commission Resolution No. 2025-03, which recommends adoption by the Board of Supervisors (Board) to update the County's Transportation Element (Attachment D).

Prior Board actions related to the County's Transportation Element are summarized in the table below.

Board Date	Action
10/8/2024	Adopted General Plan Amendment T24-01 - County of Orange Transportation Element
1/12/2021	Adopted General Plan Amendment T20-02 - County of Orange Transportation Element Adopted General Plan Amendment T20-03 - County of Orange Transportation Element
11/17/2020	Adopted General Plan Amendment 20-01 Land Use, Transportation, Growth Management
2/25/2020	Adopted General Plan Amendment T19-01 - County of Orange Transportation Element Adopted General Plan Amendment T19-02 - County of Orange Transportation Element

Compliance with CEQA: The proposed Amendment is exempt (Common Sense Exemption) from the provisions of CEQA pursuant to CEQA Guidelines Sections 15061(b)(3) since there is no possibility that the revisions to the roadway designations may have a significant effect on the environment.

Attachment A - Resolution
Attachment B - Resolution Exhibit A (Transportation Element)
Attachment C - Resolution Exhibit B (Circulation Plan Map)
Attachment D - Planning Commission Staff Report and Resolution No. 2025-03

September 9, 2024

To: Members of the Board of Directors

From: Andrea West, Clerk of the Board

Subject: Amendments to the Master Plan of Arterial Highways

Regional Transportation Planning Committee Meeting of August 29, 2024

Present: Directors Dumitru, Federico, Foley, and Stephens
Absent: Directors Do, Harper, and Khan

Committee Vote

This item was passed by the Members present.

Committee Recommendation(s)

A. Approve the following Master Plan of Arterial Highways amendments:

County of Orange

1. Reclassify Villa Park Road/Santiago Canyon Road from a major (six-lane, divided) arterial to an asymmetric primary (five-lane, divided) arterial between Hewes Street and Cannon Street.
2. Reclassify Santiago Canyon Road from a primary (four-lane, divided) arterial to a divided collector (two-lane, divided) arterial between State Route 241 and Live Oak Canyon Road.
3. Reclassify El Toro Road from a major (six-lane, divided) arterial to a primary (four-lane, divided) arterial between Live Oak Canyon Road and Pheasant Creek.
4. Reclassify El Toro Road, from a major (six-lane, divided) arterial to an asymmetric primary (five-lane, divided) arterial between Pheasant Creek and Portola Parkway.
5. Delete Black Star Canyon Road between Silverado Canyon Road and the Orange County/Riverside County Line.
6. Reclassify Bucker Way from a secondary (four-lane, undivided) arterial to a divided collector (two-lane, divided) arterial between Ranch Canyon Road and Coyotes Road.
7. Reclassify Ranch Canyon Road from a primary (four-lane, divided) arterial to a divided collector (two-lane, divided) arterial between Bucker Way and Cow Camp Road.

City of Fullerton

8. Reclassify Harbor Boulevard, from a major (six-lane, divided) arterial to a primary (four-lane, divided) arterial between Bastanchury Road and Berkeley Avenue.

City of Laguna Hills

9. Reclassify Paseo De Valencia from a major (six-lane, divided) arterial to a divided collector (two-lane, divided) arterial between Alicia Parkway and La Paz Road.
10. Reclassify Paseo De Valencia from a secondary (four-lane, undivided) arterial to a divided collector (two-lane, divided) arterial between La Paz Road and Cabot Road.
11. Reclassify Cabot Road from a secondary (four-lane, undivided) arterial to a divided collector (two-lane, divided) arterial between Paseo de Valencia and El Paseo.

The Master Plan of Arterial Highways will be amended to reflect each approved request contingent upon receipt of documentation confirming that all affected general plans are consistent with the proposed amendment and are compliant with the California Environmental Quality Act. Amendment requests will expire if the Orange County Transportation Authority does not receive such documentation within three years of granting approval.

Should the proposed Master Plan of Arterial Highways amendment be modified for any reason after receiving approval, the modified Master Plan of Arterial Highways amendment must be returned to the Orange County Transportation Authority Board of Directors for reconsideration and action.

B. Direct the Executive Director of Planning, or his designee, to file a Notice of Exemption from the California Environmental Quality Act for the Master Plan of Arterial Highways amendments.

C. Receive and file a status report on the active Master Plan of Arterial Highways amendments.

OCTA

August 29, 2024

To: Regional Transportation Planning Committe

From: Darrell E. Johnson, Chief Executive Officer

Subject: Amendments to the Master Plan of Arterial Highways

Overview

The Orange County Transportation Authority administers the Master Plan of Arterial Highways, including the review and approval of amendments requested by local agencies. Approvals are recommended for amendment requests from the County of Orange, the City of Fullerton, and the City of Laguna Hills. Also, a status report on pending amendment requests is provided.

Recommendations

A. Approve the following Master Plan of Arterial Highways amendments:

County of Orange

1. Reclassify Villa Park Road/Santiago Canyon Road from a major (six-lane, divided) arterial to an asymmetric primary (five-lane, divided) arterial between Hewes Street and Cannon Street.
2. Reclassify Santiago Canyon Road from a primary (four-lane, divided) arterial to a divided collector (two-lane, divided) arterial between State Route 241 and Live Oak Canyon Road.
3. Reclassify El Toro Road from a major (six-lane, divided) arterial to a primary (four-lane, divided) arterial between Live Oak Canyon Road and Pheasant Creek.
4. Reclassify El Toro Road, from a major (six-lane, divided) arterial to an asymmetric primary (five-lane, divided) arterial between Pheasant Creek and Portola Parkway.
5. Delete Black Star Canyon Road between Silverado Canyon Road and the Orange County/Riverside County Line.
6. Reclassify Bucker Way from a secondary (four-lane, undivided) arterial to a divided collector (two-lane, divided) arterial between Ranch Canyon Road and Coyotes Road.
7. Reclassify Ranch Canyon Road from a primary (four-lane, divided) arterial to a divided collector (two-lane, divided) arterial between Bucker Way and Cow Camp Road.

City of Fullerton

8. Reclassify Harbor Boulevard, from a major (six-lane, divided) arterial to a primary (four-lane, divided) arterial between Bastanchury Road and Berkeley Avenue.

City of Laguna Hills

9. Reclassify Paseo De Valencia from a major (six-lane, divided) arterial to a divided collector (two-lane, divided) arterial between Alicia Parkway and La Paz Road.
10. Reclassify Paseo De Valencia from a secondary (four-lane, undivided) arterial to a divided collector (two-lane, divided) arterial between La Paz Road and Cabot Road.
11. Reclassify Cabot Road from a secondary (four-lane, undivided) arterial to a divided collector (two-lane, divided) arterial between Paseo de Valencia and El Paseo.

The Master Plan of Arterial Highways will be amended to reflect each approved request contingent upon receipt of documentation confirming that all affected general plans are consistent with the proposed amendment and are compliant with the California Environmental Quality Act. Amendment requests will expire if the Orange County Transportation Authority does not receive such documentation within three years of granting approval.

Should the proposed Master Plan of Arterial Highways amendment be modified for any reason after receiving approval, the modified Master Plan of Arterial Highways amendment must be returned to the Orange County Transportation Authority Board of Directors for reconsideration and action.

B. Direct the Executive Director of Planning, or his designee, to file a Notice of Exemption from the California Environmental Quality Act for the Master Plan of Arterial Highways amendments.

C. Receive and file a status report on the active Master Plan of Arterial Highways amendments.

Background

The Master Plan of Arterial Highways (MPAH) coordinates roadway system planning across Orange County jurisdictions. The MPAH was first adopted by the County of Orange in 1956, and the Orange County Transportation Authority (OCTA) assumed administration responsibilities in 1995.

OCTA is responsible for maintaining the integrity and continuity of the MPAH system as it evolves to fulfill transportation circulation needs by reviewing changes proposed by local jurisdictions. The reviews consider potential transportation-related concerns and ensure interagency collaboration to avoid unintended impacts in neighboring jurisdictions or regional transportation systems. Details on the requested amendments by the County of Orange (County), City of Fullerton (Fullerton), and City of Laguna Hills (Laguna Hills) are presented below, along with a status report of MPAH amendments that are in process.

Discussion

Consistent with the MPAH amendment process described in OCTA's Guidance for Administration of the MPAH, Attachment A documents OCTA's analysis of several requests for amendments to the MPAH. The requests were submitted to OCTA by the County (Attachments B, C, and D), Fullerton (Attachment E), and Laguna Hills (Attachment F). The table below summarizes the current and proposed roadway configurations.

The first five amendments in the table that are proposed by the County are illustrated in Attachment G and the cities of Lake Forest, Mission Viejo, Orange, and Villa Park have provided consent forms (Attachments H and I) to express their support. The remaining three amendments being proposed by the County are illustrated in Attachment J. Additionally, a map of the MPAH amendment request by the City of Fullerton is provided in Attachment K, and a map of the amendment request by the City of Laguna Hills is provided in Attachment L.

Most of the amendments are being requested to accommodate complete street initiatives. OCTA supports these initiatives through the MPAH amendment process, which also ensures that the integrity of the MPAH system is maintained and has no impacts on the ability of OCTA to deliver public transit. The amendment requests are supported by affected jurisdictions, where applicable, and they can be implemented within the existing right-of-way. The requested amendments are expected to sufficiently accommodate future traffic demand and, therefore, they do not adversely impact the MPAH and are recommended for approval.

Agency	Current Configuration	MPAH Classification	Requested Classification
1. Villa Park Road/Santiago Canyon Road - Hewes Street to Cannon Street			
County	4-lane, divided	6-lane, divided	5-lane, divided
2. Santiago Canyon Road - State Route 241 to Live Oak Canyon Road

California Environmental Quality Act (CEQA)

Amendments to the MPAH plan are exempt from CEQA review. With direction from the Board, staff will file a Notice of Exemption from CEQA for the proposed MPAH amendment.

MPAH Amendment Status Update

There are currently 17 active amendments proposed for the MPAH (Attachment M). Several of the active amendments are awaiting local action to amend their respective general plans. Others are either under review, in the cooperative study process, pending resolution of issues with other agencies, or are awaiting refinement of development plans.

On July 12, 2021, the Board conditionally approved amendments to delete Tonner Canyon Road and Valencia Avenue in the City of Brea (Brea) from the MPAH. Since the general plan update was not completed within three years of the Board approval date, the amendment was not finalized and has expired. Staff is actively coordinating with Brea to potentially restart the amendment process when appropriate.

Staff is also coordinating with the cities of Costa Mesa and Newport Beach on the proposed 19th Street amendment. OCTA has met with both cities to discuss the status of this request. The setting for this change can have implications on roadways that involve the cities of Costa Mesa, Huntington Beach, Newport Beach, the County of Orange, and potentially the California Department of Transportation. OCTA is agreeable to lead a traffic study in the general area, including the Banning Ranch area, to gain consensus between the involved agencies on MPAH network needs before advancing the 19th Street amendment. However, OCTA was asked to pause the effort until after the cities of Costa Mesa and Newport Beach have updated their General Plan Housing Elements so the latest future housing assumptions can be reflected in the traffic analysis.

Summary

The County, Fullerton, and Laguna Hills have requested amendments to the MPAH. Based on an analysis of the requested changes, the MPAH Guidance has been satisfied, and staff recommends Board approval. A summary of active amendments proposed for the MPAH is also provided as information for the Board.

Master Plan of Arterial Highways Amendments Detailed Discussion

County – Reclassify Villa Park Road/Santiago Canyon Road

Villa Park Road/Santiago Canyon Road, between Hewes Street and Cannon Street, is currently constructed as a primary (four-lane, divided) arterial, and is classified on the Master Plan of Arterial Highways (MPAH) as a future major (six-lane, divided) arterial. The County is requesting to reclassify this facility to an asymmetric primary (five-lane, divided) arterial. This reclassification would provide two eastbound lanes and three westbound lanes, while providing adequate right-of-way to accommodate class II bicycle lanes with three-foot painted buffers. The cities of Orange and Villa Park have also submitted consent forms to express their support for this MPAH amendment.

Based on analysis by Orange County Transportation Authority (OCTA) staff, using the Orange County Transportation Analysis Model (OCTAM) 5.1, 27,000 daily vehicle trips are forecasted for this segment in 2050. Since an asymmetric primary can carry up to 37,500 daily vehicle trips while maintaining an acceptable level of service, the proposed amendment provides ample capacity, and no trips are expected to be diverted to other facilities.

The requested amendment does not adversely impact the MPAH and is, therefore, recommended for approval.

County – Reclassify Santiago Canyon Road

Santiago Canyon Road, between State Route 241 and Live Oak Canyon Road, is currently constructed as a collector (two-lane, undivided) arterial, and is classified on the MPAH as a future primary (four-lane, divided) arterial. The County is requesting a reclassification of this facility to a divided collector (two-lane, divided) arterial. The proposed changes would support the County's effort to improve traffic conditions on Santiago Canyon Road. The cities of Lake Forest and Mission Viejo have also submitted consent forms to express their support for this MPAH amendment.

Based on analysis by OCTA staff, using OCTAM 5.1, between 9,000 and 14,000 daily vehicle trips are forecasted for this segment in 2050. Since a divided collector can carry up to 15,000 daily vehicle trips while maintaining an acceptable level of service, the proposed amendment provides sufficient capacity, and no trips are expected to be diverted to other facilities.

The requested amendment does not adversely impact the MPAH and is, therefore, recommended for approval.

County – Reclassify El Toro Road

El Toro Road, between Live Oak Canyon Road and Portola Parkway, currently has between two and five travel lanes. This facility is classified on the MPAH as a future major (six-lane, divided) arterial. The County is requesting to reclassify the segment of El Toro Road between Live Oak Canyon Road and Pheasant Creek to a primary

(four-lane, divided) arterial. For the segment of El Toro Road between Pheasant Creek and Portola Parkway, the County is requesting to reclassify to an asymmetric primary (five-lane, divided) arterial, consistent with the existing built configuration. The proposed changes would support the County's effort to accommodate class II bicycle lanes and improve traffic conditions on El Toro Road.

Based on analysis by OCTA staff, using OCTAM 5.1, between 10,000 and 15,000 daily vehicle trips are forecasted for the segment of El Toro Road between Live Oak Canyon Road and Portola Parkway in 2050. No trips are anticipated to be diverted to other facilities as a result of this amendment since the proposed classifications would have ample capacity for the forecasted volumes. Specifically, a primary can carry up to 30,000 daily vehicle trips while maintaining an acceptable level of service, and an asymmetric primary can carry up to 37,500 daily vehicle trips.

The requested amendment does not adversely impact the MPAH and is, therefore, recommended for approval.

County – Delete Black Star Canyon Road

Black Star Canyon Road is currently built as an approximately one-mile, single-lane road that ends at the Black Star Canyon Falls trailhead in the Black Star Canyon wilderness area. The MPAH classifies the facility as a secondary (four-lane, undivided) arterial that extends to the Orange/Riverside County Line. A corresponding road was deleted from the Riverside County highway plan several years ago and an open space preserve was established by the City of Corona. Due to this lack of connectivity to Riverside County and concerns of severe environmental and cultural impacts from construction in the Cleveland National Forest, the County does not intend to implement this planned facility. Therefore, the County is requesting to delete Black Star Canyon Road from the MPAH.

The requested amendment does not adversely impact the MPAH and is, therefore, recommended for approval.

County – Reclassify Bucker Way

Bucker Way is an unbuilt facility in the Rancho Mission Viejo community that is currently classified on the MPAH as a future Secondary (four-lane, undivided) arterial. The County is requesting to reclassify Bucker Way as a Divided Collector (two-lane, divided) arterial between Ranch Canyon Road and Coyotes Road to provide the appropriate capacity needed for the anticipated travel demand and accommodations for active transportation.

Based on analysis by OCTA staff, using OCTAM 5.1, approximately 3,000 daily vehicle trips are forecasted on this segment in 2050. Since a divided collector can carry up to 15,000 daily vehicle trips while maintaining an acceptable level of service, the proposed amendment provides sufficient capacity, and no trips are expected to be diverted to other facilities.

Master Plan of Arterial Highways Amendments Detailed Discussion

The requested amendment does not adversely impact the MPAH and is, therefore, recommended for approval.

County – Reclassify Ranch Canyon Road

Ranch Canyon Road is an unbuilt facility in the Rancho Mission Viejo community that is currently classified on the MPAH as a future Primary (four-lane, divided) arterial. The County is requesting to reclassify Rancho Canyon Road to a Divided Collector (two-lane, divided) arterial between Bucker Way and Cow Camp Road to provide the appropriate capacity needed for the anticipated travel demand and accommodations for active transportation.

Based on analysis by OCTA staff, using OCTAM 5.1, approximately 13,000 daily vehicle trips are forecasted on this segment in 2050, assuming the amended classification. Since a divided collector can carry up to 15,000 daily vehicle trips while maintaining an acceptable level of service, the proposed amendment provides sufficient capacity. This amendment does result in a diversion of approximately 2,000 trips to other facilities within the Rancho Mission Viejo area but does not cause any performance issues.

The requested amendment does not adversely impact the MPAH and is, therefore, recommended for approval.

Fullerton – Harbor Boulevard

Harbor Boulevard, between Bastanchury Road and Berkeley Avenue, currently has between four and six travel lanes. This segment is classified on the MPAH as a major (six-lane, divided) arterial. The City of Fullerton is requesting reclassification of this facility to a primary (four-lane, divided) arterial to accommodate active transportation improvements that are part of the Orange County Complete Streets Program (OCCSP) approved by the OCTA Board of Directors (Board) on February 12, 2024. This project requires a reduction of one lane in each direction north of Valley View Drive/Brea Boulevard and will provide six-foot bicycle lanes, a two-foot painted buffer, continuous sidewalks, and improved bus stops.

Based on analysis by OCTA staff, using OCTAM 5.1, approximately 35,000 daily vehicle trips are forecasted on Harbor Boulevard north of Valley View Drive/Brea Boulevard, and approximately 52,000 daily vehicle trips south of Valley View Drive/Brea Boulevard, assuming the amended classification. A primary arterial can carry up to 30,000 daily vehicle trips while maintaining an acceptable level of service. However, the City of Fullerton has established a level of service standard that allows a primary arterial to carry up to 33,800. While the projected volumes for 2050 exceed both the MPAH and locally-adopted level of service standards for roadway segments, additional analysis was performed that showed the corridor intersections would continue to meet the locally adopted level of service standards for intersections. Additionally, there are no adverse impacts that extend beyond the City of Fullerton’s jurisdictional boundary.

Master Plan of Arterial Highways Amendments Detailed Discussion

The requested amendment does not adversely impact the MPAH outside of the City of Fullerton, therefore, it is recommended for approval.

Laguna Hills – Paseo De Valencia

Paseo De Valencia, between Alicia Parkway and Cabot Road, is currently constructed as a primary (four-lane, divided) arterial, and is classified as a major (six-lane, divided) arterial and between Alicia Parkway and La Paz Road. The segment between La Paz Road and Cabot Road is classified as a secondary (four-lane, divided) arterial. The City of Laguna Hills is requesting the reclassification of both segments to a divided collector (two-lane, divided) arterial to provide traffic and safety improvements in the vicinity of Valencia Elementary School. This is part of a project included in the OCCSP that was approved by the Board on February 12, 2024.

Based on analysis by OCTA staff, using OCTAM 5.1, between 5,000 and 10,000 daily vehicle trips are forecasted on Paseo De Valencia in 2050. Since a divided collector can carry up to 15,000 daily vehicle trips while maintaining an acceptable level of service, the proposed amendment provides sufficient capacity with no substantial diversion of traffic.

The requested amendment does not adversely impact the MPAH and is, therefore, recommended for approval.

Laguna Hills – Cabot Road

Cabot Road, between Paseo De Valencia and El Paseo, is currently constructed as a primary (four-lane, divided) arterial, and is classified as a secondary (four-lane, undivided) arterial. The City of Laguna Hills is requesting the reclassification of this facility to a divided collector (two-lane, divided) arterial to accommodate multimodal improvements that are linked to the improvements on Paseo De Valencia, and are part of the same project noted above that is included in the OCCSP approved by the Board on February 12, 2024.

Based on analysis by OCTA staff, using OCTAM 5.1, approximately 10,000 daily vehicle trips are forecasted on Cabot Road in 2050. Since a divided collector can carry up to 15,000 daily vehicle trips while maintaining an acceptable level of service, the proposed amendment provides sufficient capacity with no substantial diversion of traffic.

Subject: MPAH Amendment Request for Villa Park Road/Santiago Canyon Road

Dear Mr. Brotcke,

Orange County Public Works (OCPW) is formally requesting the initiation of a Master Plan of Arterial Highways (MPAH) Amendment process for Villa Park Road and Santiago Canyon Road between Hewes Street and Cannon Street. This roadway segment is situated within unincorporated Orange County and City of Orange.

OCPW proposes the following modification to the MPAH:

- Reclassification of Villa Park Road/Santiago Canyon Road between Hewes Street and Cannon Street from a 6-lane Major Arterial Highway to a 5-lane Asymmetric Primary Arterial Highway.

Other stakeholders involved in the project include the City of Orange and the City of Villa Park, both of which endorse the amendment request (please refer to the attached consent forms). A Traffic Study conducted by OCPW has produced results that support the requested amendment (refer to the report attached).

Should you have any inquiries regarding this change, please feel free to contact Wei Zhu at (657) 303-3113.

