Good Afternoon,

I included in our submittals a couple of locations on this little site near the historic filling station building for "sculpture". I had these commissioned and thought that you might enjoy seeing them. They were built by a very good friend and fellow Orange High graduate who can do wonders with metal.

This corner is in the best position to signify the gateway to Old Towne and the Historic District from the north. These sculptures should add to the unique little historic filling station structure as part of the gateway statement.
