Wireless mobile column lifts with **ebright Smart Control System**

TOUCH SCREEN

WIRELESS

... or cabled, it's up to you

If you predominantly work in a fixed location the cabled mobile column lifts could be the best solution for you. This setup offers the possibility to connect up to 32 columns in a single lift set. All interconnection cables are equipped with heavy-duty plugs at both ends.

Both the wireless and the cabled column lifts are equipped with a control panel on each individual column. Columns can be operated individually, in pairs or simultaneously as a complete set with the touch of a button. Each column can therefore be used at any given location.

Full color touch screen control

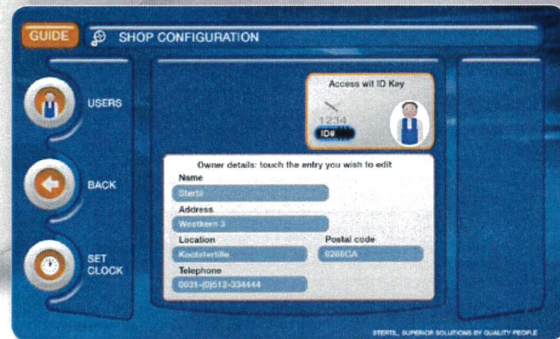

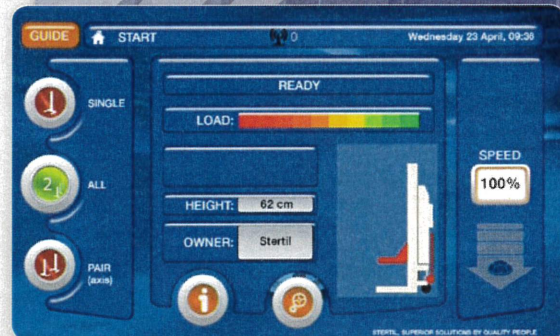

The revolutionary **ebright Smart Control System** combines intuitive ease of use with maximum visual information about the lifting process. The main advantages:

- 7" full color touch screen, works even when wearing gloves
- User-configured options, such as choice of language, safety warnings and scheduled maintenance notifications
- All relevant information available at a glance
- Customizable ID-Key to prevent unauthorized operation
- Wireless Mesh network for optimal connectivity

○ High resolution 7" touch screen

○ Intuitive controls

ebright Features

- High resolution 7" touch screen
- Owner/User configurable system with user ID key
 - Individual user settings for setting language and units of measure
 - Protection against unauthorized use, thanks to personalized ID key
- Maintenance notifications
- Visual display of maximum programmable lifting height
- Warning and failure information
- Operation manual available on-screen
- Tracking of specific operations and information codes
- Intuitive controls with actual data about the lift:
 - Indication for Single, All or Pair operation mode
 - Information about how many columns are in the set (up to 32 columns)
 - Actual lifting height displayed
 - Lowering speed can be manually adjusted on the touch screen
 - Battery status information
 - Customizable ID-Key to prevent unauthorized operation
- Wireless Mesh network with continuous active channel search offering optimal connectivity

Well thought out in all aspects

UNIQUE
SYNCHRONIZATION
SYSTEM

Easy to move

Stertil-Koni mobile column lifts are indeed mobile, thanks to the synthetic roller wheels and hydraulic pallet jack mechanism with patented overload protection.

Safe working space

As an extra safety feature, we have also designed ample working space between the column and the vehicle. This ensures that the vehicle will not come into contact with the column in the event of sagging vehicle suspension.

Unique synchronization

The synchronization system is activated at a height difference of just 9/16". This ensures a safe and smooth lifting and lowering cycle, even in cases where the distribution of the vehicle weight is extremely uneven.

Lifetime guarantee

The innovative synthetic runner wheels within the column come with a lifetime parts guarantee.

Everything under control