Sincerely,

Nardy Khan, P.E., PMP
Deputy Director

March 27, 2024

Mr. Kurt Brotcke, Director
Strategic Planning
Orange County Transportation Authority
550 South Main Street
Orange, CA. 92863-1584

Subject: MPAH Amendment Request for Santiago Canyon Road (SCR), El Toro Road, and Black Star Canyon Road

Dear Mr. Brotcke,

On May 8, 2017, the Orange County Transportation Authority (OCTA) Board of Directors (Board) approved an amendment to the Master Plan of Arterial Highways (MPAH), which included three changes: reclassification of Santiago Canyon Road (SCR), deletion of the Jeffrey Road Extension, and deletion of Black Star Canyon Road between Silverado Canyon Road and the Orange County/Riverside County line. The approval was contingent upon fulfilling several requirements, including amending each agency's general plan. This amendment was based on a traffic study that recommended reclassifying SCR, from east of the State Route 241 and Live Oak Canyon Road, from a primary (four-lane, divided) to a collector (two-lane undivided). However, this recommendation did not secure approval from the Orange County Planning Commission. Consequently, the County's General Plan was not amended, and the County's original MPAH Amendment request was indefinitely put on hold.

In 2023, Orange County Public Works (OCPW) embarked on another comprehensive Traffic Study for three roadways: SCR, El Toro Road, and Black Star Canyon Road. These roadway segments are situated within unincorporated Orange County, the City of Lake Forest, and the City of Mission Viejo. Please note that the deletion of the Jeffrey Road Extension is not included in our current request as it is not needed at this time. The outcome from our 2023 study for SCR diverges from the 2017 one and now takes precedence.

OCPW formally requests the withdrawal of the previous MPAH Amendment from 2017, and the initiation of a MPAH Amendment process for the segments of SCR, El Toro Road, and Black Star Canyon Road for the following modifications:

- Reclassify SCR between SR-241 and Live Oak Canyon Road from its currently planned designation as a Primary Arterial (four-lane divided roadway) to a Divided Collector (two-lane divided roadway with a center turn-lane)

- Reclassify El Toro Road (ETR) between Live Oak Canyon Road and Portola Parkway from its currently planned designation as a Major Arterial (six-lane divided roadway) to a Primary Arterial (four-lane divided roadway) with the exception that the southern end segment between Pheasant Creek and Portola Parkway remain at its current condition as an asymmetric Primary Arterial (five-lane divided roadway)

Attachment 7

- Delete Black Star Canyon Road (BSCR) between Silverado Canyon Road and the Orange County/Riverside County line.

Both the City of Lake Forest and the City of Mission Viejo, as stakeholders of the project, endorse the amendment request (please refer to the attached consent forms). The report of the 2023 Traffic Study supporting the requested amendment is enclosed for your reference.

Should you have any inquiries regarding the amendment, please feel free to contact Wei Zhu at (657) 303-3113.

Sincerely,

Nardy Khan, P.E./P.M.P.

Mr. Kia Mortazavi, Executive Director
Strategic Planning
Orange County Transportation Authority
550 South Main Street
Orange, CA. 92863-1584

Subject: MPAH Amendment Request for Bucker Way and Ranch Canyon Road in RMV

Dear Mr. Mortazavi,

Orange County Public Works (OCPW) is formally requesting the initiation of a Master Plan of Arterial Highways (MPAH) Amendment for Bucker Way and Ranch Canyon Road within the Rancho Mission Viejo Planning Area 3 (PA3). The roadway segments are situated within unincorporated Orange County.

OCPW proposes the following modification to the MPAH:

- Reclassify Bucker Way between Ranch Canyon Road to Coyotes Road (S) from Secondary Arterial (4-lane) to Divided Collector (2-lane)

- Reclassify Ranch Canyon Road between Bucker Way to Cow Camp Road from Primary Arterial (4-lane) to Divided Collector (2-lane)

The report of the Traffic Study dated June 2024 prepared by Fehr & Peers supports the requested amendment and is enclosed for your reference.

Should you have any inquiries regarding the amendment, please feel free to contact Wei Zhu at (657) 303-3113.

Sincerely,

Nardy Khan, P.E./P.M.P.

Subject: **Master Plan of Arterial Highways Amendment – Harbor Boulevard**

The City of Fullerton is requesting an amendment to the Master Plan of Arterial Highways (MPAH). Harbor Boulevard is currently classified as a 6-lane Major Divided Arterial spanning from Berkely Avenue to Lambert Avenue within the City of Fullerton. Below is a summary of the existing lane geometry throughout that segment.

Segment:	Existing Lane Geometry:
Berkeley Avenue to West Valley View Drive/North Brea Boulevard	4-lanes
Valley View Drive/North Brea Boulevard to Bastanchury Road	6-lanes
Bastanchury Road to Imperial Highway	4-lanes
Harbor Boulevard to Lambert Road	6-lanes

NOTE: Harbor Boulevard is classified as a 4-lane Primary Divided Arterial south of Berkeley Avenue to Orangethorpe Avenue and north of Lambert Avenue to La Habra City Limits.

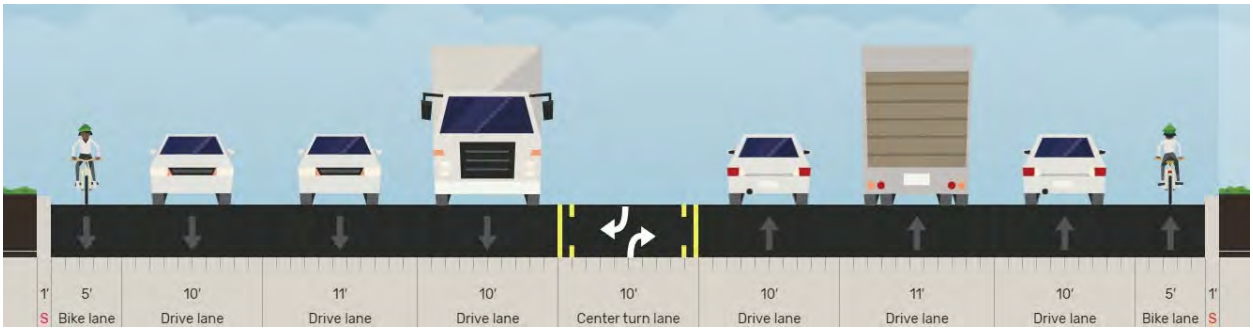
The City is requesting the segment between Berkely Avenue to Bastanchury Road be reclassified to a 4-lane Primary Divided Arterial. The reclassification will support the City's objective to provide various 'complete streets' improvements and fulfil our grant obligations for the recently awarded 2023 Orange County Complete Streets Program (OCCSP) grant application for the Harbor Boulevard Complete Streets Improvement Project. Attachment 'A' illustrates the limits and existing/proposed cross-section.

The reclassification requires lane reduction between Valley View Drive/North Brea Boulevard to Bastanchury Road, which was determined feasible based on the Response to OCTA Comments, dated April 16, 2024; see Attachment 'B' and Revised Traffic Analysis dated April 16, 2024; see Attachment 'C'.

Upon receiving conditional approval from OCTA's Board of Directors, Fullerton will take necessary steps to update the Circulation Element in our General Plan to reflect the changes identified above.

Please contact me if you have any questions or require additional information.

Regards,



for Stephen Bise, PE, TE
Public Works Director

To: Dave Roseman
City Traffic Engineer – City of Fullerton

Date: April 16, 2024

From: Richard E. Barretto, P.E., Principal
Linscott, Law & Greenspan, Engineers

LLG Ref: 1.20.4391.4

Subject: ***Response to Comments Memorandum for the Harbor Boulevard "Complete Streets" Improvements Project Traffic Analysis***

Linscott, Law & Greenspan, Engineers (LLG) is pleased to provide the following responses to address comments from OCTA, summarized in an email dated February 5, 2024, as it pertains to the *Traffic Analysis for the Harbor Boulevard "Complete Streets" Improvements Project*, dated September 20, 2023. The comments from OCTA are attached and referenced in our responses provided below.

Response to OCTA Comments:

- **Response to Comment 1:** *Upon reviewing the MPAH network map, we noted that Harbor Boulevard north of Berkeley Avenue is classified as a Major 6-lane divided Arterial, while south of Berkeley Avene is a Primary 4-lane Arterial. Suppose the City of Fullerton decided to pursue an MPAH amendment to align with the proposed reconfiguration. In that case, OCTA suggests including the segment between Brea Boulevard and Berkeley Avenue for consistent MPAH classification from Berkeley Avenue to Valencia Mesa Drive.*

  The traffic analysis has been revised to include the segments between Brea Boulevard/Valley View Drive and Berkeley Avenue.

- **Response to Comment 2:** *Specify the version of OCTAM used or provide the date of the model to ensure clarity in the analysis.*

  As noted on Page 5 of the report, under sub header *Year 2045 Buildout Traffic Volumes*, OCTAM 5.0 traffic model was utilized for Year 2045 traffic volume forecasts, which was the most current version of the model at the time of analysis.

- **Response to Comment 3:** *Clarify that the volumes were not provided directly by OCTA or directly from a version of OCTAM approved by OCTA.*

  Comment noted, the report has been updated accordingly.

- **Response to Comment 4:** *Clarify and provide a more comprehensive discussion on traffic volume development: a) Provide additional details on the methodology for forecasting future traffic volumes, particularly the rationale behind determining the 1.55% traffic growth; b) Clarify the justifications for not utilizing the model growth on the specific roadways.*

  As noted on Page 5 of the report, under sub header *Year 2045 Buildout Traffic Volumes*, the development of Year 2045 buildout traffic volumes for all study

David S. Shender, PE
John A. Boarman, PE
Richard E. Barretto, PE
Keil D. Maberry, PE
KC Yellapu, PE
Dave Roseman, PE
Shankar Ramakrishnan, PE

An LG2WB Company Founded 19

intersections and roadway segments were based on the OCTAM 5.0 model.

The reference to 1.55% was included for informational purposes only. We were merely documenting the annual growth rate when comparing the existing traffic counts to the Year 2045 model generated traffic volumes. However, the report has been updated to remove this reference to avoid potential confusion.

- **Response to Comment 5:** *Clarify why traffic volumes for the with and without project scenarios are the same. The analysis should encompass potential traffic diversions or impacts to parallel/adjacent roadways due to the road diet.*

  It is our understanding that due to the existing topography and street network, there are not any viable parallel routes within the vicinity of the Project that would result in potential traffic diversions due to the road diet. Therefore, traffic volumes are expected to remain the same for both with and without the proposed Project. It should be noted that the weekday peak hour and daily service levels are generally considered adequate with the implementation of the proposed Project and therefore motorists will not feel the need to adjust their driving patterns.

- **Response to Comment 6:** *Identify the specific thresholds for determining significant impacts at intersections and on roadway segments (e.g., LOS threshold and changes in V/C).*

  As noted on Page 7 of the report, under sub header *Level of Service Standards and Thresholds,* the City of Fullerton has identified LOS D as the minimum acceptable condition that should be maintained at both study intersections and roadway segments. Improvements should be considered if the Project causes an intersection or roadway segment operating at or above acceptable LOS D to an unacceptable condition.

* * * * * * * * * * *

Please let us know if you have any comments or questions regarding this response memorandum.

Subject: [EXTERNAL MAIL]MPAH - Harbor Boulevard Complete Street Traffic Study Comments

Hi Stephen,

Thank you for providing the Traffic Analysis for the Harbor Boulevard "Complete Streets" Improvements Project. The traffic study recommends reconfiguring the segment from a 6-lane divided Major Arterial to a 4-lane divided Primary Arterial on Harbor Boulevard between Valencia Mesa Drive and Valley View Drive/Brea Boulevard.

Upon reviewing the MPAH network map, we noted that Harbor Boulevard north of Berkeley Avenue is classified as a Major 6-lane divided Arterial, while south of Berkeley Avenue is a Primary 4-lane divided Arterial. Suppose the City of Fullerton decides to pursue an MPAH amendment to align with the proposed reconfiguration. In that case, OCTA suggests including the segment between Brea Boulevard and Berkeley Avenue for consistent MPAH classification from Berkeley Avenue to Valencia Mesa Drive. In addition, please consider revising the traffic study following the comments provided below.

- Specify the version of OCTAM used or provide the date of the model to ensure clarity in the analysis.
- Clarify that the volumes were not provided directly by OCTA or directly from a version of OCTAM approved by OCTA.
- Clarify and provide a more comprehensive discussion on traffic volume development.
    - Provide additional details on the methodology for forecasting future traffic volumes, particularly the rationale behind determining the 1.55% traffic growth.
    - Clarify the justifications for not utilizing the model growth on the specific roadways.
- Clarify why traffic volumes for the with and without project scenarios are the same.
    - The analysis should encompass potential traffic diversions or impacts to parallel/adjacent roadways due to the road diet.
- Identify the specific thresholds for determining significant impacts at intersections and on roadway segments (e.g., LOS threshold and changes in V/C).

Feel free to reach out if you have any questions.

Thank You,

Ivy Hang

LLG Ref: 2.23.4708.1

Subject: ***Revised Traffic Analysis for the Harbor Boulevard "Complete Streets" Improvements Project Fullerton, California***

Linscott, Law & Greenspan, Engineers (LLG) is pleased to submit this revised traffic analysis memorandum for the proposed Harbor Boulevard "Complete Streets" Improvements Project (hereinafter referred to as Project) located in Fullerton, California. This traffic analysis has been prepared to identify the traffic implications associated with the proposed "complete streets" modifications to Harbor Boulevard, between Bastanchury Road and Brea Boulevard/Valley View Drive. Further, the traffic analysis has been prepared in support of the City of Fullerton's proposed reclassification of Harbor Boulevard, between Valencia Mesa Drive and Berkeley Avenue, from a Major Arterial Highway to a Primary Arterial Highway. This letter was revised to address comments provided by OCTA via an email on February 5, 2024.

Harbor Boulevard, along the northern end and southern end, consists of a medical/medical office and commercial/retail properties at the street frontage, whereas the midblock section is fronted by open space. The Project involves multimodal improvements along the middle section of Harbor Boulevard, from Valencia Mesa Drive to Brea Boulevard/Valley View Drive, to provide bicycle and pedestrian connectivity in this corridor. The Project is proposing to modify Harbor Boulevard, between Valencia Mesa Drive and Brea Boulevard/Valley View Drive, to a four-lane divided roadway with on-street "buffered" bike lanes and curb adjacent sidewalks.

Included in this memorandum are:

- AM and PM peak hour and Daily capacity analyses for existing conditions,
- AM and PM peak hour and Daily capacity analyses for existing plus project conditions,
- AM and PM peak hour and Daily capacity analyses for future buildout (Year 2045) conditions,
- AM and PM peak hour and Daily capacity analyses for future buildout (Year 2045) plus project conditions, and
- Intersection vehicle queueing analyses along Harbor Boulevard.

This study satisfies the traffic analysis requirements of the City of Fullerton.

STUDY AREA/PROJECT LIMITS

The following six (6) study intersections and four (4) roadway segments located within the limits of the Project have been identified for evaluation:

Study Intersections:

1. Harbor Boulevard at Bastanchury Road
2. Harbor Boulevard at Valencia Mesa Drive
3. Harbor Boulevard at Brea Boulevard/Valley View Drive
4. Harbor Boulevard at Brea Dam Park (Future Signalized Intersection)
5. Harbor Boulevard at E. Valley View Drive
6. Harbor Boulevard at Berkeley Avenue

Study Roadway Segments:

A. Harbor Boulevard, between Bastanchury Road and Valencia Mesa Drive
B. Harbor Boulevard, between Valencia Mesa Drive and Brea Boulevard/Valley View Drive
C. Harbor Boulevard, between Brea Boulevard/Valley View Drive and E. Valley View Drive
D. Harbor Boulevard, between E. Valley View Drive and Berkeley Avenue

Figure 1, which is located at the end of this memorandum, presents the vicinity map which illustrates the limits of the Harbor Boulevard improvements and depicts the study locations and surrounding street system.

The Level of Service (LOS) investigations at these key locations were used to evaluate the potential traffic implications associated with implementation of the proposed Project. Our methods of analysis, findings and conclusions are described in detail in the following sections of this memorandum.

PROJECT DESCRIPTION

Harbor Boulevard is currently classified as a Major Arterial Highway in the City's Circulation Elements as well as the Orange County Master Plan of Arterial Highways (MPAH). The existing configuration of Harbor Boulevard, between Bastanchury Road and Brea Boulevard/Valley View Drive, is currently three through lanes in the southbound direction and three through lanes in the northbound direction, with Class II bike lanes provided in the middle section from just north of Valencia Mesa Drive to north of Brea Boulevard/Valley View Drive. The existing configuration of Harbor Boulevard, between Brea Boulevard/Valley View Drive and E. Valley View Drive, is

currently two through lanes in the southbound direction and three through lanes in the northbound direction. The existing configuration of Harbor Boulevard, between E. Valley View Drive and Berkeley Avenue is two through lanes in the southbound direction and two through lanes in the northbound direction. Daily traffic volumes on Harbor Boulevard, between Bastanchury Road and Berkeley Avenue, range between 28,271 ADT and 44,041 ADT.

With approval of the proposed reclassification to a Primary Arterial Highway, the proposed Project would allow for construction of "complete streets" improvements on Harbor Boulevard, between Bastanchury Road and Brea Boulevard/Valley View Drive, which include the removal of a through lane in both the northbound and southbound directions, the installation of a Class II bike lane with buffer in both the northbound and southbound directions, and the construction of sidewalks on both sides of the roadway, where applicable, which will connect to the existing sidewalk network. It should be noted that the proposed Project will maintain the existing lane geometrics south of Brea Boulevard/Valley View Drive. As such, upon completion of the Project, this section of Harbor Boulevard will generally match the number of travels lanes on the section of Harbor Boulevard south of Brea Boulevard/Valley View Drive.

The Project improvements are proposed to begin at Valencia Mesa Drive and terminate south of Brea Boulevard. Given the focus of the Project is on the midblock segments of Harbor Boulevard, the existing lane geometrics at the intersections of Harbor Boulevard at Bastanchury Road (Intersection No. 1) will be maintained as part of the proposed Project. The "Complete Streets" improvements consist of the following:

- **Harbor Boulevard at Bastanchury Road:** The implementation of a "Complete Streets" on Harbor Boulevard will not affect the intersection; existing lane geometrics will be maintained.

- **Harbor Boulevard at Valencia Mesa Drive:** The implementation of a "Complete Streets" on Harbor Boulevard will replace the outermost through-lane for the northbound approach with a Class II bike land and buffer, the outermost through-lane for the southbound approach with a trap right-turn lane, and the outermost through-lane for the southbound departure with a Class II bike lane and buffer. The northbound left-turn pocket will be restriped to provide 185-feet of storage. Sidewalks will be constructed for the southwest corner of the intersection and proceed southerly to connect to the existing

sidewalk on the west side of Harbor Boulevard at Brea Boulevard/Valley View Drive.

- **Harbor Boulevard at Brea Boulevard/Valley View Drive:** The implementation of a "Complete Streets" on Harbor Boulevard will replace the outermost through-lane for the southbound approach with a right-turn pocket providing 140-feet of storage and restripe the left-turn lane to provide 140-feet of storage. The outermost through-lane for the northbound approach will be removed and the outermost through-lane for the northbound departure will be replaced with a Class II bike lane and buffer.

It should also be noted that a new signalized intersection for the existing Brea Dam Park along Harbor Boulevard, located between Valencia Mesa Drive and Brea Boulevard/Valley View Drive, has been assumed as part of the proposed Project and consists of the following:

- **Harbor Boulevard at Brea Dam Park:** Construct a three-leg intersection to provide two through lanes and a 200-foot right-turn pocket in the northbound direction, two through lanes and a 250-foot left-turn pocket in the southbound direction, and shared left/right-turn lane in the westbound direction. Install a two-phase traffic signal. The implementation of a "Complete Streets" on Harbor Boulevard will construct sidewalks along Harbor Boulevard and provide a Class II bike lane and buffer in both the northbound and southbound directions.

Figure 2 presents the aerial map for Harbor Boulevard, between Bastanchury Road and Berkeley Avenue, under existing conditions. ***Figure 3*** presents the proposed lane geometry on Harbor Boulevard with the Project and compares it to the existing lane geometry.

EXISTING AND FUTURE TRAFFIC VOLUMES

Existing Traffic Volumes

Six (6) study intersections and four (4) roadway segments have been identified as the locations at which to evaluate existing and future traffic operating conditions. Existing weekday daily and peak hour traffic volumes for the five (5) existing study intersections and four (4) roadway segments evaluated in this report were obtained from manual turning movement counts conducted by Transportation Studies, Inc. in May 2023 and March 2024. ***Figure 4*** presents the existing weekday AM peak hour,

PM peak hour, and daily traffic volumes at the five (5) key study intersections and four (4) roadway segments evaluated in this report. ***Appendix A*** contains the detailed count sheets for the locations evaluated in this report.

Since the proposed Project is the implementation of "Complete Streets" improvements along Harbor Boulevard, the project does not generate any additional vehicular trips. As such, Existing Plus Project traffic volumes are identical to the Existing without Project traffic volumes.

Year 2045 Buildout Traffic Volumes

The Year 2045 traffic volume forecasts were developed via the utilization of the OCTAM 5.0 Year 2045 traffic model. Specifically, daily, AM peak period and PM peak period intersection traffic svolumes were provided by OCTA for the existing base year (i.e. Year 2016) and for the Year 2045 year. The AM peak period corresponds to a three-hour morning commute period while the PM peak period corresponds to a four-hour afternoon commute period. Using the peak period model runs and the OCTA approved peak hour factors (i.e. AM = 0.3566 and PM = 0.2662), the one-hour peak hour intersection traffic volumes were determined. ***Figure 5*** presents the Year 2045 Buildout weekday AM peak hour, PM peak hour, and daily traffic volumes at the six (6) key study intersections and four (4) roadway segments evaluated in this report.

