Portfolio Effective Rate of Return: interest earnings (not receipts) for period divided by average daily balance for period, annualized (multiplied by quotient of 365 divided by days in period).

Portfolio Yield to Maturity: weighted-average yield to maturity (or call date, if applicable) for entire portfolio;

in the case of coupon investments, includes an adjustment to the face rate for any premium paid or discount received.

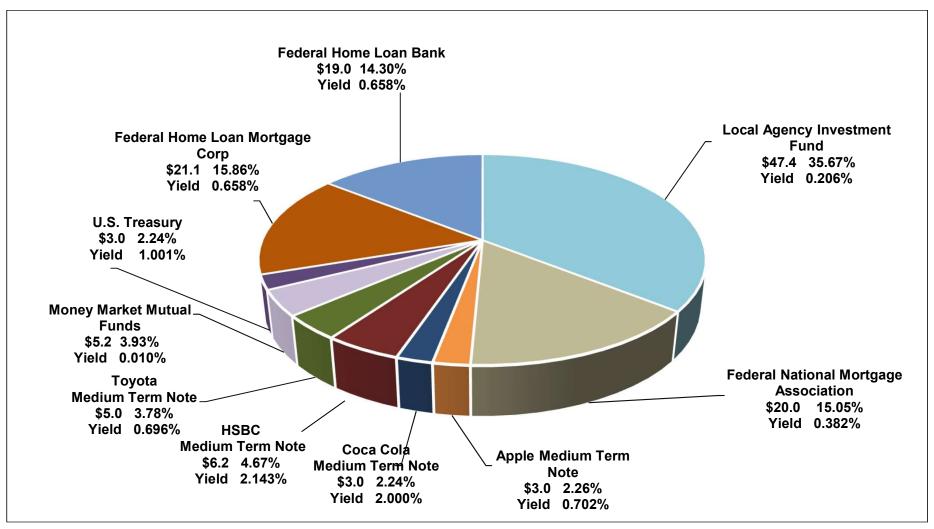

Source of Market Value: ICE Data Pricing and Reference Data provides market value on all instruments.

Total Rate of Return: growth or decline in the value of the portfolio, including both changes in the market value and income, as a proportion of the starting value,

adjusted on a time-weighted basis (per Modified Dietz Method) for cash flows into or out of the portfolio during the period.

The Modified Dietz Method assumes a constant rate of return on the portfolio during the period and is not based on daily valuations.