Since the proposed Project is the implementation of "Complete Streets" improvements along Harbor Boulevard, the project does not generate any additional vehicular trips. As such, Year 2045 Buildout Plus Project traffic volumes are identical to the Year 2045 Buildout without Project traffic volumes.

LEVEL OF SERVICE CRITERIA

Level of Service Analysis Methodologies

In conformance with the City of Fullerton criteria, weekday AM and PM peak hour operating conditions for the six (6) key study intersections were evaluated using the methodology outlined in the *Highway Capacity Manual 6* (HCM 6) for signalized intersections. The analysis of the four (4) roadway segments were evaluated per the Volume to Capacity (V/C) Ratio methodology.

Highway Capacity Manual (HCM) Method of Analysis (Signalized)

Based on the HCM 6th Edition operations method of analysis, level of service for signalized intersections is defined in terms of control delay, which is a measure of driver discomfort, frustration, fuel consumption and lost travel time. The delay experienced by a motorist is made up of a number of factors that relate to control, geometries, traffic, and incidents. Total delay is the difference between the travel time actually experienced and the reference travel time that would result during ideal conditions: in the absence of traffic control, in the absence of geometric delay, in the absence of any incidents and when there are no other vehicles on the road.

In the HCM, only the portion of total delay attributed to the control facility is quantified. This delay is called *control delay*. Control delay includes initial deceleration delay, queue move-up time, stopped delay and final acceleration delay. Specifically, LOS criteria for traffic signals are stated in terms of the average control delay per vehicle. The six qualitative categories of Level of Service that have been defined along with the corresponding HCM control delay value range for signalized intersections are shown in ***Table 1***.

Daily Volume to Capacity (V/C) Ratio Method of Analysis (Roadway Segments)

Daily operating conditions for the key study roadway segments have been investigated according to the Volume to Capacity (V/C) Ratio of each roadway segment. The V/C relationship is used to estimate the LOS of the roadway segment with the volume based on the 24-hour traffic volumes and the capacity based on the City's classification of each roadway. The six qualitative categories of Level of Service have been defined along with the corresponding Volume to Capacity (V/C) value range and are shown in ***Table 2***.

The roadway link capacity of each street classification according to the Orange County Master Plan of Arterial Highways (MPAH) is presented in ***Table 3***, along with the six corresponding service levels and associated V/C ratios.

Level of Service Standards and Thresholds

According to the City of Fullerton, LOS D is the minimum acceptable condition that should be maintained during the peak commute hours. LOS D has also been assumed as the threshold for daily.

Based on the City of Fullerton, the need for potential improvements will be assessed based on the following criteria:

- The Project causes a signalized or unsignalized intersection or roadway segment operating at or above an acceptable operating condition to degrade to an unacceptable condition.

EXISTING CONDITIONS TRAFFIC ANALYSIS

Existing Traffic Conditions Intersection Capacity Analysis

Table 4 summarizes the peak hour level of service results at the six (6) study intersections for Existing Plus Project traffic conditions. The first column (1) of HCM/LOS values in presents a summary of existing AM and PM peak hour traffic conditions utilizing the existing lane configurations. The second column (2) lists existing plus project traffic conditions utilizing the proposed project lane configurations. The third column (3) indicates whether the Project will exceed the LOS thresholds defined in this report and thus require improvements.

As shown in column (1) of *Table 4*, all five (5) existing key study intersections currently operate at an acceptable service level (LOS D or better) during the AM and PM peak hours.

As shown in column (2) of *Table 4*, all six (6) key study intersections are forecast to operate at an acceptable service level (LOS D or better) during the AM and PM peak hours with the addition of the proposed Project. As such, it can be concluded that the proposed Project will not have a negative effect on existing traffic conditions. ***Appendix B*** presents the HCM/LOS calculations for the study intersections.

Existing Traffic Conditions Roadway Segment Analysis

Table 5 summarizes the roadway segment level of service results at the four (4) roadway segments for Existing Plus Project traffic conditions. The first column (1) presents a summary of existing daily traffic conditions utilizing the existing lane configurations. The second column (2) lists existing plus project traffic conditions utilizing the proposed project lane configurations and indicates whether the intersection will operate adversely based on the criteria defined in this report and thus require improvements.

As shown in column (1) of *Table 5*, the two (2) out of the four (4) roadway segments currently operate adversely on a daily basis. Harbor Boulevard, between Brea

Boulevard/Valley View Drive and E. Valley View Drive (Segment C) and Harbor Boulevard, between E. Valley View Drive and Berkeley Avenue (Segment D) currently operate at LOS E and LOS F, respectively. The remaining roadway segments currently operate at an acceptable service level (LOS D or better) on a daily basis.

As shown in column (2) of *Table 5*, Harbor Boulevard, between Brea Boulevard/Valley View Drive and E. Valley View Drive (Segment C) and Harbor Boulevard, between E. Valley View Drive and Berkeley Avenue (Segment D) are forecast to operate adversely with the addition of the proposed Project. However, the proposed Project will maintain the existing lane geometrics along these roadway segments and thus the adverse service levels are not caused or worsened by the Project. The remaining two (2) roadway segments will continue to operate at an acceptable service level (LOS D or better) on a daily basis with the addition of the proposed Project. As such, it can be concluded that the proposed Project will not have a negative effect on existing traffic conditions.

YEAR 2045 BUILDOUT CONDITIONS TRAFFIC ANALYSIS

Year 2045 Buildout Traffic Conditions Intersection Capacity Analysis

Table 6 summarizes the peak hour level of service results at the six (6) study intersections for Year 2045 buildout Plus Project traffic conditions. The first column (1) of HCM/LOS values presents a summary of Year 2045 buildout AM and PM peak hour traffic conditions utilizing the existing lane configurations. The second column (2) lists Year 2045 buildout plus project traffic conditions utilizing the proposed project lane configurations. The third column (3) indicates whether the Project will exceed the LOS thresholds defined in this report and thus require additional improvements.

As shown in column (1) of *Table 6*, the intersection of Harbor Boulevard at Bastanchury Road (Intersection No. 1) is forecast to operate adversely during the AM and PM peak hours under Year 2045 Buildout traffic conditions. The remaining four (4) existing study intersections are forecast to operate at an acceptable service level (LOS D or better) during the AM and PM peak hours.

As shown in column (2) of *Table 6*, the intersection of Harbor Boulevard at Bastanchury Road (Intersection No. 1) will continue to operate adversely during the AM and PM peak hours with the addition of the proposed Project. Although the study intersection is forecast to operate adversely, the implementation of the Project does

not affect the forecast LOS E conditions. As such, it can be concluded that the proposed Project will not have a negative effect on future traffic conditions. *Appendix B* presents the HCM/LOS calculations for the study intersections.

Year 2045 Buildout Traffic Conditions Roadway Segment Analysis

Table 7 summarizes the roadway segment level of service results at the four (4) roadway segments for Year 2045 buildout Plus Project traffic conditions. The first column (1) presents a summary of Year 2045 Buildout daily traffic conditions utilizing the existing lane configurations. The second column (2) lists Year 2045 buildout plus project traffic conditions utilizing the proposed project lane configurations and indicates whether the intersection will operate adversely based on the criteria defined in this report and thus require additional improvements.

As shown in column (1) of *Table 7*, two (2) out of the four (4) roadway segments are forecast to operate adversely on a daily basis. Harbor Boulevard, between Brea Boulevard/Valley View Drive and E. Valley View Drive (Segment C) and Harbor Boulevard, between E. Valley View Drive and Berkeley Avenue (Segment D) are forecast to operate at LOS F. The remaining roadway segments are forecast to operate at an acceptable service level (LOS D or better) on a daily basis under Year 2045 Buildout traffic conditions and assuming a six-lane arterial is maintained.

As shown in column (2) of *Table 7*, Harbor Boulevard between Bastanchury Road and Valencia Mesa Drive (Segment A), Harbor Boulevard, between Brea Boulevard/Valley View Drive and E. Valley View Drive (Segment C) and Harbor Boulevard, between E. Valley View Drive and Berkeley Avenue (Segment D) are forecast to operate adversely with the addition of the proposed Project, whereas the segment between Valencia Mesa Drive and Brea Boulevard/Valley Drive (Segment D) is forecast to operate at LOS D with the conversion to a four-lane arterial.

The proposed Project will maintain the existing lane geometrics along Harbor Boulevard, between Brea Boulevard/Valley View Drive and E. Valley View Drive (Segment C) and Harbor Boulevard, between E. Valley View Drive and Berkeley Avenue (Segment D) and thus the adverse service levels are not caused or worsened by the Project.

To determine if the proposed Project will result in a deficiency for Harbor Boulevard between Bastanchury Road and Valencia Mesa Drive (Segment A), the roadway segment was further analyzed under peak hour conditions, as presented in ***Table 8***. Review of *Table 8* indicates that Segment A is forecast to operate at an acceptable

level of service during the AM and PM peak hours. As such, it can be concluded that the proposed Project will not have a negative effect on future traffic conditions.

INTERSECTION QUEUING EVALUATION

To validate the adequacy of the existing stacking/storage lengths along Harbor Boulevard with the addition of the proposed Project, a Synchro queuing evaluation was prepared for the northbound and southbound left-turn and right-turn pockets at the six (6) study intersections. The queuing evaluation was conducted for Existing Plus Project and Year 2045 Buildout Plus Project traffic conditions utilizing the Synchro 11.0 SimTraffic 95th percentile delay methodology. It should be noted that vehicular queues from Synchro 11.0 SimTraffic are computed based on the average queues of the microsimulation model, and therefore, each simulation is unique.

Existing Traffic Conditions

Table 9 presents the lane queuing analyses results for the six (6) signalized study intersections for existing traffic conditions. The first column (1) presents the lane queuing results for Existing traffic conditions. The second column (2) presents the results for Existing Plus Project traffic conditions.

Review of column (1) of *Table 9* indicates that the five (5) existing study intersections have queues which exceed the existing storage capacity for one or more intersection approaches under existing traffic conditions.

Review of column (2) of *Table 9* indicates that six (6) study intersections have queues which exceed the existing storage capacity for one or more intersection approaches with the addition of the proposed Project. However, with the exception of the southbound right-turn at Harbor Boulevard and Brea Boulevard/Valley View Drive (Intersection No. 3) and the northbound left-turn at Harbor Boulevard and Berkeley Avenue (Intersection No 6), the approaches which provide insufficient storage are the same as those identified under existing without project traffic conditions. As such, it can be concluded that the effect of the proposed Project on the existing roadway network is considered minimal when taking into consideration the already deficient storage under existing traffic conditions. It should be noted that the spillover queue for the southbound right-turn at Harbor Boulevard and Brea Boulevard/Valley View Drive (Intersection No. 3) can be accommodated within the transition area of the turn pocket. Similarly, the spillover queue for the northbound left-turn at Harbor Boulevard and Berkeley Avenue (Intersection No. 6) can be accommodated within

the upstream two-way left-turn lane. ***Appendix C*** presents the Synchro 11.0 SimTraffic worksheets for the study intersections.

Year 2045 Buildout Traffic Conditions

Table 10 presents the lane queuing analyses results for the six (6) signalized study intersections for Year 2045 Buildout traffic conditions. The first column (1) presents the lane queuing results for Year 2045 Buildout traffic conditions. The second column (2) presents the results for Year 2045 Buildout Plus Project traffic conditions.

Review of column (1) *Table 10* indicates that the five (5) existing study intersections have queues which exceed the existing storage capacity for one or more intersection approaches under Year 2045 Buildout traffic conditions.

Review of column (2) of *Table 10* indicates that six (6) study intersections have queues which exceed the existing storage capacity for one or more intersection approaches with the addition of the proposed Project. However, with the exception of the southbound right-turn at Harbor Boulevard and Brea Boulevard/Valley View Drive (Intersection No. 3), the approaches which provide insufficient storage are the same as those identified under Year 2045 Buildout without project traffic conditions. As such, it can be concluded that the effect of the proposed Project on the future roadway network is considered minimal when taking into consideration the already deficient storage under Year 2045 buildout traffic conditions. It should be noted that the spillover queue for the southbound right-turn at Harbor Boulevard and Brea Boulevard/Valley View Drive (Intersection No. 3) can be accommodated within the transition area of the turn pocket. *Appendix C* presents the Synchro 11.0 SimTraffic worksheets for the study intersections.

CONCLUSIONS

Based on the above, the proposed "Complete Streets" Project is not expected to negatively affect existing or future traffic conditions along Harbor Boulevard. Based on the City of Fullerton's level of service standards and threshold criteria, the weekday peak hour and daily service levels are considered adequate with the implementation of the proposed Project.

Although some queues at the six (6) study intersections are considered deficient, the implementation of the proposed Project will ensure bicycle and pedestrian connectivity along the corridor and will allow for a more balanced, multimodal

transportation network that meets the needs of all users of streets, roads, and highways, including motorists, pedestrians, and bicyclists. In addition, the proposed Project would generally provide continuity to Harbor Boulevard, which already is generally a four lane roadway south of Valley View Drive/Brea Boulevard. An added benefit of the proposed lane drop is that it helps to improve OCTA bus services since the bus will no longer be required to stop in a through lane and block traffic. It should be noted that some cities are adopting more flexible policies to solve traffic problems. For example, some communities have started accepting a lower (worse) automobile level of service standard in their downtowns and in urban neighborhoods or along transit corridors. By doing so, these cities are increasing capacity for other modes like transit and/or bikes. Therefore, opportunities and constraints both exist and should be thoroughly considered prior to approval of the "Complete Streets".

As such, LLG has concluded that the peak hour and daily traffic volumes (current and projected) on Harbor Boulevard do not warrant its current classification of Major Arterial Highway. The City's proposed reclassification of Harbor Boulevard, between Valencia Mesa Drive and Brea Boulevard/Valley View Drive, from a Major Arterial Highway to a Primary Arterial Highway, to install a new protected bike lane, with the provision of a new continuous sidewalk system, would appear feasible with the removal of one northbound through lane and one southbound through lane. It is also recommended to reclassify Harbor Boulevard, between Brea Boulevard/Valley View Drive and Berkeley Avenue, from a Major Arterial Highway to a Primary Arterial Highway for consistent MPAH classification. However, it should be noted that the proposed Project will maintain the existing lane geometrics along Harbor Boulevard, between Brea Boulevard/Valley View Drive and E. Valley View Drive, which currently has two through lanes in the southbound direction and three through lanes in the northbound direction with the third lane functioning primarily as a dedicated right turn for direct access to Brea Boulevard.

Therefore, it is recommended that the City of Fullerton formally request approval from Orange County Transportation Authority (OCTA) of the following classification for Harbor Boulevard:

Street	Limits	Existing Classification	Proposed Classification
Harbor Boulevard	Valencia Mesa Drive to Berkeley Avenue	Major Arterial	Primary Arterial

* * * * * * * * * * *

We appreciate the opportunity to work on this project. If you have any questions regarding this letter, please do not hesitate to call me at (949) 825-6175.

TABLE 1
LEVEL OF SERVICE CRITERIA FOR SIGNALIZED INTERSECTIONS (HCM)[1]
HARBOR BOULEVARD COMPLETE STREETS IMPROVEMENT PROJECT, FULLERTON

Level of Service (LOS)	Control Delay Per Vehicle (seconds/vehicle)	Level of Service Description
A	≤ 10.0	This level of service occurs when progression is extremely favorable and most vehicles arrive during the green phase. Most vehicles do not stop at all. Short cycle lengths may also contribute to low delay.
B	> 10.0 and ≤ 20.0	This level generally occurs with good progression, short cycle lengths, or both. More vehicles stop than with LOS A, causing higher levels of average delay.
C	> 20.0 and ≤ 35.0	Average traffic delays. These higher delays may result from fair progression, longer cycle lengths, or both. Individual cycle failures may begin to appear at this level. The number of vehicles stopping is significant at this level, though many still pass through the intersection without stopping.
D	> 35.0 and ≤ 55.0	Long traffic delays. At level D, the influence of congestion becomes more noticeable. Longer delays may result from some combination of unfavorable progression, long cycle lengths, or high *v/c* ratios. Many vehicles stop, and the proportion of vehicles not stopping declines. Individual cycle failures are noticeable.
E	> 55.0 and ≤ 80.0	Very long traffic delays. This level is considered by many agencies (i.e. SANBAG) to be the limit of acceptable delay. These high delay values generally indicate poor progression, long cycle lengths, and high *v/c* ratios. Individual cycle failures are frequent occurrences.
F	≥ 80.0	Severe congestion. This level, considered to be unacceptable to most drivers, often occurs with over saturation, that is, when arrival flow rates exceed the capacity of the intersection. It may also occur at high *v/c* ratios below 1.0 with many individual cycle failures. Poor progression and long cycle lengths may also be major contributing factors to such delay levels.

[1] Source: *Highway Capacity Manual* (Signalized Intersections).

TABLE 2
LEVEL OF SERVICE CRITERIA FOR ROADWAY SEGMENTS (V/C METHODOLOGY)[2]
HARBOR BOULEVARD COMPLETE STREETS IMPROVEMENT PROJECT, FULLERTON

Level of Service (LOS)	Volume to Capacity Ratio (V/C)	Level of Service Description
A	≤ 0.600	**EXCELLENT**. Describes primarily free flow operations at average travel speeds, usually about 90% of the free flow speed for the arterial class. Vehicles are completely unimpeded in their ability to maneuver within the traffic stream. Stopped delay at signalized intersections is minimal.
B	0.601 – 0.700	**VERY GOOD**. Represents reasonably unimpeded operations at average travel speeds, usually about 70% of the free flow speed for the arterial class. The ability to maneuver within the traffic stream is only slightly restricted and stopped delays are not bothersome. Drivers are not generally subjected to appreciable tension.
C	0.701 – 0.800	**GOOD**. Represents stable conditions; however, ability to maneuver and change lanes in mid-block location may be more restricted than in LOS B, and longer queues and/or adverse signal coordination may contribute to lower average travel speeds of about 50% of the average free flow speed for the arterial class. Motorists will experience appreciable tension while driving.
D	0.801 – 0.900	**FAIR**. Borders on a range in which small increases in flow may cause substantial increases in approach delay and, hence, decreases in arterial speed. This may be due to adverse signal progression, inappropriate signal timing, high volumes, or some combination of these. Average travel speeds are about 40% of free flow speed.
E	0.901 – 1.000	**POOR**. Characterized by significant approach delays and average travel speeds of one-third the free flow speed or lower. Such operations are caused by some combination of adverse progression, high signal density, extensive queuing at critical intersections, and inappropriate signal timing.
F	> 1.000	**FAILURE**. Characterizes arterial flow at extremely low speeds below one-third to one-quarter of the free flow speed. Intersection congestion is likely at critical signalized locations, with resultant high approach delays. Adverse progression is frequently a contributor to this condition.

TABLE 3
LEVEL OF SERVICE CRITERIA FOR ROADWAY SEGMENTS (V/C METHODOLOGY)[3]
HARBOR BOULEVARD COMPLETE STREETS IMPROVEMENT PROJECT, FULLERTON

Facility Type	Number of Lanes	Level of Service Criteria With Associated Roadway Capacity					
		Daily Values (VPD)					
		Level of Service (LOS)					
		A	B	C	D	E	F
Principal	8-lanes divided	45,000	52,500	60,000	67,500	75,000	--
Smart Street[4]	6-lanes divided	36,300	42,200	48,200	54,200	60,200	--
Major	6-lanes divided	33,900	39,400	45,000	50,600	56,300	--
Primary	4-lanes divided	22,500	26,300	30,000	33,800	37,500	--
Secondary	4-lanes undivided	15,000	17,500	20,000	22,500	25,000	--
Commuter	2-lanes undivided	7,500	8,800	10,000	11,300	12,500	--
V/C Ratio		≤ 0.600	0.601-0.700	0.701-0.800	0.801-0.900	0.901-1.000	≥ 1.01

Notes:
- VPD = vehicles per day

[3] Source: *Transportation Research Board 2000.*

[4] The capacity of a Smart Street is seven percent higher than the capacity of a major arterial, due to traffic flow operation enhancements that are associated with the Smart Street facility designation.

TABLE 9
EXISTING PEAK HOUR INTERSECTION QUEUING ANALYSIS[9]
HARBOR BOULEVARD COMPLETE STREETS IMPROVEMENT PROJECT, FULLERTON

Key Intersection	Storage Provided (feet)	(1) Existing Traffic Conditions				(2) Existing Plus Project Traffic Conditions			
		AM Peak Hour		PM Peak Hour		AM Peak Hour		PM Peak Hour	
		Max. Queue/ Min. Storage Required (feet)	Adequate Storage (Yes/No)	Max. Queue/ Min. Storage Required (feet)	Adequate Storage (Yes/No)	Max. Queue/ Min. Storage Required (feet)	Adequate Storage (Yes/No)	Max. Queue/ Min. Storage Required (feet)	Adequate Storage (Yes/No)
1. Harbor Boulevard at Bastanchury Road									
Northbound Left-Turn	460[10]	244	Yes	267	Yes	277	Yes	330	Yes
Northbound Right-Turn	150	68	Yes	**213**	**No**	80	Yes	**264**	**No**
Southbound Left-Turn	550[11]	**617**	**No**	**702**	**No**	**690**	**No**	**633**	**No**
2. Harbor Boulevard at Valencia Mesa Drive									
Northbound Left-Turn	175 / 185[12]	**192**	**No**	84	Yes	**198**	**No**	139	Yes
Southbound Left-Turn	230	212	Yes	125	Yes	214	Yes	143	Yes
Southbound Right-Turn[13]	705	--	--	--	--	55	Yes	40	Yes

9 Queues are based on Synchro 11.0 SimTraffic 95th Percentile methodology.

10 Movement consists of dual left-turn lanes. Both lanes provide approximately 230' of storage. The storage reported is the total of both lanes.

11 Movement consists of dual left-turn lanes. The first lane provides approximately 140' of storage and the second lane provides approximately 410' of storage. The storage reported is the total of both lanes.

12 Restriping the northbound left-turn from 175-feet to 185-feet is proposed as part of the Project.

13 Restriping the southbound through/right-turn lane into a southbound right-turn pocket is proposed as part of the Project.

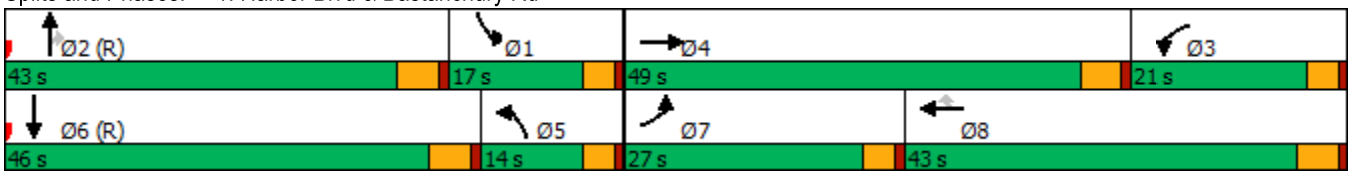
Intersection Summary			
Area Type:	Other		
Cycle Length: 130			
Actuated Cycle Length: 130			
Offset: 59 (45%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 120			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.08			
Intersection Signal Delay: 49.3		Intersection LOS: D	
Intersection Capacity Utilization 80.1%		ICU Level of Service D	
Analysis Period (min) 15			



~ Volume exceeds capacity, queue is theoretically infinite.

Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

Intersection Summary

Area Type: Other
Cycle Length: 130
Actuated Cycle Length: 130
Offset: 5 (4%), Referenced to phase 2:NBT and 6:SBT, Start of Green
Natural Cycle: 120
Control Type: Actuated-Coordinated
Maximum v/c Ratio: 0.87
Intersection Signal Delay: 39.0 Intersection LOS: D
Intersection Capacity Utilization 77.3% ICU Level of Service D
Analysis Period (min) 15
95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 1: Harbor Blvd & Bastanchury Rd

Intersection Summary			
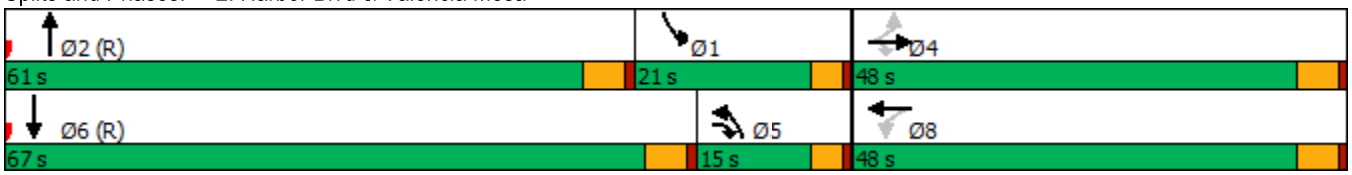
Area Type:	Other		
Cycle Length: 130			
Actuated Cycle Length: 130			
Offset: 2 (2%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 80			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.25			
Intersection Signal Delay: 18.1		Intersection LOS: B	
Intersection Capacity Utilization 65.3%		ICU Level of Service C	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary			
HCM 6th Ctrl Delay		38.1	
HCM 6th LOS		D	

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, WBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

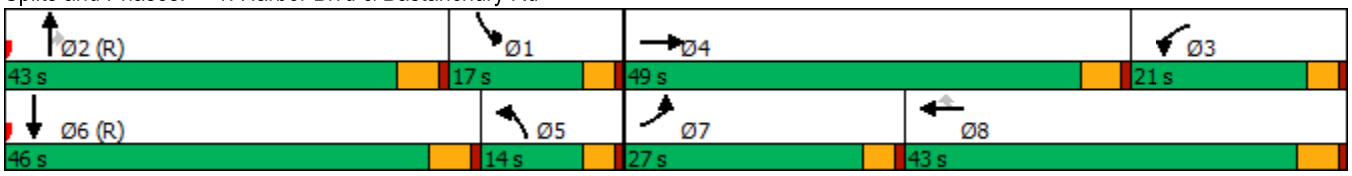
Area Type: Other
Cycle Length: 130
Actuated Cycle Length: 130
Offset: 59 (45%), Referenced to phase 2:NBT and 6:SBT, Start of Green
Natural Cycle: 120
Control Type: Actuated-Coordinated
Maximum v/c Ratio: 1.08
Intersection Signal Delay: 50.3 Intersection LOS: D
Intersection Capacity Utilization 80.1% ICU Level of Service D
Analysis Period (min) 15



~ Volume exceeds capacity, queue is theoretically infinite.

Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

Splits and Phases: 1: Harbor Blvd & Bastanchury Rd

HCM 6th LOS		D	

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, WBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary			
Area Type:	Other		
Cycle Length: 130			
Actuated Cycle Length: 130			
Offset: 2 (2%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 80			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.12			
Intersection Signal Delay: 18.3		Intersection LOS: B	
Intersection Capacity Utilization 75.4%		ICU Level of Service D	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.

Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 2: Harbor Blvd & Valencia Mesa

Cycle Length: 130			
Actuated Cycle Length: 130			
Offset: 72 (55%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 90			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 0.82			
Intersection Signal Delay: 28.7		Intersection LOS: C	
Intersection Capacity Utilization 74.5%		ICU Level of Service D	
Analysis Period (min) 15			

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 3: Harbor Blvd & Valley View/Brea Blvd

HCM 6th LOS		D

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, WBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary			
Area Type:	Other		
Cycle Length: 130			
Actuated Cycle Length: 130			
Offset: 55 (42%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
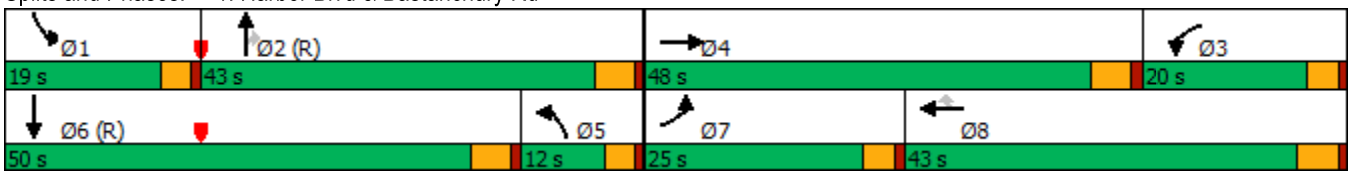
Natural Cycle: 120			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.15			
Intersection Signal Delay: 56.0		Intersection LOS: E	
Intersection Capacity Utilization 94.4%		ICU Level of Service F	
Analysis Period (min) 15			



~ Volume exceeds capacity, queue is theoretically infinite.

Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

Splits and Phases: 1: Harbor Blvd & Bastanchury Rd

Intersection Summary			
HCM 6th Ctrl Delay		37.0	
HCM 6th LOS		D	

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, WBR] is excluded from calculations of the approach delay and intersection delay.

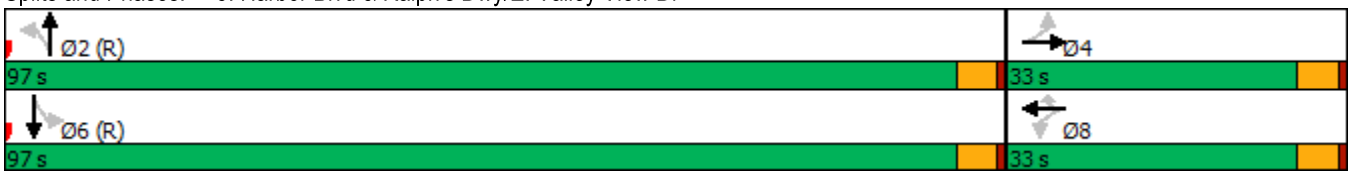
Intersection Summary			
Area Type:	Other		
Cycle Length: 130			
Actuated Cycle Length: 130			
Offset: 87 (67%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green			
Natural Cycle: 120			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.25			
Intersection Signal Delay: 11.5		Intersection LOS: B	
Intersection Capacity Utilization 87.9%		ICU Level of Service E	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

\# 95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 5: Harbor Blvd & Ralph's Dwy/E. Valley View Dr

Intersection Summary			
Area Type:	Other		
Cycle Length: 130			
Actuated Cycle Length: 130			
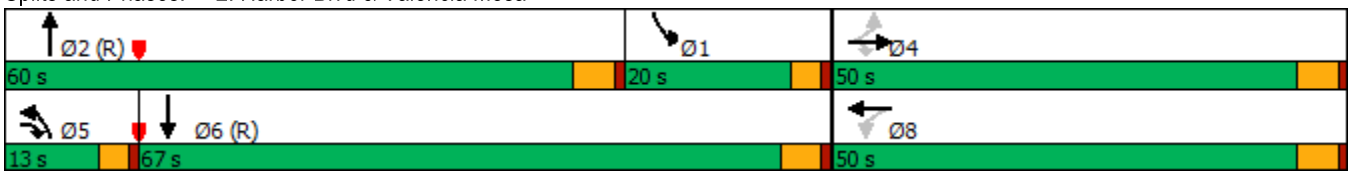
Offset: 81 (62%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 80			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.52			
Intersection Signal Delay: 21.9		Intersection LOS: C	
Intersection Capacity Utilization 82.1%		ICU Level of Service E	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

\# 95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 2: Harbor Blvd & Valencia Mesa

HCM 6th Ctrl Delay		38.3	
HCM 6th LOS		D	

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, WBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary			
Area Type:	Other		
Cycle Length: 130			
Actuated Cycle Length: 130			
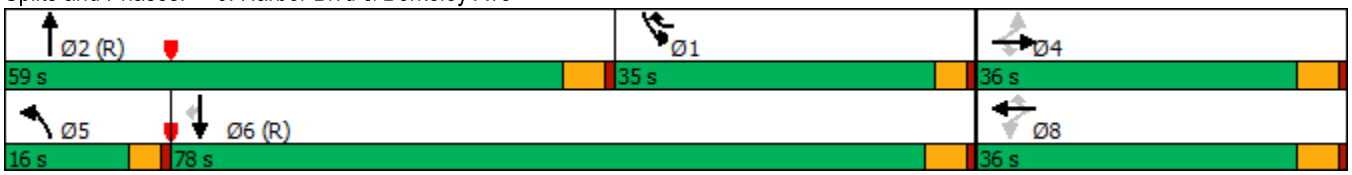
Offset: 6 (5%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 100			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.08			
Intersection Signal Delay: 35.3		Intersection LOS: D	
Intersection Capacity Utilization 103.7%		ICU Level of Service G	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 6: Harbor Blvd & Berkeley Ave

Intersection Summary

Area Type: Other
Cycle Length: 130
Actuated Cycle Length: 130
Offset: 55 (42%), Referenced to phase 2:NBT and 6:SBT, Start of Green
Natural Cycle: 120
Control Type: Actuated-Coordinated
Maximum v/c Ratio: 1.15
Intersection Signal Delay: 58.3 Intersection LOS: E
Intersection Capacity Utilization 94.4% ICU Level of Service F
Analysis Period (min) 15
~ Volume exceeds capacity, queue is theoretically infinite.

Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

Splits and Phases: 1: Harbor Blvd & Bastanchury Rd

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, WBR] is excluded from calculations of the approach delay and intersection delay.

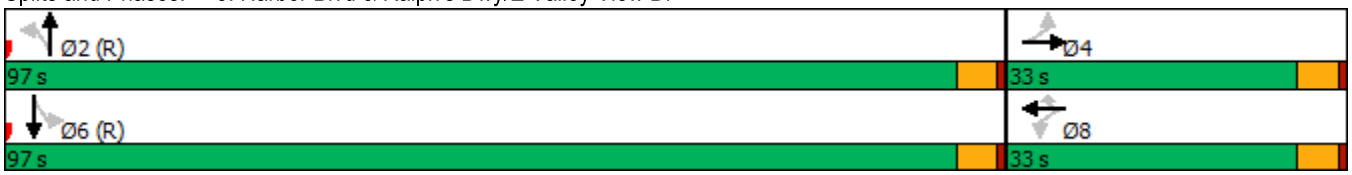
~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary			
Area Type:	Other		
Cycle Length: 130			
Actuated Cycle Length: 130			
Offset: 16 (12%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 110			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 0.91			
Intersection Signal Delay: 33.2		Intersection LOS: C	
Intersection Capacity Utilization 89.7%		ICU Level of Service E	
Analysis Period (min) 15			

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 3: Harbor Blvd & Valley View/Brea Blvd

HCM 6th Ctrl Delay			43.7									
HCM 6th LOS			D									

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, WBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary

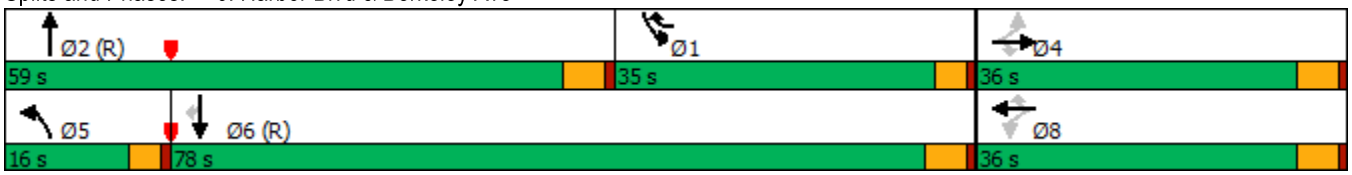
Area Type: Other
Cycle Length: 130
Actuated Cycle Length: 130
Offset: 14 (11%), Referenced to phase 2:NBT and 6:SBT, Start of Green
Natural Cycle: 100
Control Type: Actuated-Coordinated
Maximum v/c Ratio: 1.08
Intersection Signal Delay: 37.1 Intersection LOS: D
Intersection Capacity Utilization 103.7% ICU Level of Service G
Analysis Period (min) 15

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 6: Harbor Blvd & Berkeley Ave

CITY OF LAGUNA HILLS

City Manager

June 11, 2024

Orange County Transportation Authority
ATTN: Kia Mortazavi, Executive Director, Planning Division
550 South Main Street
P.O. Box 14184
Orange, CA 92863

Subject: Master Plan of Arterial Highways Amendment – Paseo De Valencia and Cabot Road

Dear Mr. Mortazavi:

The City of Laguna Hills is requesting an amendment to the Master Plan of Arterial Highways (MPAH). Paseo De Valencia is identified on the MPAH as a 6-lane divided Major Arterial between Alicia Parkway and La Paz Road but currently built as a 4-lane undivided arterial, and as a 4-lane undivided Secondary Arterial between La Paz Road and Cabot Road within the City of Laguna Hills. Cabot Road is identified on the MPAH as a 4-lane undivided Secondary Arterial between Paseo De Valencia and Oso Parkway. The City is recommending the segment of Paseo De Valencia between Alicia Parkway and La Paz Road to be reclassified as a 2-lane Divided Collector, and the segment between La Paz Road and Cabot Road to be reclassified as a 2-lane Undivided Collector. The City is also recommending the segment of Cabot Road between Paseo De Valencia and Oso Parkway to be reclassified as a 2-lane Divided Collector.

This reclassification will support the City's objective to provide traffic safety and circulation improvements in front of Valencia Elementary School along Paseo De Valencia. School improvements may include all-way stop installations, curb extensions at intersection crossings, and a student pick-up/drop-off lane for queuing vehicles during school loading times. Reclassification will also support the City's objective to accommodate multi-modal improvements along both Paseo De Valencia and Cabot Road. Attachment 'A' illustrates the project limits and proposed improvements.

The reclassification requires lane reduction, which was determined feasible based on Annual Daily Traffic (ADT) data collected in 2022, per the 2023 OCTA Traffic Volume Map (Attachment B). The segment of Paseo De Valencia between Alicia Parkway and La Paz Road has approximately 11,000 ADT, and the segment of Paseo De Valencia between La Paz Road and Cabot Road has approximately 6,000 ADT. Both of these segments are well within the ranges of 9,000 to 15,000 ADT for a Divided Collector and 7,500 to 10,000 ADT for an Undivided Collector identified in the MPAH, respectively. The segment of Cabot Road between Paseo De Valencia and El Paseo has approximately 13,000 to 14,000 ADT and is also within the range of 9,000 to 15,000 ADT for a Divided Collector identified in the MPAH.

Thank you for your attention to this important matter.

If you have any questions about this project, please contact me at jhildenbrand@lagunahillsca.gov or 949/707-2610, or Public Works Director Joe Ames at james@lagunahillsca.gov or 949/707-2655.

Sincerely,

Jarad Hildenbrand
City Manager

Memorandum

To/Attention	Placeworks	**Date**	October 7, 2020
From	IBI Group	**Project No**	119772
cc			
Subject	Santa Ana General Plan Traffic Analysis Updates		

This memo summarizes changes made to the Traffic Analysis prepared in support of the Santa Ana General Plan DEIR. The traffic analysis was circulated among relevant stakeholders in order to solicit input regarding the proposed reclassifications and analysis methodology. The major changes incorporated into the traffic analysis based on the comments received are summarized below:

- Adjustment of volumes in northeast corner for select intersections along Grand Avenue and Tustin Avenue. Volume changes at the intersection of Tustin Avenue and Santa Clara Avenue were highlighted by the City of Tustin as being excessive. Volumes were adjusted at intersections 74-76 and 91-93 in order to improve trip balance.
- Language for LOS impacts and mitigations updated to better address improvements.
- Fair –share added for non-City of Santa Ana intersections.
- LOS worksheets for the 2045 WP AM were added; they were missing in original appendix.
- V/C and LOS updated for intersection #98 at Red Hill and Warner. An impact was caused as part of the update. Mitigation was developed.
- Additional roadway segments added to analysis.
- Mitigation measure for intersection #3 at Euclid Street and Edinger Avenue expanded.
- Mitigation measure for intersection #62 at Santa Ana Boulevard and Santiago Street modified.
- Mitigation at intersection #100 at Red Hill Avenue and Alton Parkway modified.
- Updates to Figure 2.1 through 2.7.

1.0 Introduction

1.1 STUDY PURPOSE

This traffic analysis report has been prepared in support of the General Plan Update (GPU) Draft Program Environmental Impact Report (PEIR) for the City of Santa Ana and to assess requested changes to the Orange County Transportation Authority's (OCTA) Master Plan of Arterial Highways (MPAH) by the City of Santa Ana. This traffic analysis report reviews existing and future traffic conditions under the current General Plan and with the proposed Land Use Element and Circulation Element Updates.

This report is used as part of the Program EIR prepared for the General Plan Update. The Program EIR includes the results and findings of this traffic study report and identifies the significant impacts of the proposed project. The draft Program EIR will be available to the public for review and comment.

1.2 REPORT ORGANIZATION

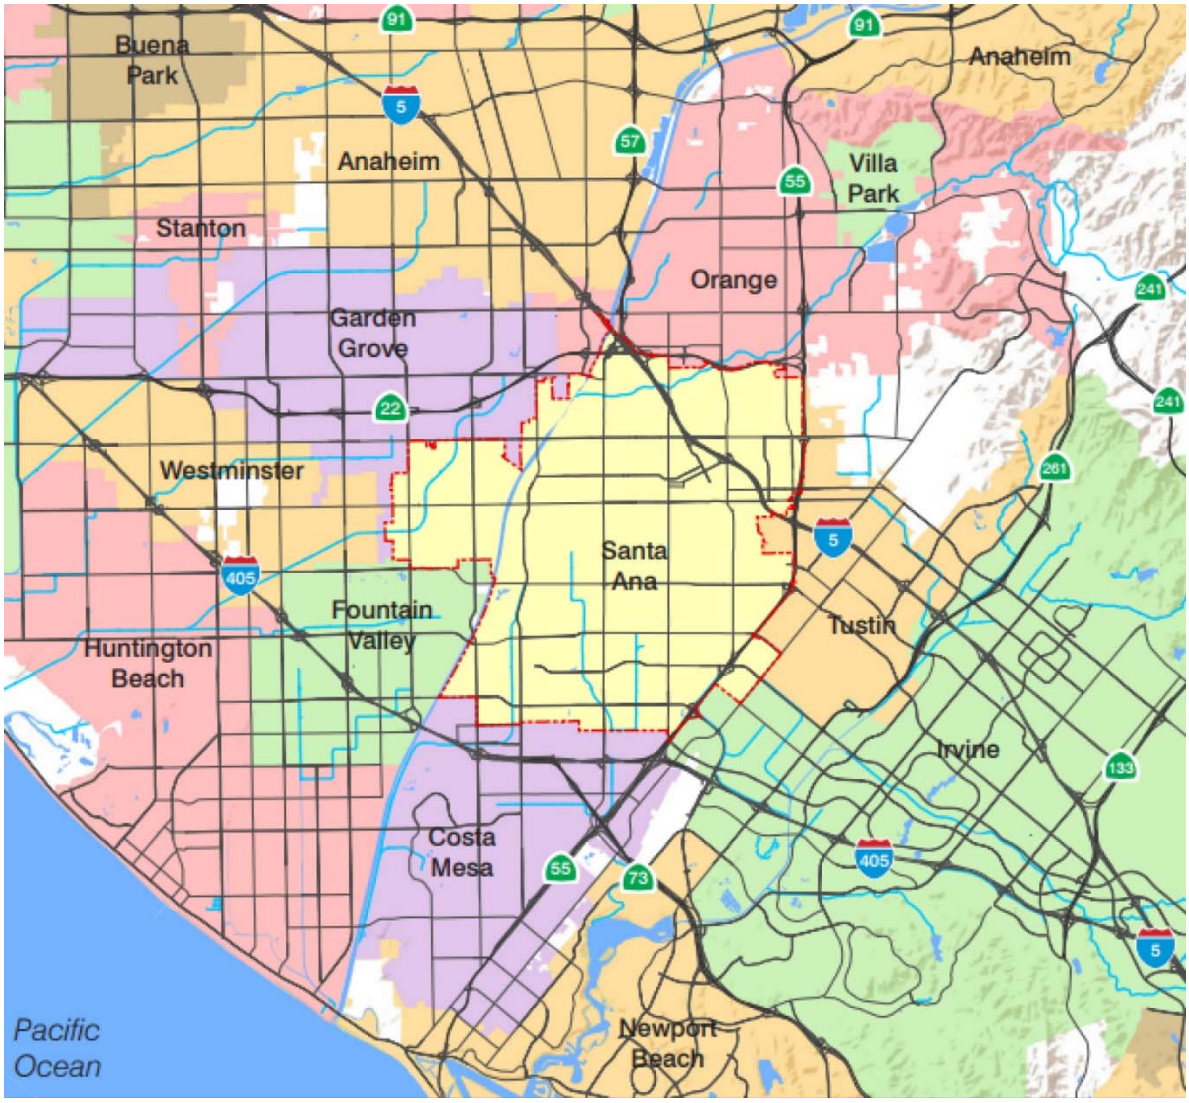
This report consists of 11 sections.

1.0 Introduction
2.0 Project Description
3.0 Circulation Element Roadway Classifications
4.0 Analysis Methodology
5.0 Existing Year (2020) Conditions
6.0 Future Year 2045 Forecast Modeling
7.0 Future Year (2045) No Project
8.0 Future Year (2045) With Project
9.0 Significant Impacts and Mitigation Measures
10.0 Conclusions
11.0 Appendices

Section 1 provides a brief introduction to the study area and report organization. Section 2 provides a summary of the project description, background history, and project alternatives. Section 3 describes the various roadway classifications within the Circulation Element. Section 4 includes the methodology utilized in the analysis and the referenced standards. The study area roadways and Existing Year (2020) intersection geometry, turning movement volumes, and level of service are presented in Section 5. The Future Year (2045) forecast modeling methodology is provided in Section 6. Section 7 describes the Future Year (2045) No Project condition and provides the roadway segment and intersection level of service results. Section 8 describes the Future Year (2045) With Project Network Alternative condition and provides the roadway segment and intersection level of service results. Section 9 presents the mitigation measures to address facilities operating at an unacceptable level of service. Findings and conclusions from this study are presented in Section 10. Appendices are provided in Section 11.

The City boundaries/project study area is shown in Exhibits 1.1 and 1.2.

Exhibit 1.1 Project Location



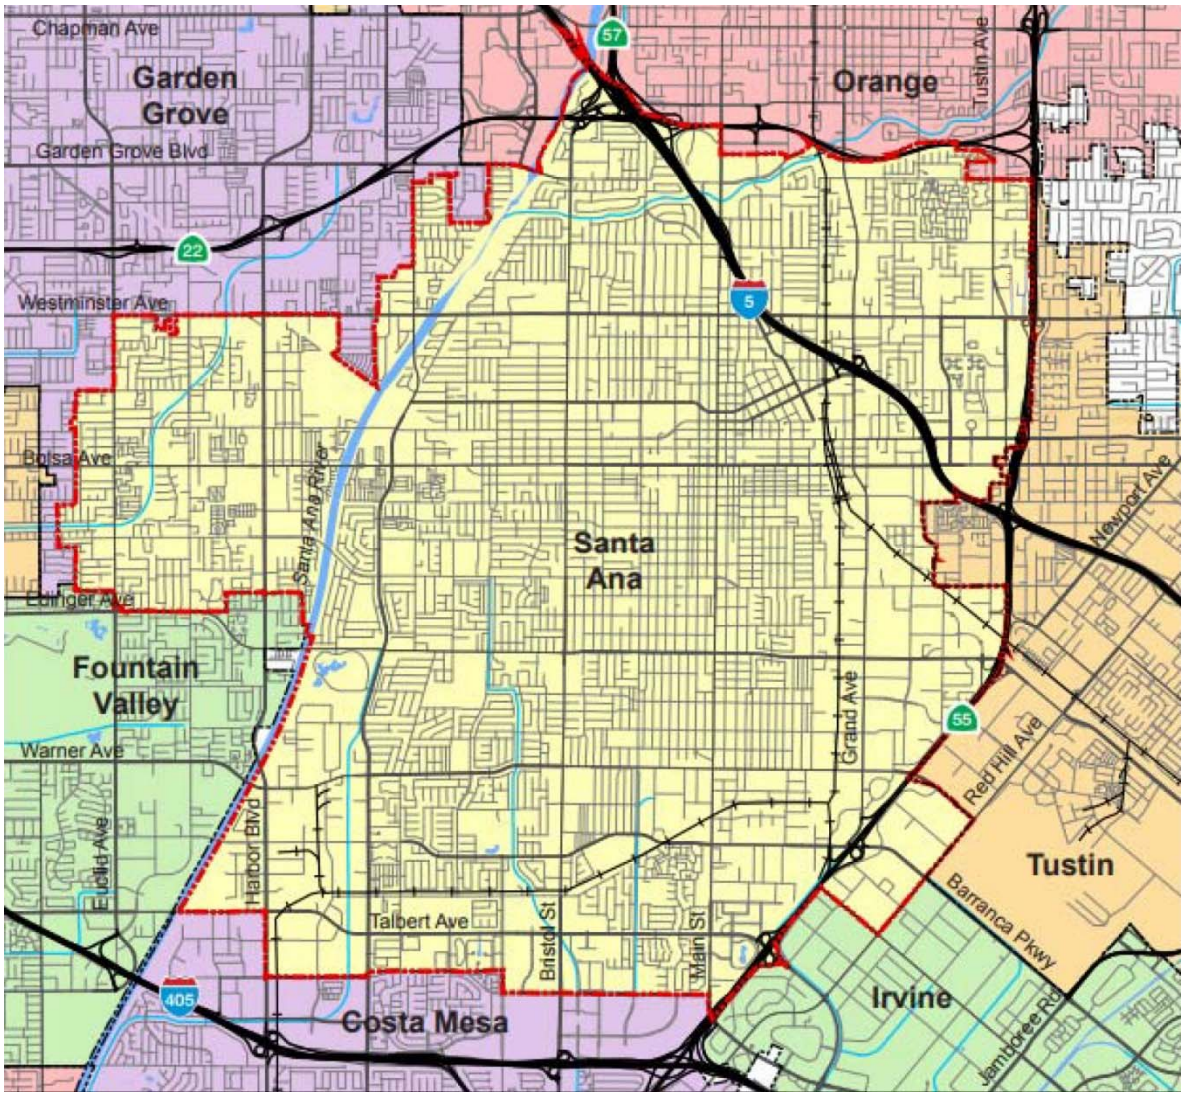


Exhibit 1.2 Project Study Area

2.0 Project Description

This section provides an overview of the project background and traffic study for the General Plan Update. This section also includes a description of the land use and Circulation Element network derived throughout the public outreach and planning process.

2.1 BACKGROUND

The City of Santa Ana's General Plan is comprised of 16 elements, serving as the principal long-range policy and planning document guiding the development, conservation, and enhancement of the City. Each element contains goals and policies related to the physical development of the City. The General Plan was adopted by City Council in 1998 and has been partially amended several times since then. For this analysis, the Land Use and Circulation Elements are of particular interest.

The Land Use Element serves as a long-range guide for land use and development within the City. The primary objective is to manage future growth, minimize land use conflicts, and facilitate growth and development as part of the City's overall vision.

The Circulation Element of the Santa Ana General Plan serves as the City's primary guide for transportation planning. The Circulation Element focuses on roadways and other transportation modes including public transit, railroads, pedestrian and bicycle paths that provide a full range of travel options.

The most recent update to the City of Santa Ana Circulation Element was authorized by City Council in 2011. The project was initiated to update the Circulation Element in its entirety to include the following key components:

- A Complete Streets Policy compliant with the requirements of Assembly Bill (AB) 1358
- OC Streetcar – a proposed streetcar service that would link the Santa Ana Regional Transportation Center (SARTC) with the Civic Center and Garden Grove. The project is currently under construction (at the time this report was written).

Over the last six years, the draft Circulation Element has gone through significant changes, including a new vision, completion of the Santa Ana Safe Mobility Plan, changes to the policy framework and roadway designations, OCTA modeling updates, work by the City on two separate Complete Street studies, advancement of a fixed-guideway/streetcar system and BRT routes, and incorporation of Complete Street Principals.

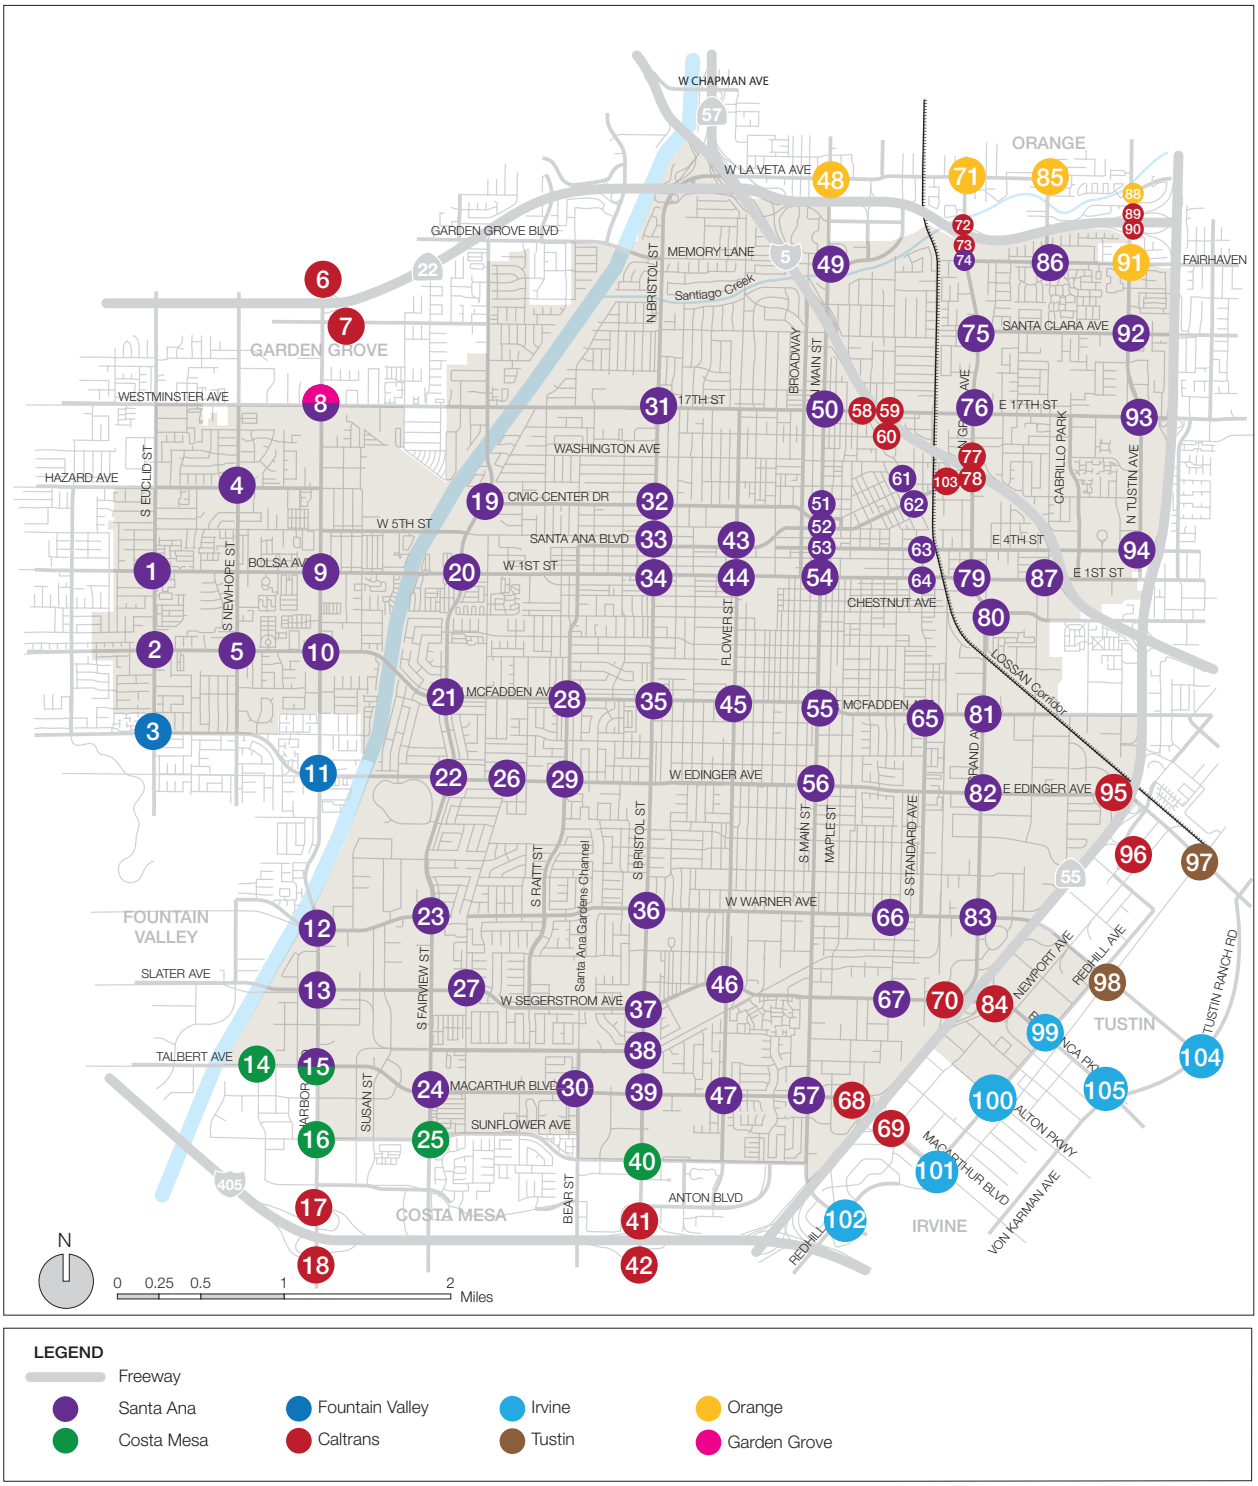
The updates to both the Circulation Element and the EIR are based on a proposed new roadway network scenario, updated OCTA modeling and new modal split, work on the Bikeway Master Plan and Pedestrian Opportunity Area Plan, regulatory changes (e.g., air quality/GHG requirements per 2015 Climate Action Plan, SB743, etc.), integrating related plans (Safe Mobility Santa Ana Plan, and complete street plans (Downtown and Central Santa Ana Transit Zone plans).

2.2 STUDY AREA

As noted, the project consists of changes to both land uses and the transportation network within the City of Santa Ana. The study area was chosen such that the direct and indirect effects of the project could be assessed, within the City of Santa Ana as well as in the adjacent cities. Study intersections were developed based on the locations of the proposed changes as well as in consideration of input provided by OCTA, Caltrans, and neighboring cities during outreach for the Circulation Element Update. Prior to merging with the GPU, the CEU was in the process of evaluating various transportation network

scenarios. The transportation network proposed in this study is a result of those efforts. Study roadway segments and intersections are shown in Exhibit 2.1 and 2.2, respectively.

Exhibit 2.1 Study Intersections



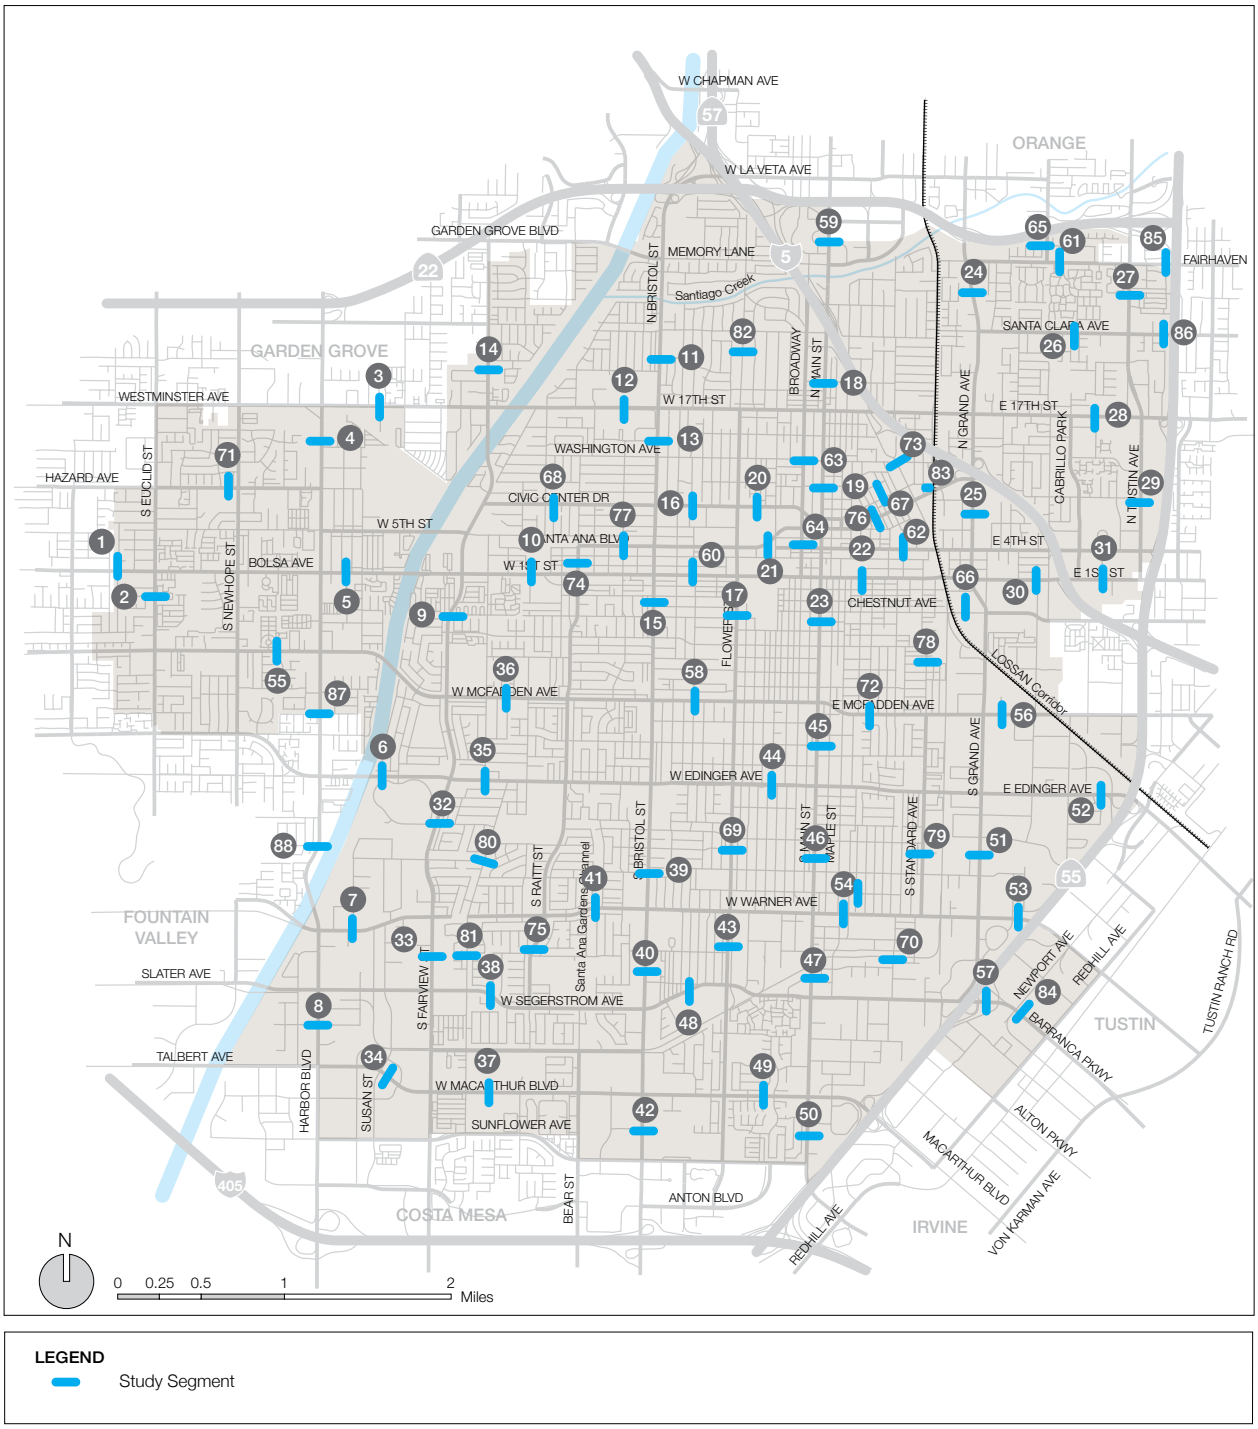


Exhibit 2.2 Study Roadway Segments

LEGEND

Study Segment

2.3 CIRCULATION ELEMENT ROADWAY CLASSIFICATIONS

The Circulation Element contains a Master Plan of Streets and Highways (MPSH) that uses a hierarchy of roadway classifications. Each roadway classification is described by size and function and has specific physical dimensions and characteristics. The MPSH contains regional arterials that connect to the countywide arterial network. OCTA's Master Plan of Arterial Highways (MPAH) is the County's planning document to ensure that the regional arterial highway network is maintained and developed in a coordinated manner between local jurisdictions to support mobility and future growth in the region. Consistency between the MPSH and MPAH is essential in order to maintain a functional regional arterial network and to receive funding from Measure M2 for street improvement projects.

Freeways

Freeways are multi-lane, limited-access, high-volume, high-speed roadways constructed for regional and interregional vehicular travel. Access to these facilities is restricted to interchange ramps at selected roadways along their route. Freeways are under the jurisdiction of the California Department of Transportation (Caltrans).

Principal Arterial

Typically, an eight-lane, divided roadway designed to accommodate between 45,000 to 67,500 vehicle trips daily. The typical right of way width is 144 feet.

Major Arterial

Generally consists of six-travel lanes, and is also divided. Typically, the right-of-way width for this type of roadway is 120 feet. A major arterial is designed to accommodate between 33,900 and 50,600 vehicle trips daily.

Primary Arterial

Generally consists of a four-lane, divided roadway. Typically, the right-of-way width is 100 feet. A primary arterial is designed to accommodate between 22,500 and 33,800 vehicle trips daily.

Secondary Arterial

Generally a four-lane, undivided roadway. The typical right-of-way width for this category of roadway is 80 feet. A secondary arterial is typically designed to accommodate between 15,000 and 22,500 vehicle trips daily.

Divided Collector Arterial

Generally a two-lane roadway with a continuous center two-way left-turn lane. The typical right-of-way width is 80 feet, for the purpose of allocating right-of-way to bicycle and pedestrian use. A divided collector arterial is designed to accommodate up to 22,000 vehicle trips per day.

Collector Street

A two-lane, undivided roadway. The right-of way width for this roadway classification is 60 feet. Collector Streets are also two-lane undivided roadways with a right-of-way width of 56 feet. A divided collector arterial is designed to accommodate up to 11,300 vehicle trips per day.

2.4 SCENARIO SUMMARY

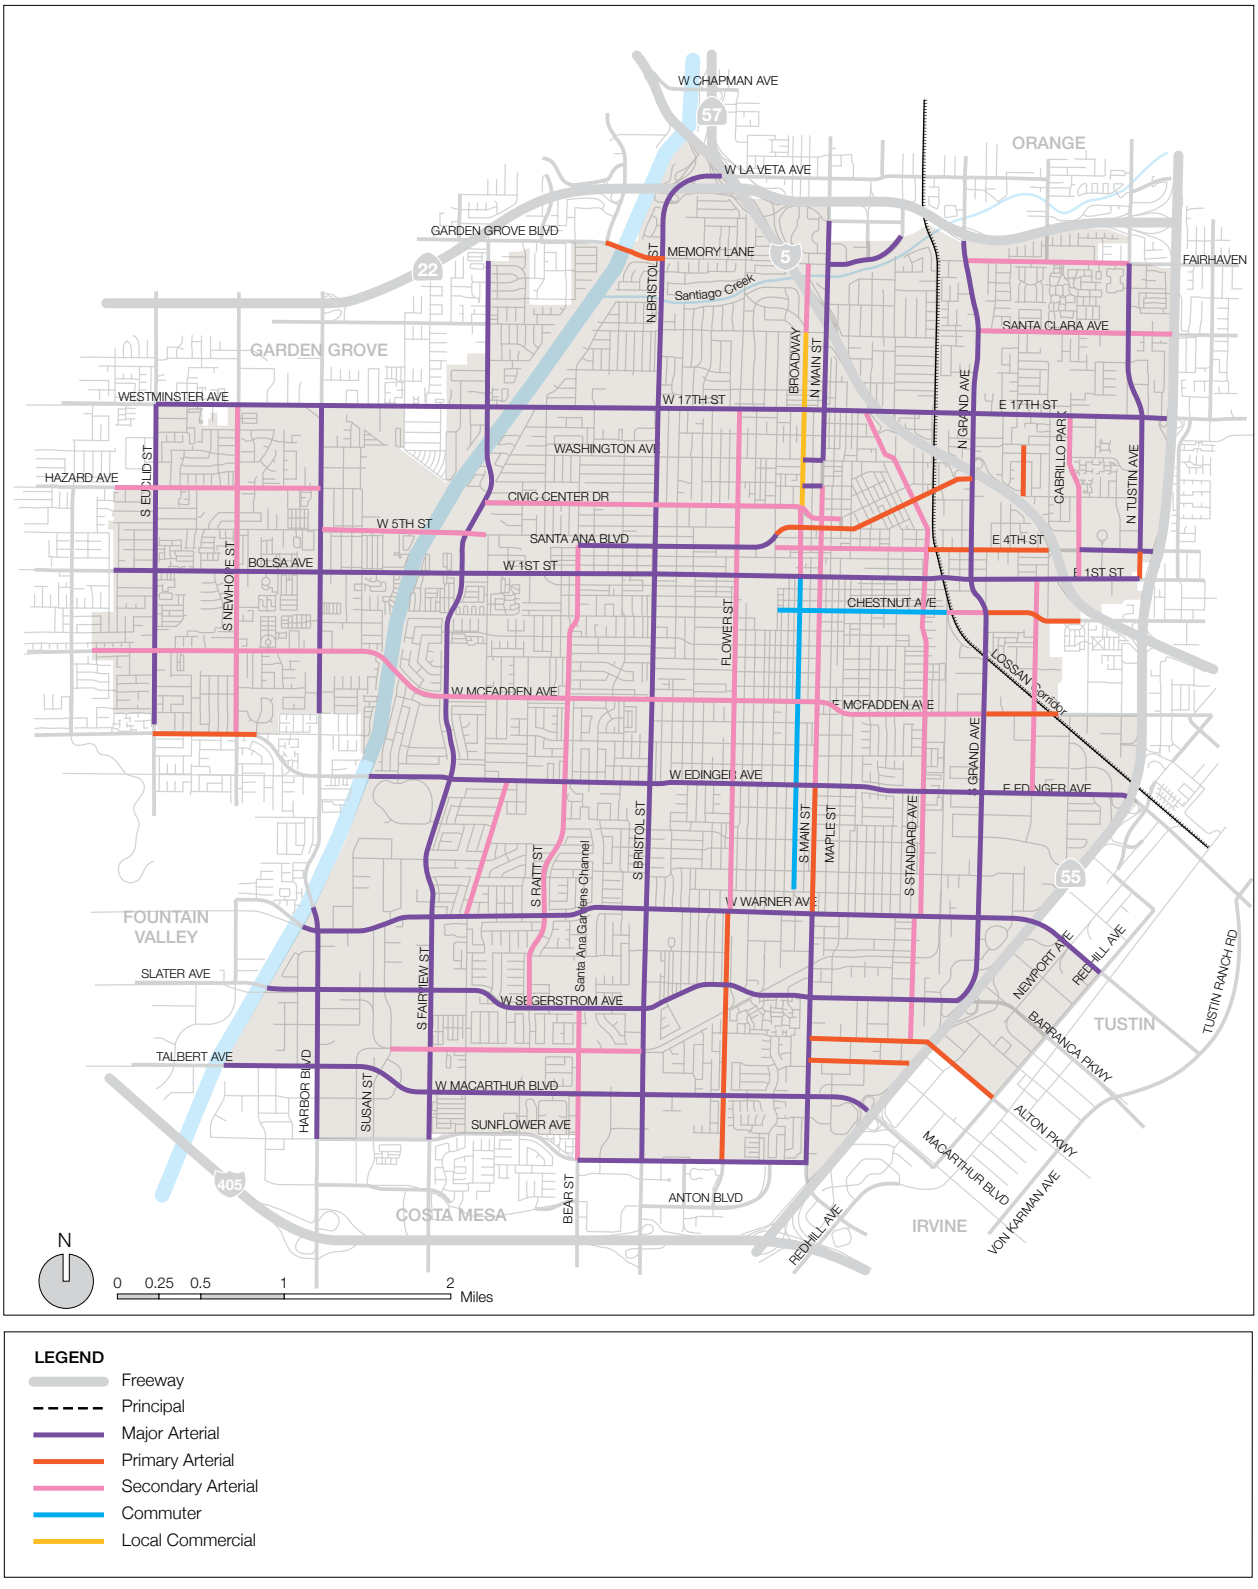
This report presents the baseline analysis results for the existing year (2020) and future year (2045) baseline scenarios as well as future year (2045) project alternative scenario. These scenarios are listed below and described in the following sections:

- Existing Year (2020)
- Future Year (2045) No Project
- Future Year (2045) With Project – Proposed GPU

2.5 EXISTING YEAR (2020)

This scenario is representative of on-the-ground conditions for the transportation network and socio-economic makeup of the city for the year 2020. This scenario serves as a point of reference for future baseline and project alternative scenarios. The network and land use assumptions are as follows:

- The transportation network is reflective of configurations as of April 2020.
- Socio-economic data is representative of December 2019 conditions.



2.6 FUTURE YEAR (2045) NO PROJECT

This scenario serves as the baseline for future year (2045) analysis and consists of the following key assumptions:

- Transportation network and socio-economic data for OCTAM 5.0 Year 2045 Baseline scenario.
- Buildout of roadways consistent with the City of Santa Ana Master Plan of Streets and Highways map (MPSH) as shown in the Circulation Element (1998).
- Buildout of the Orange County Transportation Authority's (OCTA) Master Plan of Arterial Highways (MPAH)
- Freeway and transit improvements considered in the Preferred Alternative of OCTA's LRTP
    - OC Streetcar – The OC Streetcar Project is a proposed streetcar service that would travel between the Santa Ana Regional Transportation Center (SARTC) and Garden Grove. The streetcar is proposed to travel along an exclusive guideway or path on rails that are embedded in the pavement. The streetcar is proposed to travel primarily along Santa Ana Boulevard and along the Pacific Electric Right-of-Way.
    - Bus Rapid Transit (BRT) - These improvements include the Bus Rapid Transit projects along Harbor Boulevard, Bristol Street, and Westminster Avenue/17th Street.
- Modification of mode split for automobile, bicycle, and pedestrians to reflect new bicycle/pedestrian trips.

Exhibit 2.3 presents the current MPSH, which is consistent with the No Project Alternative. Exhibit 2.4 shows current MPAH designations. Exhibit 2.5 shows the Santa Ana Fixed Guideway (OC Streetcar) alignment.

2.7 FUTURE YEAR (2045) WITH PROJECT

This scenario is based on the Future Year (2045) No Project scenario, with modifications to both the transportation network and socio-economic data. Reclassifications to some roadways are proposed to facilitate the implementation of Complete Streets throughout the City as well as reconcile inconsistencies between the MPSH and MPAH. Additionally, this scenario considers the buildout of an updated Land Use Element for the General Plan.

The transportation network was developed through the evaluation of alternatives in the Circulation Element Update and in consideration of input provided by OCTA, Caltrans, and neighboring cities during outreach. This network is based on that of the No Project scenario, with the addition of the following modifications.

Classify the following streets as Divided Collector Arterials

- Santa Clara between Grand Avenue and SR-55 Freeway (currently Secondary)
- Flower Street between Warner Avenue and First Street (currently Secondary)
- Chestnut Avenue between Standard Avenue and East City Limit (currently Secondary/Primary)
- Raitt Street between Segerstrom and Santa Ana Boulevard (currently Secondary)
- Civic Center Drive between Fairview Street and Bristol Street (currently Secondary)
- Penn Way between I-5 on/off ramps and Washington Avenue (currently a secondary)
- Santiago Street between Washington Avenue and 6th Street (currently a secondary)
- Standard Avenue between 6th Street and Warner Avenue (currently a Secondary Arterial)
- Santa Ana Boulevard between French Street and Santiago Street (currently a Primary Arterial)
- Santa Ana Boulevard between Raitt and Flower (currently a Major)
- Cambridge Street between Fairhaven and SR-22 Freeway (currently Secondary)
- Hazard Avenue between Euclid and Harbor (currently Secondary)
- Halladay Avenue between Warner and Dyer (currently Secondary)
- McFadden Avenue between Harbor Blvd and Grand Ave (currently Secondary)
- Broadway between 1st and 17th (currently Secondary)
- 4th Street between French and Grand (currently Secondary/Primary)
- Fairhaven Avenue from Grand to Tustin (currently Secondary)

Classify the following streets as Primary Arterials

- Santa Ana Boulevard between Flower and Ross (currently a Major)
- 1st Street between Bristol Street and Tustin Avenue (currently Major)

Classify the following streets as Collector Arterials

- Civic Center Drive between French and Santiago (currently a Secondary Arterial)

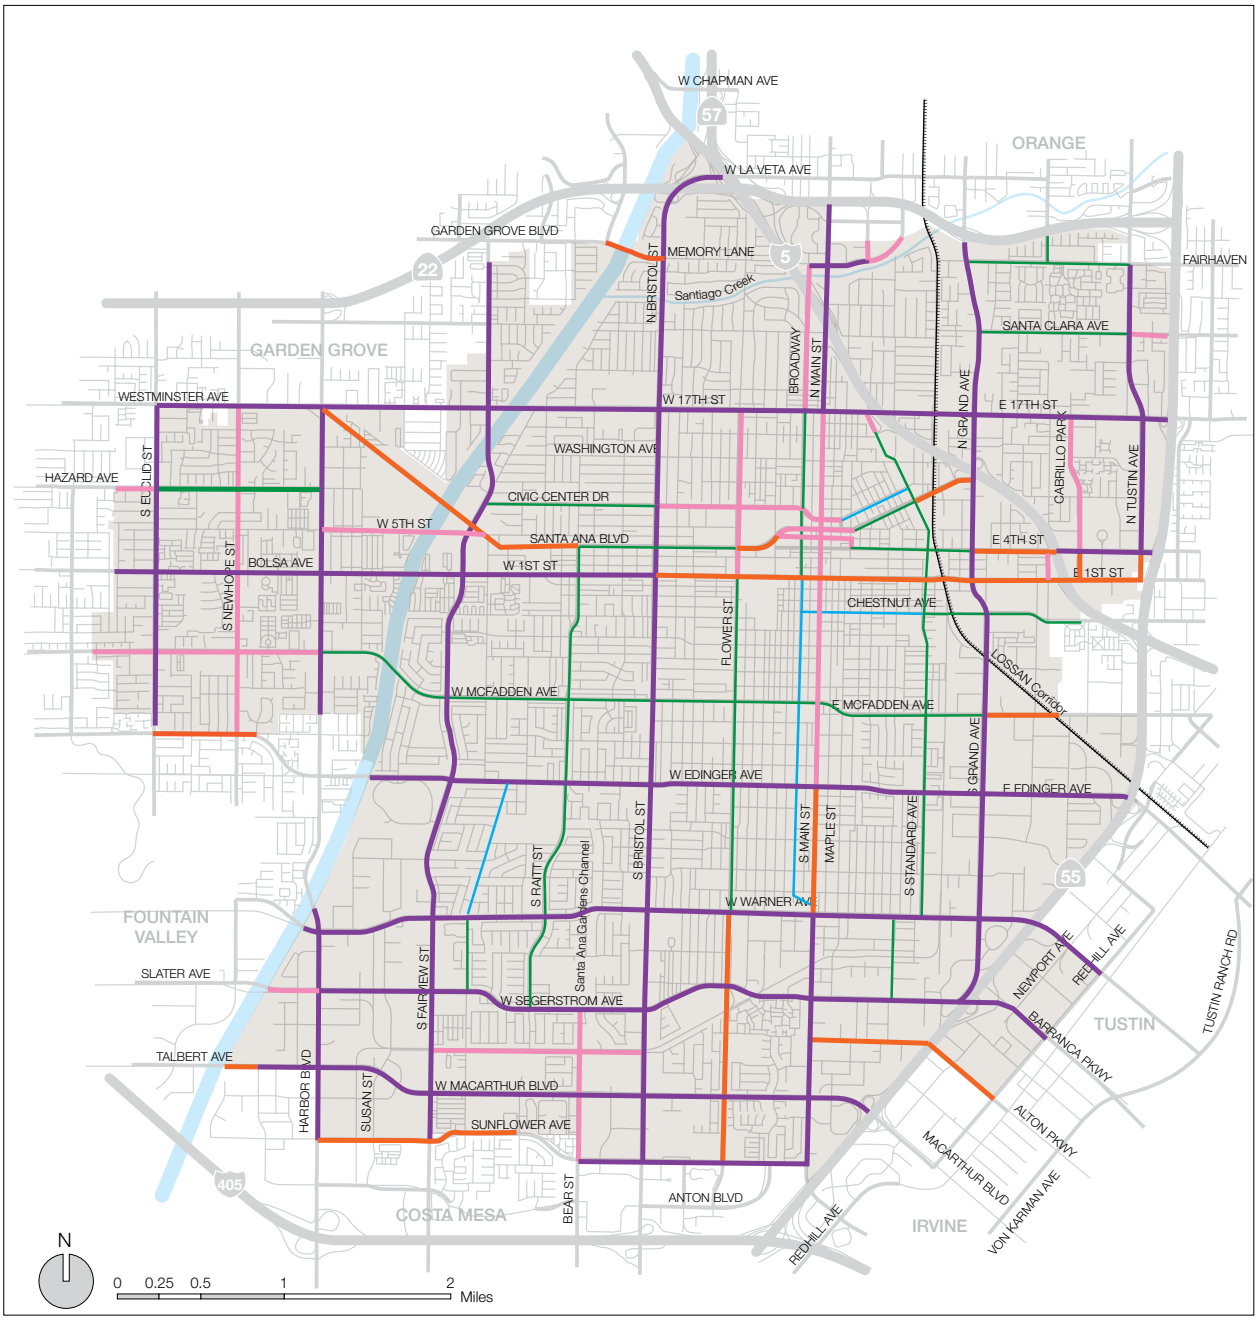
Add the following streets to the MPAH as Divided Collector Arterials

- Greenville Street between Segerstrom Avenue and Warner Avenue

Add the following streets to the MPAH as Collector Streets

- Greenville Street between Edinger Avenue and Warner Avenue

Remove the following streets from the MPAH



- Flower Street between 17th Street and its northern terminus
- Logan Street between Civic Center Drive and Santa Ana Boulevard

Exhibit 2.6 presents the proposed street reclassifications. Exhibit 2.7 presents the With Project transportation network.

Exhibit 2.6 Proposed Arterial Roadway Reclassifications

Exhibit 2.7 Proposed Santa Ana Circulation Element Transportation Network

3.0 Analysis Methodology

The analysis methodology and impact criteria used in this analysis conform to the California Environmental Quality Act (CEQA) guidelines for a traffic impact analysis. CEQA identifies VMT as the preferred metric for identifying environmental impacts. Although VMT governs CEQA impacts, vehicle LOS is also assessed in order to address local operational performance and impacts. Additionally, roadway performance is assessed in order to monitor conformance with the Orange County Transportation Authority's (OCTA) Master Plan of Arterial Highways (MPAH) operational requirements.

Study intersections and roadway segments were assessed using the method specified by the City Santa Ana, Orange County Congestion Management Program (CMP) guidelines, and other governing agency guidelines. As such, intersections under the jurisdiction of the Cities of Santa Ana, Costa Mesa, Irvine, Tustin, Garden Grove, Fountain Valley, and Orange were assessed using the Intersection Capacity Utilization (ICU) method. Intersections under the jurisdiction of Caltrans were assessed using the Highway Capacity Manual 2000 method (HCM 2000).

3.1 VEHICLE MILES TRAVELED (VMT) ANALYSIS

The VMT analysis was prepared in conformance with the City of Santa Ana VMT Analysis Guidelines (VMT Guidelines; September 2019). The City's VMT Guidelines are based on the Office of Planning and Research's (OPR) Technical Advisory on Evaluating Transportation Impacts in CEQA (December 2018). A VMT analysis is to be conducted for land use and transportation projects that have the potential to increase the average VMT per service population (VMT/SP).

VMT is defined as the total miles traveled by vehicles (within a transportation network). Service population is described as the population generating the VMT of interest. A VMT analysis may be conducted for large-scale projects such as land use plans or individual transportation/development projects. For large-scale projects, it is appropriate to assess VMT impacts based on total VMT/SP. For individual projects, the VMT analysis may consider VMT and VMT/SP based on specific trip types (e.g. work-based trips) and the corresponding population which generates said VMT (e.g. employees).

VMT was generated with data from OCTAM 5.0 using the full-accounting, origin-destination (OD) methodology. The full-accounting, origin-destination methodology considers the VMT generated by all internal-internal (I-I), internal-external (I-X), and external-internal (X-I) trips. These trip types refer to trips that include an origin and/or destination within the study areas (City of Santa Ana and Orange County). For example, an internal-internal trip refers to a trip which begins in the City and also ends in the City; an internal-external trip refers to a trip which begins in the City but ends outside of the City; an external-internal trip refers to a trip which begins outside of the City but ends in the City. It should be noted that while the majority of trips are captured in their entirety, a small portion are cut off at the OCTAM 5.0 boundaries. Thus, while the number of trips to and from the City of Santa Ana which cross the model boundary are known at various locations along major access points (highways, freeways, etc.) the trip length past the OCTAM 5.0 boundary is not.

In order to account for the VMT generated by the portions of trips outside the model boundaries, trip length assumptions were developed. These assumptions are based on the destinations/attractions near the model boundary as well as likely attractions/destinations beyond the immediate developments near the boundary limits. For example, northbound and southbound trips along I-5 at the San Diego County Line were assigned a trip length of 20 miles past the model's southern boundary (the San Diego County Line). This assumption is intended to provide a general account for VMT which considers trips to various locations such as Camp Pendleton, the US-Mexico Border, and various cities within San Diego County. Trip lengths of zero (0) miles are assigned to those trips which are not considered to extend further than 5 miles past the OCTAM boundary; due to the approximate boundary of the model, it would not be appropriate to pursue such a level of accuracy. A summary of the trip length assumptions to/from major OCTAM 5.0 boundary access points is provided below:

- SR-101 near Ventura (20 miles)
- SR-150 near Ojai (0 miles)
- SR-33 near Ventura (0 miles)
- I-5 near Santa Clarita (50 miles)
- SR-14 near Santa Clarita (20 miles)
- I-15 north of I-215 (50 miles)
- I-10 near Banning (30 miles)
- SR-243 south of Banning (10 miles)
- SR-74 east of Hemet (20 miles)
- SR-79 near Temecula (20 miles)
- I-15 near Temecula (0 miles)
- I-5 at San Diego County Line (20 miles)

Due to the nature and scale of the proposed project, the analysis considers the total VMT and service population which consists of the aggregate of total employees and population within the study area. When aggregating employees and residents, an employee reduction factor was applied to account for overlaps in the two (employees who are also residents). Reduction factors were applied to both the City of Santa Ana and County of Orange employees then aggregated to the resident population. Reduction factors are based on employment data within the Southern California Association of Governments (SCAG) Local Profiles Reports (2019) for the City of Santa Ana and Orange County. The SCAG reports show that 20.8% of employees within the City are also residents of the City and that 65.3% of employees within the County are also residents of the County.

VMT and VMT/SP is provided for all scenarios. Existing year (2020) VMT, SP, and VMT/SP values were developed through linear interpolation of 2016 and 2045 baseline OCTAM scenarios. This method was chosen due to the availability of consistent VMT and socio-economic data (SED) used to derive VMT/SP. Although existing year (2020) SED is available, it does not have an accompanying VMT dataset since there is no baseline OCTAM roadway/highway network for existing year (2020) conditions. Therefore, the traffic study uses both interpolated VMT and SED based on OCTAM 2016 baseline and the 2045 forecasts to develop the existing year (2020) values.

Per the City of Santa Ana Traffic Impact Study Guidelines (2019), the project should be screened to determine the need for a full VMT analysis based on the following screening criteria. Firstly, two conditions should be considered:

- Does the project have the potential to reduce VMT/SP?
- Is the project consistent with the Regional Transportation Plan (RTP) / Sustainable Communities Strategy's (SCS)?

If both conditions are met, then a project may be precluded from a full VMT analysis if any of the following criteria are met:

- Projects which serve the local community and have the potential to reduce VMT, such as neighborhood K-12 schools and local-serving retail less than 50,000 square feet (Charter schools are excluded from this criteria.
- Projects that generate less than 110 net daily trips.
- Projects located within Transit Priority Areas (TPAs)
- Projects located in a low-VMT generating Traffic Analysis Zone (TAZ).
    - Proposed land use shall be consistent with the existing land use generating the low VMT/SP.
    - Proposed land use shall be consistent with the RTP/SCS assumptions or decreases VMT/SP compared to RTP/SCS.

The criteria above are presented in a compact manner. Detailed criteria descriptions and supporting material are provided in the City of Santa Ana Traffic Impact Study Guidelines (2019).

VMT impacts are assessed for the Future Year (2045) With Project scenario, based on changes from both the Existing Year (2020) and Future Year (2045) No Project scenarios. VMT impact thresholds for land use plans (such as General Plans and Specific Plans) are listed below:

- Project Level Impact
    - A project is considered to have a significant impact if the project VMT/SP (for the land use plan) exceeds 15% below the existing total daily VMT/SP for the County; or
- Cumulative Impact
    - A project is considered to have a significant impact if the project results in a negative effect on VMT/SP at the citywide level (City VMT/SP is higher with the project than without it.

Where an impact is identified, the project's VMT/SP should be mitigated to be at or less than 15% below the existing Countywide VMT/SP. Mitigation measures may include changes to the project, implementation of transportation demand management (TDM) measures, impact fees, a mitigation exchange, or any other measure approved by the City's Traffic Engineering Division and Planning Department.

3.2 ROADWAY LEVEL OF SERVICE ANALYSIS

Roadway performance was assessed based on the volume-to-capacity (V/C) ratio, as specified in the Santa Ana Circulation Element (1998). The V/C ratio is calculated by dividing the roadway volume by the capacity of the roadway. Roadway capacities are presented in Table 3-1 and resemble those presented in the Santa Ana Circulation Element. The Santa Ana Circulation Element, however, does not provide roadway capacities for the Divided Collector and five-lane divided arterial roadway types. Capacities for the Divided Collector roadway were taken from the Orange County Master Plan of Arterial and Highways (OC MPAH); capacities for the five-lane divided arterial roadway were developed by averaging the capacities of the Major and Primary Arterial roadway types. The capacities shown

correspond to the maximum volume that can be experienced in order to achieve the corresponding level of service (LOS). Therefore, a volume greater than that listed in the column labeled "LOS E" will result in LOS F. The minimum level of service for roadways in the City of Santa Ana is LOS D, per the Circulation Element (1998). The OC MPAH suggests a minimum LOS of C be maintained for roadways, with the intent of maintaining LOS D through intersections. Descriptions of operation and the range of volume-to-capacity ratios for each LOS grade are presented in Table 3-2.

Table 3-1 Roadway Capacity and LOS

CLASSIFICATION	LANES	LOS A	LOS B	LOS C	LOS D	LOS E
Principal Arterial	8D	45,000	52,500	60,000	67,500	75,000
Major Arterial	6D	33,900	39,400	45,000	50,600	56,300
Major / Primary Arterial	5D	28,200	32,850	37,500	42,200	46,900
Primary Arterial	4D	22,500	26,300	30,000	33,800	37,500
Secondary Arterial	4U	15,000	17,500	20,000	22,500	25,000
Divided Collector	2D	9,000	12,000	15,000	20,000	22,000
Collector	2U	7,500	8,800	10,000	11,300	12,500

Sources: City of Santa Ana, General Plan – Circulation Element (1998); Orange County Master Plan of Arterials and Highways (2017).

3.3 INTERSECTION LEVEL OF SERVICE ANALYSIS

Study intersections were assessed using the methodology described in the governing agency's traffic impact analysis guidelines. As such, intersections were assessed using the Intersection Capacity Utilization (ICU) methodology or the Highway Capacity Manual 2000 method (HCM 2000). A description of each as well as the level of service criteria is provided in the following sections.

3.3.1 ICU Methodology

Signalized intersections under the jurisdiction of the Cities of Santa Ana, Costa Mesa, Orange, Irvine, Tustin, and Fountain Valley were assessed using the ICU methodology. The ICU methodology is based on intersection V/C ratio. The V/C ratio value for each movement is the observed volume divided by the saturation flow volume. The intersection ICU value is the sum of the V/C values for the critical movement on each leg, where critical movements are the pairs of conflicting movements with the highest combined V/C values. ICU is expressed as a decimal value (e.g. 0.74), where 1.00 represents the saturated condition where the volume of traffic flow is equal to the capacity. LOS descriptions and their corresponding ranges of V/C ratios are provided in Table 3-2.

This study uses maximum saturation volumes of 1,600 vehicles per hour per lane (VPHPL) for turn lanes and 1,700 VPHPL for through lanes. A 5% loss time per cycle length was applied.

Table 3-2 ADT / ICU Level of Service Descriptions

LOS	V/C	Definition
A	0.00 – 0.60	Free Flow. Individual users are virtually unaffected by the presence of others in the traffic stream. Freedom to select desired speeds and to maneuver within the traffic stream is extremely high. The general level of comfort and convenience provided to the motorist, passenger, or pedestrian is excellent.
B	0.61 – 0.70	Stable flow. The presence of other users in the traffic stream begins to be noticeable. Freedom to select desired speeds is relatively unaffected, but there is a slight decline in the freedom to maneuver within the traffic stream with LOS A. The general level of comfort and convenience provided is somewhat less than that of LOS A, because the presence of others in the traffic stream begins to affect individual behavior.
C	0.71 – 0.80	Stable flow. This LOS marks the beginning of the range of flow in which the operation of individual users becomes significantly affected by interactions with others in the traffic stream. The selection of speed is affected by the presence of others, and maneuvering within the traffic stream requires substantial vigilance on the part of the user. The general level of comfort and convenience declines noticeably at this level.
D	0.81 – 0.90	High density, but stable flow. Speed and freedom to maneuver are severely restricted, and the drive or pedestrian experiences a generally poor level of comfort and convenience. Small increases in traffic flow will generally cause operational problems at this level.
E	0.91 – 1.00	Operating conditions at or near the capacity level. All speeds are reduced to a slow but relatively uniform value. Freedom to maneuver within the traffic stream is extremely difficult, and generally accomplished by forcing a vehicle or pedestrian to "give way" to accommodate such maneuvers. Comfort and convenience levels are extremely poor, and drivers or pedestrian frustration is generally high. Operations at this level are usually unstable because small increases in flow or minor variations within the stream will cause a breakdown.
F	> 1.00	Forced or breakdown flow. This condition exists wherever the amount of traffic approaching a point exceeds the amount which can traverse that point. Queues form up behind such locations as arrival flow exceeds discharge flow.

Source: City of Santa Ana, General Plan – Circulation Element, 1998

3.3.2 Highway Capacity Manual (HCM) Methodology

Study intersections that are Caltrans operated intersections were evaluated using the Highway Capacity Manual 2000 (HCM 2000) Operations methodology consistent with Caltrans guidelines. Chapter 16 of the Highway Capacity Manual (HCM) 2000 contains the operations methodology for signalized intersections, which evaluates LOS based on controlled delay per vehicle. Controlled delay is defined as the portion of the total delay attributed to the traffic signal operation including deceleration delay, queue move-up time, stopped delay, and final acceleration delay. Consistent with HCM 2000 methodology the maximum saturation flow rate for intersections analyzed using HCM 2000 is 1,900 VPHPL. The relationship between controlled delay per vehicle and LOS for signalized intersections is summarized in Table 3-3.

Table 3-3 HCM 2000 Level of Service Descriptions

LOS	Description of Traffic Conditions	Delay (sec/veh)
A	Insignificant delays: no approach phase is fully utilized and no vehicle waits longer than one red indication.	≤ 10
B	Minimal delays: an occasional approach phase is fully utilized. Drivers begin to feel restricted.	> 10 – 20
C	Acceptable delays: major approach phase may become fully utilized. Most drivers feel somewhat restricted.	> 20 – 35
D	Tolerable delays: drivers may wait through more than one red indication. Queues may develop but dissipate rapidly, without excessive delays.	> 35 – 55
E	Significant delays: volumes approaching capacity. Vehicles may wait through several cycles and long vehicle queues form upstream.	> 55 – 80
F	Excessive delays: represents conditions at capacity, with extremely long delays. Queues may block upstream intersections.	> 80

Source: Highway Capacity Manual, Transportation Research Board, 2000.

Unsignalized intersections were evaluated using the methodology described in Chapter 17 of the HCM. The criteria for unsignalized intersections have different threshold values than do those for signalized intersections because drivers expect signalized intersections to carry higher traffic volumes, so higher levels of control delay are acceptable. The relationship between controlled delay per vehicle and LOS for unsignalized intersections is summarized in Table 3-4.

Table 3-4 Level of Service for Unsignalized Intersections

LOS	Control Delay (sec/veh)
A	≤ 10
B	> 10 – 15
C	> 15 – 25
D	> 25 – 35
E	> 35 – 50
F	> 50

Source: Highway Capacity Manual, Transportation Research Board, 2000. Exhibit 17-22

The intersection Level of Service analysis for this report was performed using TRAFFIX software. TRAFFIX is a network-based interactive computer program that enables calculation of levels of service at signalized and unsignalized intersections for multiple locations and scenarios. TRAFFIX also calculates signal timing (green times and cycle lengths) and maximum queue lengths to assist in evaluating signalized intersections.

3.4 INTERSECTION LOS AND SIGNIFICANT IMPACT CRITERIA

3.4.1 Cities of Santa Ana, Costa Mesa, Fountain Valley, and Orange

The minimum LOS for intersections in the Cities of Santa Ana, Costa Mesa, and Fountain Valley is LOS D. Impacts are considered significant if:

- An intersection degrades from an acceptable LOS (LOS D or better) to an unacceptable LOS (LOS E or F) during the peak hours; or
- The project increases traffic demand at the study intersection by 1% of capacity (0.01) if the intersection already operates at an unacceptable level (LOS E or F).

3.4.2 City of Tustin

The minimum LOS for intersections in the City of Tustin is LOS D. Significant impacts are not explicitly outlined, but the preservation of the minimum LOS with and without the project is required. Therefore, a significant impact can be assumed to occur if:

- An intersection is expected to operate at an unacceptable LOS (LOS E or F) in the With Project scenario; an effort to return the intersection LOS to an acceptable level is to be made.

3.4.3 City of Irvine

The minimum LOS for intersections in the City of Irvine is LOS D. Impacts are considered significant if:

- An intersection degrades from an acceptable LOS (LOS D or better) to an unacceptable LOS (LOS E or F) during the peak hours; or
- An intersection is operating at an unacceptable LOS (LOS E or F) and experiences an increase in V/C of 0.02 or more.

3.4.4 Orange County Congestion Management Program

The minimum LOS for intersections part of the Orange County Congestion Management Program (OC CMP) establishes LOS E as the minimum level of operation for CMP roadways (freeways and Smart Streets). Impacts are considered significant if:

- An intersection degrades from an acceptable LOS (LOS E or better) to an unacceptable LOS (LOS F) during the peak hours; or
- The project increases traffic demand at the study intersection by 10% of capacity (0.10) if the intersection already operates at an unacceptable level (LOS F)

OC CMP intersections included in this analysis are:

- INT 6 – Harbor Boulevard and SR-22 WB Off-Ramp / Banner Drive
- INT 9 – Harbor Boulevard and 1st Street
- INT 12 – Harbor Boulevard and Warner Avenue
- INT 17 – Harbor Boulevard and I-405 NB Off-Ramp
- INT 18 – Harbor Boulevard and I-405 SB Off-Ramp
- INT 87 – Mabury Street and 1st Street
- INT 95 – SR-55 SB Ramps / Auto Mall Drive and Edinger Avenue

3.4.5 Caltrans

The minimum LOS for Caltrans intersections is LOS C. Impacts are considered significant if:

- An intersection degrades from an acceptable LOS (LOS C or better) to an unacceptable LOS (LOS D or worse) during the peak hours; or
- Any increase in delay is expected at an intersection already operating at an unacceptable LOS.

3.5 TRAFFIC VOLUMES

This study assesses both roadway and intersection performance for all existing and future year scenarios. Roadway and intersection counts were utilized to determine existing year (2020) average daily traffic (ADT) on study roadway segments and peak hour turning movement counts at study intersections. To determine future year (2045) volumes, an annual growth rate applied to existing traffic volumes was developed through the Orange County Transportation Analysis Model (OCTAM). The traffic volume development procedure is further detailed in the following sections.

3.5.1 Traffic Count Data

Roadway ADT was taken from the City of Santa Ana count database, with counts conducted in September and October 2019. A compound annual growth rate of 1% was applied to the ADT volumes to bring them to levels consistent with those expected in the year 2020.

Intersection turning movement volumes are provided by recent count data and supplemented with historical count data. Updated traffic counts for the year 2020 were in the process of being scheduled and conducted when widespread closures of schools, businesses, and other facilities were ordered due to the onset of the COVID-19 pandemic, disrupting normal traffic patterns. As a result, updated counts were only partially conducted and were supplemented with historic count data. Where they were able to be conducted, updated counts were conducted during the morning peak period (6:00 AM to 9:00 AM) and the afternoon peak period (4:00 PM to 7:00 PM). The AM and PM peak hour analyses are based on the hour of highest total intersection volume during the morning and afternoon peak periods. A compound annual growth rate (CAGR) of 1% was applied to the volumes for traffic counts conducted prior to 2020 to bring them to levels consistent with those expected in the year 2020. The CAGR 1% was selected based on comparisons of historical ADT data for various locations throughout the City. An inventory of intersection count data is provided in Table 3-5.

3.5.2 Travel Demand Forecasting

The horizon year 2045 volumes were derived based on existing peak hour count data and forecast link volumes obtained from the Orange County Transportation Analysis Model (OCTAM) version 5.0. OCTAM 5.0 is the accepted sub-regional model for forecasting travel demand in Orange County, and is based on socioeconomic data from Orange County Projections 2018. Growth factors for each intersection approach and departure were interpolated from OCTAM forecast for the 2016 and 2045 baseline scenarios. These growth factors were then applied to existing counts to forecast future turning movement volumes. OCTAM 5.0 was recently updated by OCTA and this traffic analysis update utilizes this new TransCad version of the model.

4.0 Existing Year (2020) Conditions

The project study area includes arterial roadways and signalized intersections in the vicinity of the project corridor. Descriptions of geometrical features and intersection level of service analysis results for the year 2020 are included in this section.

4.1 EXISTING ROADWAY NETWORK

Selected arterials that are located in the vicinity of the project corridor are described in this section. Items of note include existing geometry, pedestrian and bicycle facilities, and adjacent land uses.

Euclid Street is classified as a Major Arterial that travels north and south through the study area. Within the study area, there are three travel lanes in each direction with a striped center median functioning as a two-way left-turn lane. Euclid Street is five lanes (2 northbound and 3 southbound) south of Davit Avenue. The posted speed limit is 45 miles per hour. On-street parking is not permitted and no bike facilities are provided. OCTA provides service along this corridor via Route 37 at approximately 30 minute headways.

Newhope Street is classified as a Secondary Arterial that travels north and south on the west end of Santa Ana. Within the study area, there are two travel lanes in each direction with a striped center median functioning as a two-way left-turn lane. The posted speed limit is 40 miles per hour. On-street parking is generally not permitted north of McFadden Avenue, except between 1st Street and 5th Street. Class II bike lanes were recently implemented between Westminster Avenue and McFadden Avenue. There are currently no bus routes that serve this corridor.

Hazard Avenue is classified as a Secondary Arterial that travels east and west through the study area. Within the study area, there are two travel lanes in each direction with a striped center median functioning as a two-way left-turn lane. Hazard Avenue transitions to a Divided Collector west of Harbor Boulevard, and Undivided Collector east of Harbor Boulevard. Limited on-street parking is permitted adjacent to Rosita Park. The posted speed limit is 35 miles per hour and 25 miles per hour near the school zone. No bus routes or bike facilities are provided along this corridor.

McFadden Avenue is classified as a Secondary Arterial (between Euclid Street and Grand Avenue) and a Primary Arterial (east of Grand Avenue) that travels east and west through the study area. Within the study area, there are two travel lanes in each direction with a striped center median functioning as a two-way left-turn lane and a raised, landscaped median on occasion. McFadden Avenue narrows to a two-lane undivided roadway between Bristol Street and Standard Avenue. The posted speed limit is 30-45 miles per hour. On-street parking is permitted along parts of the corridor. Bike lanes are provided west of Harbor Boulevard. OCTA provides service along this corridor via Route 66 and Route 145 at approximately 15-45 minute headways.

Harbor Boulevard is classified as a Major Arterial that travels north and south through the study area. Within the study area, there are three travel lanes in each direction with a raised, landscaped median. The posted speed limit is 40-45 miles per hour. On-street parking is not permitted and limited bike facilities are provided. OCTA provides service along this corridor via Route 43 and Route 543 at approximately 15-20 minute headways.

Fairview Avenue is classified as a Major Arterial that travels north and south through the study area. Within the study area, there are three lanes in each direction with a raised, landscaped median. Fairview Avenue transitions to a five-lane divided roadway then a Primary Arterial north of Civic Center Drive. The posted speed limit is 45 miles per hour. On-street parking is not permitted and bike facilities are not provided. OCTA provides service along this corridor via Route 47 at approximately 15 minute headways.

Civic Center Drive is classified as a Secondary Arterial that travels east and west through the study area. Within the study area, Civic Center Drive is a four-lane undivided roadway; Civic Center Drive becomes a four-lane divided with bike facilities east of Bristol Street until Broadway. It is a four-lane

divided road until Minter Street and then becomes a two-lane undivided. The posted speed limit is 35 miles per hour, unless otherwise noted to be 25 miles per hour in a school zone. On-street parking is allowed along some sections of Civic Center Drive. On-street parking is permitted along certain segments. There are some bike lanes or bike routes provided along this roadway. OCTA provides service along this corridor via Routes 83, 145, and 862 with headways of approximately 30 minutes for each route.

MacArthur Boulevard is classified as a Major Arterial that travels east and west through the study area. Within the study area, there are three travel lanes in each direction with a raised, landscaped median. MacArthur Boulevard is classified as a Primary Arterial west of Hyland Avenue. The posted speed limit is 40 miles per hour. On-street parking is not permitted throughout the corridor and there are currently no bike facilities provided. OCTA operates four bus routes along this corridor via Routes 53, 55, 76 and 173. Headways range between every 10 minutes for Route 53, 30 minutes for Route 55, 60 minutes for Route 76, and 45 minutes for Route 173.

Raitt Street is classified as a Secondary Arterial that travels north and south through the study area. Between MacArthur Boulevard and Edinger Avenue, Raitt Street is a four-lane divided roadway. Between Edinger Avenue and Myrtle Street, Raitt Street is a four-lane undivided roadway. Then from Myrtle Street to 1st Street it is a two-lane divided roadway. Between First Street and Washington Avenue, Raitt Street narrows down to a two-lane undivided roadway. The speed limit is limited to 25 miles per hour in school zones and 35-40 miles per hour outside of the school zone. On-street parking is permitted along the west side of the street between McFadden Avenue and Edinger Avenue and on both sides of the street north of McFadden Avenue to Richland Avenue. Currently bike facilities are not provided along this roadway. OCTA operates Route 145 approximately every 45 minutes during peak operation.

1st Street is classified as a Major Arterial that travels east and west through the study area. Within the study area, there are three lanes in each direction with a raised, landscaped median. The posted speed limit is 40 miles per hour. On-street parking is not permitted along this corridor. There are currently no bike lanes or bike routes provided. OCTA provides service along this corridor via Route 64 at approximately 15 minute headways.

Bristol Street is classified as a Major Arterial that travels north and south through the study area. Within the study area, there are three travel lanes in each direction with a raised, landscaped median. The posted speed limit is 40 miles per hour. Bikeways exist between 17th Street and Edinger Avenue. On-street parking is not permitted along this corridor. OCTA provides service along this corridor via Route 57 at approximately 30 minute headways.

17th Street/ Westminster Avenue is classified as a Major Arterial traveling east and west through the northern region in Santa Ana. There are three lanes in each direction divided by a center median. The posted speed limit is 40 miles per hour. On-street parking is not permitted and there are currently no bike facilities provided along the corridor. Several OCTA bus routes serve this corridor, including Routes 51 and 60 with approximately 15-20 minute headways.

Santa Ana Boulevard is classified as a Major Arterial (between Raitt Street and Ross Street) and a Primary Arterial (between Ross Street and Grand Avenue). The roadway fluctuates between a four-lane undivided roadway (Raitt Street to Flower Street), six-lane divided roadway (Flower Street to Ross Street and Santiago Street to Grand Avenue), and a three-lane one-way roadway (Ross Street to French Street). On-street parking is permitted along certain segments of the corridor. There are currently no bike lanes or bike routes provided. The posted speed limit is 35 miles per hour. Several OCTA bus routes serve this corridor, including Routes 83, 145, and 206 with approximately 30-45 minute headways.

Segerstrom Avenue is classified as a Major Arterial that travels east and west through the study area. Segerstrom Avenue is a six-lane divided roadway between Susan Street and Harbor Boulevard and a four-lane divided roadway along the rest of the corridor. The posted speed limit is 40 miles per hour.

On-street parking is not permitted and there are currently no bike facilities provided along this corridor. There are currently no transit services that operate along Segerstrom Avenue within the study area.

Memory Lane is classified as a Major Arterial that travels east and west through the study area. There are three travel lanes in each direction with a raised, landscaped median. The posted speed limit is 40 miles per hour. On-street parking is not permitted along this roadway. Class II bike lanes are provided between Bristol Street and Flower Street. OCTA provides service along this corridor via Route 453 at approximately 30 minute headways.

Tustin Avenue is classified as a Major Arterial that travels north and south parallel to the SR-55 Freeway. There are three travel lanes in each direction with a striped center median. The posted speed limit is 40 miles per hour. On-street parking is not permitted and bike lanes are not available along Tustin Avenue. Two OCTA bus routes operate along Tustin Avenue. Routes 60 and 71 operate at frequencies of 45 minutes and 1 hour respectively.

Warner Avenue is classified as a Major Arterial that travels east and west through the study area. Within the study area, Warner Avenue is a four-lane undivided roadway. The posted speed limit is 40-45 miles per hour. On-street parking is not permitted and there are currently limited bike lanes provided along the corridor. There are two OCTA bus routes that serve Warner Avenue in the study area. Routes 72 and 463 operate with headways at approximately 20-60 minutes.

Edinger Avenue is classified as a Major Arterial that travels east and west through the study area. The roadway is a four-lane divided roadway between Euclid Street and Main Street and six-lane divided roadway between Main Street and SR-55 freeway. The posted speed limit is 40 miles per hour. On-street parking is not permitted throughout most of the corridor, with the exception of the eastbound direction between Main Street and Maple Street; and between Cedar Street and Evergreen Street. There are bike facilities provided along parts of the corridor. OCTA provides service along Edinger Avenue via Route 70 at approximately 30 minute headways.

Flower Street is classified as a Collector Street (north of 17th Street), Secondary Arterial (between 17th Street and Warner Avenue), and Primary Arterial (south of Warner Avenue) that travels north and south through the study area. The roadway fluctuates between a two-lane divided roadway (Warner Avenue to First Street and 17th Street to Memory Lane) and a four-lane divided roadway (Sunflower Avenue to Warner Avenue and First Street to 17th Street). On-street parking is permitted along residential areas. There are currently no bike facilities provided along the corridor. OCTA provides service along this corridor via Route 51 at approximately 30 minute headways.

Main Street is classified as a Major Arterial (north of Washington Avenue and south of Warner Avenue), Secondary Arterial (between Washington Avenue to Edinger Avenue), and a Primary Arterial (between Edinger Avenue and Warner Avenue) that travels north and south through the study area. There are two travel lanes in each direction, with a striped center median operating as a two-way left-turn lane. The posted speed limit is 35-40 miles per hour. Parking is permitted on the east side of the street between Goetz Avenue and Dyer Road, and prohibited on Main Street through the rest of the study area. South of Dyer Road, Main Street widens to a six-lane facility with a center two-way left-turn lane. OCTA provides service along this corridor via Route 53 at approximately 20 minute headways.

Grand Avenue is classified as a Major Arterial that travels north and south through the study area. From the SR-55 freeway to the northern study area boundary, Grand Avenue is a six-lane major arterial with a center two-way left-turn lane. Approximately 900 feet north of Warner Avenue, Grand Avenue narrows to two lanes in the southbound direction, and the third southbound lane is restored about 300 feet north of Warner Avenue. South of the SR-55 freeway, Grand Avenue has two northbound and three southbound lanes divided by a landscaped median. Parking is not permitted and there are currently no bike lanes or bike routes along Grand Avenue. The posted speed limit is 45 miles per hour. OCTA provides service along this corridor via Route 59 at approximately 30 minute headways.

4.2 STUDY INTERSECTION GEOMETRY AND PEAK HOUR VOLUMES

Intersections were selected in consultation with the City of Santa Ana based on expected traffic impacts and vehicle volumes. The existing study intersection lane geometries are provided in the Appendix. Year 2020 AM peak hour turning movement volumes are shown in Table 4-1, and the PM peak hour volumes are shown in Table 4-2.

Table 4-1 Existing Year 2020 Volumes – AM Peak Hour

4.3 EXISTING YEAR (2020) VEHICLE MILES TRAVELED (VMT)

Table 4-3 presents the VMT analysis results for the existing year (2020) scenario. VMT calculations are based on the scenario parameters and methodology as described in Sections 2.5 and 3.1, respectively.

Table 4-3 Existing Year (2020) VMT Summary

	I – I VMT	I – X VMT	X – I VMT	Total VMT	Service Population	VMT/SP
City	697,779	5,356,504	5,352,841	11,407,124	507,924	22.5
County	48,242,429	25,463,887	25,637,825	99,344,141	3,834,949	25.9

SP = Service Population = Total Employees + Total Population. Reduction factor applied to Total Employees as noted in Section 3.1 and shown in Appendix F. I-I = Internal-Internal; I-X = Internal-External; X-I = External-Internal.

4.4 EXISTING YEAR (2020) ROADWAY SEGMENT LEVEL OF SERVICE

Table 4-4 includes the 24-hour count locations, volumes, and corresponding roadway segment level of service. The following study roadway segments currently operate at a deficient LOS:

- Segment 4 – Harbor Boulevard from Westminster Avenue/17th Street to Hazard Avenue
- Segment 11 – Bristol Street from 17th Street to Santa Clara Avenue
- Segment 13 – Bristol Street from 17th Street to Washington Avenue
- Segment 14 – Fairview Street from Trask Avenue to 17th Street
- Segment 17 – Flower Street from 1st Street to Bishop Street
- Segment 23 – Main Street from 1st Street to Bishop Street
- Segment 25 – Grand Avenue from Santa Ana Boulevard to 4th Street
- Segment 39 – Bristol Street from Edinger Avenue to Warner Avenue
- Segment 44 – Edinger Avenue from Flower Street to Main Street
- Segment 45 – Main Street from McFadden Avenue to Edinger Avenue
- Segment 57 – Dyer Road from Grand Avenue to Pullman Street
- Segment 58 – McFadden Avenue from Bristol Street to Flower Street
- Segment 72 – McFadden Avenue from Main Street to Standard Avenue
- Segment 88 – Harbor Boulevard from Edinger Avenue to Warner Avenue

Notes:
* Not available.
(1) ADT – Average Daily Traffic Volumes
(2) LOS – Level of Service
(3) #D – total number of lanes in both directions divided by raised or striped median; #U – total number of undivided lanes in both directions
(4) Roadway capacities shown in Table 3-1.
(5) Yellow and red shading indicates an unacceptable level of service.

4.5 EXISTING YEAR (2020) INTERSECTION LEVEL OF SERVICE

A summary of the AM and PM peak hour level of service analysis results for the existing year (2020) existing condition are included in Table 4-5. Intersections are general considered unacceptable if the level of service (LOS) is “E” or “F”. It should be noted that Caltrans and CMP intersection have a minimum acceptable LOS of C and E, respectively. The following intersections are forecast to have unacceptable level of service in the existing year (2020) condition:

- INT 2 – Euclid street and McFadden Avenue (City of Santa Ana)
- INT 12 – Harbor Boulevard and Warner Avenue (City of Santa Ana – CMP)
- INT 13 – Harbor Boulevard and Segerstrom Avenue (City of Santa Ana)
- INT 14 – Hyland Avenue and MacArthur Boulevard (City of Costa Mesa / City of Santa Ana)
- INT 37 – Bristol Street and Segerstrom Avenue (City of Santa Ana)
- INT 45 – Flower Street and McFadden Avenue (City of Santa Ana)
- INT 47 – Flower Street and MacArthur Boulevard (City of Santa Ana)
- INT 82 – Grand Avenue and Edinger Avenue (City of Santa Ana)
- INT 91 – Tustin Street and Fairhaven Avenue (City of Orange)

*Intersection does not currently exist; assessed in future scenarios only.

5.0 Future Year 2045 Forecast Modeling

5.1 ORANGE COUNTY TRANSPORTATION AUTHORITY MODEL (OCTAM)

The Orange County Transportation Authority (OCTA) is responsible for regional transportation planning in Orange County. OCTA's role as the regional planning agency is to plan for and evaluate multi-modal transportation alternatives to support regional planning activities. The Orange County Transportation Authority Model (OCTAM) is OCTA's regional model that is based on the traditional four-step sequential modeling methodology with "feedback loops" procedures to insure internal modeling consistency. The model incorporates multi-modal analytical capabilities to analyze the following modes of travel: local and express bus transit, urban rail, commuter rail, toll roads, carpools, truck traffic, as well as non-motorized transportation which includes pedestrian and bicycle trips. The model responds to changes in land use types, household characteristics, transportation infrastructure, and travel costs such as transit fares, parking costs, tolls, and auto operating costs.

5.2 PEAK HOUR FORECASTS

The future year 2040 volumes were derived based on existing peak hour count data and forecast link volumes obtained from the Orange County Transportation Analysis Model (OCTAM 5.0). OCTAM 5.0 (TransCad) is the accepted sub-regional model for forecasting travel demand for Orange County. Growth factors for each intersection approach and departure were interpolated from OCTAM 5.0 link plots for the baseline 2016 and 2045 scenarios. These growth factors were then applied to existing counts to forecast future turning movement volumes at each of the study intersections.

5.2.1 Turning Movement Development

It should be noted that Intersection #63 (Standard Avenue and 4th Street) does not currently exist, but is assumed to be constructed in the future year (2045) scenarios. Turning movement volumes for this intersection were developed through use of a post-processor. Because this intersection may affect local travel patterns, turning movement volumes for two adjacent intersections were also developed using this method. These intersections are #62 (Santiago Street and Santa Ana Boulevard) and #64 (Standard Avenue and 1st Street).

The process of converting link level traffic volumes to turning movement volumes is called "post processing." The fundamental theory behind the post-processor is the belief that with proper calibration, travel demand models provide good forecasts at the link level. Turning level forecasts are obtainable from the model, but the reliability of the forecast breaks down at this level of detail, and the abstraction of reality into numerical methods becomes apparent. The frictionless nature of left and right turns in the travel demand model allow them to occur as easily as through movements, which does not represent a realistic situation.

IBI Group has developed a spreadsheet-based postprocessor that uses existing turning movement volumes or split percentages along with forecast link-level data to determine future turn movement volumes at selected intersections. For intersections where existing data is not available (#63), assumed split percentages of 50% for the through movements, 25% for the right turn movements, and 25% for the left turn movements are used.

The postprocessor generates another solution to the possible combination of turning movements at a given intersection. There are numerous approaches to post processing. The IBI Group postprocessor utilizes a procedure documented in Chapter 8 of the National Cooperative Highway Research Program Report 255. It uses an iterative process to balance the intersection throughput volumes, which provides the best combination of reasonable turning movement volumes and traceability of results. Most importantly, the model link volumes (especially the approach intersection volumes) are maintained

when using this methodology. The "post processing" method can be summarized into the following steps:

1. If existing peak hour turning movement volumes are not available, calculate a base set of turning volumes from the known/assumed splits and the peak hour approach link volumes.
2. Calculate the inbound and outbound volumes for each leg of the intersection from the initial set of turning volumes.
3. Multiply the inbound volumes by the ratio of the forecast inbound volume to the calculated inbound volume for each leg. The calculated inbound volumes should now match the forecast inbound volumes.
4. Multiply the new volumes by the ratio of the forecast outbound volume to the calculated outbound volume for each leg. The calculated outbound volumes should now match the forecast outbound volumes for each leg, but the calculated inbound volumes may no longer be equal to the forecast inbound volumes.
5. Compare the calculated approach and departure volumes with the forecast approach and departure volumes.
6. If the deviation is within the tolerance level, the solution is obtained.
7. If the deviation is not within the tolerance level, repeat steps 3 and 4.
8. Repeat this process until the tolerance is met.

5.2.2 Roadway Segment Forecasts

Forecast roadway segment volumes were also derived based on existing average daily traffic (ADT) volumes and forecast ADT link volumes obtained from OCTAM 5.0. Growth factors for each study roadway segment were interpolated from OCTAM 5.0 link plots for the 2016 and 2045 baseline scenarios. The growth factors were then applied to existing ADT counts to forecast future roadway segment ADT.

5.2.3 Santa Ana Fixed Guideway (OC Streetcar)

As described in Section 2.0 of this report, the OC Streetcar is a proposed streetcar service that would travel primarily along Santa Ana Boulevard and the Pacific Electric Right-of-Way (PEROW) between the Santa Ana Regional Transportation Center (SARTC) and Garden Grove (4 miles long). The streetcar is proposed to travel along an exclusive guideway or path on rails that are embedded in the pavement. The streetcar would adhere to the same signal operations as on-street automobiles for most locations where Transit Signal Priority is not implemented. Santa Ana Boulevard is reclassified between Raitt Street and Shelton Street from a four lane undivided roadway to a two lane roadway (divided with a center left turn lane or raised median with left turn pockets. The project also proposes to reconfigure portions of Santa Ana Boulevard between Raitt Street and SARTC to accommodate a bike lane on the north side of the street throughout the alignment as well as 14-inch high platforms. The Fixed Guideway service is proposed to run every 10 to 15 minutes from approximately 6:00 AM to 11:00 PM. Within OCTAM, the Fixed Guideway is modeled as ‘bus transit,’ which would translate to six extra trips assigned during the peak hour in the direction of operations.

In 2016, the OCTA Board conditionally approved the following additional MPAH amendments:

- Fourth Street from French Street to Grand Avenue – Secondary to Divided Collector
- Santa Ana Boulevard from Flower Street to Ross – Major to Primary
- Santa Ana Boulevard from French Street to Santiago Street – Primary to Divided Collector
- Santa Ana Boulevard from Raitt Street to Flower Streer – Major to Divided Collector

6.0 Future Year (2045) No Project

This scenario is used as the point of comparison for the network alternatives and consists of the key elements presented in Section 2.6.

This scenario will serve as a base for comparison and establish impacts of the proposed With Project network. The Future Year 2045 No Project intersection geometries are the same as existing. The future year 2045 No Project volumes for the AM peak hour are shown in Table 6-1 and the PM peak hour volumes are shown in Table 6-2.

6.1 FUTURE YEAR (2045) NO PROJECT VEHICLE MILES TRAVELED (VMT)

Table 7-6 presents the VMT analysis results for the Future Year (2045) No Project scenario. VMT calculations are based on the scenario parameters and methodology as described in Sections 2.6 and 3.1, respectively.

Table 6-3 Future Year (2045) VMT Summary

	I – I VMT	I – X VMT	X – I VMT	Total VMT	Service Population	VMT/SP
City	692,704	5,737,798	5,733,292	12,163,794	534,238	22.8
County	52,994,916	29,554,879	29,660,308	112,210,103	4,221,830	26.6

SP = Service Population = Total Employees + Total Population. Reduction factor applied to Total Employees as noted in Section 3.1 and shown in Appendix F. I-I = Internal-Internal; I-X = Internal-External; X-I = External-Internal.

6.2 ROADWAY SEGMENT LEVEL OF SERVICE

A summary of the forecast roadway segment volumes and corresponding level of service results for the future year 2045 No Project condition is shown in Table 6-4. The following roadway segments are forecast to operate at a deficient LOS:

- Segment 8 – Harbor Boulevard from Segerstrom Avenue to MacArthur Boulevard
- Segment 23 – Main Street from 1st Street to Bishop Street
- Segment 39 – Bristol Street from Edinger Avenue to Warner Avenue
- Segment 43 – Flower Street from Warner Avenue to Segerstrom Avenue
- Segment 45 – Main Street from McFadden Avenue to Edinger Avenue
- Segment 52 – Edinger Avenue from Richie Street to Newport Avenue
- Segment 57 – Dyer Road from Grand Avenue to Pullman Street
- Segment 58 – McFadden Avenue from Bristol Street to Flower Street
- Segment 62 – Fourth Street from French Street to Standard Avenue
- Segment 63 – Broadway from 17th Street to Civic Center Drive
- Segment 72 – McFadden Avenue from Main Street to Standard Avenue
- Segment 73 – Penn Way/Santiago Street from I-5 SB Ramps to Santa Ana Boulevard
- Segment 74 – Raitt Street from Santa Ana Boulevard to 1st Street
- Segment 84 – Dyer Road from Pullman Street to Red Hill Avenue

Notes:
* Not available.
(1) ADT – Average Daily Traffic Volumes
(2) LOS – Level of Service
(3) #D – total number of lanes in both directions divided by raised or striped median; #U – total number of undivided lanes in both directions.
(4) Roadway capacities shown in Table 3-1.

6.3 INTERSECTION LEVEL OF SERVICE

A summary of the AM and PM peak hour level of service analysis results for the Future Year (2045) No Project condition is provided in Table 6-5. Intersections are considered unacceptable if the level of service (LOS) is "E" or "F". It should be noted that Caltrans and CMP intersection have a minimum LOS of C and E, respectively. The following intersections are forecast to have unacceptable level of service in the Future Year (2045) No Project condition:

- INT 2 – Euclid Street and McFadden Avenue (City of Santa Ana)
- INT 3 – Euclid Street and Edinger Avenue (City of Fountain Valley)
- INT 8 – Harbor Boulevard and Westminster Avenue (City of Garden Grove / City of Santa Ana)
- INT 12 – Harbor Boulevard and Warner Avenue (City of Santa Ana – CMP)
- INT 13 – Harbor Boulevard and Segerstrom Avenue (City of Santa Ana)
- INT 14 – Hyland Avenue and MacArthur Boulevard (City of Costa Mesa)
- INT 22 – Fairview Street and Edinger Avenue (City of Santa Ana)
- INT 29 – Raitt Street and Edinger Avenue (City of Santa Ana)
- INT 32 – Bristol Street and Civic Center Drive (City of Santa Ana)
- INT 35 – Bristol Street and McFadden Avenue (City of Santa Ana)
- INT 36 – Bristol Street and Warner Avenue (City of Santa Ana)
- INT 44 – Flower Street and 1st Street (City of Santa Ana)
- INT 45 – Flower Street and McFadden Avenue (City of Santa Ana)
- INT 51 – Main Street and Civic Center Drive (City of Santa Ana)
- INT 52 – Main Street and Santa Ana Boulevard (City of Santa Ana)
- INT 55 – Main Street and McFadden Avenue (City of Santa Ana)
- INT 61 – Santiago Street and Civic Center Drive (City of Santa Ana)
- INT 62 – Santiago Street and Santa Ana Boulevard (City of Santa Ana)

- INT 63 – Standard Avenue and 4th Street (City of Santa Ana)
- INT 64 – Standard Avenue and 1st Street (City of Santa Ana)
- INT 66 – Halladay Street and Warner Avenue (City of Santa Ana)
- INT 67 – Halladay Street and Dyer Road (City of Santa Ana)
- INT 82 – Grand Avenue and Edinger Avenue (City of Santa Ana)
- INT 91 – Tustin Street and Fairhaven Avenue (City of Orange)
- INT 92 – Tustin Avenue and Santa Clara Avenue (City of Santa Ana)
- INT 93 – Tustin Avenue and 17th Street (City of Santa Ana)
- INT 96 – SR-55 NB Ramps / Del Amo Avenue and Newport Avenue (Caltrans)
- INT 100 – Red Hill Avenue and Alton Parkway (City of Irvine)
- INT 105 – Von Karman Avenue and Barranca Parkway (City of Irvine)

7.0 Future Year (2045) With Project

This network alternative includes all the improvements listed in the No Project alternative, in addition to the improvements presented in Section 2.7.

Separate OCTAM 5.0 forecasts were produced for the With Project condition in order to understand traffic changes resulting from the proposed roadway improvements listed above. The Future Year (2045) With Project – AM and PM peak hour intersection turning movement volumes are shown in Tables 7-1 and 7-2.

Table 7-1 Future Year (2045) With Project Volumes – AM Peak Hour
